Classic Series Amplifiers
C35, C60, & C100 Models

Installation and Use Manual
Notice: Every effort was made to ensure that the information in this guide was complete and accurate at the time of printing. However, information is subject to change.

WARNING: To reduce the risk of Fire or Electric Shock, Do Not Expose this apparatus to rain or moisture.

Apparatus shall not be exposed to dripping or splashing and no objects filled with liquids, such as vases shall be placed on the apparatus.

WARNING: Only connect unit to AC mains outlet providing protective earthing connection.

NOTE: Mains plug or an appliance coupler are used as disconnect devices from the mains and shall remain readily accessible and operable.

CAUTION: These servicing instructions are for use by qualified service personnel only. To reduce the risk of electric shock, do not perform any servicing other than that contained in the operating instructions unless you are qualified to do so.

Always follow these basic safety precautions when installing and using the unit:

IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean unit with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade, or the third prong, are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Unplug this apparatus during lightning storms or when not used for long periods of time.
13. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

CAUTION: TO PREVENT THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE ANY FRONT/BACK COVERS OR PANELS. NO USER-SERVICEABLE PARTS INSIDE.

REFER SERVICING TO QUALIFIED PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions.

Panel Descriptions

Classic Series Front Panel

1. MIC1 Level Control
   Individual level control for a dedicated microphone input.

2. MIC2/AUX1 Mode Switch
   Switch selects either the MIC2 or AUX1 connection as the active input.

3. MIC2/AUX1 Level Control
   Individual level control for a dedicated microphone input or for an auxiliary input depending on input mode selected.

4. AUX2 Level Control
   Individual level control for a dedicated auxiliary input.

5. Treble Control
   Controls the amount of cut or boost of treble frequencies above 10 kHz.

6. Bass Control
   Controls the amount of cut or boost of bass frequencies below 100 Hz.

7. Power
   AC Power switch. Illuminates when ON.
Panel Descriptions

Classic Series Rear Panel

Models C35/60

Model C100

1. Amplifier Output
   Screw terminal strip containing all available speaker outputs.

2. Tape/Booster
   RCA unbalanced signal level/output.

3. WMT1A
   RCA output connection for Bogen’s 600-ohm balanced line matching transformer Model WMT1A.

4. AUX Terminal
   Screw terminal connection that allows externally controlled muting of AUX inputs with a contact closure.

5. Microphone Inputs
   Screw terminal strip containing the MIC1 and MIC2 balanced, low-impedance inputs. (MIC2 is switch-selectable.)

6. Auxiliary Inputs
   RCA unbalanced, AUX1 and AUX2 high-impedance inputs. (AUX1 is switch-selectable.)

7. TEL Input
   Screw terminal input for 600-ohm balanced telephone signal.

8. VOX Sensitivity Control
   Variable control for adjusting TEL input signal level trigger point for automatic muting of AUX input.

9. TEL Volume Control
   Adjusts the telephone input paging level.
Installation

Package Contents

- Classic Series Amplifier
- Instruction Manual

Ventilation

When using a shelf or table mount, the amplifier should stand alone with no equipment on top of it or below it.

Rack Mounting

A rack mount bracket kit (Model RPK50) is available as an accessory. (Not included.)
Input Connections

Microphone Connections
These inputs are for two low-impedance balanced dynamic microphones. Connect cable shield to center screw marked "GND."

Auxiliary
The AUX inputs provide unbalanced RCA inputs for connection to external signal-level equipment.

AUX Muting
For this function, a customer-supplied, normally-open contact closure (switch) must be connected to the AUX2 and MUTE terminals. When the contacts are closed, the AUX2 input will be muted. Typically activated by a switch in a push-to-talk style microphone. AUX 1, if selected, is not mutable by contact closure.

TEL
Connect the telephone line to the two outside terminals and the shield, if used, to the center terminal. TEL input signal will trigger automatic muting of AUX 1 and AUX 2. Input impedance is 600-ohm and is transformer balanced. Input is for "Dry" audio signals only, no DC voltage on the signal.

Output Connections

Speakers, General
The amplifier may be used with most conventional speaker systems. Connect one speaker lead to the screw terminal that corresponds to the impedance of the type of speakers used in the system and the other lead to the COM terminal. If the line is shielded, connect the shield to GND.

Connecting the GND to the COM terminal when using the transformer-coupled outputs references the transformer output to ground. Disconnecting the GND terminal from COM allows the transformer output to float electrically. This is sometimes useful under certain conditions where a ground connection is undesirable. It is generally a good idea to short the GND to the COM terminal regardless of output type (Trans or Direct).

Speakers, Low-Impedance
To connect a 4-ohm speaker, remove the 4-ohm link and connect the speaker between 4-ohm and GND.

Tape/Booster Connection
To record the amplifier program, connect a patch cord from the TAPE/BOOSTER output jack to the input of a recording device. Can also be connected to the input of a booster amplifier.

WMT1A Connection
This output jack is directly connected to the 25V speaker tap and permits the connection of Bogen's general-purpose matching transformer (WMT1A). The WMT1A steps the signal down by a 5:1 ratio, giving you a 600-ohm balanced signal that can drive long cable runs.
Front Panel Controls

Power
The front panel ON/OFF switch applies power to the amplifier and is illuminated when power is ON.

Input Volume Controls
Each input module may be individually controlled by its corresponding volume control knob.

MIC2, AUX 1 Mode Switch
Activates the corresponding input that it is switched to, MIC2 or AUX1. The other input is inactive and any connections to the inactive input will not work.

Bass and Treble Controls
The Bass and Treble controls are used to adjust the tonal balance of the amplifier output. The center position of these controls provides flat frequency response. Counterclockwise rotation of these controls reduces the bass or treble response, while clockwise rotation increases such response.

The treble control has a cut/boost range of +/- 11 dB at frequencies above 10 kHz and provides a roll off after 20 kHz to reduce gain above the audio range.

The bass control has a cut/boost range of +/- 11 dB at frequencies below 100 Hz. When driving speakers using the direct-coupled output terminals, the bass filter's response is flat to 20 Hz.
**Rear Panel Controls**

**TEL Volume Control**

The TEL VOLUME control on the rear panel adjusts the TEL input's paging level. It does not affect the microphone level. Rotate the control counterclockwise to decrease the level. Rotate the control clockwise to increase the level.

**VOX Sensitivity Control**

When an input signal (such as voice) is detected through the TEL input, the music channels (AUX1 and AUX2) will be muted. The VOX Sensitivity control should be set so that only the desired signal is above the threshold level, while noise and unwanted signal is below it. To adjust the sensitivity of this circuit:

1. Rotate the control fully clockwise. While making a page announcement and talking at a low level, the sound should not be choppy nor missing parts of words. If it is choppy, or if intelligibility is poor, rotate the control counterclockwise to the point where the sound is clear and crisp (but not to the maximum counterclockwise position).

2. If the background music shuts down when no page is in progress, rotate the control clockwise until the music is restored.
Specifications

Power Output (RMS)
- C35: 35W
- C60: 60W
- C100: 100W

Frequency Response & Distortion
- Transformer: 70 Hz to 16 kHz (± 2 dB) @ 1% max.
- 4-Ohm Direct Output: 20 Hz to 20 kHz (± 1 dB) @ 0.5% max.

Hum and Noise
- MIC Input: 55 dB below rated output
- AUX Input: 70 dB below rated output
- TEL Input: 70 dB below rated output

Tone Control Action
- Bass: +/- 11 dB @ 100 Hz
- Treble: +/- 11 dB @ 10 kHz

Input Sensitivity
- MIC Lo-Z Balanced: 600 μV
- AUX: 85 mV
- TEL: 75 mV

Outputs
- 8 ohms (C35 & C60 models only), 16 ohms, 25V, and 70V transformer-isolated balanced or unbalanced; 4 ohms direct unbalanced

Output Connections
- Speaker screw terminal strip, TAPE/BOOSTER RCA jack;
- WMT1A RCA jack

Input Connections
- (2) MIC Lo-Z screw terminals; (2) AUX Hi-Z RCA jacks,
- TEL screw terminals

Controls
- MIC1, MIC2/AUX1 (switch selected), AUX 2, BASS, TREBLE, TEL, VOX

Thermal Emissions (Full Power)
- C35: 119.5 BTU/hr.
- C60: 228.8 BTU/hr.
- C100: 399.6 BTU/hr.

Power Requirements
- 120V AC, 60 Hz

AC Line Draw
- C35: 85W
- C60: 148W
- C100: 220W

Dimensions
- 14½" W x 3¾" H x 11" D (all models)

Product Weight
- C35: 15 lb.
- C60: 17 lb.
- C100: 19 lb.

Approvals
- Listed to UL Standard 60065 for U.S. and Canada

† Measured @ 2 dB below FRP

Limited Warranty; Exclusion of Certain Damages

Bogen Classic Series Amplifiers are warranted to be free from defects in material and workmanship for 2 (two) years from the date of sale to the original purchaser. Any part of the product covered by this warranty that, with normal installation and use, becomes defective (as confirmed by Bogen upon inspection) during the applicable warranty period, will be repaired or replaced by Bogen, at Bogen’s option, provided the product is shipped insured and prepaid to: Bogen Factory Service Department, 4570 Shelby Air Drive, Suite 11, Memphis TN 38118, USA. Repaired or replacement product will be returned to you freight prepaid. This warranty does not extend to any of our products that have been subjected to abuse, misuse, improper storage, neglect, accident, improper installation or have been modified or repaired or altered in any manner whatsoever, or where the serial number or date code has been removed or defaced.

THE FOREGOING LIMITED WARRANTY IS BOGEN’S SOLE AND EXCLUSIVE WARRANTY AND THE PURCHASER’S SOLE AND EXCLUSIVE REMEDY. BOGEN MAKES NO OTHER WARRANTIES OF ANY KIND, EITHER EXPRESS OR IMPLIED, AND ALL IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE ARE HEREBY DISCLAIMED AND EXCLUDED TO THE MAXIMUM EXTENT ALLOWABLE BY LAW. Bogen’s liability arising out of the manufacture, sale or supplying of products or their use or disposition, whether based upon warranty, contract, tort or otherwise, shall be limited to the price of the product. IN NO EVENT SHALL BOGEN BE LIABLE FOR SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, LOSS OF PROFITS, LOSS OF DATA OR LOSS OF USE DAMAGES) ARISING OUT OF THE MANUFACTURE, SALE OR SUPPLYING OF PRODUCTS, EVEN IF BOGEN HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES OR LOSSES. Some States do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from State to State.

Products that are out of warranty will also be repaired by the Bogen Factory Service Department – same address as above or call 201-934-8500. The parts and labor involved in these repairs are warranted for 90 days when repaired by the Bogen Factory Service Department. All shipping charges in addition to parts and labor charges will be at the owner’s expense. All returns require a Return Authorization number. For most efficient warranty or repair service, please include a description of the failure.

11/2014

Accessories

RPK50 - Rack Mounting Kit
- Adapts Classic Series amps (Models C35, C60, and C100) for 19” rack mounting, 2 rack spaces (3-1/2”)
- Heavy gauge steel construction

WMT1A - Matching Transformer
- Hi-Z, 10k-ohm primary impedance
- Lo-Z, 600-ohm secondary impedance, balanced with center tap
- Matches high-impedance unbalanced or low-impedance balanced signals
- Jumper selection allows line level signal to microphone level signal conversion
