

User's Manual

AMX-120

12-CHANNEL MIXING CONSOLE

www.altoproaudio.com
Version 1.4 September 2005

— English —

SAFETY RELATED SYMBOLS

This symbol, wherever used, alerts you to the presence of un-insulated and dangerous voltages within the product enclosure. These are voltages that may be sufficient to constitute the risk of electric shock or death.

This symbol, wherever used, alerts you to important operating and maintenance instructions. Please read.

Protective Ground Terminal

AC mains (Alternating Current)

Hazardous Live Terminal

ON: Denotes the product is turned on.

OFF: Denotes the product is turned off.

WARNING

Describes precautions that should be observed to prevent the possibility of death or injury to the user.

CAUTION

Describes precautions that should be observed to prevent damage to the product.

Disposing of this product should not be placed in municipal waste and should be placed in a separate collection.

WARNING

• Power Supply

Ensure that the mains source voltage (AC outlet) matches the voltage rating of the product. Failure to do so could result in damage to the product and possibly the user.

Unplug the product before electrical storms occur and when unused for long periods of time to reduce the risk of electric shock or fire.

• External Connection

Always use proper ready-made insulated mains cabling (power cord). Failure to do so could result in shock/death or fire. If in doubt, seek advice from a registered electrician.

• Do Not Remove Any Covers

Within the product are areas where high voltages may present. To reduce the risk of electric shock do not remove any covers unless the AC mains power cord is removed.

Covers should be removed by qualified service personnel only.

No user serviceable parts inside.

• Fuse

To prevent fire and damage to the product, use only the recommended fuse type as indicated in this manual. Do not short-circuit the fuse holder. Before replacing the fuse, make sure that the product is OFF and disconnected from the AC outlet.

• Protective Ground

Before turning the product ON, make sure that it is connected to Ground. This is to prevent the risk of electric shock.

Never cut internal or external Ground wires. Likewise, never remove Ground wiring from the Protective Ground Terminal.

• Operating Conditions

Always install in accordance with the manufacturer's instructions.

To avoid the risk of electric shock and damage, do not subject this product to any liquid/rain or moisture. Do not use this product when in close proximity to water.

Do not install this product near any direct heat source.

Do not block areas of ventilation. Failure to do so could result in fire.

Keep product away from naked flames.

IMPORTANT SAFETY INSTRUCTIONS

Read these instructions

Follow all instructions

Keep these instructions. Do not discard.

Heed all warnings.

Only use attachments/accessories specified by the manufacturer.

• Power Cord and Plug

Do not tamper with the power cord or plug. These are designed for your safety.

Do not remove Ground connections!

If the plug does not fit your AC outlet seek advice from a qualified electrician.

Protect the power cord and plug from any physical stress to avoid risk of electric shock.

Do not place heavy objects on the power cord. This could cause electric shock or fire.

• Cleaning

When required, either blow off dust from the product or use a dry cloth.

Do not use any solvents such as Benzol or Alcohol. For safety, keep product clean and free from dust.

• Servicing

Refer all servicing to qualified service personnel only.

Do not perform any servicing other than those instructions contained within the User's Manual.

PREFACE

Dear Customer:

Thank you for choosing the ▲LTO AMX-120 12-Channel Mixing Console, which is the result of our ▲LTO AUDIO TEAM's endeavours.

For the ▲LTO AUDIO TEAM, music and audio are more than a profession, it is a passion and an obsession!

We have, in fact, been designing professional audio products for a number of years in cooperation with many of the world's major brands.

The ▲LTO line represents unparalleled analogue and digital products made by musicians, for musicians. With our design centres in Italy, the Netherlands, and the United Kingdom we provide you with world-class designs, while our software development teams continue to develop an impressive range of audio specific algorithms.

By purchasing our ▲LTO products you become the most important member of our ▲LTO AUDIO TEAM. We would like to share with you our passion for what we design and invite you to make suggestions, which will aid us in developing future products for you. We guarantee you our commitment for quality, continual research and development, and of course the best prices.

The ▲LTO AMX-120 mixing console is equipped with 2 mono input channels (these are provided with ultra low noise microphone pre-amplifiers and phantom power at +48 Volt), 8 stereo input channels and 2 TK IN. So, in total you have 12 input channels on your AMX-120. It is specifically designed for professional application.

Seeing is believing, let's meet the ▲LTO AMX-120.

We would like to thank all the people who made the ▲LTO AMX-120 12-Channel Mixing Console possible, especially to our designers and ▲LTO staff. It is their passion for music and professional audio that has made it possible for us to offer you, our most important team member, our continued support.

Thank you very much
▲LTO AUDIO TEAM

1. INTRODUCTION

Thank you very much for expressing your confidence in ▲LTO products by purchasing ▲LTO AMX-120 mixing console. The AMX-120 is a professional compact mixer. You will get the smooth, accurate more natural and open sound from this apparatus, and it is really ideal for small gigs, recording and fixed PA installations.

The AMX-120 mixing console is packed with some key features that can not be found in other consoles of its size: 2 mono input channels (these are provided with ultra low noise microphone pre-amplifiers and phantom power at +48 Volt), each of which is provided with a 3 bands graphic equalizer for HI, MID and LOW controls; 8 stereo input channels; highly accurate 4-segment bar graph meters and 2-Track inputs assign-able to main mix, control room / headphone outputs etc..

Your AMX-120 is very easy to operate but we advise you to go through each section of this manual carefully. In this way you will get the best out of your AMX-120.

2. FEATURES

The AMX-120 12-Channel Mixing Console is designed for professional application. It will provide the following features:

- 2 MIC input channels with gold plated XLRs and balanced LINE input
- 8 stereo input channels with balanced TRS jacks
- Ultra-low noise discrete MIC pre-amps with +48V phantom power
- Extremely high headroom offering more dynamic range
- Switch-able low cut filter on each mono channel
- Warm, natural 3-band EQ on each mono channel
- Peak LED on each mono channel
- +4dB / -10dB gain select switch on stereo channels
- AUX send switch-able to PRE/POST fader
- Control room and headphone outputs
- 2-Track inputs assignable to main mix, control room / headphone outputs
- Highly accurate 4-segment bar graph meters

3. READY TO START?

- 3.1 Please check the AC voltage available in your country before connecting your AMX-120 to the AC socket.
- 3.2 Be sure that the main power switch is turned off before connecting the mixer to the AC socket. Also, you should make sure that all Input and output controls are turned down. This will avoid damages to your speakers and avoid excessive noise.
- 3.3 Before turning on the AMX-120 you shall connect it to a power amplifier and turn-on the mixer BEFORE the power amplifier. Once you have finished your working session you shall turn the mixer off AFTER the power amplifier.
- 3.4 Before disconnecting the AMX-120 always turn-off the power switch.
- 3.5 Do not use solvents to clean your AMX-120. A dry and clean cloth will be OK.

4. CONTROL ELEMENTS

4.1 MONO MIC/LINE Channels

1

These are channel 1 through channel 2. You can connect balanced, low impedance microphones to the XLR socket. On the 1/4" jack you can connect either a microphone or a line level instrument. You shall never connect an unbalanced microphone to the XLR socket if you do not want to damage both the microphone and the mixer.

48 Volt phantom power

2

It is available only to the XLR Mic sockets. Never plug in a microphone when phantom power is already on. Before turning phantom power on, make sure that all faders are all the way down. In this way you will protect your stage monitors and main loudspeakers.

- INPUT LEVEL Setting

3

This control is provided with 2 different indication rings: One is for the microphone and the other for the line levels. When you use a microphone you shall read the OUTSIDE ring (0~44 dB), when you use a line level instrument you shall read the INSIDE ring (+15~-30 dB). For optimum operation you shall set this control in a way that the peak LED will blink also occasionally in order to avoid distortion on the input channel.

- LOW CUT Button

4

By pressing this button you will activate a 75 Hz low frequency filter with a slope of 18 dB per octave. You can use this facility to reduce the hum noise infected by the mains power supply, or the stage rumble while using a microphone.

- 3 BANDS EQUALIZER

A 3-band equalizer is provided for mono input channels with a wide range of frequency adjustment.

HI

5

This is the Treble control. You can use it to get rid of high frequency noises or to boost the sound of cymbals or the high harmonics of the human voice. The gain range goes from -15dB to +15dB with a center frequency of 12 kHz.

MID

6

This is the Midrange control. It can affect most fundamental frequencies of all musical instruments and human voice. An attentive use of this control will give you any very wide panorama of sound effects. The gain range goes from -12dB to +12dB and the center frequency is 2.5 kHz.

2

LOW 7

This is the Bass control. Boost male voice or kickdrum and bass guitar. Your system will sound much bigger than what it is. The gain range goes from -15dB to +15dB and the center frequency is 80 Hz.

- AUX SEND Control 8

This control is used to adjust the level of the signal sent to AUX buses, and their adjustable range goes from -∞ to +15dB.

The AUX send is configured as POST-FADER, therefore, most of the times, it will be used for effects and processors input, however, you can also changed it to PRE-FADER configuration according to the specific application. (For more detail, please see chapter 6.)

- PAN Control 9

Abbreviation of PANORAMA control for mono channels.

You can adjust the stereo image of the signal via this control. Keep this control in center position and your signal will be positioned in the middle of stage. Turn this control fully counterclockwise and the signal will be present only on the left speaker and vice-versa.

- PEAK LED 10

Inside your AMX-120 the audio signal is monitored in several different stages and then sent to the PEAK LED. When this LED blinks, it warns you that you are reaching signal saturation and possible distortion. The PEAK LED will blink with a level that is 6dB before actual clipping.

- LEVEL Control 11

This control will adjust the overall level of this channel and set the amount of signal sent to the main output.

4.2 STEREO Inputs 12

These are Channel 3 through 10. They are organised in stereo pair and provided with 1/4" TRS sockets.

If you connect only the left jack, the input will operate in mono mode.

- BAL Control 13

Abbreviation of BALANCE control for stereo channels, this knob controls the balance between left and right input sources.

- . +4dBu/-10dBV Switch 14

Your AMX-120 provides the gain select switch, which is used to adjust the sensitivity of line input on stereo channels. Line level are considered to be between 1V and 2V RMS (+2dBu ~ +8dBu) in professional equipment, peak levels may extend to over 10V RMS (+22dBu). The accepted standard for sound reinforcement equipment is +4dBu.

Unfortunately, many low budget components fall short of these levels, so we need to "baby" their level, and find another source for the signal strength necessary to drive the power amplifiers, in such situations, the -10dBV operating level is compromised.

NOTE: The remaining controls of stereo channel are the same as in the mono channel section.

4.3 MASTER Section

- . MAIN MIX LEVEL Dial 15

This control sets the amount of signal sent either to the main out socket or to the tape output.

- . OUTPUT LEVEL LED Display 16

This stereo 4 segments LED meter will indicate the level of the overall output signal.

- . POWER LED 17

This LED indicates when the power is on in your AMX-120.

- . PHANTOM LED 18

This LED indicates when the phantom power is switched on.

- . 2TK TO CTRL ROOM Switch 19

Engaging this button to route the 2 TRACK IN signal into the control room output.

- . 2TK TO MIX Switch 20

Engaging this button to route the 2 TRACK IN signal into the main output.

- . 2TK IN Control 21

This control is used to adjust the level of 2TK IN signal, which can be varied from $-\infty$ to MAX.

- . AUX SENDS Control 22

This control is used to determine the master AUX SEND levels, which can be varied from $-\infty$ to +15dB.

- PHONES/CTRL ROOM Control 23

This control sets the amount of signal sent to the control room and headphone.

4.4 CTRL ROOM OUTPUT Connectors 24

These 1/4" sockets are used to send the control room signal to the studio monitor speakers or a second set of PA.

4.5 2TK IN/OUT Connectors 25

- TAPE IN

Use the tape input if you wish to listen to your mix from a taper recorder or DAT. You can assign the signal coming from the taper recorder either to a pair of studio monitor using the control room assignment on the front panel or you can also send the signal directly to the main mix.

- TAPE OUT

These RCA jacks will route the main mix into a tape recorder.

4.6 AUX SENDS Connector 26

These 1/4" sockets are used to send out the signal from the AUX bus to external devices such effects.

4.7 PHONES 27

This socket will send out the mix signal to a pair of headphones.

4.8 MAIN MIX OUTPUT Connectors 28

The stereo output is supplied with 1/4" TRS sockets, which is used to send the audio signal to an amplifier.

Through the main mix level control, you can adjust the output level from $-\infty$ to +15dB.

4.9 REAR PANEL Description

- POWER ON/OFF Switch 29

This switch is used to turn the main power ON and OFF.

- PHANTOM ON/OFF Switch 2

This switch will apply +48 Volt Phantom Power only to the 2 XLR microphone inputs. Never connect microphones when the phantom power is on already.

- AC INPUT Connector 30

This connector is used to connect the supplied AC adapter.

5. INSTALLATION AND CONNECTION

Ok, you have got to this point you are now in the position to successfully operate your AMX-120. However, we advise you to read carefully the following section to be the real master of your own mix. Not paying attention enough to the Input signal level, to the routing of the signal and the assignment of the signal will result in unwanted distortion, a corrupted signal or no sound at all. So you should follow this procedure for every single channel:

- Turn down all Input and output gain controls.
- Connect phantom powered microphones before switching on the +48Volt phantom power switch.
- If you have a power amplifier connected to your AMX-120 set the level of the amplifier at no more than 75%.
- Now, set the CONTROL ROOM/PHONES level at no more than 50%. In this way you will be able to hear later what you are doing connecting a pair of headphones or a pair of powered studio monitor speakers.
- Position HI, MID and LOW EQ controls on the middle.
- Position panoramic (PAN) control on the center.
- With a headphone or studio monitor speakers connected apply a line level input signal so that the PEAK LED does not light up.
- At this point increase the input gain so that the PEAK LED will blink occasionally. In this way you will maintain good headroom and ideal dynamic range.
- Now connect a microphone and ask the singer to sing loud into the microphone. Turn slowly the gain control clockwise and have the PEAK LED blink only occasionally.
- Now repeat the same sequence for all input channels. The main LED meter could move up into the red section. In this case you can adjust the overall output level through the MAIN MIX control.

5.1 Audio Connection

Both XLR and 1/4" TRS connectors are available on the unit. In this way you can interface the unit in several different ways without experiencing any noise or signal loss. You can use the unit with single instruments using The mixer's main insert or on "in-line" between a mixing console's output and a power amplifier.

- Wiring Configuration

Either the 1/4" TRS phone jack or XLR connector can be wired in balanced and unbalanced modes, which will be determined by the actual application status, please wire your system as the following wiring examples:

- For 1/4" Phone jack

TS Type Unbalanced

TRS Type Balanced

TRS Type Unbalanced

- For XLR connector

XLR Type Unbalanced

XLR Type Balanced

- In-line Connection

For these applications the unit provides 1/4" TRS and XLR connectors to easily interface with most professional audio devices. Follow the configuration examples below for your particular connection.

- Balanced

- Unbalanced

6. FOR THE EXPERTS WHO WANT TO KNOW MORE

As we have told you previously in this manual, the AUX SEND control both on mono and on stereo channels is factory wired as POST-FADER. If you have some skill in electronic components soldering you can modify this setting and have all your AUX SENDS configured as PRE-FADER.

Modification on mono and stereo channels

8. TECHNICAL SPECIFICATION

| Mono input channels | | |
|-------------------------------------|-----------------------------|--|
| | Microphone input | electronically balanced, discrete input configuration |
| | Frequency response | 10Hz to 55kHz, +/- 3dB |
| | Distortion (THD & N) | 0.005% at +4dBu, 1kHz |
| | Gain range | 0dB to 44dB (MIC) |
| | SNR (Signal to Noise Ratio) | 115dB |
| | Line input | electronically balanced |
| | Frequency response | 10Hz to 55kHz, +/- 3dB |
| | Distortion (THD & N) | 0.005% at +4dBu, 1kHz |
| | Sensitivity range | +15dBu to - 30dBu |
| Stereo input channels | | |
| | Line input | Balanced |
| | Frequency response | 10Hz to 55kHz, +/- 3dB |
| | Distortion (THD & N) | 0.005% at +4dBu, 1kHz |
| Impedances | | |
| | Microphone input | 1.4kOhm |
| | All other inputs | 10kOhm or greater |
| | Tape out | 1kOhm |
| | All other output | 120Ohm |
| Equalization | | |
| | Hi shelving | +/- 15dB @12kHz |
| | Mid bell | +/- 12dB @2.5kHz |
| | Low shelving | +/- 15dB @80Hz |
| | Low Cut filter | 75Hz, 18dB/oct. |
| Main Mix Section | | |
| | Noise (Bus noise) | Fader 0 dB, channels muted: - 100dBr (ref.:+4dBu) |
| | | Fader 0dB, all input channels assigned and set to UNITY gain: - 90dBr (ref.:+4dBu) |
| | Max output | +22dBu unbalanced, 1/4" jacks |
| | AUX Sends max out | +22dBu |
| Power supply (AC/AC Adaptor) | | |
| | Main voltage | USA/Canada 100 - 120V~, 60Hz |
| | | Europe 210 - 240V~, 50Hz |
| | | U.K./Australia 240V~, 50Hz |
| | Power Consumption | 11 watts |
| Physical | | |
| | Dimension (WxDxH) | 208mmx275.5mmx35/43mm (6.06"x7.81"x1.01"/1.30") |
| | Net weight | 1.65Kg (3.65lb) |
| | Shipping weight | 2.3Kg (5.11lb) |

9. WARRANTY

1. WARRANTY REGISTRATION CARD

To obtain Warranty Service, the buyer should first fill out and return the enclosed Warranty Registration Card within 10 days of the Purchase Date.

All the information presented in this Warranty Registration Card gives the manufacturer a better understanding of the sales status, so as to purport a more effective and efficient after-sales warranty service.

Please fill out all the information carefully and genuinely, miswriting or absence of this card will void your warranty service.

2. RETURN NOTICE

2.1 In case of return for any warranty service, please make sure that the product is well packed in its original shipping carton, and it can protect your unit from any other extra damage.

2.2 Please provide a copy of your sales receipt or other proof of purchase with the returned machine, and give detail information about your return address and contact telephone number.

2.3 A brief description of the defect will be appreciated.

2.4 Please prepay all the costs involved in the return shipping, handling and insurance.

3. TERMS AND CONDITIONS

3.1 ▲LTO warrants that this product will be free from any defects in materials and/or workmanship for a period of 1 year from the purchase date if you have completed the Warranty Registration Card in time.

3.2 The warranty service is only available to the original consumer, who purchased this product directly from the retail dealer, and it can not be transferred.

3.3 During the warranty service, ▲LTO may repair or replace this product at its own option at no charge to you for parts or for labor in accordance with the right side of this limited warranty.

3.4 This warranty does not apply to the damages to this product that occurred as the following conditions:

- Instead of operating in accordance with the user's manual thoroughly, any abuse or misuse of this product.
- Normal tear and wear.
- The product has been altered or modified in any way.
- Damage which may have been caused either directly or indirectly by another product / force / etc.
- Abnormal service or repairing by anyone other than the qualified personnel or technician.

And in such cases, all the expenses will be charged to the buyer.

3.5 In no event shall ▲LTO be liable for any incidental or consequential damages. Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above exclusion or limitation may not apply to you.

3.6 This warranty gives you the specific rights, and these rights are compatible with the state laws, you may also have other statutory rights that may vary from state to state.
