Introducing the ARW51 wireless speaker conversion system. Now you can turn any 5.1 speaker system into a CD-quality wireless system, with the ARW51 wireless speaker conversion system from Acoustic Research. The ARW51's true point-to-point technology transmits full bandwidth 16-bit audio and eliminates audible noise and distortion—while its breakthrough code-hopping circuitry avoids potential interference from cordless phones, wireless networks, microwaves and more. Set-up is quick and simple. So lose the wires, and keep every drop of that high-fidelity sound. Get the details at www.acoustic-research.com. Or call 1-800-345-7730.
