Installation instructions .... 171
Important information

Before you use your car audio system for the first time, please take the time to read the instruction manual carefully and make yourself familiar with the audio equipment. Keep this manual handy in your car for future reference.

Traffic safety

⚠️ Traffic safety is always the top priority. Do not attempt to operate your car audio system unless the traffic conditions permit. Familiarize yourself with the equipment before you start driving.
Always make sure that you are still able to hear any warning signals coming from outside the vehicle, such as police or fire engine sirens, at all times.
As a result, please always select a moderate volume for playing your car audio system while you are driving.

Installation

If you would like to install your new car stereo yourself or add other audio components to the existing ones, then please read the instructions on installation and connection at the end of this manual carefully.

Accessories

Use only Blaupunkt-approved accessories.

Remote control unit

The optionally available RC 08 infrared remote control unit allows you to conveniently operate the most important system functions from the steering wheel.

Amplifiers

All Blaupunkt amplifiers can be used.

CD changers

The following CD changers can be connected directly: CDC A 06, CDC A 08, CDC A 072 and IDC A 09.
The CDC A 05 and CDC A 071 can be connected with an adapter cable (Blaupunkt no. 7 607 889 093).

 Guarantee

The scope of the guarantee is determined by the laws in the country where the unit is purchased.
Regardless of the legal guarantee regulations, Blaupunkt affords a 12-month guarantee.
If you have any questions about the guarantee, please contact your authorised Blaupunkt dealer. Your cash register receipt is a valid guarantee coupon.

International telephone information

Have you got any questions on the operation of this equipment or do you require more information?
Give us a call!
You will find the international telephone and fax numbers on the last page of this manual.
Removable front panel

Theft protection system
To prevent your car audio system from being stolen, it has been equipped with a removable front panel (flip release panel). Without the front panel, the car audio system is useless to thieves. Protect your car audio system against theft and take the operating panel with you each time you leave the vehicle. Never leave the release panel in the car, even if it is well hidden. The panel has been designed so that it is easy to remove.

Notes:
- Do not drop the release panel.
- Do not expose the release panel to direct sunlight or other heat sources.
- Store the release panel in the case supplied.

Removing the operating panel

Press [1].

The release panel will unlock.

First pull the operating panel forward and then slide it to the left to remove it.

Replacing the operating panel

Slide the operating panel into the guides from left to right.

Press the left-hand side of the panel onto the car audio system until it locks into place.

Note:
- While replacing the panel, be careful not to press on the display.

If the car audio system was on when you removed the panel, it will automatically switch back on using the same settings when you replace it (radio, CD player or CD changer).
Switching the car audio system on/off

The car audio system can be switched on/off in a number of ways.

Switching the car audio system on/off with the ignition

If the car audio system has been connected to your vehicle ignition, it is possible to switch it on and off with the ignition.

You can also switch the car audio system on when the ignition is switched off.

Press down and hold \( 3 \) until the car audio system switches on.

Note:
To prevent the car battery from running down, the radio will switch off again automatically after one hour.

Switching the car audio system on/off with the removable front panel

Remove the release panel.

The car audio system will switch off.

Replace the release panel.

The car audio system will switch on again. The last settings used (radio, CD player or CD changer) will be activated.

Switching the car audio system on/off by pressing \( 3 \)

Press \( 3 \) to switch the car audio system on.

Press \( 3 \) for longer than 2 seconds to switch the car audio system off again.

The system will then switch off.

Switching the car audio system on by inserting a CD

If the system is switched off and there is no CD in the CD player,

Press \( \triangleleft \ 9 \).

The flip release panel will open.

Insert the CD into the CD player with the label facing upwards until you feel resistance. Do not use force.

The CD will be pulled automatically into the CD player.

Do not attempt to assist or prevent this process.

Press the operating panel closed gently until you feel it click into place.

The audio system will switch on. CD playback will begin.

Switching the car audio system on/off
VOLUME CONTROL

Volume control
The car audio system volume can be adjusted to levels from 0 (off) to 66 (maximum).
➮ To increase the volume, turn the volume control knob \( \odot \) to the right.
➮ To decrease the volume, turn the volume control knob \( \odot \) to the left.

Adjusting the power-on volume
It is possible to adjust the volume at which the car audio system switches on.
➮ Press \( \text{MENU} \odot \).
➮ Press \( > \odot \) repeatedly until “ON VOLUME” appears in the display.
➮ Press \( < > \odot \) to adjust the volume.

If you adjust this setting to “0”, the car audio system will switch on at the volume used before it was switched off.

⚠️ Warning of serious injury
If the power-on volume is set to the maximum level, it may be extremely loud when the car audio system is switched on.
If the power-on volume is set to 0 and the car audio system was played at maximum volume before it was switched off, it may be extremely loud when the car audio system is switched back on. This could result in serious injury to your ears!
➮ Once you have selected the desired settings, press \( \text{MENU} \odot \) or \( \text{OK} \odot \).

Mute
You can reduce the volume of the car audio system immediately (mute).
➮ Press \( \odot \) briefly.
“MUTE” will appear in the display.

Selecting the mute level
It is possible to select the mute level.
➮ Press \( \text{MENU} \odot \).
➮ Press \( \odot \) repeatedly until “MUTE LEVEL” appears in the display.
➮ Press \( < > \odot \) to select the mute level.
➮ Once you have made your selection, press \( \text{MENU} \odot \) or \( \text{OK} \odot \).

Mute during telephone operation
If your car audio system has been equipped with a mobile telephone, it will automatically switch to mute when you use the phone. This will not work unless the mobile phone is connected to the car audio system as described in the installation instructions.
If a traffic announcement is received while the phone is in use and traffic information priority has been activated, you will hear the traffic announcement. For more information, refer to the section on “Traffic information reception”. The car audio system will be muted to the mute level selected.
Adjusting the volume of the beep
For a number of functions you will hear a beep if you press a key for longer than 2 seconds, e.g. if you want to store a radio station on a station preset. You can adjust the volume level of this beep.

➤ Press MENU 8.
➤ Press V 10 repeatedly until “BEEP” appears in the display.
➤ Press << > > 10 to adjust the volume. “0” means the beep volume is off, “9” means the beep volume is adjusted to the maximum volume.
➤ Once you have adjusted the settings, press MENU MENU 8 or OK 11.

Radio operation
This car audio system has been equipped with an RDS radio receiver. Many FM radio stations now transmit the RDS signal, which contains such other information as the station name and the program type (PTY) along with the regular station programming. As soon as the car radio receiver detects the station name, it will appear in the display. It is also possible to display the program type. For more information, refer to the section on “Program Type (PTY)”.

Switching to the radio mode
If you are currently using the CD player or CD changer,
➤ press CD•C 16 repeatedly until “RADIO” appears in the display.

Special RDS functions (AF, REG)
The special RDS functions for AF (Alternate Frequency) and REG (REGIONal) improve the performance of your car radio.

● AF. If this RDS function is activated, the car radio continuously searches in the background for the frequency with the best reception for the station you have tuned into.

● REG. A number of radio stations broadcast different regional programming at different times of the day. Use REG to prevent your car radio from tuning into alternate frequencies which might have different programming.
RADIO OPERATION

Note:
It is necessary to activate/deactivate REG in the menu.

Switching REG on/off
☞ Press MENU ⑧.
☞ Press ▼ ⑩ repeatedly until “REG” appears in the display. “OFF” or “ON” will appear next to “REG”.
☞ Press ◀ or ▶ ⑩ to switch REG off or on.
☞ Press MENU ⑧ or OK ⑪.

Switching RDS functions on/off
☞ To take advantage of the RDS functions for AF and REG, press RDS ④.

When the RDS functions have been activated, “RDS” will light up as a symbol in the display. When you activate the functions, “REG ON” or “REG OFF” will appear briefly in the display.

Selecting wavebands/memory banks
Using this car audio system, you can tune into radio stations on the FM, MW and LW (AM) wavebands. There are three memory banks for the FM waveband and one memory bank each for MW and LW (the Sylt CD50 does not include MW/LW radio).

You can store six stations in each of these memory banks.
☞ To switch between the different FM memory banks or wavebands, press BND / TS ⑤.

Tuning into radio stations
You can tune into radio stations in a number of different ways.

Automatic seek tuning
☞ Press ▼ or ▲ ⑩.

The radio will tune into the next available station within reception range.

Manual station selection
You can also tune into radio stations manually.
☞ Press ◀ or ▶ ⑩.

Note:
You cannot use manual tuning unless the RDS functions are deactivated.

Paging through the broadcasting network (for FM only)
If a radio broadcasting network has more than one station, you can page through the “station network”.
☞ Press ◀ or ▶ ⑩ to tune into the next station in the network.

Note:
To take advantage of this function, you must have activated the RDS functions.

It is only possible to tune into those stations which have been received once before already. To do this, use the SCAN or TravelStore function.
Adjusting seek tuning sensitivity
It is also possible to adjust the sensitivity of the seek tuning function to tune the radio into stations with strong reception signals only, or to those with weaker reception signals as well.

➮ Press MENU 8.
➮ Press V (10) repeatedly until “SENS” appears in the display.
➮ Press >> (10).
The currently selected setting will appear in the display. “SENS HI6” indicates the highest level of sensitivity, “SENS LO1” the lowest. If you select “SENS LO”, “lo” will light up in the display.
➮ Press << (10) to adjust the desired sensitivity.
➮ Once you have made your selection, press MENU 8 or OK 11.

Storing radio stations
Storing radio stations manually
➮ Select the desired memory bank FM1, FM2, FMT or either MW or LW (the Sylt CD50 does not include MW/LW radio).
➮ Tune the radio into the desired station.
➮ Press and hold down one of the station preset buttons 1 to 6 (14) on which you want to store the radio station for longer than two seconds.

Storing radio stations automatically (TravelStore)
You can automatically store the six radio stations with the strongest reception in your current reception area (for FM only). These stations will be stored in the FMT memory bank.

Note:
Any stations stored previously in the memory bank will be deleted.
➮ Press and hold down BND / TS 5 for longer than two seconds.
The storing process will begin. “TRAV-EL-STORE” will appear in the display. After the stations have been stored, the radio will automatically begin to play the station stored on preset button 1 for the FMT memory bank.

Recalling stored radio stations
➮ Select the desired station memory bank.
➮ Press the station button 1 to 6 (14) on which you have stored the desired radio station.

Scanning the radio stations within reception range (SCAN)
You can scan all of the radio stations currently within your reception range. The scan time can be set in the menu to play from five to 30 seconds.

Starting SCAN
➮ Press and hold down OK 11 for longer than two seconds.
SCAN will begin. “SCAN” will appear briefly in the display, followed by the
flashing station name or frequency of
the radio station currently being
scanned.

**Stopping the SCAN function,**
**continuing to listen to the radio**
**station scanned**
☞ Press OK 11.
SCAN will end and the last station
scanned will continue playing.

**Adjusting the scan time**
☞ Press MENU 8.
☞ Press V 10 repeatedly until
“SCANTIME” appears in the dis-
play.
☞ Press < > 10 to set the scan time
as desired.
☞ Once you have made your selec-
tion, press MENU 8 or OK 11.

**Note:**
The scan time selected also applies to
the SCAN function for CD player and
CD changer operation.

**Program Type (PTY)**
In addition to the radio station name, a
number of FM stations transmit informa-
tion on the type of program they broad-
cast. This car radio has been equipped
to receive and display this information.

These program types can include:
- CULTURE
- TRAVEL
- JAZZ
- SPORT
- NEWS
- POP
- ROCK
- CLASSICS

Using the PTY function, you can select
the radio station according to the type
of program being broadcast.

As soon as the radio registers a radio
station broadcasting the program type
selected, it will automatically switch from
the station playing or from the CD play-
er or CD changer mode to that station.

**Switching PTY on/off**
☞ Press MENU 8.
☞ Press V 10 repeatedly until “PTY
ON” or “PTY OFF” appears in the
display.
☞ Press < or > 10 to switch this
function either on or off.

PTY will light up in the display when this
function has been activated.
☞ Press MENU 8 or OK 11.

**Selecting the program type and**
**starting seek tuning**
☞ Press < or > 10.
The currently selected program type will
appear in the display.
☞ If you would like to select a different
program type, press < or > 10
while the program type is on dis-
play to switch to another program
type.

**OR**
☞ Press one of the station preset but-
tons from 1 to 6 14 to select the
program type stored on that partic-
ular station button.

The program type selected will appear
briefly in the display.
Press A or B 10 to start seek tuning.

The next radio station broadcasting the program selected will begin to play.

Note:
If the radio is not able to find a station broadcasting the program type selected, you will hear a beep and “NO PTY” will appear briefly in the display. The station selected previously will then resume play.

Storing the program types on the station preset buttons
Press < or > 10 to select the program type.
Press the desired station preset button (1 to 6) 14 for longer than two seconds.

The program type selected will then be stored on the station preset button (1 to 6) 14 pressed.

Optimising radio reception

Interference-related treble cut (HICUT)
The HICUT function improves reception when reception begins to deteriorate. If interference occurs, then the treble and the noise is cut automatically.

Switching HICUT on/off
Press MENU 8.
Press V 10 repeatedly until “HICUT” appears in the display.
Press < or > 10 to switch HICUT on or off.

Selecting the display of variable text
A number of radio stations use the RDS signal to transmit advertising or other texts in place of their station names. These “variable texts” will appear in the display. It is possible to adjust your radio so that these “variable texts” do not appear.
Press and hold down RDS 4 until “NAME FIX” appears in the display.
To have the “variable texts” displayed again, press and hold down RDS 4 until “NAME VAR” appears in the display.
TRAFFIC INFORMATION RECEPTION

Traffic information reception

Switching traffic information priority on/off

Press TRAF.

Traffic information priority is activated when the traffic congestion symbol lights up in the display.

Note:
You will hear a warning beep

● if you leave the reception area of the traffic information station you are tuned into.

● if you are listening to a CD, leave the reception area of the traffic information station you are tuned into and the seek tuning function is unable to find another traffic information station.

● if you switch from a traffic information station to a station which does not broadcast traffic information.

Then either switch off traffic information priority or switch to a different traffic information station.

Adjusting the volume for traffic announcements

Press MENU.

Press V repeatedly until "TA VOLUME" appears in the display.

Press ◄ to adjust the traffic announcement volume.

Once you have adjusted the setting, press MENU or OK.
CD player operation

The CD player in this car audio system can be used to play conventional music CDs with a diameter of 12 cm.

⚠️ Danger of damage to the CD player!
CD singles with a diameter of 8 cm and contour CDs (shape CDs) are not suitable for use with this CD player.
We assume no liability for any damage done to the CD player resulting from the use of unsuitable CDs.

Starting CD player operation

● If there is no CD in the player,
  ➤ press ▼ (9).
The flip release panel will open.
  ➤ Insert a CD into the player with the label facing up until you feel resistance. Do not use force.
The CD will be pulled into the player automatically.
Do not attempt to assist or prevent this process.
  ➤ Press the operating panel closed gently until you feel it click into place.
CD playback will begin.
● If there already is a CD inserted into the player,
  ➤ press CD•C (16) repeatedly until “CD” appears in the display.
Playback will resume at the point where it was interrupted.

Selecting tracks

➤ Press a key on the cursor block (10) to select the next or the previous track.
Press ▼ or ▼ (10) once to restart the same track.

Audible fast forward/reverse (CUE/REVIEW)
To start Cue or Review,
  ➤ press and hold down either ▼ or ▼ (10) until the process begins.

Playing tracks in random order (MIX)

➤ Press 5 MIX (14).
“MIX CD” will appear briefly in the display, the MIX symbol will light up in the display. The next track played will be selected at random.

Stopping the MIX function

➤ Press 5 MIX (14) again.
“MIX OFF” will appear briefly in the display and the MIX symbol will no longer light up.

Scanning tracks (SCAN)
You can scan all of the tracks on the CD.

➤ Press OK (11) for longer than two seconds. Scanning will begin with the next track.

Note:
It is possible to adjust the scan time. For more information, read the section on “Adjusting the scan time” in the chapter on “Radio Operation”.

CD PLAYER OPERATION

ENGLISH
CD PLAYER OPERATION

Stopping the SCAN function, continue listening to the current track

➢ To stop the SCAN function, press OK 11.

The track currently scanned will continue playing.

Repeating individual tracks (REPEAT)

➢ To repeat the track currently playing, press 4 RPT 14.

“REPEAT TRCK” will appear briefly in the display, the RPT symbol will light up in the display. The track will continue to repeat until RPT is deactivated.

Stopping the REPEAT function

➢ If you want to stop the REPEAT function, press 4 RPT 14 again.

“REPEAT OFF” will appear briefly in the display and the RPT symbol will no longer light up. CD playback will resume normally.

Interrupting playback (PAUSE)

Stopping PAUSE

➢ Press 3 14 during the pause. Playback will resume.

Switching the display mode

➢ To switch the display between the track number and time or the track number and elapsed playing time, press ⑤ / DIS 7 for longer than two seconds once or repeatedly as required.

Traffic radio information during CD playback

➢ If you would like to receive traffic radio information while listening to your CD player, press TRAF 15.

The traffic congestion symbol will light up in the display to indicate that priority for traffic radio announcements has been activated. For more information, please refer to the section on “Traffic information reception”.

Traffic radio information during CD playback

➢ If you would like to receive traffic radio information while listening to your CD player, press TRAF 15.

The traffic congestion symbol will light up in the display to indicate that priority for traffic radio announcements has been activated. For more information, please refer to the section on “Traffic information reception”.

38
CD changer operation

Note:
For information on how to handle CDs, how to insert CDs into the changer and how to operate the changer, please refer to the instructions included with the CD changer.

Starting CD changer operation

➢ Press CD•C 16 repeatedly until “CHANGER” appears in the display.
Playback will begin with the first CD the changer detects in the magazine.

Selecting CDs

➢ To select a CD up or down in the magazine, press ▲ or ▼ 10 the required number of times.

Selecting tracks

➢ To select a different track on the CD currently playing, press ► or ◄ 10 the required number of times.

Audible fast forward/reverse (CUE/REVIEW)

To start Cue or Review,
➢ press and hold down either ◄ or ► 10 until the process begins.

Switching the display mode

➢ To switch the display between the track number and time or the track number and elapsed playing time, press Ø / DIS 7 for longer than two seconds once or repeatedly as required.

Repeating individual tracks or entire CDs (REPEAT)

➢ To repeat the track currently playing, press 4 RPT 14 briefly.
“REPEAT TRCK” will appear briefly in the display, RPT will light up in the display.
➢ To repeat the entire CD currently playing, press 4 RPT 14 again.
“REPEAT DISC” will appear briefly in the display, RPT will light up in the display.

Stopping the REPEAT function

➢ To stop the REPEAT function for the current track or CD, press 4 RPT 14 repeatedly until “REPEAT OFF” appears in the display and RPT no longer lights up.

Playing tracks in random order (MIX)

➢ To play the tracks of the currently selected CD in random order, press 5 MIX 14 briefly.
“MIX CD” will appear briefly in the display, MIX will light up in the display.
➢ To play the tracks of all of the CDs in random order, press 5 MIX 14 again.
“MIX ALL” will appear briefly in the display, MIX will light up in the display.

Note:
The CDC A 08 and the IDC A 09 are also able to play all of the CDs in the changer in random order. The other CD changers first play all of the tracks on a CD in random order and then select the next CD in the changer.
CD CHANGER OPERATION

Stopping the MIX function
- To stop the MIX function, press 5-hosted “MIX OFF” appears briefly in the display and MIX no longer lights up.

Scanning all of the tracks on all of the CDs (SCAN)
- To scan all of the tracks on all of the CDs in ascending order, press OK for longer than two seconds. “SCAN” will appear in the display.

Stopping the SCAN function
- To stop the SCAN function, press OK briefly.
The track currently scanned will continue playing.

Note:
It is possible to adjust the scan time. For more information, read the section on “Adjusting the scan time” in the chapter on “Radio Operation”.

Interrupting playback (PAUSE)
- Press 3 during the pause. “PAUSE” will appear in the display.

Stopping PAUSE
- Press 3 during the pause. Playback will resume.

CLOCK

Displaying the clock briefly
In the radio mode
- To display the time briefly, press DIS briefly.

In CD player and CD changer mode
- To switch between the display of the CD number, playing time and the time, press DIS once or repeatedly.

Altering the permanent display
- To make the time or another display as described above permanent, press and hold DIS until the desired information appears in the display.

Setting the time
- To set the time, press MENU.
- “MENU” will appear in the display.
- Press until “CLOCKSET” appears in the display.
- Press . The time will appear in the display. The minutes will flash and can be altered.
- Press or to alter the minutes.
- Once you have altered the minutes, press . The hours will begin to flash.
- Press or to alter the hours.
- Once you have set the time, press MENU or OK twice.
Selecting the 12/24-hour time display mode

▷ Press MENU 8.
“MENU” will appear in the display.
▷ Press  repeatedly until “24 H MODE” or “12 H MODE” appears in the display.
▷ Press  or  to switch the display mode.
▷ Once you have selected the mode, press MENU 8 or OK 11.

Activating the clock for display when the car audio system is switched off

▷ To activate the clock for display when the car audio system is switched off, press MENU 8.
“MENU” will appear in the display.
▷ Press  repeatedly until “CLK DISP OFF” or “CLK DISP ON” appears in the display.
▷ Press  or  to switch the clock display on or off.
▷ Once you have made the setting, press MENU 8 or OK 11.

Displaying the time briefly when the car radio is switched off

To display the time briefly when the car radio is switched off,
▷ press DIS 7.
The time will then appear in the display for eight seconds.
TONE AND BALANCE/FADER

Adjusting the tone and balance/fader

Adjusting the bass
➢ To adjust the bass, press AUD / LD ⑩.
“BASS” will appear in the display.
➢ Press ‹ or › ⑩ to alter the bass.

Adjusting the treble
➢ To adjust the treble, press AUD / LD ⑩.
“BASS” will appear in the display.
➢ Press ◄ ⑩ until “TREBLE” appears in the display.
➢ Press ‹ or › ⑩ to alter the treble.

Adjusting the balance
➢ To adjust the balance, press AUD / LD ⑩.
“BASS” will appear in the display.
➢ Press ◄ ⑩ until “BALANCE” appears in the display.
➢ Press ‹ or › ⑩ to alter the balance.

Adjusting the fader
➢ To adjust the fader, press AUD / LD ⑩.
“BASS” will appear in the display.
➢ Press ◄ ⑩ until “FADER” appears in the display.
➢ Press ‹ or › ⑩ to alter the fader.

Switching Loudness on/off
Loudness boosts the bass and treble when the volume is low to create a more natural sound.
➢ Press AUD / LD ⑩ for approx. two seconds.
LD will light up in the display to indicate that Loudness is active.

Adjusting Loudness intensity
The Loudness boost can be set in stages from one to six.
➢ Press MENU ⑩.
“MENU” will appear in the display.
➢ Press ‹ ⑩ repeatedly until “LOUDNESS” appears in the display.
➢ Press ◄ or ► ⑩ to alter the Loudness setting.
➢ Once you have completed adjusting the settings, press MENU ⑩ or OK ⑪.
Equalizer

This car audio system is equipped with a parametric 2-band equalizer. For “LOW EQ” the gain can be set to a frequency between 60 to 100 Hz. For “HIGH EQ” the gain can be set to a frequency between 10000 and 17500 Hz. As a result, it is possible to significantly influence the in-vehicle acoustics.

Notes on making the settings

We recommend that you use a CD you are familiar with to make the settings.

Before you set the equaliser, set bass, treble, balance and fader to “0” and deactivate the Loudness function. For more information on how to do this, refer to the section on “Tone and balance/fader”.

✓ Now listen to the CD you have selected.
✓ Evaluate the sound according to your own personal preferences.
✓ Now refer to “Sound impression” in the table.
✓ Make the settings for the equalizer as described under “What to do”.

Adjusting the equalizer

✓ Press EQ. “LOW EQ” will appear in the display.
✓ Press < or > to select either “LOW EQ” or “HIGH EQ”.
✓ Press ▲ or ▼ to adjust the gain.
✓ Press < or > to select the frequency range.
✓ To select the next frequency, press OK first and then >.
✓ Once you have completed making all of the necessary adjustments, press EQ.
**EQUALIZER**

Assistance in setting your equaliser

Start to make your settings in the treble and end it with the bass range.

<table>

<tbody>
<tr>
<td><strong>Bass</strong> 60 to 100 Hz</td>
<td>Bass reproduction too weak</td>
<td>Boost the bass with “LOW EQ”. Frequency: 60 to 100 Hz. Gain: +4 to +6 dB.</td>
<td>Avoid distortion. Adjust the gain carefully.</td>
</tr>
</tbody>
</table>

**Adjusting the spectrometer**

The spectrometer in the display uses symbols to temporarily indicate what adjustments are made to the volume, the tone and balance/fader and the equalizer settings.

If no adjustments are being made to the system, the spectrometer displays the output level of the car radio. You can select the type of spectrometer you want displayed in the menu. There are two different types available.

**Selecting the spectrometer type**

☞ Press MENU 8.

“MENU” will appear in the display.

☞ Press Y 10 repeatedly until “EQ DISPLAY” appears in the display.

☞ Press < or > 10 to select either “SPECTRUM 1”, “SPECTRUM 2” or “EQ DISP OFF”.

☞ Once you have completed adjusting the settings, press MENU 8 or OK 11.
External audio sources

In place of the CD changer it is also possible to connect other external audio sources to the line output. These sources can include a portable CD player, MiniDisc player or MP3 player. You must activate the AUX output in the menu.

If you would like to connect another external audio source, you will require an adapter cable. This adapter cable can be ordered from any authorized Blaupunkt dealer.

Switching the AUX output on/off

➤ Press MENU (8). “MENU” will appear in the display.
➤ Press V (10) repeatedly until “AUX-IN-1 OFF” or “AUX-IN-1 ON” appears in the display.
➤ Press < or > (10) to switch AUX on or off.
➤ Once you have completed your selections, press MENU (8) or OK (11).

Note:
If the AUX input has been switched ON, you can select it by pressing CD•C (16).

Specifications

Amplifier
Output power: 4 x 25 watts sinus acc. to DIN 45 324 at 14.4 V
4 x 40 watts max. power

Tuner
Wavebands:
FM : 87.5 – 108 MHz
MW : 531 – 1602 kHz
LW : 153 – 279 kHz
(The Sylt CD50 does not include MW/LW.)

FM frequency response:
30 - 15000 Hz

CD
Frequency response:
20 - 20000 Hz

Preamp Out
4 channels: 2 V
