Inserting the batteries

1. Slide the rear cover off the remote control unit in the arrow direction.

2. Load the two batteries properly as indicated by the ⊕ and ⊖ marks in the battery compartment.

3. Put the rear cover back on.

NOTE
- When inserting the batteries, be sure to do so in the proper direction, following the ⊕ and ⊖ marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
- Remove the batteries from the remote control unit if it will not be in use for long periods.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.

Operating range of the remote control unit

Point the remote control unit at the remote sensor when operating it.
Features

High quality sound

• With discrete circuit technology, the power amplifier provides identical quality for all 7-channels (165 Watts x 7-channels)
  For optimum realism and stunning dynamic range, the power amplifier section features discrete power devices (not integrated circuitry).
  By using high current, high power discrete power devices, the amplifier is able to easily drive high quality speakers.

• Audyssey DSX® (page 159)
  This unit is equipped with Audyssey DSX® processor. By connecting front height speakers to this unit and playing back with Audyssey DSX® processing you can experience a more vertically expansive front soundstage.
  By connecting two front wide speakers, you can experience a wider and more expanded front soundstage.

• Audyssey LFC™ (Low Frequency Containment) (page 158)
  Audyssey LFC™ solves the problem of low frequency sounds disturbing people in neighboring rooms or apartments. Audyssey LFC™ dynamically monitors the audio content and removes the low frequencies that pass through walls, floors and ceilings. It then applies psychoacoustic processing to restore the perception of low bass for listeners in the room. The result is great sound that no longer disturbs the neighbors.

• Discrete subwoofers and Audyssey Sub EQ HT™ (page 173)
  The unit has two subwoofer output capability and can adjust the level and delay for each subwoofer individually.
  Audyssey Sub EQ HT™ makes the integration seamless by first compensating for any level and delay differences between the two subwoofers and then applying Audyssey MultEQ® XT32 to both subwoofers together for improved deep bass response and detail.

• DTS Neo:X (page 108)
  This technology enables the playback of 2-channel source audio or 7.1/5.1 multi-channel source audio through a maximum 9.1-channel speakers, achieving an even broader soundstage.

• Denon’s unique high quality playback technology “Denon Link HD” (page 43)
  This unit is equipped with our exclusive Denon Link HD technology. When connected to a Denon disc player that has Denon Link HD, the sound localization becomes more precise, with increased detail and definition. The system works by carrying the critical clock timing signals via the dedicated Denon Link HD connection, minimizing the jitter caused by conventional digital connections.
• Equipped with Hybrid PLL Jitter Reducer capable of reducing jitter and phase noise that negatively affects sound quality
  Denon’s Hybrid Phase Lock Loop Jitter Reducer improves sound localization, reproducing a broad and natural soundstage.

High performance

• Digital video processor upscales analog video signals (SD resolution) to HD (720p/1080p) and 4K (page 229)
  This unit features a sophisticated video processor that can upscale standard definition (SD) analog video content from legacy sources such as a VCR to HD and is able to output at 4K Ultra HD resolution (3840 x 2160 pixels) for compatibility with newly available high resolution 4K TVs.

• Equipped with HDMI ZONE2 output (page 133)
  The ZONE2 multi-room output includes an HDMI output that lets you enjoy a different A/V source in that room, with another program playing in the main room.

• Simultaneous playback via two HDMI outputs (for MAIN ZONE) (page 133)
  This unit is equipped with two HDMI MONITOR outputs. You can connect one output to a projector and the other output to a TV for simultaneous signal outputs.

• Supports Internet Radio, music, and photograph streaming
  Supports AirPlay® (page 97)
  You can enjoy a wide variety of content, including listening to Internet Radio, playing audio files stored on your PC, and displaying photographs stored on your PC on our television.
  This unit also supports Apple AirPlay which lets you stream your music library from an iPhone®, iPad®, iPod touch® or iTunes®.

• Compatible with “Denon Remote App” for performing basic operations of the unit with an iPad, iPhone* or Android smartphone
  “Denon Remote App” is application software that allows you to perform basic operations with an iPad, iPhone, Android smartphone or Android tablet such as turning the unit ON/OFF, controlling the volume, and switching the source.
  * Download the appropriate “Denon Remote App” for iOS and Android devices. This unit needs to be connected to your LAN and the iPhone/iPod touch or other device needs to be connected to the same network by Wi-Fi (wireless LAN).

• HDMI connections enable quick connection to various digital AV devices (7 inputs, 3 outputs)
  The unit is equipped with 7 HDMI input connectors for connecting devices with HDMI connectors, such as a Blu-ray Disc player, game console, HD digital camcorder, HDTVs, etc.
• Supports HDMI (3D, ARC, Deep Color, “x.v.Color”, Auto Lip Sync, 4K) and HDMI control function (page 229)
Advanced HDMI features are supported, including 3D passthrough, Audio Return Channel, Auto Lip Sync, Deep Color and “x.v.Color”, and HDMI CEC control functions. If a 4K digital video signal is input, it is passed through the unit unchanged, and the GUI overlay will adjust the resolution accordingly.

• Direct play for iPod and iPhone via USB (page 46)
Music data from an iPod or iPhone can be played back if you connect the USB cable supplied with the iPod via the USB port of this unit, and also an iPod can be controlled with the remote control that comes with this unit.

• Equipped with 3 source 3 zone Multi-Zone Function
Lets you enjoy audio and video in the main room, and have up to 1 other zones with different audio content delivered to each room (page 133).

• Multi-Room audio
Enjoy the same music in your home theater and another room at the same time (page 107).

• InstaPrevue Technology (page 123)
Live picture-in-picture preview of HDMI sources that are connected to the unit.

Easy operation

• “Setup Assistant” provides easy-to-follow setup instructions
First select the language when prompted. Then simply follow the instructions displayed on the TV screen to set up the speakers, network, etc.

• Easy to use Graphical User Interface
This unit is equipped with an easy to see Graphical User Interface that uses menu displays and features colorful icons and easy to understand controls for maximum ease of use.
Part names and functions

Front panel
1 **Power operation button (८)**  
   This turns the power of MAIN ZONE on/off (standby) ([page 54]).

2 **Power indicator**  
   This is lit as follows according to the power status:
   - Power on : Green
   - Normal standby : Off
   - When “HDMI Pass Through” ([page 163]) or “HDMI Control” ([page 163]) is set to “On” : Red
   - When “IP Control” ([page 191]) is set to “Always On” : Red

3 **Door**  
   When you are using buttons and/or connectors behind the door, press the bottom of the door to open it. When not using buttons and/or connectors behind the door, close it. Be careful not to catch your fingers when closing the door.

4 **MASTER VOLUME knob**  
   This adjusts the volume level ([page 55]).

5 **Display**  
   This displays various pieces of information ([page 16]).

6 **Remote control sensor**  
   This receives signals from the remote control unit ([page 8]).

7 **SOURCE SELECT knob**  
   This selects the input source ([page 54]).
With the door open

1. **AUX1 HDMI 7 connector**
   Used to connect HDMI output compatible devices such as video cameras and game consoles (page 44).

2. **USB port**
   Used to connect USB storages (such as USB memory devices) and the USB cable supplied with iPod (page 46).

3. **Headphones jack (PHONES)**
   When the headphones are plugged into this jack, audio will no longer be output from the connected speakers.

   **NOTE**
   • To prevent hearing loss, do not raise the volume level excessively when using headphones.

4. **BACK button**
   This returns to the previous screen (page 146).

5. **ENTER button**
   This determines the selection (page 146).

6. **SETUP button**
   This displays the menu on the TV screen (page 146).

7. **AUX1 INPUT connector**
   Used to connect analog output compatible devices such as video cameras and game consoles (page 44).

8. **SETUP MIC jack**
   Used to connect the supplied Setup and measurement microphone (page 175).

9. **QUICK SELECT buttons**
   With a single press of any of these buttons, you can call up various settings you’ve registered to each button such as the input source, volume level and sound mode settings (page 128).

10. **DIMMER button**
    Each press of this switches the brightness of the display (page 199).

11. **OPTION button**
    This displays the option menu on the TV screen (page 100).

12. **Cursor buttons (∆▼◄►)**
    These select items (page 146).
13 Information button (INFO)  
This displays the status information on the TV screen (page 200).

14 STATUS button  
Each press of this switches the status information that is shown on the display (page 58).

15 ZONE3 SOURCE button  
This selects the input source for ZONE3 (page 137).

16 ZONE3 ON/OFF button  
This turns the power of ZONE3 on/off (page 137).

17 ZONE2 SOURCE button  
This selects the input source for ZONE2 (page 137).

18 ZONE2 ON/OFF button  
This turns the power of ZONE2 on/off (page 137).
Display

1 Information display
   The input source name, sound mode, setting values and other information are displayed here.

2 Front speaker indicator
   This lights according to the setting of the front A and B speakers.

3 Input/output signal channel indicators
   The channel for input/output signals is displayed according to the setting configured for “Channel Indicators” (page 199).
   - When “Channel Indicators” is set to “Output” (Default) These light when audio signals are being output from the speakers.
   - When “Channel Indicators” is set to “Input” These light when digital signals are input.
   When playing HD Audio sources, the EXIT indicator lights when a signal from an extension channel (a channel other than the front, center, surround, surround back, front height, front wide or LFE channel) is input.
[Front panel]

4 Master volume indicator
This lights when the audio mute mode is selected (page 55).

5 MUTE indicator
This lights when the sleep mode is selected (page 126).

6 Sleep timer indicator
This lights when the sleep mode is selected (page 126).

7 MULTI ZONE indicator
This lights up when ZONE2 or ZONE3 (separate room) power is turned on (page 137).

8 Monitor output indicator
These light according to the HDMI monitor output setting.
When set to “Auto(Dual)”, the indicators light according to connection status (page 163).

9 Tuner reception mode indicators
These light according to the reception conditions when the input source is set to “TUNER”.
STEREO : In FM mode, this lights up when receiving stereo broadcasts.
TUNED : Lights up when the broadcast is properly tuned in.
RDS : Lights up when receiving RDS broadcasts.

10 Audyssey® indicator
This indicator lights when the “MultEQ® XT32” (page 156),
“Dynamic EQ” (page 156) or “Dynamic Volume” (page 157)
setting is set to other than “Off” and “Audyssey LFC™” (page 158)
setting or “Audyssey DSX™” (page 159) is set to other than “Off”.

11 Decoder indicator
These light when Dolby or DTS signals are input or when the Dolby or
DTS decoder is running.

12 Input signal indicators
The respective indicator will light corresponding to the input signal
(page 171).
1 FM antenna terminals (ANTENNA)
   Used to connect FM antennas (page 64).
2 Speaker terminals (SPEAKERS)
   Used to connect speakers (page 28).
3 PRE OUT connectors
   Used to connect a subwoofer with a built-in amplifier or an external
   power amplifier (page 29, 136).
4 AC inlet (AC IN)
   Used to connect the power cord (page 52).
5 Component video connectors (COMPONENT VIDEO)
   Used to connect devices equipped with component video connectors
   (page 39, 41, 42).
6 HDMI connectors
   Used to connect devices equipped with HDMI connectors
   (page 37, 38, 41, 42, 43, 44).
7 Video connectors (VIDEO)
   Used to connect devices equipped with video connectors
   (page 39, 41, 42, 44).
8 SIGNAL GND jacks
   Used to connect a turntable (page 45).
9 Denon Link HD connector
   Used to connect a Denon Link HD compatible Blu-ray Disc player
   (page 43).
10 REMOTE CONTROL jacks
   Used to connect infrared receivers/transmitters in order to operate this
   unit and external devices from a different room (page 51).
11 Digital audio connectors (DIGITAL AUDIO)
   Used to connect devices equipped with digital audio connectors
   (page 38, 39, 41, 42).
12 Network connector (NETWORK)
   Used to connect this unit to the network (page 49).
13 RS-232C connector
The RS-232C serial port is provided to allow compatibility with an external home automation controller. Consult the owner’s manual of the home automation controller for more information about serial control of this unit. The serial port allows two-way control and status via an external home automation controller.

14 TRIGGER OUT jacks
Used to connect devices equipped with the trigger function (page 51).

15 Analog audio connectors (AUDIO)
Used to connect devices equipped with analog audio connectors (page 41, 42, 44).

NOTE
- Do not touch the inner pins of the connectors on the rear panel. Electrostatic discharge may cause permanent damage to the unit.
Remote control unit

1 ZONE SELECT buttons (MAIN, 2, 3)
   These switch the zone (MAIN ZONE, ZONE2, ZONE3) that is operated through the remote control unit (page 137, 146).

2 Operation mode indicators
   The “AVR” indicator lights when the unit is being operated.
   The “DEV.” indicator lights when an external device is being operated.
   The “TV” indicator lights when the TV is being operated.

3 Device operation buttons (DEVICE / DEVICE MENU)
   These turn the power of external devices on/off and call up menus.
   Preset codes need to be registered in order to use these buttons (page 207).

4 Input source select buttons
   These select the input source (page 54).

5 FAVORITE STATION buttons (1 – 4)
   With a single press of these, you can call up registered radio stations and contents (page 95).

6 Channel/page search buttons (CH/PAGE ▲▼)
   These select preset radio stations or switch pages (page 69).

7 MUTE button (MUTE)
   This mutes the output audio (page 55, 138).

8 Information button (INFO)
   This displays the status information on the TV screen (page 200).

   **Tuning up / Tuning down buttons (TUNE +, −)**
   These operate the tuner (page 65).

12 **Number / Character buttons**
   These enter letters or numbers into the unit (page 148).

13 **Remote control signal transmitter**
   This transmits signals from the remote control unit (page 8).

14 **POWER button** (◇)
   This turns the power on/off (page 54).

15 **TV operation buttons**
   (TV ◇ / TV MENU / TV INPUT)
   These turn the TV power on/off, switch the TV input and call up menus.
   Preset codes need to be registered in order to use these buttons (page 208).
16 **AVR-operation mode button**
When using a remote control with preset codes registered, press AVR before other operations in order to operate the unit.

17 **InstaPrevue button**
This displays the InstaPrevue screen (page 123).

18 **VOLUME buttons (▲▼)**
These adjust the volume level (page 55, 138).

19 **OPTION button**
This displays the option menu on the TV screen (page 100).

20 **ENTER button**
This determines the selection (page 146).

21 **SETUP button**
This displays the menu on the TV screen (page 146).

22 **SOUND MODE buttons**
These select the sound mode (page 108).
  - MOVIE button
  - MUSIC button
  - GAME button
  - PURE button

23 **SLEEP button**
This sets the sleep timer (page 126).
### Connections

**Speaker connection** (page 25)

**Connecting a TV** (page 36)

**Connecting a playback device** (page 40)

**Connecting an iPod or USB memory device to the USB port** (page 46)

**Connecting an FM antenna** (page 48)

**Connecting to a home network (LAN)** (page 49)

**Connecting an external control device** (page 51)

**Connecting the power cord** (page 52)

#### NOTE

- Do not plug in the power cord until all connections have been completed. However, when the “Setup Assistant” is running, follow the instructions in the “Setup Assistant” (page 7) screen for making connections. (During “Setup Assistant” operation, the input/output connectors do not conduct current.)
- Do not bundle power cords together with connection cables. Doing so can result in noise.

### Cables used for connections

Provide necessary cables according to the devices you want to connect.

</tbody>
</table>
Speaker connection

Install speakers and connect them to this unit (page 25, 28).

Speaker installation

Determine the speaker system depending on the number of speakers you are using and install each speaker and subwoofer in the room. Here, we explain how to install the speakers using a typical example.

**FL/FR**: Place the FRONT left and right speakers an equal distance from the main listening position. The distance between each speaker and your TV should also be the same.

**C**: Place the CENTER speaker in between the front speakers and above or below your TV.

**SL/SR**: Place the SURROUND left and right speakers an equal distance to the left and right sides of the main listening position. If you don’t have Surround Back speakers, move the surround speakers slightly behind your listening position.

**SBL/SBR (SB)**: Place the SURROUND BACK left and right speakers an equal distance from the main listening position and directly behind the main listening position. If you only have one Surround Back speaker, center it.

**FHL/FHR**: Place the FRONT HEIGHT left and right speakers just outside of the front left and right speakers. Mount them as close to the ceiling as possible and aim them towards the main listening position.

**FWL/FWR**: Place the FRONT WIDE left and right speakers outside of the front left and right speakers so that there is an equal distance between all front speakers.

**SW**: Place the SUBWOOFER at a convenient location near the front speakers. If you have two subwoofers, place them symmetrically across the front of your room.
This unit is compatible with Audyssey DSX® (page 245), Dolby Pro Logic IIz (page 247) and DTS Neo:X (page 248) which offers an even wider and deeper surround sensation.

When using Audyssey DSX®, install front wide speakers or front height speakers. When using Dolby Pro Logic IIz, install front height speakers.

- Use the illustration below as a guide for how high each speaker should be installed. The height does not need to be exactly the same.

![Diagram of speaker placement](image)

**NOTE**

- You cannot have audio output from the surround back speakers, front height speakers and front wide speakers simultaneously.
**Typical speaker layout**

*1 22° – 30°
*2 22° – 45°
*3 55° – 60°
*4 90° – 110°
*5 135° – 150°

- When using a single surround back speaker, place it directly behind the listening position.

*2 120°
Speaker connection

Here we connect the speakers in the room to this unit. This section explains how to connect them using typical examples.

**NOTE**
- Disconnect this unit's power plug from the power outlet before connecting the speakers. Also, turn off the subwoofer.
- Connect so that the speaker cable core wires do not protrude from the speaker terminal. The protection circuit may be activated if the core wires touch the rear panel or if the + and – sides touch each other (see page 250 “Protection circuit”).
- Never touch the speaker terminals while the power cord is connected. Doing so could result in electric shock. When the “Setup Assistant” is running, follow the instructions in the “Setup Assistant” screen for making connections. (Power is not supplied to the speaker terminals while the “Setup Assistant” is running.)
- Use speakers with an impedance of 6 – 16 Ω/ohms.

### Connecting the speaker cables

Carefully check the left (L) and right (R) channels and + (red) and – (black) polarities on the speakers being connected to this unit, and be sure to connect the channels and polarities correctly.

1. **Peel off about 10 mm of sheathing from the tip of the speaker cable, then either twist the core wire tightly or terminate it.**

2. **Turn the speaker terminal counterclockwise to loosen it.**

3. **Insert the speaker cable’s core wire to the hilt into the speaker terminal.**

4. **Turn the speaker terminal clockwise to tighten it.**
Connecting the subwoofer
Use a subwoofer cable to connect the subwoofer.
Two subwoofers can be connected to this unit.
To use two subwoofers, set “Subwoofer” to “2 spkrs” using the “Speaker Config.” (page 184) setting.
The level and distance can be set separately for Subwoofer 1 and Subwoofer 2.
About the speaker cable label (supplied) for channel identification

The channel display section for speaker terminals on the rear panel is color-coded for each channel to be identifiable.

</tbody>
</table>

Attach the speaker cable label for each channel to its speaker cable as shown in the diagram. Then, make connection so that the color of the speaker terminal matches that of the speaker cable label.
Connecting 11.1-channel speakers

The illustrations shows a connection example for performing 11.1-channel playback.

- When using this connection, also set "Assign Mode" in the menu to “7.1ch (SB/FH/FW)” and “9.1ch (SB/FH/FW)” (page 182).
- When “Assign Mode” in the menu is set to “9.1ch(SB/FH/FW)”, use an external amp to connect the pre-out terminal to the channel specified in “Main Pre-amps” (page 183).
- When using a signal surround back speaker, connect it to the SURROUND BACK L terminal.
About the front B speaker connections

- For how to connect the front, center, and surround speaker and the subwoofer to this unit, see “Connecting 11.1-channel speakers” (page 31).

- When using this connection, also set “Assign Mode” in the menu to “5.1ch + Front B” (page 182).
About the Bi-amp connection

Some audiophile loudspeakers can be connected to an amplifier with two separate amp-to-speaker connections per each speaker. One amplifier channel’s output is hooked up to the speaker’s bass driver (woofer), while the other amplifier drives the upper range transducers (tweeter, or in some cases midrange and tweeter). This connection method has one amplifier channel driving one half of the bi-amp speaker, and avoids electrical interference between the speaker’s bass and treble drivers and the driving amplifier channels. You can assign 4 amp channels to connect to one pair of bi-amp capable speakers. Bi-amp capable speakers always have two sets of speaker input connector pairs, one for the bass range and one for the treble range. If you’re unsure about whether or not your speakers are bi-amp capable, consult the owner’s manual that came with the speakers.

- For how to connect the center and surround speaker and the subwoofer to this unit, see “Connecting 11.1-channel speakers” (page 31).

![Diagram of bi-amp connections]

- When using this connection, also set “Assign Mode” in the menu to “5.1ch (Bi-Amp)” (page 182).

**NOTE**
- When making bi-amp connections, be sure to remove the short-circuiting plate or wire between the speaker’s woofer and tweeter terminals.
About connecting front speakers exclusively for 2-channel playback

You can connect the other from speaker for 2-channel playback using the DIRECT mode or STEREO mode. The speakers used exclusively for multi-channel playback and the speaker used exclusively for 2-channel playback are automatically switched for playback in accordance with the sound mode.

- For how to connect the front, center, and surround speaker and the subwoofer to this unit, see “Connecting 11.1-channel speakers” (page 31).

Multi-channel playback (Sound mode)

2-channel playback (DIRECT/STEREO mode)

Switching

When using this connection, also set “Assign Mode” in the menu to “7.1ch/2ch Front” (page 182).
Connecting an external power amplifier

- You can use this unit as a pre-amp by connecting an external power amplifier to the PRE OUT connectors. Adding an external power amplifier with a higher power output rating than this unit may be beneficial with loudspeakers that have lower efficiency and/or lower impedances, or to reach higher volume levels.
- Select the terminal to use and connect the device.

When using just one surround back speaker, connect it to the left channel (L) terminal.
Connecting a TV

Connect a TV to this unit so that the input video is output to the TV. You can also enjoy audio from the TV on this unit.

How to connect a TV depends on the connectors and functions equipped on the TV. ARC function plays TV audio on this unit by sending the TV audio signal to this unit via HDMI cable.

Is the TV equipped with an HDMI connector?

Yes

Is the TV compatible with the ARC (Audio Return Channel)?

Yes

Connection 1
(page 37)

No

Connection 2
(page 38)

Yes

No

Connection 3
(page 39)
Connection 1: TV equipped with an HDMI connector and compatible with the ARC (Audio Return Channel)

Use an HDMI cable to connect a TV that is compatible with the ARC function to this unit. Set “HDMI Control” (page 163) to “On” when using a TV that supports the ARC function.
Connection 2: TV equipped with an HDMI connector

Use an HDMI cable to connect the TV to this unit.
To listen to audio from TV on this unit, use an optical cable to connect the TV to this unit.

To output audio signals that are input from the HDMI input connector to a TV connected via HDMI, set “HDMI Audio Out” (page 162) to “TV”.
Connection 3: TV equipped without an HDMI connector

Use a video or a component cable to connect the TV to this unit.
To listen to audio from TV on this unit, use an optical cable to connect the TV to this unit.
Connecting a playback device

This unit is equipped with three types of video input connectors (HDMI, component video and composite video) and three types of video output connectors (HDMI, component video and composite video).

Select input connectors on this unit according to the connectors equipped on the device you want to connect.

If the device connected to this unit is equipped with an HDMI connector, it is recommended to use HDMI connections.

In the HDMI connection, audio and video signals can be transmitted through a single HDMI cable.

- Connecting a set-top box (Satellite tuner/cable TV) (page 41)
- Connecting a DVD player (page 42)
- Connecting a Blu-ray Disc player compatible with the Denon Link HD function (page 43)
- Connecting a video camcorder or other device (page 44)
- Connecting a turntable (page 45)

• Connect devices to this unit as indicated by the input sources printed on the audio/video input connectors of this unit.
• This unit can change the source that is assigned to the HDMI IN, DIGITAL AUDIO IN, COMPONENT VIDEO IN, VIDEO IN and AUDIO IN connectors. How to change the source assigned to connectors (page 168 “Input Assign”).
Connecting a set-top box (Satellite tuner/cable TV)

This explanation uses the connection with a satellite tuner/cable TV STB as an example. Select input connectors on this unit according to the connectors equipped on the device you want to connect.
Connecting a DVD player

This explanation uses the connection with a DVD player as an example.
Select input connectors on this unit according to the connectors equipped on the device you want to connect.
Connecting a Blu-ray Disc player compatible with the Denon Link HD function

By making a Denon Link HD connection to a player compatible with the Denon Link HD function, you can enjoy higher quality playback compared with when only the HDMI connector connection is made.

When making this connection, set “Input Assign” – “DIGITAL” (page 169) to “D.LINK”.

- Both HDMI and Denon Link HD connections are required for this connection method.
- Set the audio input mode to “Auto” or “HDMI” using “Input Mode” (page 171) menu.
Connecting a video camcorder or other device

This explanation uses the connection with a video camcorders as an example.
Connect a playback device to this unit, such as a video camcorder or game console.
Connecting a turntable

This unit is compatible with turntables equipped with a moving magnet (MM) phono cartridge. When you connect to a turntable with a low output moving coil (MC) cartridge, use a commercially available MC head amp or a step-up transformer.

If you set this unit’s input source to “PHONO” and you accidentally increase the volume without having a turntable connected, you may hear a hum noise from the speakers.

NOTE
- The SIGNAL GND terminal of this unit is not a safety ground connection. Connect it to reduce noise when noise is excessive. Note that depending on the turntable, connecting the ground line may have the reverse effect of increasing noise. In this case, it is not necessary to connect the ground line.
Connecting an iPod or USB memory device to the USB port

To connect an iPod to this unit, use the USB adapter cable that was supplied with the iPod. For operating instructions see “Playing an iPod” (page 56) or “Playing a USB memory device” (page 61).

- Denon does not guarantee that all USB memory devices will operate or receive power. When using a portable USB hard disk drive (HDD) which came with an AC adapter, use that device’s supplied AC adapter.

**NOTE**
- USB memory devices will not work via a USB hub.
- It is not possible to use this unit by connecting the unit’s USB port to a PC via a USB cable.
- Do not use an extension cable when connecting a USB memory device. This may cause radio interference with other devices.
■ Supported iPod models

- iPod classic
  - iPod classic 80GB
  - iPod classic 160GB (2007)
  - iPod classic 160GB (2009)

- iPod nano
  - iPod nano 3rd generation (video) 4GB 8GB
  - iPod nano 4th generation (video) 8GB 16GB
  - iPod nano 5th generation (video camera) 8GB 16GB
  - iPod nano 6th generation 8GB 16GB
  - iPod nano 7th generation 16GB

- iPod touch
  - iPod touch 1st generation 8GB 16GB 32GB
  - iPod touch 2nd generation 8GB 16GB 32GB
  - iPod touch 3rd generation 32GB 64GB
  - iPod touch 4th generation 8GB 32GB 64GB
  - iPod touch 5th generation 32GB 64GB

- iPhone
  - iPhone 4GB 8GB 16GB
  - iPhone 3G 8GB 16GB
  - iPhone 3GS 8GB 16GB 32GB
  - iPhone 4 8GB 16GB 32GB
  - iPhone 4S 16GB 32GB 64GB
  - iPhone 5 16GB 32GB 64GB
Connecting an FM antenna

After connecting the antenna and receiving a broadcast signal (page 65 “Listening to FM broadcasts”), fix the antenna with tape in a position where the noise level becomes minimal.

**NOTE**
- Do not connect two FM antennas simultaneously.
- If you are unable to receive a good broadcast signal, we recommend installing an outdoor antenna. For details, inquire at the retail store where you purchased the unit.
Connecting to a home network (LAN)

You can connect this unit to your home network (LAN) to perform various types of playbacks and operations as follows.

- Playback of network audio such as Internet Radio and from your media server(s)
- Playback of music content from online streaming services
- Using the Apple AirPlay function
- Operation on this unit via the network
- Firmware Update

With this unit, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.

When using this unit connected to a network with no DHCP function, make the settings for the IP address, etc., at "Network" (page 191).

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.
When using this unit, we recommend you use a router equipped with the following functions:

• Built-in DHCP server
  This function automatically assigns IP addresses on the LAN.
• Built-in 100BASE-TX switch
  When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.
• Use only a shielded STP or ScTP LAN cable which is easily available at electronics stores (CAT-5 or greater recommended).
• The normal shielded-type LAN cable is recommended. If a flat-type cable or unshielded-type cable is used, other devices could be affected by noise.

**NOTE**

• The types of routers that can be used depend on the ISP. Contact your ISP or a computer shop for details.
• This unit is not compatible with PPPoE. A PPPoE-compatible router is required if you have a contract for a type of line set by PPPoE.
• Do not connect an NETWORK connector directly to the LAN port/ Ethernet connector on your computer.
Connecting an external control device

REMOTE CONTROL jacks

If this unit is installed in a location that is out of range of the signal from the remote control unit (such as when installed in a cabinet), you can still operate the unit and the devices connected to it by using a commercially available IR receiver. You can also use it to remotely control ZONE2 and ZONE3 (another room).

TRIGGER OUT jacks

When a device with TRIGGER IN jack is connected, the connected device’s power on/standby can be controlled through linked operation to this unit. The TRIGGER OUT jack outputs a maximum 12 V DC /150 mA electrical signal.

NOTE

• Use a monaural mini-plug cable for connecting the TRIGGER OUT jacks. Do not use a stereo mini-plug cable.
• If the permissible trigger input level for the connected device is larger than 12 V DC/150 mA, or has shorted, the TRIGGER OUT jack cannot be used. In this case, turn off the power to the unit, and disconnect it.
Connecting the power cord

After completing all the connections, insert the power plug into the power outlet.

To household power outlet
(AC 230 V, 50/60 Hz)

Basic operation

Turning the power on

1 Press POWER button to turn on power to the unit.

- You can also switch the power to standby by pressing the POWER button on the main unit.

Selecting the input source

1 Press the input source select button to be played back. The desired input source can be selected directly.

- You can also select the input source by turning the SOURCE SELECT knob on the main unit.
Adjusting the master volume

1 Use VOLUME ▲▼ to adjust the volume.
   • The variable range differs according to the input signal and channel level setting.

• You can also adjust the master volume by turning MASTER VOLUME on the main unit.

Turning off the sound temporarily

1 Press MUTE ØX.
   • “MUTE” indicator on the display flashes.
   • ØX appears on the TV screen.

• The sound is reduced to the level set at “Mute Level” (page 155).
• To cancel, press MUTE ØX again. Muting can also be cancelled by adjusting the master volume.

Playing a DVD player/Blu-ray Disc player

The following describes the procedure for playing DVD player/Blu-ray Disc player.

1 Prepare for playback.
   ① Turn on the power of the TV, subwoofer and player.
   ② Change the TV input to the input of this unit.

2 Press POWER ◊ to turn on power to the unit.

3 Press DVD or Blu-ray to switch an input source for a player used for playback.

4 Play the DVD player or Blu-ray Disc player.
Playing an iPod

- You can use the USB cable provided with the iPod to connect the iPod with the unit’s USB port and enjoy music stored on the iPod.
- For information on the iPod models that can be played back with this unit, see “Supported iPod models” (page 47).
Listening to music on an iPod

1. Connect the iPod to the USB port (page 46).

2. Press iPod/USB to switch the input source to “iPod/USB”.
   “Browse From iPod” is displayed on the display of this unit.
   • Nothing is displayed on the TV screen.

3. Operate iPod itself directly while seeing the iPod screen to play back music.

   • The iPod display modes include “From iPod” and “On-Screen”.
     By default, “From iPod”, where you directly operate the iPod itself while looking at the iPod screen, is set.
     • To change to “On-Screen”, where you perform operations while having the iPod information displayed on the TV screen, see “Setting operation mode (iPod Browse Mode)” (page 58).

   NOTE

   • Depending on the type of iPod and the software version, some functions may not operate.
   • Note that Denon will accept no responsibility whatsoever for any problems arising with the data on an iPod when using this unit in conjunction with the iPod.

■ Playing the AirPlay (page 97)

■ Operations available through the OPTION button
   • Setting operation mode (iPod Browse Mode) (page 58)
Setting operation mode (iPod Browse Mode)

In this mode, various lists and screens during playback on the iPod are displayed on the TV screen.
This section describes the steps up to playing back tracks on the iPod in “On-Screen”.

1 **Press OPTION.**
   The option menu screen is displayed.

2 **Select “iPod Browse Mode”, then press ENTER.**
   The “iPod Browse Mode” screen is displayed.

3 **Use ‹ › to select “On-Screen”, then press ENTER.**
   - Operations available for “On-Screen” and “From iPod” are listed below.

</tbody>
</table>

#### Operations available through the OPTION button
- Performing repeat playback (Repeat) (page 101)
- Performing random playback (Random) (page 101)

- The display switches between track title, artist name, and album title etc. each time the STATUS button is pressed during playback with “iPod Browse Mode” set to “On-Screen”.
- English letters, numbers and certain symbols are displayed. Incompatible characters are displayed as “.” (period).
Performing repeat playback (Repeat)

1. Press OPTION with “iPod Browse Mode” set to “On-Screen”.
   The option menu screen is displayed.

2. Use ▲▼ to select “Repeat”, then press ENTER.

3. Use ◀▶ to select repeat playback mode.
   - Off (Default) : Repeat playback mode is canceled.
   - One : A file being played is played repeatedly.
   - All : All files in the folder currently being played are played repeatedly.

4. Press ENTER.
   The display returns to the playback screen.

Performing random playback (Random)

1. Press OPTION with “iPod Browse Mode” set to “On-Screen”.
   The option menu screen is displayed.

2. Use ▲▼ to select “Random”, then press ENTER.

3. Use ◀▶ to select random playback mode.
   - Off (Default) : Disable random playback.
   - On : Randomly play back all tracks in the current playback folder.

4. Press ENTER.
   The display returns to the playback screen.

- During random playback, each time playback of a track is completed, another track is randomly selected for playback from tracks in the folder. Therefore, it’s possible that you may hear a track played back more than once during random playback.
Playing a USB memory device

- Playing back music or viewing still picture (JPEG) files stored on a USB memory device.
- Only USB memory devices conforming to mass storage class and MTP (Media Transfer Protocol) standards can be played on this unit.
- This unit is compatible with USB memory devices in “FAT16” or “FAT32” format.
- This unit can play back the following files.
  - WMA (Windows Media Audio)
  - MP3 (MPEG-1 Audio Layer-3)
  - WAV
  - MPEG-4 AAC
  - FLAC (Free Lossless Audio Codec)
  - JPEG
  - ALAC (Apple Lossless Audio Codec)
Playing files stored on USB memory devices

1 Connect the USB memory device to the USB port (page 46).

2 Press iPod/USB to switch the input source to “iPod/USB”.

3 Use △▽ to select the file to be played, then press ENTER. Playback starts.

<table>
<thead>

</tr>
</tbody>
</table>

* This function is available while an MP3 / WAV / AAC / FLAC file is being played back.

- When an MP3 music file includes album art data, the album art can be displayed while playing the file.

**NOTE**

- Note that Denon will accept no responsibility whatsoever for any problems arising with the data on a USB memory device when using this unit in conjunction with the USB memory device.
Operations available through the OPTION button

- Performing repeat playback (Repeat) (page 101)
- Performing random playback (Random) (page 101)
- Searching content with keywords (Text Search) (page 103)
- Playing back still pictures in sequential order (Slideshow Interval) (page 105)
Listening to FM broadcasts

For antenna connections, see “Connecting an FM antenna” (page 48).
Listening to FM broadcasts

1. Press TUNER to switch the input source to “TUNER”.

   - **[TV Screen]**
   - **[Display of this unit]**

   

   01 FM 87.50MHz

2. Press TUNE + or TUNE – to select the station you want to hear.

   Scanning is performed until it finds an available radio station. When it finds a radio station, it stops the scan automatically and tunes in.

   • The modes for receiving FM broadcasts consists of “Auto” mode that automatically searches available broadcast stations and “Manual” mode that lets you tune in using buttons to change the frequency. The default setting is “Auto”. You can also use “Direct Tune” to tune in by entering the frequency directly.

   - In “Auto” mode, you cannot tune in to radio stations if the reception is not good. If this is the case, then use the “Manual” mode or “Direct Tune” to tune in.

<table>

</tbody>
</table>
Adding to the FAVORITE STATION button (\textit{page 95})

Operations available through the OPTION button

- Tuning in by entering the radio frequency (Direct Tune) (\textit{page 66})
- RDS search (\textit{page 67})
- PTY search (\textit{page 67})
- TP search (\textit{page 68})
- Radio Text (\textit{page 69})
- Changing the tuning mode (Tune Mode) (\textit{page 69})
- Presetting the current broadcast station (Preset Memory) (\textit{page 70})
- Tuning in to radio stations and presetting them automatically (Auto Preset Memory) (\textit{page 71})
- Specify a name for the preset broadcast station (Preset Name) (\textit{page 71})
- Skipping preset broadcast stations (Preset Skip) (\textit{page 72})

Tuning in by entering the radio frequency (Direct Tune)

You can enter the receiving frequency directly to tune in.

1. Press OPTION.
   The option menu screen is displayed.

2. Use $\Delta \nabla$ to select “Direct Tune”, then press ENTER.
   The direct tuner screen is displayed and “–” in the display flashes.

3. Use $\Delta \nabla$ or 0 – 9 to select a number and press $\triangleright$.
   The screen that lets you enter the frequency is displayed.
   • If $\triangleleft$ is pressed, the immediately preceding input is cancelled.

4. Repeat step 3 and enter the frequency of the radio station you want to hear.

5. When setting is completed, press ENTER.
   The preset frequency is tuned in.
RDS search

RDS is a broadcasting service which allows a station to send additional information along with the regular radio program signal. Use this function to automatically tune to FM stations that provide the RDS service. Note that the RDS function only works when receiving RDS compatible stations.

1. Press OPTION.
   The option menu screen is displayed.
2. Use △▽ to select “RDS Search”, then press ENTER.
3. Press ENTER.
   The search for RDS stations begins automatically.

* If you use ◀▶ within 5 seconds after the broadcast station name is shown on the display, you can search for a different station.

PTY search

Use this function to find RDS stations broadcasting a designated program type (PTY).

PTY identifies the type of RDS program. The program types and their displays are as follows:

</tbody>
</table>
1 Press OPTION.
The option menu screen is displayed.

2 Use △▽ to select “PTY Search”, then press ENTER.

3 Use △▽ to call out the desired program type.

4 Press ENTER.
PTY search begins automatically.

• If you use ◀▶ within 5 seconds after the broadcast station name is shown on the display, you can search for a different station.

TP search
TP identifies programs that carry traffic announcements. This allows you to easily find out the latest traffic conditions in your area before leaving home. Use this function to find RDS stations broadcasting traffic programs (TP stations).

1 Press OPTION.
The option menu screen is displayed.

2 Use △▽ to select “TP Search”, then press ENTER.

3 Press ENTER.
TP search begins automatically.

• If you use ◀▶ within 5 seconds after the broadcast station name is shown on the display, you can search for a different station.
Radio Text

RT allows RDS stations to send text messages that appear on the display. “Radio Text” appears on the display when radio text data is received.

1 Press OPTION. The option menu screen is displayed.

2 Use △▼ to select “Radio Text”, then press ENTER.

3 Use ◀▶ to select “On”, then press ENTER.
   • While receiving an RDS broadcast station, the text data broadcast from the station is displayed.
   • If no text data is being broadcast, “NO TEXT DATA” is displayed.

Changing the tuning mode (Tune Mode)

You can change the mode for tuning into FM broadcasts. If you cannot tune in automatically with “Auto” mode, then change the mode to “Manual” and tune in manually.

1 Press OPTION. The option menu screen is displayed.

2 Use △▼ to select “Tune Mode”, then press ENTER.

3 Use ◀▶ to select tuning mode, then press ENTER.
   Auto : Automatically tune to the station.
   Manual : Manually tune to the station.

Listening to preset stations

1 Use CH/PAGE ▲▼ or 0 – 9 to select the desired preset channel.
Presetting the current broadcast station (Preset Memory)

Your favorite broadcast stations can be preset so that you can tune them in easily. Up to 56 stations can be preset.

1. **Tune in the broadcast station you want to preset** (page 65 “Listening to FM broadcasts”).

2. **Press OPTION.**
   The option menu screen is displayed.

3. **Use △▽ to select “Preset Memory”, then press ENTER.**
   The list of already preset channels is displayed.

4. **Use △▽ or 0 – 9 to select the channel you want to preset, then press ENTER.**
   The current broadcast station that is preset.
   • To preset other stations, repeat steps 1 to 4.

</tbody>
</table>
**Tuning in to radio stations and presetting them automatically (Auto Preset Memory)**

Up to 56 stations can be preset.
If “Auto Preset Memory” is performed after performing “Preset Memory”, the “Preset Memory” settings will be overwritten.

1. **Press OPTION.**
   The option menu screen is displayed.

2. **Use △▽ to select “Auto Preset Memory”, then press ENTER.**

3. **Press ENTER.**
   The unit starts to tune in to radio stations automatically and preset them.
   • When presetting is completed, “Completed” is displayed for about 5 seconds and the option menu screen turns off.

**Specify a name for the preset broadcast station (Preset Name)**

You can set the name to the preset broadcast station or change it. Up to eight characters can be input.

1. **Press OPTION.**
   The option menu screen is displayed.

2. **Use △▽ to select “Preset Name”, then press ENTER.**
   The Preset Name screen is displayed.

3. **Use ◀▶ to select the group of the broadcast station you want to name.**

4. **Use △▽ to select the broadcast station you want to name, then press ENTER.**

5. **Use △▽ to select a name label, then press ENTER.**
   The screen that lets you edit the preset name is displayed.
   • If you select “Set Defaults”, then the unit returns to displaying the frequency.

6. **Enter the characters, then press “OK”.**
   • For character input, see page 147.
Skipping preset broadcast stations (Preset Skip)

You can set in advance, the stations you do not want to be displayed when tuning in, by groups or by stations. The preset skip setting is useful when tuning in, because only your favorite stations are displayed.

1. **Press OPTION.**
   The option menu screen is displayed.

2. **Use △▽ to select “Preset Skip”, then press ENTER.**
   The Preset Skip screen is displayed.

3. **To set the stations you want to skip by groups**
   1. **Use ◄ ► to select the group of broadcast stations you want to skip.**
   2. **Press △ to select “Set No. * – * to Skip”, then press ENTER.**
      All broadcast stations in the group “* – *” you selected are not displayed.
      (* are the selected group numbers)

   **Cancelling preset skip**

1. While the Preset Skip screen is displayed, use ◄ ► to select a group containing a broadcast station to cancel the skip for.

2. **Use △▽ to select a broadcast station to cancel the skip for.**

3. **Use ◄ ► to select “On”.**
   The skip is cancelled.

**NOTE**
- You cannot cancel the skip for each group.

---

- Press OPTION.
- Use △▽ to select “Preset Skip”, then press ENTER.
- To set the stations you want to skip by groups:
  1. Use ◄ ► to select the group of broadcast stations you want to skip.
  2. Press △ to select “Set No. * – * to Skip”, then press ENTER.
     All broadcast stations in the group “* – *” you selected are not displayed.
     (* are the selected group numbers)

- Cancelling preset skip:
  1. While the Preset Skip screen is displayed, use ◄ ► to select a group containing a broadcast station to cancel the skip for.
  2. Use △▽ to select a broadcast station to cancel the skip for.
  3. Use ◄ ► to select “On”.
     The skip is cancelled.

**NOTE**
- You cannot cancel the skip for each group.
Listening to Internet Radio

- Internet Radio refers to radio broadcasts distributed over the Internet. Internet Radio stations from around the world can be received.
- The broadcast station types and specifications supported by this unit for playback are as follows:
  - WMA (Windows Media Audio)
  - MP3 (MPEG-1 Audio Layer-3)
  - MPEG-4 AAC
Listening to Internet Radio

1 Prepare for playback.
   • Check the network environment, then turn on this unit’s power
     (page 49 “Connecting to a home network (LAN)”).

2 Press NETWORK.
   • You can also press INTERNET RADIO to select the input source
     “Internet Radio” directly.

3 Use ▲▼◄► to select “Internet Radio”, then press ENTER.

4 Use ▲▼ to select the item you want to play, then press ENTER.

   • Displays typical Internet Radio stations your country.

Search Stations:
   • Displays all Internet Radio stations that this unit can tune in to.

Search Podcasts:
   • Displays Internet Radio stations in the podcasts that this unit can
     tune in to.

Recommended Stations:
   • Displays recommended Internet Radio stations.
radiodenon.com:
- Displays Internet Radio stations added to favorites in vTuner. For instructions on how to add to favorites in vTuner, see “Using vTuner to add Internet Radio stations to favorites” (see page 76).

Recently Played:
- Displays recently played Internet Radio stations. Up to 20 stations can be stored in “Recently Played”.

Search by Keyword:
- Displays Internet Radio stations searched by keyword. For character input, see page 147.

Use △▼ to select the station, then press ENTER.
Playback starts once buffering reaches “100%”.

NOTE
- The display switches between track title and radio station name etc. each time the STATUS button is pressed.
- Any characters that cannot be displayed are replaced with “.” (period).

Playing the last played Internet Radio station

1 Press INTERNET RADIO.
The source switches to “Internet Radio” and the last played radio station plays.
Using vTuner to add Internet Radio stations to favorites

There are many Internet Radio stations in the world, and this unit can tune into these stations. But finding the radio station you want to hear may be difficult, because there are too many stations. If this is the case, then please use vTuner, an Internet Radio station search website specifically designed for this unit. You can use your PC to search Internet Radio stations and add them as your favorites. This unit can play radio stations added to vTuner.

1. **Check the MAC address of this unit** ([page 191](#) “Information”).
   • The MAC address is necessary when you create an account for vTuner.

2. **Use your PC to access the vTuner website** ([http://www.radiodenon.com](http://www.radiodenon.com)).

3. **Enter the MAC address of this unit, then click “Go”**.

4. **Enter your E-mail address and a password of your choice**.

5. **Select the search criteria (genre, region, language, etc.) of your choice**.
   • You can also enter a keyword to search for a station you want to hear.

6. **Select the radio station of your choice from the list, and then click the Add to Favorites icon**.

7. **Enter the name of the favorite group, then click “Go”**.
   A new favorite group that includes the selected radio station is created.
   • Internet Radio stations added to favorites in vTuner can be played from “radiodenon.com” ([page 74](#)) with this unit.

### Operations available through the OPTION button

- Add to favorites from the Option menu (Save to Favorites) ([page 102](#))
- Searching content with keywords (Text Search) ([page 103](#))
- Playing back music and a favorite picture at the same time (Slideshow) ([page 104](#))
Playing back files stored on a PC and NAS

- This unit can play back music files and playlists (m3u, wpl) stored on a PC and on Network Attached Storage (NAS) that supports DLNA.
- The network audio playback function of this unit connects to the server using technologies shown below.
  - Windows Media Player Network Sharing Service
  - Windows Media DRM10
- This unit can play back the following files.
  - WMA (Windows Media Audio)
  - MP3 (MPEG-1 Audio Layer-3)
  - WAV
  - MPEG-4 AAC
  - FLAC (Free Lossless Audio Codec)
  - JPEG
  - ALAC (Apple Lossless Audio Codec)
Applying media sharing settings

Here, we apply the settings to share music files stored on a PC and NAS on the network. If you are using a Media Server, be sure to apply this setting first.

- **When using Windows Media Player 12 (Windows 7 / Windows 8)**

1. Start up Windows Media Player 12 on the PC.
2. Select “More streaming options...” in the “Stream”.
3. Select “Allowed” in the drop-down list for “AVR-X4000”.
4. Select “Allowed” in the drop-down list for “Media programs on this PC and remote connections...”.
5. Click “OK” to finish.

- **When using Windows Media Player 11**

1. Start up Windows Media Player 11 on the PC.
2. Select “Media Sharing” in the “Library”.
3. Click the “Share my media” check box, select “AVR-X4000”, and then click “Allow”.
4. As you did in step 3, select the icon of the device (other PCs and mobile devices) you want to use as a media controller, and then click “Allow”.
5. Click “OK” to finish.

- **Sharing media stored in NAS**

Change settings on the NAS to allow this unit and other devices (PCs and mobile devices) used as media controllers to access the NAS. For details, see the owner’s manual that came with the NAS.
Playing back files stored on a PC and NAS

Use this procedure to play music files, image files or playlists.

1 **Prepare for playback.**
   ① Check the network environment, then turn on this unit’s power (page 49 “Connecting to a home network (LAN)”).
   ② Prepare the computer (Computer’s operating instructions).

2 **Press NETWORK.**

3 **Use △▽◁▷ to select “Media Server”, then press ENTER.**

4 **Use △▽ to select the server including the file to be played, then press ENTER.**

5 **Use △▽ to select the file, then press ENTER.**
Playback starts once buffering reaches “100%”.

* This function is available while an MP3 / WAV / AAC / FLAC file is being played back.
• The display switches between track title, artist name, and album title each time the STATUS button is pressed.
• When a WMA (Windows Media Audio), MP3 or MPEG-4 AAC file includes album art data, the album art can be displayed while the music files are playing.
• If you use Ver.11 or later of Windows Media Player, the album art for WMA files can be displayed.
• WMA Lossless files can be played when using a server supporting transcoding, such as Windows Media Player Ver. 11 or later.

**NOTE**

• When playing back music files with your PC or NAS connected through wireless LAN, audio may be interrupted depending on your wireless LAN environment. In this case, play back music files with your PC or NAS connected through wired LAN.
• Depending on the size of the still picture (JPEG) file, some time may be required for the file to be displayed.
• The order in which the tracks/files are displayed depends on the server specifications. If the tracks/files are not displayed in alphabetical order due to the server specifications, searching by the first letter may not work properly.

### Operations available through the OPTION button

- Performing repeat playback (Repeat) ([page 101](#))
- Performing random playback (Random) ([page 101](#))
- Add to favorites from the Option menu (Save to Favorites) ([page 102](#))

- Playing back still pictures in sequential order (Slideshow Interval) ([page 105](#))
- Displaying your desired video during audio playback (Video Select) ([page 105](#))
- Adjusting the picture quality for your viewing environment (Picture Mode) ([page 106](#))
- Playing music in All Zone Stereo ([page 107](#))
Listening to Last.fm

• Last.fm learns what you love... and it’s a great way to discover new music.
Your new Denon AV receiver is very clever. You can create a free Last.fm profile when you start using your Denon AV receiver and magically keep track of all the songs you hear.
When you sign in at http://www.last.fm, you can see your top music charts, view thousands of reviews, biographies and artwork, and get recommendations for local performances you won’t want to miss.
With an affordable subscription you can enjoy an endless choice of personalized ad-free radio stations. Check out http://www.last.fm/subscribe today for more details.
Your subscription also gives you access to Last.fm radio on a great range of music products, including your Denon AV Receiver. This feature is not available in all countries.
Visit http://www.last.fm/hardware to find out more.

• Last.fm radio is not available in all countries. Please check http://www.last.fm/hardware for more information. You’ll also need a subscription. Get one today at http://www.last.fm/subscribe.
Listening to Last.fm

1 Prepare for playback.
   • Check the network environment, then turn on this unit’s power (page 49 “Connecting to a home network (LAN)”).

2 Press NETWORK.

3 Use ▲▼ to select “Last.fm”, then press ENTER.

4 If you have a Last.fm account, use ▲▼ to select “I have a Last.fm account”. Then press ENTER.

   • If you do not have a Last.fm account, press ▼ to select “I am new to Last.fm”. Then press ENTER.
   Create an account in accordance with the instructions on the screen.
5 Use ▲ ▼ ▶ to enter your username and password.

![Last.fm Account](image)

- For character input, see page 147.
- The password should be no longer than 99 characters.
- Press BACK to cancel the input. When “Cancel input?” is displayed, select “Yes”, then press ENTER.

6 After inputting the username and password, select “OK”, then press ENTER.

If the username and password match, the top menu for Last.fm is displayed.

7 Use ▲ ▼ to select menu and then press ENTER.

**Popular Stations**:  
- Play popular artists and tags in your area.

**Your Recent Stations**:  
- Play your recent stations.

**Your stations**:  
- You can play tracks from the following personalized stations (“Your Recommended Radio”, “Your Library”, “Your Friends’ Radio”, “Your Top Artists”).

**Search Stations**:  
- You can search station by Artist or Tag.
8 Use ▲▼ to select a station, and press ENTER to start playback.
Playback starts and the following screen appears.

9 Press ▶ while a track is playing.
The Last.fm menu screen is displayed.

---

**Love this track:**
- Loving tracks improves your Last.fm recommendations, and you can optionally share them on popular social networks.

**Ban this track:**
- If you ban a track, we won’t play it again. You can undo this on the Last.fm website.

**Scrobbling:**
- Scrobbling sends the tracks you played to your Last.fm account. You can see charts of the music you’ve been listening to, get recommendations for new music and events in your area and share your listening tastes with your friends. You can turn this service on or off using this option. The more you scrobble, the better your recommendations will become.
Log Out

Disassociate this unit from your Last.fm account.

1 Use △▽ to select “Log Out”, then press ENTER.

2 When the popup menu appears, use ◀▶ to select “Yes”, then press ENTER.
Viewing photographs on the Flickr site

• Flickr is an online photograph sharing service that started in 2004. You can use this unit to view photographs that have been made public by Flickr users. You do not need an account to use Flickr. To view photographs that you recorded yourself, you need an account in order to upload these photographs to the Flickr server. For details, see the Flickr homepage. http://www.flickr.com/

• You can view photographs shared by particular users, or all of the photographs shared on Flickr.
Viewing photographs shared by particular users

1 Prepare for playback.
   • Check the network environment, then turn on this unit’s power (page 49 “Connecting to a home network (LAN)”).

2 Press NETWORK.

3 Use ▲ ◄ ► to select “Flickr”, then press ENTER.

4 Use ▲ ◄ ► to select “Add Flickr Contact”, then press ENTER.

5 In “Contact”, add the screen name (user name you want to view) you want to add.
   • For character input, see page 147.

6 After inputting the “Contact”, press “OK”.
   The screen name is added to “Contact”, and the screen name you entered in Step 5 is displayed on the top screen of Flickr.
   • If you enter a screen name that does not exist, “The Flickr Contact you entered could not be found” is displayed. Check and enter the correct screen name.
7 Use △▽ to select the folder, and then press ENTER.

<table>

Viewing all photographs on Flickr

1 Use △▽ to select “All Content”, then press ENTER.

![Flickr settings](image)

3 Use △▽ to select the file, and then press ENTER. The selected file is displayed.

**NOTE**
- Depending on the file format, some photographs may not be viewable.

- **Operations available through the OPTION button**
  - Playing back still images in sequential order (Slideshow Interval) (page 105)
  - Displaying your desired video on the monitor during audio playback (Video Select) (page 105)
  - Adjusting the picture quality for your viewing environment (Picture Mode) (page 106)
  - Playing music in All Zone Stereo (page 107)

2 Use △▽ to select the folder, and then press ENTER.

**Interestingness**:
- Displays photographs that are popular from the number of user comments or number of times they are added as favorites.

**Recent**:
- Displays the most recently added photographs.

**Search by text**:
- Search for photographs by keyword.
Introduce your Denon to a whole new world of music. With Spotify, you can enjoy instant access to millions of songs. A Spotify Premium subscription is required. For details, see the Spotify homepage.

9 Press ▶ while a track is playing.
The Spotify menu screen is displayed.

![Spotify menu screen]

Star this track:
• Adds a star to the selected track.

Browse “Artist name”:
• Displays the list of albums by the artist of the track that is being played back.

Browse “Album name”:
• Displays the list of tracks on the album that is being played back.

- The display switches between track title, artist name, and album title each time the STATUS button is pressed.

**Operations available through the OPTION button**
- Performing repeat playback (Repeat) (page 101)
- Performing random playback (Random) (page 101)
- Displaying your desired video on the monitor during audio playback (Video Select) (page 105)
- Adjusting the picture quality for your viewing environment (Picture Mode) (page 106)
- Playing music in All Zone Stereo (page 107)
Adding to the FAVORITE STATION button

With a single press of these, you can call up registered radio stations and contents.
You can add up to four types of content.

1. **Press and hold one of the FAVORITE STATION 1 – 4 buttons for 3 seconds or longer while playing back a content or listening to a radio station.**
   The content you are playing back or the radio station you are listening to is registered to the pressed button.
   • Contents that can be added to the FAVORITE STATION button differ depending on the input source.

</tbody>
</table>
Playing back content added to the FAVORITE STATION button

You can easily call up content by pressing the FAVORITE STATION button.

1 Press one of the FAVORITE STATION 1 – 4 buttons that you added content to.
Playback starts.

• Internet Radio stations are already registered to the FAVORITE STATION 1 – 4 buttons. However, you may not be able to play the stations due to restrictions imposed by the radio stations.

**NOTE**

• The following operations update the database on the Media Server, which may make the added music files unplayable.
  • When you quit the Media Server and then restart it.
  • When music files are deleted or added on the Media Server.
AirPlay function

Enjoy music from your iTunes library with high quality sound anywhere in your home.

Streaming music stored in iPhone, iPod touch, or iPad directly to the unit

If you update your “iPhone/iPod touch/iPad” to iOS 4.2.1 or later, you can stream music stored in your “iPhone/iPod touch/iPad” directly to this unit.

1. **Make the Wi-Fi settings for iPhone, iPod touch, or iPad.**
   • For details, see your device’s manual.

2. **Startup iPhone, iPod touch, or iPad music or iPod app.**
   • is displayed on the iPhone, iPod touch or iPad screen.

3. **Tap the AirPlay icon .**

4. **Select the speaker you want to use.**
Playing iTunes music with this unit

1 Install iTunes 10, or later, on a Mac or Windows PC that is connected to the same network as this unit.

2 Turn this unit ON.
   Set “IP Control” (page 191) to “Always On” for this unit.
   
   **NOTE**
   • When “IP Control” is set to “Always On”, the unit consumes more standby power.

3 Launch iTunes and click the AirPlay icon displayed the window and select this unit from the list.

4 Choose a song and click play in iTunes.
   The music will stream to this unit.

Selecting multiple speakers (devices)

It is possible to play iTunes songs on your home’s AirPlay compatible speakers (devices) other than those of this unit.

1 Click the AirPlay icon and select “Multiple”.

2 Check the speakers you want to use.

   **NOTE**
   • In playback using the AirPlay function, the sound is output at the iPhone, iPod touch, iPad or iTunes volume setting level.
   You should turn down the iPhone, iPod touch, iPad or iTunes volume prior to playback and then adjust it to a suitable level.
Perform iTunes playback operations with the remote control unit of this unit

With this unit’s remote control unit, you can perform iTunes song play, pause, and auto search (cue) operations.

1. Select “Edit” – “Preferences...” on the menu.
2. Select “Devices” in the iTunes setting window.
3. Check “Allow iTunes audio control from remote speakers”, and then click “OK”.

Convenience functions

Here, we explain how to use the convenience functions. The source names under the titles of each function’s description are sources that allow use of these functions.
Performing repeat playback (Repeat)

- Supported input sources: USB / Media Server / Spotify

1. While content is playing, press OPTION.
   The option menu screen is displayed.

2. Use △▽ to select “Repeat”, then press ENTER.

3. Use ◀▶ to select repeat playback mode.
   - Off (Default): Repeat playback mode is canceled.
   - One: A file being played is played repeatedly.
   - All: All files in the folder currently being played are played repeatedly.

4. Press ENTER.
   The display returns to the playback screen.

Performing random playback (Random)

- Supported input sources: USB / Media Server / Spotify

1. While content is playing, press OPTION.
   The option menu screen is displayed.

2. Use △▽ to select “Random”, then press ENTER.

3. Use ◀▶ to select random playback mode.
   - Off (Default): Disable random playback.
   - On: Randomly play back all tracks in the current playback folder.

4. Press ENTER.
   The display returns to the playback screen.

• During random playback, each time playback of a track is completed, another track is randomly selected for playback from tracks in the folder. Therefore, it’s possible that you may hear a track played back more than once during random playback.
Add to favorites from the Option menu 
(Save to Favorites)

You can add up to 100 items as favorites for Internet Radio and Media Server.

- **Supported input sources**: Internet Radio / Media Server

1. **While content is playing, press OPTION.**
   The option menu screen is displayed.

2. **Use \(\Delta\nabla\) to select “Save to Favorites”, then press ENTER.**
   “Favorite added” is displayed, and the current content is added to favorites.
   - The display returns to the playback screen when the procedure is completed.

Playing back content added in “Save to Favorites”

1. **Press NETWORK.**

2. **Use \(\Delta\nabla\) to select “Favorites”, then press ENTER.**

3. **Use \(\Delta\nabla\) to select the content you want to play, and then press ENTER.**
   Playback starts.
Deleting content added to favorites (Remove from Favorites)

1. Press NETWORK.
2. Use △▽◁▷ to select “Favorites”, then press ENTER.
3. Use △▽ to select the content you want to delete from favorites, then press OPTION.
   The option menu screen is displayed.
4. Use △▽ to select “Remove from Favorites”, then press ENTER.
   “Favorite removed” is displayed, and the selected content is deleted from favorites.
   • The display returns to the original screen when the procedure is completed.

Searching content with keywords (Text Search)

- Supported input sources: USB / Internet Radio / Media Server

1. While content is playing, press OPTION.
   The option menu screen is displayed.
2. Use △▽ to select “Text Search”, then press ENTER.
   The keyboard input screen is displayed.
3. Enter the first character of the Internet Radio station or file you want to search for, and then press “OK”.
   • For character input, see page 147.
4. Use △▽ to select the content you want to play, and then press ENTER.
   Playback starts.

• “Text Search” searches for Internet Radio stations or files that start with the entered first character from the displayed list.

NOTE
• “Text Search” may not work for some lists.
Playing back music and a favorite picture at the same time (Slideshow)

- Supported input sources: USB

1. **Play back a still picture.**
   - Playing back still pictures stored on USB memory devices [page 62].

2. **Play back a music file** [page 62].

3. **Press OPTION.**
   The option menu screen is displayed.

4. **Use △▼ to select “Slideshow”, then press ENTER.**
   The option menu disappears, and the picture you were viewing is shown on the screen.

- Supported input sources: Internet Radio / Media Server

1. **Play back a still picture.**
   - Playing back still pictures stored on Flickr [page 86].
   - Playing back still pictures stored on Media Server [page 77].

2. **Play back a music file of Media Server or Internet Radio station** [page 74, 79].

3. **Press OPTION.**
   The option menu screen is displayed.

4. **Use △▼ to select “Slideshow”, then press ENTER.**
   The option menu disappears, and the picture you were viewing is shown on the screen.
Playing back still pictures in sequential order (Slideshow Interval)

You can play back still picture (JPEG) files stored on a USB memory device or Media Server and pictures on Flickr website as a slide show. The display time can also be set.

- **Supported input sources:** USB / Media Server / Flickr

1. **While the list is displayed, press OPTION.**

   - The option menu screen is displayed.

2. **Use △▽ to select “Slideshow Interval”, then press ENTER.**

3. **Use ◀▶ to set the display time.**

   - **Off:** The slide show is not played back.
   - **5s – 60s:** Set the time for displaying a single picture when playing back images in the slide show.

4. **Press ENTER.**

   - The slide show is displayed on the screen.

- **This unit plays back picture (JPEG) files in the order in which they are stored in the folder.**

Displaying your desired video during audio playback (Video Select)

This unit can display video from a different source on TV during audio playback. You can set this for each input source.

- **Supported input sources:** iPod/USB / CD* / TUNER / Internet Radio / Media Server / Flickr / PHONO

   - * Available when none of HDMI, component video or video connector is assigned.

1. **Press OPTION during audio playback.**

   - The option menu screen is displayed.

2. **Use △▽ to select “Video Select”, then press ENTER.**

3. **Use ◀▶ to select the Video Select mode.**

   - **Off** (Default) : Disable Video Select mode.
   - **On** : Enable Video Select mode.

4. **If you selected “On” in step 3, press ▼ and select “Source”.**

5. **Press ◀▶ to select the input source for video you want to play back, and press ENTER.**
Adjusting the picture quality for your viewing environment (Picture Mode)

- Supported input sources: CBL/SAT / DVD / Blu-ray / GAME/ AUX1 / AUX2 / MEDIA PLAYER / USB / NETWORK / CD* / TV AUDIO*
  * You can set the picture mode when an HDMI, component video or video connector is assigned.

1. **While content is playing, press OPTION.**
   The option menu screen is displayed.

2. **Use △▽ to select “Picture Mode”, then press ENTER.**

3. **Use ◀▶ to select picture mode.**
   - **Off**: No picture quality adjustment is done with this unit.
   - **Standard**: The standard mode suited for most living room viewing environments.
   - **Movie**: A mode suited for watching movies in a dark room such as a theater room.
   - **Vivid**: A mode that makes graphic images for games, etc. brighter and more vivid.
   - **Streaming**: A mode suited for low bit rate video sources.
   - **Custom**: Adjusts the picture quality manually.

4. **Press ENTER.**
   The display returns to the playback screen.
Playing music in All Zone Stereo

You can play back music in another room (ZONE2/ZONE3) simultaneously that is played back in MAIN ZONE.

It is useful when you want to enjoy the same music at the same time in multiple rooms during home party or when you want to play back the same BGM in the entire house.

The All Zone Stereo function can be set for any source.

• Before setting this function, you need to turn on the another room (ZONE2/ZONE3) for which you want to use the All Zone Stereo function.

1 Press MAIN to switch the zone mode.
MAIN lights.

2 Press OPTION.
The option menu screen is displayed.

3 Use △▽ to select “All Zone Stereo”, then press ENTER.

4 Use ◀▶ to select “On”, then press ENTER.
The input source for the multi-zones (ZONE2/ZONE3) is switched to the same as the one for MAIN ZONE, and playback in the All Zone Stereo mode starts.

Stopping the All Zone Stereo function

1 During playback in All Zone Stereo, press OPTION.
The option menu screen is displayed.

2 Use △▽ to select “All Zone Stereo”, then press ENTER.

3 Use ◀▶ to select “Off”, then press ENTER.

• The All Zone Stereo function is also stopped when you:
  • Turn MAIN ZONE off.
  • Change the input source for MAIN ZONE.
  • Change the sound mode.
  • When “HDMI Audio Out” (page 162) is set to “TV”, the All Zone Stereo function is not available.
Selecting a sound mode

This unit allows you to enjoy various kinds of surround and stereo playback modes.
Multi-channel audio formats are provided on popular movie and music disc formats such as Blu-ray and DVD, as well as being supported by digital broadcasting, and even by streaming movies and music from internet-based subscription services.
This unit supports playback of almost all of these multi-channel audio formats. It also supports surround playback of audio formats other than multi-channel audio such as 2-channel stereo audio.

• For audio formats recorded on a disc, see the disc jacket or label.
## Selecting a sound mode

1. Press MOVIE, MUSIC or GAME to select a sound mode.

- **MOVIE**: Switches to the sound mode suitable for enjoying movies and TV programs.
- **MUSIC**: Switches to the sound mode suitable for enjoying music.
- **GAME**: Switches to the sound mode suitable for enjoying games.

- The MOVIE, MUSIC, or GAME button memorizes the last sound mode selected for its button. Pressing MOVIE, MUSIC, or GAME recalls the same sound mode as the one selected at the previous playback.
- If the content played back does not support the previously selected sound mode, the most appropriate sound mode for the content is automatically selected.

### Switching the sound mode

- Press and hold MOVIE, MUSIC or GAME displays a list of the sound modes that can be selected. Each time you press MOVIE, MUSIC or GAME, the sound mode changes.
- While the list is displayed, you can also use ▲▼ to select a sound mode.
- Try out various surround playback modes and enjoy surround playback in your favorite mode.

**Example** When MOVIE is pressed and held

![Movie Sound Modes Example](image)

This unit provides not only sound modes that conform to the formats recorded on discs such as Dolby and DTS but also extended types of modes that match your speaker configuration including front height speakers and surround back speakers and “original sound modes” that create atmosphere of ROCK ARENA and JAZZ CLUB, etc.
Direct playback

Sound recorded in source is played as is.

1 **Press PURE to select “DIRECT”**. Direct playback begins.

- While DSD signals are played back, “DSD DIRECT” is displayed.

Pure Direct playback

This mode is for playback with higher sound quality than in “DIRECT” mode, by turning off the front panel display panel, which can eliminate faint low level noise from creeping into sensitive analog circuitry.

1 **Press PURE to select “PURE DIRECT”**. The display goes dark, and Pure Direct playback begins.

- In DIRECT and PURE DIRECT sound modes, the following items cannot be adjusted.
  - Tone (page 153)
  - Restorer (page 154)
  - MultEQ® XT32 (page 156)
  - Dynamic EQ (page 156)
  - Dynamic Volume (page 157)
  - Audyssey LFC™ (page 158)

**NOTE**

- Video signals are only output when HDMI signals are played in the PURE DIRECT mode.
- When the PURE DIRECT mode has been selected, the display turns off after about 5 seconds.
### Description of sound mode types

#### Dolby sound mode

<table>
<thead>
<tr>
<th>Sound mode type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DOLBY PLIIx*1</td>
<td>This mode can be selected when the Dolby Pro Logic IIx decoder is used to play back 2-channel sources in 6.1/7.1-channel surround sound including the surround back channel(s). By adding the surround back channel(s), a more enveloping surround environment is produced, compared to Dolby Pro Logic II. There are three playback modes: “Cinema” mode that is optimized for movie playback, “Music” mode that is optimized for music playback, and “Game” mode that is optimized for game play.</td>
</tr>
<tr>
<td>DOLBY PLII</td>
<td>This mode can be selected when the Dolby Pro Logic II decoder is used to play back 2-channel sources in 5.1-channel surround sound with an enveloping surround sound experience.</td>
</tr>
<tr>
<td>DOLBY PLIIz*2</td>
<td>This mode can be selected when the Dolby Pro Logic IIz decoder is used to play back 2-channel sources in 7.1-channel surround sound with added front height channels. By adding front height channels, the front soundstage becomes dramatically taller, simulating the effect of listening in a large movie theater or concert hall.</td>
</tr>
<tr>
<td>DOLBY DIGITAL</td>
<td>This mode can be selected when playing sources recorded with Dolby Digital.</td>
</tr>
<tr>
<td>DOLBY DIGITAL EX*1</td>
<td>Using the Dolby Digital EX decoder, this mode plays Dolby Digital sources in 6.1/7.1-channel surround sound with added surround back channel(s). By adding surround back speaker(s), sounds can be heard coming at you from behind and not just from the sides.</td>
</tr>
<tr>
<td>DOLBY TrueHD</td>
<td>This mode can be selected when playing sources recorded in Dolby TrueHD.</td>
</tr>
<tr>
<td>DOLBY DIGITAL Plus</td>
<td>This mode can be selected when playing sources recorded with Dolby Digital Plus.</td>
</tr>
</tbody>
</table>

*1 This can be selected when “Speaker Config.” – “Surr. Back” ([page 184]) is not set to “None”.
*2 This can be selected when “Speaker Config.” – “Front Height” ([page 185]) is not set to “None”.
### DTS sound mode

<table>
<thead>
<tr>
<th>Sound mode type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DTS NEO:X*1</td>
<td>This matrix decoding technology uses the DTS NEO:X decoder to playback 2-channel source or 5.1/6.1/7.1-channel surround sound including the surround back channel. There are 3 modes: “Music” suited for playing music, “Cinema” suited for playing movies, and “Game” which is optimized for playing games.</td>
</tr>
<tr>
<td>DTS SURROUND</td>
<td>This mode can be selected when playing sources recorded in DTS.</td>
</tr>
<tr>
<td>DTS ES DSCRT6.1*2</td>
<td>This mode is suitable for playing discs recorded in DTS-ES. The surround back channel added using the discrete method is played as an independent channel. Since all channels are independent, the 360-degree spacial expressiveness and sound localization are enhanced.</td>
</tr>
<tr>
<td>DTS ES MTRX6.1*3</td>
<td>This mode is suitable for playing discs recorded in DTS-ES. The surround back channel added to the surround-left and surround-right channels by a matrix encoder at software recording time is decoded by this unit’s matrix decoder and played from each channel (surround left, surround right, surround back).</td>
</tr>
<tr>
<td>DTS 96/24</td>
<td>This mode can be selected when playing sources recorded in DTS 96/24.</td>
</tr>
<tr>
<td>DTS-HD</td>
<td>This mode can be selected when playing sources recorded in DTS-HD.</td>
</tr>
<tr>
<td>DTS Express</td>
<td>This mode can be selected when playing sources recorded in DTS Express.</td>
</tr>
</tbody>
</table>

*1 This mode cannot be selected when DSD signals from Super Audio CD are input.  
*2 This mode can be selected when only one surround back speaker is used and no front height speaker is used.  
*3 This can be selected when “Speaker Config.” – “Surr. Back” ([page 184]) is set to “1 spkr”.
### PCM multi-channel sound mode

<table>
<thead>
<tr>
<th>Sound mode type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MULTI CH IN</td>
<td>This mode can be selected when playing multi-channel PCM/DSD sources.</td>
</tr>
</tbody>
</table>

### Audyssey DSX® sound mode

<table>
<thead>
<tr>
<th>Sound mode type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Audyssey DSX® (A-DSX)*</td>
<td>This mode creates playback for the new channels (front wide or front height) in 5.1-channel systems. By adding front wide or front height channels, the surround sound effects sound become more three dimensional and realistic.</td>
</tr>
</tbody>
</table>

* This can be selected when a setting other than “None” is selected for “Front Height” or “Front Wide”, and a setting other than “None” is selected for “Center” in “Speaker Config.” (page 183).
## Original sound mode

<table>
<thead>
<tr>
<th>Sound mode type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>MULTI CH STEREO</td>
<td>This mode is for enjoying stereo sound from all speakers. Stereo audio (2-channel) sources are played back via the front (L/R) speakers, the surround speakers and if connected the surround back speakers.</td>
</tr>
<tr>
<td>ROCK ARENA</td>
<td>This mode simulates the expansive sound of a live concert in an arena.</td>
</tr>
<tr>
<td>JAZZ CLUB</td>
<td>This mode puts you right in the middle of an intimate jazz club.</td>
</tr>
<tr>
<td>MONO MOVIE</td>
<td>This mode works with monaural audio sources and delivers a surround sound effect. For optimum channel balance and surround sound effects, connect the monaural source to both of the front (L/R) audio inputs.</td>
</tr>
<tr>
<td>VIDEO GAME</td>
<td>This mode provides an exciting, dynamic surround sound effect with your favorite action video games.</td>
</tr>
<tr>
<td>MATRIX</td>
<td>This mode adds a spacious surround sound effect with stereo music sources.</td>
</tr>
<tr>
<td>VIRTUAL</td>
<td>This mode lets you experience an expansive surround sound effect when playing back through just the front (L/R) speakers only, and when listening with stereo headphones.</td>
</tr>
</tbody>
</table>
### Stereo sound mode

<table>
<thead>
<tr>
<th>Sound mode type</th>
<th>Description</th>
</tr>
</thead>
</table>
| STEREO          | This mode plays 2-channel stereo audio with no additional surround sound processing.  
  • Sound is output from the front left and right speakers, and subwoofer if connected.  
  • When multi-channel signals are inputted, they are mixed down to 2-channel audio and are played back with no additional surround sound processing. |

### Direct sound mode

<table>
<thead>
<tr>
<th>Sound mode type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DIRECT</td>
<td>This mode provides a direct input-to-output path with minimal audio processing, bypassing any unnecessary stages for purest sound.</td>
</tr>
</tbody>
</table>
| PURE DIRECT     | This mode provides the direct audio signal path benefit of the Direct mode along with disabling additional stages that might possibly have an affect on sound quality.  
  In Pure Direct mode, the following elements are turned off:  
  • The front panel display and its driver circuitry are shut down. The display will temporarily come on when adjusting the volume, etc., but will turn off again once the adjustment has been made.  
  • The analog video input/output switcher and processor is disabled. |
## Sound mode

- The following sound modes can be selected using the MOVIE, MUSIC, GAME, and PURE buttons.
- Adjust the sound field effect with the menu “Surround Parameter” (page 150) to enjoy surround sound the way you like it.

*3  This mode cannot be selected when DSD signals from Super Audio CD are input.

*4  Some sound modes cannot be selected, depending on the audio format or number of channels of the input signal. For details, see “Types of input signals, and corresponding sound modes” (page 242).
## Views on the display

1. Shows a decoder to be used.
   - A DOLBY DIGITAL Plus decoder is displayed as “DOLBY D +”.

2. Shows a decoder that creates sound output from the speakers.
   - “+ PLIIz” indicates the front height sound from front height speakers.
HDMI control function

A recent addition to the HDMI standard is CEC (Consumer Electronics Control), which allows control signals from one device to communicate with another device via the HDMI cable connection. Not all HDMI-equipped devices have this capability.

Setting procedure

1. Set the HDMI output connector corresponding with the HDMI control function.
   Set “HDMI Control” (page 163) to “On”.

2. Turn the power on for all the devices connected by HDMI cable.

3. Set the HDMI control function for all devices connected by HDMI cable.
   • Please consult the operating instructions for the connected devices to check the settings.
   • Carry out steps 2 and 3 should any of the devices be unplugged.

4. Switch the television input to the HDMI input connected to this unit.

5. Switch this unit input to the HDMI input source and check if the picture from the player is ok.

6. When you turn the TV’s power to standby, check that the power of this unit also goes to standby.

   **NOTE**
   • Some functions may not operate depending on the connected TV or player. Check the owner’s manual of each device for details beforehand.
   • The HDMI ZONE2 function is not compatible with the HDMI control function.
   • When the HDMI ZONE2 function is used with “HDMI Control” in the menu set to “On”, the HDMI ZONE2 function may not fully work.
InstaPrevue function

You can display sub screens on the main screen to preview playback video of the HDMI input connected to this unit. You can also display various video inputs in a single screen to switch input sources such as Blu-ray, DVD, and GAME while viewing them on sub screens.

- The InstaPrevue function is compatible with the HDMI 1 – 6 connectors. It is not supported for the AUX1 HDMI7 connector on the front panel.
Switching input sources

Switch to the desired input source on this unit while viewing sub screens.

1. **Press MAIN to switch the zone mode.**
   MAIN lights.

2. **Press InstaPrevue.**
   The main screen (current input video) and sub screens (other input video) are displayed.

3. **Use ▲▼◄► to select the desired input source from the sub screen, and press ENTER.**

Setting how to display sub screens

You can select to display five sub screens or only one sub screen.

1. **While sub screens are displayed, press OPTION.**
   The InstaPrevue setting screen is displayed.

2. **Press ◀▶ in “HDMI Input” to select how to display sub screens.**
   - **All** (Default) : Displays five sub screens.
   - **One at time** : Displays only one sub screen.

3. **Press OPTION to enter the setting.**
Changing the display location of sub screens

You can change the display location of sub screens to a desired location.

1. **While sub screens are displayed, press OPTION.**
   The InstaPrevue setting screen is displayed.

2. **Press ▼ to select “Location” and use  ◀  ▶ to select the location where you want to display sub screens.**

3. **Press OPTION to enter the setting.**

   • The InstaPrevue function is available when HDMI signals are input to the main screen. However, it is not available while computer’s resolution (e.g. VGA) or 3D or 4K video content is being played back.
   • The InstaPrevue function is not available when the power of ZONE2 is on.
Sleep timer function

You can have the power automatically switched to standby once a set time has elapsed. This is convenient for viewing and listening while going to sleep.
The sleep timer function can be set for each zone.
Using the sleep timer

1. **Press MAIN, ZONE2 or ZONE3 to switch the zone mode.**
The button for the selected zone is lit.

2. **Press SLEEP and display the time you want to set.**
   - The \[S\] indicator on the display lights.
   - You can set the sleep timer in the range from 10 to 120 minutes in steps of 10 minutes.

**To cancel the sleep timer**
Press SLEEP to set “Off”.
The \[S\] indicator on the display turns off.

- The sleep timer is also cancelled when this unit is set to the standby mode or the MAIN ZONE, ZONE2 or ZONE3 power is turned off.

**NOTE**
- The sleep timer function cannot turn off the power of devices connected to this unit. To turn off the power of those connected devices, set up sleep timers on the connected devices themselves.
Quick select function

You can save settings such as the input source selection, volume level, and sound mode at the QUICK SELECT 1 – 4 buttons. You can simply press one of the set QUICK SELECT buttons for subsequent playback to switch to various saved settings all at once. By saving frequently used settings at the QUICK SELECT 1 – 4 buttons, you will always be able to easily call up the same playback environment.

Calling up the Quick Select

1 Press QUICK SELECT.
The Quick Select settings for the button you pressed are called up.

Changing the settings

1 Set the items below to the settings you want to save.
   ① Input source (page 54)
   ② Volume (page 55)
   ③ Sound mode (page 108)
   ④ Audyssey (Audyssey MultEQ® XT32, Audyssey Dynamic EQ®, Audyssey Dynamic Volume®, Audyssey LFC™) (page 155)

2 Press and hold the desired QUICK SELECT until “Quick* Memory” appears on the display.
The current settings will be memorized.
* The number for the QUICK SELECT button you pressed is displayed.

Changing the Quick Select Name

On this unit, you can change the Quick Select Name displayed on the menu to the name that you prefer.

For the name change method, see “Quick Select Names” (page 197).

The default settings of each Quick Select function are as shown below.

<table>
<thead>
<tr>

</table>
Rec out function

When using the audio/video recording connectors (MEDIA PLAYER outputs), you can record the audio or video.
Recording on an External Device

1 Press the input source select button to choose the input source to be recorded.

2 Start recording.
   • For operating instructions, refer to the respective device’s operating instructions.

FAQ
• Recordings you make are for your personal enjoyment and should not be used for other purposes without permission of the copyright holder.
• To record video signals through this unit, use the video cable for connection between this unit and the player.
• Make an analog connection for audio signals.
Web control function

You can control this unit from a web control screen on a web browser.

PC

- This unit and the PC need to be connected to the network properly (page 49 “Connecting to a home network (LAN)”) in order to use the web control function.
- Depending on the settings of your security-related software, you may not be able to access this unit from your PC. If this is the case, then change the settings of the security-related software.

Controlling the unit from a web control

1. Switch the “IP Control” (page 191) setting to “Always On”.

2. Check the IP address of this unit with “Information” (page 191).

3. Start up the web browser.

Checking the IP address.

Displays the current network settings of the AVR
4 Enter the IP address of this unit in browser’s address box.
For example, if the IP address of this unit is “192.168.100.19”, enter “http://192.168.100.19/”.

http://192.168.100.19/index.asp

5 When the top menu is displayed, click on the menu item you want to operate.

• You can use the Web control function with Internet Explorer 8 or later to memorize and call up various settings on this unit.
  To memorize settings, click “SAVE” on the Setup Menu screen.
  To call up settings, click “LOAD” on the Setup Menu screen.
Playback in ZONE2/ZONE3 (Separate room)

You can operate this unit to enjoy video and audio in a room (ZONE2 and ZONE3) that is different from the room where this unit is placed (MAIN ZONE). You can simultaneously play back the same source in both the MAIN ZONE, ZONE2 and ZONE3. You can also play back separate sources in the MAIN ZONE, ZONE2 and ZONE3.

Connecting ZONE

You can use the following three methods to play back video and audio in ZONE2 and ZONE3.

• Connection through the HDMI ZONE2 connector (page 133)
• Connection through the video output connector and speaker output connector (page 134)
• Connection through the video output connector and external amp (page 136)

Connection 1 : Connection through the HDMI ZONE2 connector

When a TV is connected to the HDMI ZONE2 OUT connector, you can play back a video or audio from the device connected to the HDMI 1 – 6 IN connector in ZONE2 (HDMI ZONE2 function).
Connection 2: Connection through the video output connector and speaker output connector

- When "Assign Mode" (page 182) in the menu is set to any of the following audio is output from speakers in ZONE2 or ZONE3.

- **Assign Mode : 5.1ch + ZONE2**

- **Assign Mode : 5.1ch + ZONE3**
Assign Mode: 5.1ch + ZONE2/3-MONO

Connection 3: Connection through the video output connector and external amp

The audio signals of this unit’s ZONE2 and ZONE3 audio output connectors are output to the ZONE2 and ZONE3 amplifiers and played on these amplifiers.

- We recommend using high quality pin-plug (RCA type) cables for audio connections in order to prevent noise.
- If you select a same input source for MAIN ZONE and ZONE2, audio playback may be restricted.
- When “Component Video Out” (page 164) in the menu is set to “ZONE2”, the component video output connector outputs the ZONE2 video.
- The menu screen is not output in ZONE2.
1 Press ZONE2 or ZONE3 to switch the zone mode.
   • ZONE2 or ZONE3 lights.

2 Press POWER \( \bigcirc \) to turn on the ZONE2 or ZONE3 power.
   • Also press input source select button when in standby mode, the power turns on.
   • When POWER \( \bigcirc \) is pressed, ZONE2 or ZONE3 turns off.
   • Power in ZONE2 or ZONE3 can be turned on or off by pressing ZONE2 ON/OFF or ZONE3 ON/OFF on the main unit.

3 Press the input source select button to select the input source to be played.
The audio signal of the selected source is output to ZONE2 or ZONE3.
   • To perform an operation with the main unit, press ZONE2 SOURCE or ZONE3 SOURCE.
   Each time you press ZONE2 SOURCE or ZONE3 SOURCE, the input source changes.
■ Adjusting the volume
Use VOLUME ▲▼ to adjust the volume.
• At time of purchase, “Volume Limit” (page 196) is set to “70 (-10dB)”.
  • Turn MASTER VOLUME after pressing ZONE2 SOURCE or ZONE3 SOURCE on the main unit to adjust the sound volume.

■ Turning off the sound temporarily
Press MUTE □X.
The sound is reduced to the level set at “Mute Level” (page 197) in the menu.
• To cancel, either adjust the volume or press MUTE □X again.
• You can also adjust the volume level to cancel the muting.
  • You can adjust the tone and volume for ZONE2 or ZONE3 in “ZONE2 Setup” or “ZONE3 Setup” (page 195) in the menu.
For menu operation, connect a TV to this unit and display the menu on the TV screen. For menu operations, see the following page.
By default, this unit has recommended settings defined. You can customize this unit based on your existing system and your preferences.

</tr>
</tbody>
</table>
Menu operation

1. Press MAIN to switch the zone mode. MAIN lights.
2. Press SETUP. The menu is displayed on the TV screen.
3. Use ▲▼◀▶ to select the menu to be set or operated, then press ENTER.
4. Use ◀▶ to change to desired setting.
5. Press ENTER to enter the setting.
   • To return to the previous item, press BACK.
   • Exiting the Menu, press SETUP while the menu is displayed. The menu display disappears.
Inputting characters

- On this unit, you can change the name displayed on the following screens to the names that you prefer.
  - Preset Name (page 71)
  - Text Search (page 103)
  - Source Rename (page 170)
  - Friendly Name (page 191)
  - Zone Rename (page 197)
  - Quick Select Names (page 197)
- Character input for the network functions (page 74, 81, 86, 90, 192)
- There are two methods for inputting characters; select a character on the TV screen to input characters. Multiple characters are assigned to a button, and each time the button is pressed, a character is switched.
  - Using the keyboard screen (page 148)
  - Using the number buttons (page 148)
## Using the keyboard screen

1. Display the screen for inputting characters.

   ![Example] Source Rename screen

2. Select a character to be changed.
   - Use \( \triangle \downarrow \uparrow \rightarrow \) to select “\( \leftarrow \)” or “\( \rightarrow \)”.
   - Press ENTER to place the cursor at the character to be changed.
   
   Each time ENTER is pressed, the cursor moves by one character.

3. Select a character to be input with \( \triangle \downarrow \uparrow \rightarrow \) then press ENTER.

4. Repeat steps 2 and 3 to change the name.

5. Use \( \triangle \downarrow \uparrow \rightarrow \) to select “OK”, then press ENTER.

## Using the number buttons

1. When the keyboard screen is displayed, press 0 – 9. The 10 key input screen is displayed.

2. Place the cursor at the character to be changed with \( \leftarrow \) \( \rightarrow \) and press the number button (0 – 9) until the desired character is displayed.
   - The types of characters that can be input are as shown below.

   ![Character Table]

3. Repeat step 2 to change the name then press ENTER to register it.
Audio

Make audio-related settings.

**Dialog Level**

Sets the output level to clarify the dialogue output from the center channel.

- **Level**
  - 
  - 
  - 12.0dB – +12.0dB (Default : 0.0dB)

**Subwoofer Level**

This setting adjusts the volume level for the subwoofer.

- **Subwoofer**
  - Turn subwoofer output on and off.
  - On (Default) : The subwoofer is used.
  - Off : The subwoofer is not used.

- This can be set when the sound mode is “DIRECT” and the “Subwoofer Mode” (page 188) is “LFE+Main”.

- **Subwoofer 1 Level**
  - This setting adjusts the volume level for the subwoofer 1.
  - 
  - 12.0dB – +12.0dB (Default : 0.0dB)

- **Subwoofer 2 Level**
  - This setting adjusts the volume level for the subwoofer 2.
  - 
  - 12.0dB – +12.0dB (Default : 0.0dB)
Surround Parameter

You can adjust the surround audio sound field effects to match your preferences. The items (parameters) that can be adjusted depend on the signal being input and the currently set sound mode. For details on the adjustable parameters, see "Sound modes and surround parameters" (page 239).

Some setting items cannot be set while playback is stopped. Make the settings during playback.

Cinema EQ

Gently softens the upper treble range of movie soundtracks to reduce possible harshness and improve clarity.

On: “Cinema EQ” is used.
Off (Default): “Cinema EQ” is not used.

Loudness Management

This sets whether to output as specified in “Dynamic Compression” or output directly without compressing the dynamic range of audio recorded in the disc.

On (Default): Outputs using the settings made in “Dynamic Compression” and “Dialogue normalization function” (page 199) are enabled.
Off: “Dynamic Compression” settings and “Dialogue Normalization” are disabled, and the signals on the disc are output as is.

This can be set in the Dolby TrueHD mode.

Dynamic Compression

Compress dynamic range (difference between loud and soft sounds).

Auto (Default): Automatic dynamic range compression on/off control according to source.
Low / Medium / High: These set the compression level.
Off: Dynamic range compression is always off.

You can set “Auto” only for the Dolby TrueHD source.
**Low Frequency Effects**
Adjust the low-frequency effects level (LFE).

\[-10\text{dB} - 0\text{dB} \text{ (Default)}\]

- For proper playback of the different sources, we recommend setting to the values below.
  - Dolby Digital sources : 0dB
  - DTS movie sources : 0dB
  - DTS music sources : –10dB

**Center Gain**
Distributes the dialogue output from the center channel to the front left and right channels and widens the sound image in the front.

\[0.0 - 1.0\]

- You can set this when the sound mode is set to DTS NEO:X.
- The smaller the value, the more dialogue is concentrated on the center channel. The larger the value, the more dialogue is distributed to front left and right channels, and the more the sound image widens in the front.

**Panorama**
Assign front L/R signals to also go to the surround channels for wider sound.

- **On : Set.**
- **Off (Default) : Do not set.**

- You can set this when the sound mode is Dolby PLII/PLIIx in the “Music” mode.

**Dimension**
Shift sound image center to front or rear to adjust playback balance.

\[0 – 6 \text{ (Default : 3)}\]

- You can set this when the sound mode is Dolby PLII/PLIIx in the “Music” mode.
- As you set a smaller number, the surround sound field shifts backward; as you set a larger number, the surround sound field shifts forward.
### Center Width
Distributes the dialogue output from the center channel to left and right channels and widens the sound image in the front.

**0 – 7** (Default : 3)

- You can set this when the sound mode is Dolby PLII/IIX in the “Music” mode.
- The smaller the value, the more dialogue is concentrated on the center channel. The larger the value, the more dialogue is distributed to front left and right channels, and the more the sound image widens in the front.

### Delay Time
Adjust the audio delay time against video to extend the sound field image.

**0ms – 300ms** (Default : 30ms)

- You can set this when the sound mode is “MATRIX”.

### Effect Level
Adjust the sound effect level of the current sound mode.

**1 – 15** (Default : 10)

- Set to a lower level if the positioning and sense of phase of the surround signals seems unnatural.

### Room Size
Determine size of acoustic environment. You can set this when the sound mode is one of the original sound modes.

- **Small** : Simulate acoustics of a small room.
- **Medium small** : Simulate acoustics of a medium-small room.
- **Medium** (Default) : Simulate acoustics of a medium room.
- **Medium large** : Simulate acoustics of a medium-large room.
- **Large** : Simulate acoustics of a large room.

- “Room Size” does not indicate the size of the room in which sources are played.

### Height Gain
Control the front height channel volume.

- **Low** : Reduce the front height channel volume.
- **Normal** (Default) : Front height channel sound is output with standard sound volume.
- **High** : Increase the front height channel volume.

- You can set this in the “PLIIz” sound mode or when using the PLIIz decoder.
Speaker Select
Makes settings for the speakers outputting sound.

Surround Back: Sound is output from the surround back speakers.
Height: Sound is output from the front height speakers.
Wide: Sound is output from the front wide speakers.
Back/Height: Sound is output from the surround back and front height speakers.
Back/Wide: Sound is output from the surround back and front wide speakers.
Height/Wide: Sound is output from the front height and front wide speakers.

% This can be set when “Assign Mode” (page 182) is set to “7.1ch (SB/FH/FW)” or “9.1ch (SB/FH/FW)”.
% The speakers that can be selected by the “Main Pre-amps” setting are changed when “Assign Mode” (page 182) is set to “9.1ch (SB/FH/FW)”.

Set Defaults
The “Surround Parameter” settings are returned to the default settings.

Tone
Adjust the tonal quality of the sound.

Tone Control
Set the tone control function to “On” and “Off”.
On: Allow tone adjustment (bass, treble).
Off: Playback without tone adjustment.

Bass
Adjust bass.
-6dB – +6dB

Treble
Adjust treble.
-6dB – +6dB

% This cannot be set when the sound mode is set to “DIRECT” or “PURE DIRECT”.

Speaker Select
Makes settings for the speakers outputting sound.

Surround Back: Sound is output from the surround back speakers.
Height: Sound is output from the front height speakers.
Wide: Sound is output from the front wide speakers.
Back/Height: Sound is output from the surround back and front height speakers.
Back/Wide: Sound is output from the surround back and front wide speakers.
Height/Wide: Sound is output from the front height and front wide speakers.

% This can be set when “Assign Mode” (page 182) is set to “7.1ch (SB/FH/FW)” or “9.1ch (SB/FH/FW)”.
% The speakers that can be selected by the “Main Pre-amps” setting are changed when “Assign Mode” (page 182) is set to “9.1ch (SB/FH/FW)”.

Set Defaults
The “Surround Parameter” settings are returned to the default settings.

Tone
Adjust the tonal quality of the sound.

Tone Control
Set the tone control function to “On” and “Off”.
On: Allow tone adjustment (bass, treble).
Off: Playback without tone adjustment.

Bass
Adjust bass.
-6dB – +6dB

Treble
Adjust treble.
-6dB – +6dB

% This cannot be set when the sound mode is set to “DIRECT” or “PURE DIRECT”.

Tone
Adjust the tonal quality of the sound.

Tone Control
Set the tone control function to “On” and “Off”.
On: Allow tone adjustment (bass, treble).
Off: Playback without tone adjustment.

Bass
Adjust bass.
-6dB – +6dB

Treble
Adjust treble.
-6dB – +6dB

% This cannot be set when the sound mode is set to “DIRECT” or “PURE DIRECT”.

Speaker Select
Makes settings for the speakers outputting sound.

Surround Back: Sound is output from the surround back speakers.
Height: Sound is output from the front height speakers.
Wide: Sound is output from the front wide speakers.
Back/Height: Sound is output from the surround back and front height speakers.
Back/Wide: Sound is output from the surround back and front wide speakers.
Height/Wide: Sound is output from the front height and front wide speakers.

% This can be set when “Assign Mode” (page 182) is set to “7.1ch (SB/FH/FW)” or “9.1ch (SB/FH/FW)”.
% The speakers that can be selected by the “Main Pre-amps” setting are changed when “Assign Mode” (page 182) is set to “9.1ch (SB/FH/FW)”.

Set Defaults
The “Surround Parameter” settings are returned to the default settings.
Restorer

Compressed audio formats such as MP3, WMA (Windows Media Audio) and MPEG-4 AAC reduce the amount of data by eliminating signal components that are hard for the human ear to hear. The “Restorer” function generates the signals eliminated upon compression, restoring the sound to conditions near those of the original sound before compression. It also restores the original bass characteristics for a rich and expanded tonal range.

■ Mode

<table>
<thead>
<tr>
<th>Selection</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>High</td>
<td>Optimized mode for compressed sources with very weak highs (64 kbps and under).</td>
</tr>
<tr>
<td>Medium</td>
<td>Apply suitable bass and treble boost for all compressed sources (96 kbps and under).</td>
</tr>
<tr>
<td>Low</td>
<td>Optimized mode for compressed sources with normal highs (96 kbps and over).</td>
</tr>
<tr>
<td>Off</td>
<td>Do not use “Restorer”.</td>
</tr>
</tbody>
</table>

Audio Delay

While viewing video, manually adjust the time to delay audio output so that the video and audio are synchronized.

0ms (Default) – 200ms

- This item can be set within the range of 0 to 100 ms when “Auto Lip Sync” (page 162) is set to “On” and when a TV compatible with Auto Lip Sync is connected.
- Store “Audio Delay” for each input source.
- Audio Delay for game mode can be set when “Video Mode” (page 165) is set to “Auto” or “Game”.

Volume

Set the MAIN ZONE (room where the unit is located) volume setting.

■ Scale

Set how volume is displayed.

0 – 98 (Default) : Display in the range 0 (Min) to 98.
-79.5dB – 18.0dB : Display dB (Min), in the range –79.5 dB to 18.0 dB.

- The “Scale” setting applies to all zones.
**Limit**

Make a setting for maximum volume.

- **60 (–20dB) / 70 (–10dB) / 80 (0dB)**
- **Off (Default)**

**Power On Level**

Define the volume setting that is active when the power is turned on.

- **Last (Default)**: Use the memorized setting from the last session.
- **Mute**: Always use the muting on condition when power is turned on.
- **1 – 98 (–79dB – 18dB)**: The volume is adjusted to the set level.

**Mute Level**

Set the amount of attenuation when muting is on.

- **Full (Default)**: The sound is muted entirely.
- **–40dB**: The sound is attenuated by 40 dB down.
- **–20dB**: The sound is attenuated by 20 dB down.

---

**Audyssey**

Set Audyssey MultEQ® XT32, Audyssey Dynamic EQ®, Audyssey Dynamic Volume®, Audyssey LFC™ and Audyssey DSX®. These can be selected after Audyssey® Setup has been performed. For additional information on Audyssey technology, please see page 245.

- “MultEQ® XT32”, “Dynamic EQ”, “Dynamic Volume” and “Audyssey LFC™” settings are stored for each input source.
- “MultEQ® XT32”, “Dynamic EQ”, “Dynamic Volume” and “Audyssey LFC™” cannot be set when the sound mode is set to “DIRECT” or “PURE DIRECT”.

---

155
**MultEQ® XT32**

MultEQ® XT32 compensates for both time and frequency characteristics of the listening area based on Audyssey® Setup measurement results. Selection is done from three types of compensation curves. We recommend the “Audyssey” setting.

- **Audyssey** (Default) : Optimize the frequency response of all speakers.
- **Audyssey Byp. L/R** : Optimize frequency response of speakers except front L and R speakers.
- **Audyssey Flat** : Optimize frequency response of all speakers to flat response.
- **Graphic EQ** : Apply frequency response set with “Graphic EQ” (page 160).
- **Off** : Turn “MultEQ® XT32” equalizer off.

- When using headphones, “MultEQ® XT32” is automatically set to “Off”.

**Dynamic EQ**

Solves the problem of deteriorating sound quality as volume is decreased by taking into account human perception and room acoustics. Works with MultEQ® XT32.

- **On** (Default) : Use Dynamic EQ.
- **Off** : Do not use Dynamic EQ.

- When the menu “Dynamic EQ” setting is “On”, it is not possible to do “Tone Control” (page 153) adjustment.
## Reference Level Offset

Audyssey Dynamic EQ® is referenced to the standard film mix level. It makes adjustments to maintain the reference response and surround envelopment when the volume is turned down from 0 dB. However, film reference level is not always used in music or other non-film content. Dynamic EQ Reference Level Offset provides three offsets from the film level reference (5 dB, 10 dB, and 15 dB) that can be selected when the mix level of the content is not within the standard. Recommended setting levels are shown at below.

- **0dB (Film Ref) (Default)**: This is the default setting and should be used when listening to movies.
- **5dB**: Select this setting for content that has a very wide dynamic range, such as classical music.
- **10dB**: Select this setting for jazz or other music that has a wider dynamic range. This setting should also be selected for TV content as that is usually mixed at 10 dB below film reference.
- **15dB**: Select this setting for pop/rock music or other program material that is mixed at very high listening levels and has a compressed dynamic range.

* Setting is enabled when “Dynamic EQ” (page 156) is “On”.

## Dynamic Volume

Solves the problem of large variations in volume level between TV, movies and other content (between quiet passages and loud passages, etc.) by automatically adjusting to the user’s preferred volume setting.

- **Heavy**: Most adjustment to softest and loudest sounds.
- **Medium**: Medium adjustment to loudest and softest sound.
- **Light**: Least adjustment to loudest and softest sounds.
- **Off (Default)**: Do not use “Dynamic Volume”.

* If “Dynamic Volume” is set to “Yes” in “Audyssey® Setup” (page 172), the setting is automatically changed to “Medium”.
**Audyssey LFC™**

Adjusts the low frequency band to prevent bass and vibration from being conveyed to neighboring rooms.

- **On**: Use “Audyssey LFC™”.
- **Off** (Default): Do not use “Audyssey LFC™”.

*“Audyssey LFC™” cannot be set up if “Audyssey® Setup” is not completed.*

**About Audyssey LFC™ (Low Frequency Containment)**

Audyssey LFC™ solves the problem of low frequency sounds disturbing people in neighboring rooms or apartments. Audyssey LFC™ dynamically monitors the audio content and removes the low frequencies that pass through walls, floors and ceilings. It then applies psychoacoustic processing to restore the perception of low bass for listeners in the room. The result is great sound that no longer disturbs the neighbors.

**Containment Amount**

Adjusts the amount of low frequency containment. Use higher settings if you have close neighbors.

- **1 – 7** (Default: 4)

*Setting is enabled when “Audyssey LFC™” is “On”.*
**About Audyssey Dynamic Surround Expansion (A-DSX)**

Audyssey DSX® is a scalable system that adds new speakers to improve surround impression. Starting with a 5.1 system Audyssey DSX® first adds Wide channels for the biggest impact on envelopment. Research in human hearing has proven that information from the Wide channels is much more critical in the presentation of a realistic soundstage than the Back Surround channels found in traditional 7.1 systems. Audyssey DSX® then creates a pair of Height channels to reproduce the next most important acoustical and perceptual cues. In addition to these new Wide and Height channels, Audyssey DSX® applies Surround Envelopment Processing to enhance the blend between the front and surround channels.

**Stage Width**
Adjust sound stage width when using front wide speakers.

-10 – +10 (Default : 0)

**Stage Height**
Adjust sound stage height when using front height speakers.

-10 – +10 (Default : 0)

---

**Audyssey DSX®**
Provides more immersive surround sound by adding the new channels.

- **Wides**: Turn on Audyssey DSX® processing for wide expansion.
- **Heights**: Turn on Audyssey DSX® processing for height expansion.
- **Wides/Heights**: Turns on Audyssey DSX® processing for wide and height expansion.
- **Off (Default)**: Do not set Audyssey DSX®.

- “Audyssey DSX®” can be set when you are using front height speakers or front wide speakers.
- “Wides/Heights” can only be set when the “Assign Mode” (page 182) setting is other than “9.1ch (SB/FH/FW)” and the “Main pre-amps” (page 183) setting is other than “Surround Back”.
- “Audyssey DSX®” is only valid when using a center speaker.
- “Audyssey DSX®” is valid when sound mode is DOLBY sound mode or DTS sound mode other than PLIIz Height and DTS NEO:X.
- “Audyssey DSX®” cannot be configured if the HD Audio source being played includes Front height and Front wide channels. In this case, the respective channels are played back using the input signals.
Graphic EQ

Use the 9 band graphic equalizer to adjust the tone of each speaker.

- “Graphic EQ” can be set when “MultEQ® XT32” (page 156) setting is “Graphic EQ”.
- Speakers for which “Graphic EQ” can be set differ according to the sound mode.

■ Speaker Selection
Select whether to adjust tones for individual speakers or for all speakers.

- All
- Left/Right (Default)
- Each

■ Adjust EQ
Adjust tonal balance for each frequency band. Adjust the speaker selected in “Speaker Selection”.

1. Select the speaker.
2. Select the adjustment frequency band.
   - 63Hz / 125Hz / 250Hz / 500Hz / 1kHz / 2kHz / 4kHz / 8kHz / 16kHz
3. Adjust the level.
   -20.0dB – +6.0dB (Default : 0.0dB)

■ Curve Copy
Copy “Audyssey Flat” curve from “MultEQ® XT32” (page 156).

- “Curve Copy” is displayed after Audyssey® Setup has been performed.

■ Set Defaults
The “Graphic EQ” settings are returned to the default settings.
Video
Make video-related settings.

**Picture Adjust**
Picture quality can be adjusted.

- Can be set when the “Video Conversion” (page 165) setting is “On”.
- Can be set when “HDMI”, “COMP” or “VIDEO” (page 169) is assigned for each input source.

**Picture Mode**
Select the desired picture mode according to the video content and your viewing environment.

- **Standard**: The standard mode suited for most living room viewing environments.
- **Movie**: A mode suited for watching movies in a dark room such as a theater room.
- **Vivid**: A mode that makes graphic images for games, etc. brighter and more vivid.
- **Streaming**: A mode suited for low bit rate video sources.
- **Custom**: Adjusts the picture quality manually.
- **Off**: No picture quality adjustment is done with this unit.

- You can also press OPTION to make these settings from “Picture Mode” (page 106) in the option menu.
- The default settings are as follows.
  - For “NETWORK” and “iPod/USB” input sources: Streaming
  - For input sources other than “Network” and “iPod/USB”: Off

**Contrast**
Adjust picture contrast.

-6 – +6 (Default: 0)

**Brightness**
Adjust picture brightness.

0 (Default) – +12

**Saturation**
Adjust picture chroma level (color saturation).

-6 – +6 (Default: 0)
■ Hue
Adjust green and red balance. Also called Tint.

–6 – +6 (Default : 0)

■ Noise Reduction
Reduce overall video noise.

Low / Medium / High / Off (Default)

■ Enhancer
Emphasize picture sharpness.

0 (Default) – +12

• “Contrast”, “Brightness”, “Saturation”, “Hue”, “Noise Reduction” and “Enhancer” can be set when “Picture Mode” is set to “Custom”.
• “Picture Adjust” cannot be set when 4K signals are input.

HDMI Setup
Make settings for HDMI video/audio output.

NOTE
• When “HDMI Pass Through” and “HDMI Control” is set to “On”, it consumes more standby power. If you are not using this unit for an extended period, it is recommended that you unplug the power cord from the power outlet.

■ Auto Lip Sync
Make automatic compensation for timing shift in audio and video output.

On (Default) : Compensated.
Off : Not compensated.

■ HDMI Audio Out
Select HDMI audio output device.

AVR (Default) : Play back through speakers connected to the unit.
TV : Play back through TV connected to the unit.

• When the HDMI control function is activated, priority is given to the TV audio setting (page 122 “HDMI control function”).
• When the power of this unit is on and “HDMI Audio Out” is set to “TV”, audio is output as 2-channel from the HDMI OUT connector.
Video Output

Selects which HDMI outputs to use.

**Auto(Dual)** (Default) : The presence of a TV connected to the HDMI MONITOR 1 or HDMI MONITOR 2 connector is detected automatically, and that TV connection is used.

**Monitor 1** : A TV connected to the HDMI MONITOR 1 connector is always used.

**Monitor 2** : A TV connected to the HDMI MONITOR 2 connector is always used.

- If both the HDMI MONITOR 1 and HDMI MONITOR 2 connectors are connected and “Resolution” (page 166) is set to “Auto”, the signals are output with a resolution compatible with both TV.
- With “Resolution” (page 166) not set to “Auto”, check whether the TV you are using is compatible with the resolution under “Video” – “HDMI Monitor 1” or “HDMI Monitor 2” (page 200).

HDMI Pass Through

Selects how the AV receiver will pass HDMI signals to the HDMI output in standby power mode.

**On** : Passes the selected HDMI input through the AV receiver’s HDMI output when the AV receiver is in standby power mode.

**Off** (Default) : No HDMI signals are passed through the AV receiver’s HDMI output in standby power mode.

HDMI Control

You can link operations with devices connected to HDMI and compatible with HDMI Control.

**On** : Use HDMI control function.

**Off** (Default) : Do not use HDMI control function.

- Please consult the operating instructions for each connected device to check the settings.
- Refer to “HDMI control function” (page 122) for more information about the HDMI control function.

NOTE

- If the “HDMI Control” settings have been changed, always reset the power to connected devices after the change.
Pass Through Source
The AV receiver will “pass through” the sources HDMI signal when in standby.

Last (Default) : Choose this option to “pass through” the last used HDMI input video source.

CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / CD* : Choose one of these HDMI sources to be passed through when the AV receiver is in standby.

* “Pass Through Source” can be set when any of the HDMI connectors is assigned to “CD” for the input source in the “Input Assign” (page 168) setting.

“Pass Through Source” can be set when “HDMI Control” is set to “On” or “HDMI Pass Through” is set to “On”.

Power Off Control
Links the power standby of this unit to external devices.

All (Default) : If power to a connected TV is turned off independently of the input source, power to this unit is automatically set to standby.

Video : With an input source being selected that is assigned either “HDMI”, “COMP” or “VIDEO” (page 169), when you turn the power of the TV off, power to this unit is automatically set to standby.

Off : This unit does not link with power to a TV.

Component Video Out
Set the zone to which the component video output connector is assigned.

MAIN ZONE (Default) : Assigns the component video output connector to MAIN ZONE.

ZONE2 : Assigns the component video output connector to ZONE2.
Output Settings

Makes screen-related settings.

- Can be set when each input source is assigned “HDMI”, “COMP” or “VIDEO” (page 169).
- “Resolution”, “Progressive Mode” and “Aspect Ratio” can be set when “i/p Scaler” is set to anything other than “Off”.
- “Output Settings” cannot be set when 4K signals are input.

Video Mode

Make settings for video processing.

Auto (Default): Process video automatically based on the HDMI content information.

Game: Always process video for game content.

Movie: Always process video for movie content.

- If “Video Mode” is set to “Auto”, the mode is switched according to the input contents.

Video Conversion

The input video signal is converted automatically in conjunction with the connected TV (page 232 “Video conversion function”).

On (Default): The input video signal is converted.

Off: The input video signal is not converted.

i/p Scaler

Convert the input source resolution to the resolution set.

- When the input source is set other than to “iPod/USB” and “NETWORK”

  Analog (Default): Use i/p (interlace-to-progressive) scaler function for analog video signals.

  Analog & HDMI: Use i/p scaler function for analog and HDMI video signal.

  HDMI: Use i/p scaler function for HDMI video signals.

  Off: Do not use i/p scaler function.

- When the input source is set to “iPod/USB” and “NETWORK”

  On (Default): Use i/p scaler function.

  Off: Do not use i/p scaler function.

- “Analog & HDMI” can be set for input sources for which an HDMI input connector is assigned.
- Which items can be set depend on the input source assigned to each input connector.
- This function is not effective when the input signal is “x.v.Color”, 3D, sYCC 601 color, Adobe RGB color, Adobe YCC 601 color or computer resolutions.
### Resolution
Set the output resolution. You can set “Resolution” separately for HDMI output of the analog video input and HDMI input.

**Auto** (Default) : The number of pixels the TV connected to the HDMI MONITOR OUT connector supports is detected automatically and the appropriate output resolution is set.

**480p/576p / 1080i / 720p / 1080p / 1080p:24Hz / 4K** :
Set the output resolution.

- When “i/p Scaler” is set to “Analog & HDMI”, the resolution of both the analog video input signal and HDMI input signal can be set.
- When set to “1080p:24Hz”, you can enjoy film-like pictures for film sources (in 24 Hz). For video sources and mixed sources, we recommend setting the resolution to “1080p”.
- It is not possible to convert a 50 Hz signal into 1080p/24Hz. It is output at a resolution of 1080p/50Hz.

### Progressive Mode
Set an appropriate progressive conversion mode for the source video signal.

**Auto** (Default) : The video signal is automatically detected and the appropriate mode is set.

**Video** : Select mode suitable for video playback.

**Video and Film** : Select mode suitable for video and 30-frame film material playback.

- This item can be set when “i/p Scaler” is set to anything other than “Off”.

### Aspect Ratio
Set the aspect ratio for the video signals output to the HDMI.

**16:9** (Default) : Output at 16:9 aspect ratio.

**4:3** : Output at 4:3 aspect ratio with black bars on the sides of a 16:9 TV screen (except for 480p/576p output).

- “Aspect Ratio” can be set when “i/p Scaler” is set to anything other than “Off”.

---

**Front panel** | **Display** | **Rear panel** | **166** | **Remote** | **Index** | **Appendix**
On Screen Display

Select the on-screen display user interface preferences.

■ Volume
Sets where to display the master volume level.

- **Bottom** (Default) : Display at the bottom.
- **Top** : Display at the top.
- **Off** : Turn display off.

- When the master volume display is hard to see when superimposed text (closed captioning) or movie subtitles are present, set to “Top”.

■ Info
Displays status of operation temporarily when the sound mode is changed, or input source is switched. You can set whether or not to show each of these status displays.

- **On** (Default) : Turn display on.
- **Off** : Turn display off.

■ Now Playing
Sets how long each menu is displayed when the input source is “NETWORK”, “iPod/USB”, or “TUNER”.

- **Always On** (Default) : Show display continuously.
- **Auto Off** : Show display for 30 seconds after operation.

TV Format

Set the video signal format to be output for the TV you are using.

■ Format

- **PAL** (Default) : Select PAL output.
- **NTSC** : Select NTSC output.

- “Format” can also be set by the following procedure. However, the menu screen is not displayed.
  1. Press and hold the main unit’s \(<\) \(\triangleright\) for at least 3 seconds.
  2. Use the main unit’s \(<\) \(\triangleright\) and set the video signal format.
  3. Press the main unit’s ENTER to complete the setting.

**NOTE**
- When a format other than the video format of the connected TV is set, the picture will not be displayed properly.
Inputs

Perform settings related to input source playback.
You do not have to change the settings to use the unit. Make settings when needed.

Input Assign

By making connections as indicated by the input sources printed on the audio/video input connectors of this unit, you can just press one of the input source select buttons to easily play back audio or video from a connected device.
When making connections other than the default settings, you must change settings in this section.

■ Examples of “Input Assign” menu screen displays

Use the “Input Assign” menu to change the HDMI input connectors, Digital input connectors, Analog input connectors, Component input connectors, and Video input connectors that are assigned to the input sources in default settings.

By default, each item is set as follows.

<table>
<thead>
<tr>
<th>Input source</th>

TV set top box/satellite users please note

When using the optical or coaxial digital audio output on a TV/satellite box
To play the video signal assigned to “HDMI” combined with the audio signal assigned at “Input Assign” – “DIGITAL”, you will also need to select “Digital” in the “Input Mode” (page 171).
**HDMI**
Set this to change the HDMI input connectors assigned to the input sources.

1 / 2 / 3 / 4 / 5 / 6 / FRONT :
Assign an HDMI input connector to the selected input source.

– : Do not assign an HDMI input connector to the selected input source.

* When “HDMI Control” (page 163) is set to “On”, HDMI input connector cannot be assigned to “TV AUDIO”.

**DIGITAL**
Set this to change the digital audio input connectors assigned to the input sources.

COAX1 (Coaxial) / COAX2 / OPT1 (Optical) / OPT2 :
Assign a digital input connector to the selected input source.

D.LINK : Assign the Denon Link HD connector when the Denon Link HD connection is established to a player compatible with the Denon Link HD function (page 43).

– : Do not assign a digital input connector to the selected input source.

**ANALOG**
Set this to change the analog audio input connectors assigned to the input sources.

1 / 2 / 3 / 4 / 5 / FRONT :
Assign a analog input connector to the selected input source.

– : Do not assign a analog input connector to the selected input source.

**COMP (Component video)**
Set this to change the component video input connectors assigned to the input sources.

1 / 2 :
Assign the component video input connector to the selected input source.

– : Do not assign a component video input connector to the selected input source.

**VIDEO**
Set this to change the composite video input connectors assigned to the input sources.

1 / 2 / 3 / FRONT :
Assign the video input connector to the selected input source.

– : Do not assign a video input connector to the selected input source.

**Set Defaults**
The “Input Assign” settings are returned to the default settings.
Source Rename

Change the display name of the selected input source. This is convenient when the input source name of your device and the input source name of this unit are different. You can change the name to suit your needs. When the renaming is completed, the name is displayed on this unit’s display and on the menu screen.

CBL/SAT / DVD / Blu-ray / GAME / AUX1 / AUX2 / MEDIA PLAYER / CD / TV AUDIO / PHONO : Change the display name of the selected input source.

Set Defaults : The “Source Rename” settings are returned to the default settings.

Source Level

• This function corrects the playback level of the selected input source’s audio input.
• Make this setting if there are differences in the input volume levels between the different sources.

Source Level

- When the input source is set to “iPod/USB”, “NETWORK” and “TUNER”
  -12dB – +12dB (Default : 0dB)

- Analog Inputs / Digital Inputs

- When the input source is set to “iPod/USB”, “NETWORK” and “TUNER”
  -12dB – +12dB (Default : 0dB)

Hide Sources

Remove from the display input sources that are not used.

Show (Default) : Use this source.
Hide : Do not use this source.

- The analog input level can be adjusted independently for input sources for which “ANALOG” is assigned at “Input Assign” (page 168).
- The digital input level can be adjusted independently for input sources for which “DIGITAL” is assigned at “Input Assign” (page 168).
Input Select

Set the audio input mode and decode mode of each input source. The input modes available for selection may vary depending on the input source.

- **Input Mode**
  
  Set the audio input modes for the different input sources.
  
  It is normally recommended to set the audio input mode to “Auto”.
  
  - **Auto** (Default): Automatically detect input signal and perform playback.
  - **HDMI**: Play only signals from HDMI input.
  - **Digital**: Play only signals from digital input.
  - **Analog**: Play only signals from analog input.

- **Decode Mode**
  
  Set the audio decode mode for input source.
  
  - **Auto** (Default): Detect type of digital input signal and decode and play automatically.
  - **PCM**: Decode and play only PCM input signals.
  - **DTS**: Decode and play only DTS input signals.

  - **When digital signals are properly input, the [DIG] indicator lights on the display.**
  - **If the [DIG] indicator does not light, check “Input Assign” (page 168) and the connections.**
  - **If “HDMI Control” is set to “On” and a TV compatible with the ARC is connected via the HDMI MONITOR connectors, the input mode whose input source is “TV AUDIO” is fixed to ARC.**
Speakers

The acoustic characteristics of the connected speakers and listening room are measured and the optimum settings are made automatically. This is called “Audyssey® Setup”.

You do not have to perform Audyssey® Setup when you have already performed Speaker Calibration in Setup Assistant.

To set up the speakers manually, use “Manual Setup” (page 182) on the menu.

Audyssey® Setup

To perform measurement, place the Setup and measurement microphone in multiple locations all around the listening area. For best results, we recommend you measure in six or more positions, as shown in the illustration (up to eight positions).

• When performing Audyssey® Setup, Audyssey MultEQ® XT32/Audyssey Dynamic EQ®/Audyssey Dynamic Volume®/Audyssey LFC™ functions become active (page 156, 157, 158).

**NOTE**

• Make the room as quiet as possible. Background noise can disrupt the room measurements. Close windows and turn off the power on electronic devices (TVs, radios, air conditioners, fluorescent lights, etc.). The measurements could be affected by the sounds emitted by such devices.

• During the measurement process, place cell phones outside the listening room. Cell phone signals could disrupt the measurements.

• Do not stand between the speakers and Setup and measurement microphone or allow obstacles in the path while the measurements are being made. Do not hold the Setup and measurement microphone in your hand during measurements. This will cause inaccurate readings.

• During the measurement process, audible test tones will come from the speakers and subwoofer(s), but this is part of normal operation. If there is background noise in the room, these test signals will increase in volume.

• Operating VOLUME ▲▼ on the remote control unit or MASTER VOLUME on the main unit during the measurements will cancel the measurements.

• Measurement cannot be performed when headphones are connected. Unplug the headphones before performing Audyssey® Setup.
About Setup and measurement microphone placement

- Measurements are performed by placing the Setup and measurement microphone successively at multiple positions throughout the entire listening area, as shown in **Example ①**.
- Even if the listening environment is small as shown in **Example ②**, measuring at multiple points throughout the listening environment results in more effective correction.

![Example ①](image1)

![Example ②](image2)

- FL  Front speaker (L)
- SW  Subwoofer
- FR  Front speaker (R)
- C   Center speaker
- SL  Surround speaker (L)
- SR  Surround speaker (R)

About the main listening position (*M)

The main listening position is the position where listeners would normally sit or where one would normally sit alone within the listening environment. Before starting Audyssey® Setup, place the Setup and measurement microphone in the main listening position. Audyssey MultEQ® XT32 uses the measurements from this position to calculate speaker distance, level, polarity, and the optimum crossover value for the subwoofer.

About Audyssey Sub EQ HT™

Audyssey Sub EQ HT™ makes the integration of dual subwoofers seamless by first compensating for any level and delay differences between the two subwoofers and then applying Audyssey MultEQ® XT32 to both subwoofers together.

To run Audyssey Sub EQ HT™ you must select “Measure (2 spkrs)” in “Channel Select” (page 175).
Procedure for speaker settings (Audyssey® Setup)

1. **Mount the Setup and measurement microphone on a tripod or stand and place it in the main listening position.** When you set the setup microphone, point the tip of it toward the ceiling, at the height of your ears in your listening position.

2. **If using a subwoofer capable of the following adjustments, set up the subwoofer as shown below.**

   - When using a subwoofer with a direct mode
     Set the direct mode to “On” and disable the volume adjustment and crossover frequency setting.

   - When using a subwoofer without a direct mode
     Make the following settings:
     - Volume : “12 o’clock position”
     - Crossover frequency : “Maximum/Highest Frequency”
     - Low pass filter : “Off”
     - Standby mode : “Off”
3 Connect the Setup and measurement microphone to the SETUP MIC jack of this unit.

When the Setup and measurement microphone is connected, the following screen is displayed.

4 Select “Start” and then press ENTER.
Audyssey® Setup can also make the following settings.

- **Amp Assign**
The signal output from the SURROUND BACK, FRONT HEIGHT and FRONT WIDE speaker terminals of this unit can be switched to match your speaker environment. Refer to “Amp Assign” (page 182).

- **Channel Select**
If channels that are not to be used are set in advance, measurement for the set channels is skipped, and measuring time can be reduced. You can also change the number of surround back speakers and subwoofer.

5 Select “Next” and then press ENTER.
6 Select “Begin Test” and then press ENTER.
   • Measurement requires several minutes.

   **NOTE**
   • If “Caution!” is displayed on TV screen:
     Go to “Error messages” (page 179). Check any related items, and
     perform the necessary procedures.
   • If the volume level for the subwoofer is not appropriate, an error message
     is displayed. See “Subwoofer level error message and how to adjust”
     (page 180).

   When measuring has stopped
   ① Press BACK to display the popup screen.
   ② Press ▼ to select “Yes”, and then press ENTER.

7 The detected speakers are displayed.

8 Select “Next” and then press ENTER.

9 Move the Setup and measurement microphone to position 2, select “Continue”, and then press ENTER.
The measurement of the second position starts. Measurements can be made in up to eight positions.

   • To skip measuring the second and subsequent listening position, use ▼ to
     select “Calculation” and press ENTER to proceed to step 12.
10 Repeat step 9, measuring positions 3 to 8.

11 Select “Calculation” and then press ENTER.

- Analysis takes several minutes to complete. The more speakers and measurement positions that there are, the more time it takes to perform the analysis.

12 Use ▲▼ to select the item you want to check, and then press ENTER.

- Subwoofers may measure a greater reported distance than the actual distance due to added electrical delay common in subwoofers.
13 Select “Store” and then press ENTER.
Save the measurement results.

14 Unplug the Setup and measurement microphone from the unit’s SETUP MIC jack.

15 Set Audyssey Dynamic Volume®.

• This feature adjusts the output volume to the optimal level while constantly monitoring the level of the audio input to the unit. Optimal volume control is performed automatically without any loss in the dynamism and clarity of the sound when, for example, the volume suddenly increases for commercials shown during television programs.

• Saving the results requires about 30 seconds.

• During saving of measurement results, be sure not to turn off the power.

• After performing Audyssey® Setup, do not change the speaker connections or subwoofer volume. In event of a change, perform Audyssey® Setup again.
Error messages

An error message is displayed if Audyssey® Setup could not be completed due to speaker placement, the measurement environment, etc. If an error message is displayed, check the relevant items and perform the necessary measures. Be sure to turn off the power before checking speaker connections.

</tbody>
</table>
Subwoofer level error message and how to adjust

The optimal level of each subwoofer channel for Audyssey® Setup measurement is 75 dB. During subwoofer level measurement (page 172 “Audyssey® Setup”), an error message is displayed when one level of subwoofers is outside the 72 – 78 dB range.

When using a subwoofer with built-in amplifier (active type), adjust the subwoofer volume so that the subwoofer level is within the 72 to 78 dB range.

1. Select “SW Level Matching” and then press ENTER.
2. Adjust the volume control on your subwoofer so that the measured level is within the 72 to 78 dB range.
3. When the measured level is within the 72 to 78 dB range, select “Next” and then press ENTER.
   - If you use two subwoofers, the second subwoofer’s adjustment will be started.
   Repeat the operation from step 2, 3.
Retrieving Audyssey® Setup settings

If you set “Restore...” to “Restore”, you can return to Audyssey® Setup measurement result (value calculated at the start by MultEQ® XT32) even when you have changed each setting manually.

Audyssey Setup
Your AV receiver can automatically measure the acoustics of your room then optimize your speakers using the included microphone. Set the following items if necessary.

Amp Assign
Channel Select
Check Results
Restore...

Start
## Manual Setup

Perform when setting the speakers manually or when changing settings made in Audyssey® Setup.

- If you change the speaker settings after performing Audyssey® Setup, it will not be possible to select Audyssey MultEQ® XT32, Audyssey Dynamic EQ® and Audyssey Dynamic Volume® (page 156, 157).
- “Manual Setup” can be used without changing the settings. Please set if necessary.

## Amp Assign

Select power amplifier usage method to match your speaker system.

### Assign Mode

Set the assignment mode.

- **7.1ch(SB/FH/FW)** (Default) : Assigns all power amplifiers within this unit for MAIN ZONE.
- **5.1ch + ZONE2** : Setting to assign the unit’s built-in power amplifier for ZONE2 and output the audio in stereo.
- **5.1ch + ZONE3** : Setting to assign the unit’s built-in power amplifier for ZONE3 and output the audio in stereo.
- **5.1ch + ZONE2/3-MONO** : Setting to assign the unit’s built-in power amplifier for ZONE2 and ZONE3 and output the audio in monaural.
- **5.1ch(Bi-Amp)** : Setting to use the front speakers via the bi-amp connection.
- **5.1ch + Front B** : Setting to use the second set of front speakers for playback. You can switch the front speakers A and B to be used for playback in accordance with the 2-channel playback or multi-channel playback mode. When you select this setting, also perform the “Front Speaker Setup” (page 188) procedure.
- **7.1ch/2ch Front** : Setting to use the other front speakers for playback when you do 2-channel playback in DIRECT or STEREO mode. When you select this setting, also perform the “Front Speaker Setup” (page 188) procedure.
- **9.1ch(SB/FH/FW)** : Setting to use a maximum 9.1 channel speaker system by using a combination of the unit’s 7-channel built-in amp with an external power amp connected to a set of 2-channel speakers.
Main Pre-amps
Selects the PRE OUT connector that is connected to the external power amplifier used in MAIN ZONE when “Assign Mode” (page 182) is set to “9.1ch(SB/FH/FW)”.

**Surround Back** (Default): The surround back left and right pre-amp outputs are connected to an external amplifier.

**Front Height**: The front height left and right pre-amp outputs are connected to an external amplifier.

**Front Wide**: The front wide left and right pre-amp outputs are connected to an external amplifier.

**Front**: The front left and right pre-amp outputs are connected to an external amplifier.

---

### Speaker Config.
Indicate speaker presence and select speaker size categories based on bass reproduction capability.

#### Front
Set the front speaker size.

- **Large** (Default): Use a large speaker that can adequately play back very low bass frequencies.
- **Small**: Use a small speaker that has inadequate playback capacity for very low bass frequencies. Note that for most multi-channel speakers, this is the best choice.

- When “Subwoofer” is set to “No”, “Front” is automatically set to “Large”.
- When “Front” is set to “Small”, “Center”, “Surround”, “Surr. Back”, “Front Height” and “Front Wide” can not be set to “Large”.

#### Center
Set the presence and size of the center speaker.

- **Large**: Use a large speaker that can adequately play back very low bass frequencies.
- **Small** (Default): Use a small speaker that has inadequate playback capacity for very low bass frequencies. Note that this is almost always the best choice.

- **None**: Select when a center speaker is not connected.
Subwoofer

Set the presence of a subwoofer.

- **2 spkrs**: Use two subwoofers.
- **1 spkr** (Default): Use only one subwoofer.
- **None**: Select when a subwoofer is not connected.

- When “Front” is set to “Small”, “Subwoofer” is automatically set to “1spkr”.

Surround

Set the presence and size of the surround speakers.

- **Large**: Use a large speaker that can adequately play back very low bass frequencies.
- **Small** (Default): Use a small speaker that has inadequate playback capacity for very low bass frequencies. Note that this is almost always the best choice.
- **None**: Select when the surround speakers are not connected.

- When “Surround” is set to “None”, “Surr. Back”, “Front Height” and “Front Wide” are automatically set to “None”.

Surr. Back

Set the presence, size and number of surround back speakers.

- **Large**: Use a large speaker that can adequately play back very low bass frequencies.
- **Small** (Default): Use a small speaker that has inadequate playback capacity for very low bass frequencies. Note that this is almost always the best choice.
- **None**: Select when the surround back speakers are not connected.

- When “Assign Mode” (page 182) setting is “7.1ch (SB/FH/FW)”, “9.1ch (SB/FH/FW)” or “7.1ch/2ch Front”, you can make the “Surr. Back” setting.
Front Height
Set the presence and size of the front height speakers.

Large: Use a large speaker that can adequately play back very low bass frequencies.

Small (Default): Use a small speaker that has inadequate playback capacity for very low bass frequencies. Note that this is almost always the best choice.

None: Select when the front height speakers are not connected.

When “Assign Mode” (page 182) setting is “7.1ch (SB/FH/FW)” or “9.1ch (SB/FH/FW)”, you can make the “Front Height” setting.

Front Wide
Set the presence and size of the front wide speakers.

Large: Use a large speaker that can adequately play back very low bass frequencies.

Small (Default): Use a small speaker that has inadequate playback capacity for very low bass frequencies. Note that this is almost always the best choice.

None: Select when the front height speakers are not connected.

When “Assign Mode” (page 182) setting is “7.1ch (SB/FH/FW)” or “9.1ch (SB/FH/FW)”, you can make the “Front Wide” setting.

Distances
Set distance from listening position to speakers.
Measure beforehand the distance from the listening position to each speaker.

Unit
Set the unit of distance.

Meters (Default)
Feet

Step
Set the minimum variable width of the distance.

0.1m (Default) / 0.01m
1ft / 0.1ft

Set Defaults
The “Distances” settings are returned to the default settings.
### Set the distance

0.00m – 18.00m / 0.0ft – 60.0ft

- The speakers that can be selected differ depending on the “Amp Assign” ([page 182]) and “Speaker Config.” ([page 183]) settings.
- Default settings:
  - Front L / Front R / F. Height L / F. Height R / F. Wide L / F. Wide R / Center / Subwoofer : 3.60 m (12.0 ft)
  - Surround L / Surround R / Surr. Back L / Surr. Back R : 3.00 m (10.0 ft)
- Set the difference in the distance between the speakers to less than 6.00 m (20.0 ft).

### Levels

Set the volume of the test tone to be the same when it is output from each speaker.

#### Test Tone Start

Output test tone. A test tone is output from the selected speaker. While listening to the test tone, adjust the volume output from the selected speaker.

-12.0dB – +12.0dB (Default : 0.0dB)

- When “Levels” is adjusted, the adjusted values are set for all the sound modes.
- When headphones are connected to the PHONES connector on this unit, you cannot set “Levels”.

#### Set Defaults

The “Levels” settings are returned to the default settings.
Crossovers

Set the maximum frequency of the bass signal output from each channel to the subwoofer. Set the Crossover Frequency to suit the bass reproduction capability of the speaker being used.

Speaker Selection

Selects how to set the crossover frequency. See the speaker manual for information concerning speaker crossover frequency.

- **All** (Default): Selects the crossover point of all speakers at the same time.
- **Individual**: Selects the crossover points for each speaker individually.

### Set the crossover frequency

40Hz / 60Hz / 80Hz (Default) / 90Hz / 100Hz / 110Hz / 120Hz / 150Hz / 200Hz / 250Hz

- “Crossovers” can be set when the “Subwoofer Mode” (page 188) setting is “LFE+Main”, or when you have a speaker that is set to “Small”.
- The default crossover frequency is “80Hz”, which will work best with the widest variety of speakers. When using very small speakers, however, you can choose a higher setting based on the specified frequency response of the speakers. If the speaker has a specified frequency response of 120 Hz – 20 kHz (as an example), then choose the 120 Hz crossover frequency.
- For speakers set to “Small”, low frequency content below the crossover frequency is attenuated to the speakers and the low bass content is then re-delivered to the subwoofer, or the front (L/R) speakers if they have been set to Large.
- The speakers that can be set when “Individual” is selected differ depending on the “Subwoofer Mode” (page 188) setting.
  - When “LFE” is selected, speakers set to “Small” at “Speaker Config.” (page 183) can be set. If the speakers are set to “Large”, “Full Band” is displayed and the setting cannot be made.
  - When “LFE+Main” is selected, speakers can be set regardless of the “Speaker Config.” (page 183) setting.
Set subwoofer and LFE signal range playback.

### Subwoofer Mode
Select low range signals to be reproduced by subwoofer.

- **LFE** (Default): The low range signal of the channel set to “Small” speaker size is added to the LFE signal output from the subwoofer.
- **LFE+Main**: The low range signal of all channels is added to the LFE signal output from the subwoofer. This is usually the best setting for most systems.

- “Subwoofer Mode” can be set when “Speaker Config.” is set to other than “None”.
- Play music or a movie source and select the mode offering the strongest bass.
- If “Front” and “Center” for “Speaker Config.” are set to “Large”, and “Subwoofer Mode” is set to “LFE”, no sound may be output from the subwoofers, depending on the input signal or selected sound mode. Select “LFE+Main” if you want the bass signals to always be produced from the subwoofer.

### LPF for LFE
Set LFE signal playback range. Set this when you want to change the playback frequency (low pass filter point) of the subwoofer.

80Hz / 90Hz / 100Hz / 110Hz / 120Hz (Default) / 150Hz / 200Hz / 250Hz

Set the front speakers to use for every sound mode.

- This can be set when “Assign Mode” is set to “5.1ch + Front B”.

### 2ch Playback
The front speakers used in direct play (2-channel), stereo play and pure direct play (2-channel) are set in advance.

- **A** (Default): Front speaker A is used.
- **B**: Front speaker B is used.
- **A+B**: Both front speakers A and B are used.

### Multi ch Playback
The front speakers used in play modes other than direct play (2-channel), stereo play and pure direct play (2-channel) are set in advance.

- **A** (Default): Front speaker A is used.
- **B**: Front speaker B is used.
- **A+B**: Both front speakers A and B are used.
2ch Playback

Select the method for setting the speakers used in the 2-channel direct and stereo playback modes.

- This can be set when “Assign Mode” (page 182) is set to “7.1ch/2ch Front”.

■ Setting

Select the method for setting the speakers used in the 2-channel direct and stereo playback modes.

**Auto** (Default) : The settings at “Speakers” (page 172) are applied.

**Manual** : Make separate settings for 2-channel. Make the following settings:

- **Front**
  
  Set the front speaker size.

  **Large** (Default) : Use a large speaker that can adequately play back very low bass frequencies.

  **Small** : Use a small speaker that has inadequate playback capacity for very low bass frequencies.

- If “Speaker Config.” – “Subwoofer” (page 184) is set to “None”, the setting is automatically set to “Large”.

- If “Speaker Config.” – “Subwoofer” (page 184) is set to “None”, the setting is automatically set to “No”. If the “Front” setting is “Small”, the setting is automatically “Yes”.

■ SW Mode

Select low range signals to be reproduced by subwoofer.

**LFE** (Default) : When the “2ch Playback – “Front” setting is set to “Large”, the LFE signal alone is output from the subwoofer. Also, when the “2ch Playback – “Front” setting is set to “Small”, the front channel low range signal is added to the LFE signal output from the subwoofer.

**LFE+Main** : The front channel low range signal is added to the LFE signal output from the subwoofer.

- This setting can be set made “2ch Playback” – “Subwoofer” is set to “Yes”.

■ Subwoofer

Set the presence of a subwoofer.

**Yes** (Default) : Use a subwoofer.

**No** : Select when a subwoofer is not connected.
**Crossover**
Set the maximum frequency of the bass signal output from each channel to the subwoofer.

40Hz / 60Hz / 80Hz (Default) / 90Hz / 100Hz / 110Hz / 120Hz / 150Hz / 200Hz / 250Hz

- This setting can be set made “2ch Playback” – “Subwoofer” is set to “Yes”.
- If the “2ch Playback” – “Front” setting is “Large” and the “SW Mode” setting is “LFE”, “Full Band” is displayed and the setting cannot be made.

**Distance FL / Distance FR**
Select speaker for distance setting.

0.00m – 18.00m (Default : 3.60m) / 0.0ft – 60.0ft (Default : 12.0ft) :
Set distance from main listening position to speaker.

- Set the difference in the distance between the speakers to less than 6.00 m (20.0 ft).

**Level FL / Level FR**
Select speaker for level adjustment.

–12.0dB – +12.0dB (Default : 0.0dB) :
Adjust the level of each channel.
Network

To use this unit by connecting it to a home network (LAN), you must configure network settings. If you set up your home network (LAN) via DHCP, set “DHCP” to “On” (use the default setting). This allows this unit to use your home network (LAN). If you assign an IP address for each device, you must use the “IP Address” setting to assign an IP address to this unit and enter the information about your home network (LAN) such as the gateway address and subnet mask.

Information

Display network information.

Friendly Name / DHCP On or Off / IP Address / MAC Address

- MAC Address is required to make a vTuner account.

IP Control

Enables network communication in standby power mode.

Off In Standby (Default) : Suspend network function during standby.
Always On : Network is on during standby. Main unit operable with a network compatible controller.

- Set to “Always On” when using the web control function.

NOTE

- When “IP Control” is set to “Always On”, it consumes more standby power.

Friendly Name

The Friendly Name is the name of this unit displayed on the network. You can change the Friendly Name according to your preferences.

 ■ Edit Name
Edits Friendly Name.

- The default Friendly Name on first use is “Denon AVR-X4000”.
- Up to 63 characters can be input.
- For character input, see page 147.

 ■ Set Defaults
Restores Friendly Name, which you had changed, to the default setting.
Settings

Make settings for wired LAN.
- If you are using a broadband router (DHCP function), there is no need to make the settings at “IP Address” and “Proxy”, since the DHCP function is set to “On” in this unit’s default settings.
- Only set “Settings” when connecting to a network without a DHCP function.

- [DHCP]
  Selects how to connect to the network.
  **On** (Default) : Configure the network settings automatically from your router.
  **Off** : Configure the network settings manually.

- **IP Address**
  Set the IP address within the ranges shown below.
  - The Network Audio function cannot be used if other IP addresses are set.
  CLASS A: 10.0.0.1 – 10.255.255.254
  CLASS B: 172.16.0.1 – 172.31.255.254
  CLASS C: 192.168.0.1 – 192.168.255.254

- **Subnet Mask**
  When connecting an xDSL modem or connector adapter directly to this unit, input the subnet mask indicated in the documentation supplied by your provider. Normally input 255.255.255.0.

- **Default Gateway**
  When connected to a gateway (router), input its IP address.

- **Primary DNS, Secondary DNS**
  If there is only one DNS address indicated in the documentation supplied by your provider, input it at “Primary DNS”. If two or more DNS are provided by your provider, enter both “Primary DNS” and “Secondary DNS”.

- **DHCP**
  Configure the network settings manually.
### Proxy
Make this setting when connecting to the Internet via a proxy server. Make the proxy settings only when you connect to the Internet via a proxy server that is on your internal network or provided by your provider, etc.

- **On(Address)**: Select when inputting by address.
- **On(Name)**: Select when inputting by domain name. Up to 38 characters can be input.
- **Off (Default)**: Disables the proxy server.

### Port
Enter port number.

- If you cannot connect to the Internet, recheck the connections and settings (page 49).
- If you do not understand about Internet connection, contact your ISP (Internet Service Provider) or the store from which you purchased your computer.

### Diagnostics
Used to check the network connection.

#### Physical Connection
Checks the physical LAN port connection.

- **OK**
- **Error**: The LAN cable is not connected. Check the connection.

#### Router Access
Checks the connection from this unit to the router.

- **OK**
- **Error**: Failed to communicate with the router. Check the router settings.

#### Internet Access
Checks whether this unit has access to the Internet (WAN).

- **OK**
- **Error**: Failed to connect to the Internet. Check the Internet connection environment or router settings.
Maintenance Mode

Use when receiving maintenance from a Denon service engineer or custom installer. Ordinarily, this mode isn’t suitable for use by the end user, only by a trained service technician or custom installation professional.

**NOTE**

- Only use this function if so instructed by a Denon serviceperson or installer.
## General

Make various other settings.

### Language

Set the language for display on the menu screen.

**English** (Default) / **Deutsch** / **Français** / **Italiano** / **Español** / **Nederlands** / **Svenska** / **Русский** / **Polski**

- “Language” can also be set by the following procedure. However, the menu screen is not displayed.
  1. Following the display content to make the setting.
  2. Press and hold the main unit’s **o** for at least 3 seconds.
     - “Video Format <PAL>” appears on the display.
  3. Press the main unit’s **i**.
     - “GUI Language <ENGLISH>” appears on the display.
  4. Use the main unit’s **o** and set the language.
  5. Press the main unit’s ENTER to complete the setting.

### ZONE2 Setup / ZONE3 Setup

Set the audio to play back with multi-zone (ZONE2, ZONE3).

- The setting values (dB) for “Volume Limit” and “Power On Volume” are what is displayed when “Scale” (page 154) in the menu is set to “−79.5dB − 18.0dB”.

#### Bass

Adjust bass tones.

-14dB − +14dB (Default : 0dB)

#### Treble

Adjust treble tones.

-14dB − +14dB (Default : 0dB)

#### High Pass Filter

Make settings for cutting the low range to reduce distortion in the bass.

- **On** : The low range is attenuated.
- **Off** (Default) : The low range is not attenuated.
Appendix

Contents
Connections
Playback
Settings
Tips
Appendix

Lch Level
Adjust the left channel output level.
–12dB – +12dB (Default : 0dB)

Rch Level
Adjust the right channel output level.
–12dB – +12dB (Default : 0dB)

Channel
Set the signal output from multi-zone.
Stereo (Default) : Select stereo output.
Mono : Select monaural output.

• When “Assign Mode” (page 182) is set to “5.1ch + ZONE2/3-MONO”, the “Channel” setting is automatically set to “Mono”.

HDMI Audio (ZONE2 only)
Selects the audio signal format for playing an HDMI source in ZONE2.

Through (Default) : The HDMI audio signal is passed through the AV receiver to the device in ZONE2.

PCM : The HDMI audio signal is converted to PCM format so you can listen to HDMI sound from the ZONE2 pre out or ZONE2 assigned speakers.

Volume Level
Set the volume output level.

Variable (Default) : Volume adjustment is enabled by main unit and remote control unit.
1 – 98 (–79dB – 18dB) : The volume is adjusted to the set level.

Volume Limit
Make a setting for maximum volume.

60 (–20dB) / 70 (–10dB) / 80 (0dB) (Default : 70 (–10dB))
Off : Do not set a maximum volume.

• This can be set when “Volume Level” is set to “Variable”.

Front panel
Display
Rear panel
Remote
Index
### Power On Volume
Define the volume setting that is active when the power is turned on.

**Last** (Default) : Use the memorized setting from the last session.

**Mute** : Always mute when power is turned on.

1 – 98 (–79dB – 18dB) : The volume is adjusted to the set level.

- This can be set when “Volume Level” is set to “Variable”.

### Mute Level
Set the amount of attenuation when muting is on.

**Full** (Default) : The sound is muted entirely.

–40dB : The sound is attenuated by 40 dB down.

–20dB : The sound is attenuated by 20 dB down.

- This can be set when “Volume Level” is set to “Variable”.

---

### Zone Rename
Change the display title of each zone to one you prefer.

**MAIN ZONE / ZONE2 / ZONE3**

**Set Defaults** : The input source name is returned to the default setting.

- Up to 10 characters can be input.
- For character input, see page 147.

### Quick Select Names
Change the “Quick Select” display title to one you prefer.

**Quick Select 1 / Quick Select 2 / Quick Select 3 / Quick Select 4**

**Set Defaults** : The input source name is returned to the default setting.

- Up to 16 characters can be input.
- For character input, see page 147.
**Trigger Out 1 / Trigger Out 2**

Selects when to activate trigger out. For details about how to connect the TRIGGER OUT jacks, see “TRIGGER OUT jacks” ([page 51](#)).

- When setting for zone (MAIN ZONE / ZONE2 / ZONE3) 
  Trigger out is activated through linkage to the power of the zone set to “On”.

- When setting for input source 
  Activate trigger out when the input source set to “On” is selected.

- When setting for HDMI monitor 
  Activate trigger out when the HDMI monitor set to “On” is selected.

**On** : Activate trigger on this mode.

**– – –** : Do not activate trigger on this mode.

**Auto Standby**

When you do not perform any operation on this unit with no audio or video input for a specified time, this unit automatically enters the standby mode. Before it enters the standby mode, “Auto Standby” is displayed on the display of this unit and the menu screen.

- **60 min** : The unit goes into standby after 60 minutes.
- **30 min** (Default) : The unit goes into standby after 30 minutes.
- **Off** : The unit does not go into standby automatically.
Front Display
Makes settings related to the display on this unit.

- **Dimmer**
  Adjust the display brightness of this unit.
  - **Bright** (Default) : Normal display brightness.
  - **Dim** : Reduced display brightness.
  - **Dark** : Very low display brightness.
  - **Off** : Turns the display off.

  * You can also adjust the display by turning DIMMER on the main unit.

- **Channel Indicators**
  Sets whether to use the input signal display or output signal display for the channel indication on the display.
  - **Input** : Uses the input signal display for the channel indication on the display.
  - **Output** (Default) : Uses the output signal display for the channel indication on the display.

Information
Show information about receiver settings, input signals, etc.

- **Audio**
  Show the audio information for MAIN ZONE.
  - **Sound Mode** : The currently set sound mode.
  - **Input Signal** : The input signal type.
  - **Format** : The number of input signal channels (presence of front, surround, LFE).
  - **Sample Rate** : The input signal’s sampling frequency.
  - **Offset** : The dialogue normalization correction value.
  - **Flag** : This is displayed when inputting signals including a surround back channel. “MATRIX” is displayed with Dolby Digital EX and DTS-ES Matrix signals, “DISCRETE” with DTS-ES Discrete signals.

### Dialogue normalization function
This function is automatically activated when playing Dolby Digital, Dolby Digital Plus, Dolby TrueHD, DTS and DTS-HD sources.
It automatically corrects the standard signal level for individual program sources.
The correction value can be checked using the STATUS on the main unit.

<table>
<thead>
<tr>
<th>Dial.Norm</th>
<th>Offset - 4dB</th>
</tr>
</thead>
</table>

The figure is the corrected value. This cannot be changed.
Video
Show the HDMI input/output signals and HDMI monitor information for MAIN ZONE.

HDMI Signal Info.
Resolution / Color Space / Pixel Depth

HDMI Monitor 1 / HDMI Monitor 2
Interface / Resolutions

ZONE
Show information about current settings.
MAIN ZONE: This item shows information about settings for MAIN ZONE. The information displayed differs according to the input source.
ZONE2: This item shows information about settings for ZONE2.
ZONE3: This item shows information about settings for ZONE3.

Firmware
Version: Displays information for the current firmware.

Notifications
Selects notification message preferences.

Notification Alerts
On (Default): Displays notification messages from Denon in the popup menu.
Off: Does not display notification messages from Denon in the popup menu.

• Press INFO to display current source name, volume, sound mode name, and other information at the bottom of the screen.

NOTE
• The status display screen cannot be displayed at a computer’s resolution (e.g. VGA) is being played.
**Usage Data**

To help us improve our products and customer service, Denon collects anonymous information about how you use your AV receiver (such as frequently used input sources and sound modes and speaker settings). Denon will never provide any information we collect to third parties.

**Yes** : Provide Denon with information about how you use this unit via the network.

**No** : Do not provide Denon with information about how you use this unit via the network.

---

**Firmware**

Set whether or not to check for firmware update, update the firmware, and display update and upgrade notifications.

- **Update**
  
  Update the firmware of the receiver.

  - **Check for Update** : Check for firmware updates. You can also check approximately how long it will take to complete an update.

  - **Update Start** : Execute the update process. When the update starts, the menu screen is shut down. During the update, the progress is shown on the display.

  **Tips**

  - If updating fails, the set automatically retries, but if updating is still not possible, one of the messages shown below is displayed. If the display reads as shown below, check the settings and network environment, then update again.

<table>
<thead>
<tr>
<th>Display</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Updating fail</td>
<td>Updating failed.</td>
</tr>
<tr>
<td>Login failed</td>
<td>Failure to log into server.</td>
</tr>
<tr>
<td>Server is busy</td>
<td>Server is busy. Wait a while then try again.</td>
</tr>
<tr>
<td>Connection fail</td>
<td>Failure in connecting to server.</td>
</tr>
<tr>
<td>Download fail</td>
<td>Downloading of the firmware has failed.</td>
</tr>
</tbody>
</table>
Notifications
When the latest firmware is available, a notification message is displayed on the TV screen at power on.
The notification message is displayed for about 20 seconds when the power is turned on. Connect to broadband Internet (page 49) when using this function.

Update
On (Default) : Display update message.
Off : Do not display update message.

Upgrade
On (Default) : Display upgrade message.
Off : Do not display upgrade message.

Add New Feature
Display new features that can be downloaded to this unit and perform an upgrade.

Upgrade Package : Display the items to be upgraded.
Upgrade Status : Display a list of the additional functions provided by the upgrade.
Upgrade Start : Execute the upgrade process. When the upgrade starts, the menu screen is shut down. During the upgrade, the amount of upgrade time which has elapsed is displayed.

• See the Denon website for details about upgrades.
• When the procedure is complete, “Registered” is displayed in this menu and upgrades can be carried out. If the procedure has not been carried out, “Not Registered” is displayed.
The ID number shown on this screen is needed when carrying out the procedure.
The ID number can also be displayed by pressing and holding the main unit’s and INFO for at least 3 seconds.
• If the upgrade is not successful, an error message identical to those in “Update” will appear on the display. Check the settings and network environment and then perform the upgrade again.
Notes concerning use of “Update” and “Add New Feature”

- In order to use these functions, you must have the correct system requirements and settings for a broadband Internet connection (page 49).
- Do not turn off the power until updating or upgrading is completed.
- Even with a broadband connection to the Internet, approximately 1 hour is required for the updating/upgrading procedure to be completed.
- Once updating/upgrade starts, normal operations on this unit cannot be performed until updating/upgrading is completed. Furthermore, there may be cases where backup data is reset for the parameters, etc., set on this unit.
- If the update or upgrade fails, press and hold the \( \mathbb{O} \) on the main unit for more than 5 seconds, or remove and re-insert the power cord. “Update retry” appears on the display and update restarts from the point at which update failed. If the error continues despite this, check the network environment.

Setup Lock

Protect settings from inadvertent changes.

<table>
<thead>
<tr>
<th>Lock</th>
<th>Protection Status</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>On</strong></td>
<td>Turn protection on.</td>
</tr>
<tr>
<td><strong>Off</strong> (Default)</td>
<td>Turn protection off.</td>
</tr>
</tbody>
</table>

**NOTE**

- When cancelling the setting, set “Lock” to “Off”.
- When “Lock” is set to “On”, no setting items are displayed except for “Setup Lock”.

Information regarding the “Update” function and “Add New Feature” will be announced on the Denon web site each time related plans are defined.
Operating external devices with the remote control unit

When preset codes are registered in the included remote control unit, it can then be used to operate any devices you have, such as DVD players or TVs made by different manufacturers.
Registering preset codes

There are two methods for registering preset codes; the simple method for registering preset codes of Denon players, and the method for registering the preset numbers of other manufacturers’ devices.

- Registering Denon Players (page 205)
- Registering by entering preset numbers (page 206)

Registering Denon Players

Use the following simple method to register the preset codes of Denon Blu-ray Disc players, DVD players and CD players.

- Registering Blu-ray Disc Players
  1. Press and hold down Blu-ray and OPTION until the DEV, TV and AVR indicators on the remote are flashing green, then release.

- Registering DVD Players
  1. Press and hold down DVD and OPTION until the DEV, TV and AVR indicators on the remote are flashing green, then release.

- Registering CD Players
  1. Press and hold down CD and OPTION until the DEV, TV and AVR indicators on the remote are flashing green, then release.
Registering multiple players at the same time

1. Press and hold down FAVORITE STATION 1 – 4 and OPTION until the DEV, TV and AVR indicators on the remote are flashing green, then release.

<table>
<thead>
<tr>
<th>Devices to be registered at the same time</th>

</tr>
</tbody>
</table>

Registering by entering preset numbers

Before starting, confirm the preset number of the device that you want to register and the buttons that can be registered in the Preset Code Table (page 268) in the Appendix.

1. Press and hold down the input source button that you want to register the preset code to and SETUP until the DEV, TV and AVR indicators are flashing green.

2. Enter the preset number (5 digits) listed for the device in the Preset Code Table using the number buttons (0 – 9) on the remote control.

• Some manufacturers use more than one type of remote control code. Preset codes to change the number and verify correct operation.

NOTE

• Depending on the model and year of manufacture of your device, some buttons may not operate. In this case, try “Registering by entering preset numbers” (page 206).
Operating devices

To operate an external device, press the input source button registered with the preset code, followed by one of the buttons in the following tables.

- The “DEV.” indicator lights when an external device is being operated.
- The “TV” indicator lights when the TV is being operated.
- To operate the menu of this unit, press AVR before operating the unit. The “AVR” operation mode indicator lights when this unit is being operated.

• DEVICE buttons may power some devices on. (Only the power-on operation is available for some Denon model devices as well.)
Initializing registered preset codes

1 Press and hold down AVR and OPTION until the DEV, TV and AVR indicators on the remote are flashing green, then release.

Specifying the zone used with the remote control unit

To prevent accidental misuse, you can set the zone for which the remote control unit is used.

1 Press and hold down MAIN or ZONE2 or ZONE3 and SETUP until the DEV, TV and AVR indicators on the remote are flashing green, then release.

   MAIN : When only using “MAIN ZONE”
   2 : When using “MAIN ZONE” / “ZONE2”
   3 (Default) : When using “MAIN ZONE” / “ZONE2” / “ZONE3”

Resetting the remote control unit

All the settings are restored to their defaults.

1 Press and hold down DEVICE MENU until the DEV, TV and AVR indicators on the remote are flashing green, then release.

2 Press 9, 8 and 1, in that order.
   The remote control unit operation mode indicator flashes twice.
   All the settings are restored to their defaults.

**Tips**

I want the volume not to become too loud by mistake.
• Set the volume upper limit for “Volume Limit” in the menu beforehand. This prevents children or others from increasing the volume too much by mistake. You can set this for each zone (page 155, 196).

I want to keep the volume at the same level when I turn the power on.
• By default, the volume setting when power was previously set to standby is applied at next power on. To use a fixed volume level, set the volume level at power on for “Volume Limit” in the menu. You can set this for each zone (page 155, 196).

I want to have the subwoofer always output audio.
• Depending on the input signals and sound mode, the subwoofer may not output audio. When “Subwoofer Mode” in the menu is set to “LFE+Main”, you can have the subwoofer always output audio (page 188).

I want to make human voices in the movies clearer.
• Use “Dialog Level” in the menu to adjust the level (page 149).

I want to keep bass and clarity during playback at a lower volume level.
• Set “Dynamic EQ” in the menu to “On”. This setting corrects the frequency characteristics to allow you to enjoy clear sound without the bass being lost even during playback at a lower volume level (page 156).

I want to automatically adjust the volume level difference in content such as TV and movies.
• Set “Dynamic Volume” in the menu. Volume level changes (between quiet scenes and loud scenes) in TV shows or movies are automatically adjusted to your desired level (page 157).
I want to set the optimized listening environment after changing the configuration/position of the speakers or changing a speaker to a new one.
• Perform Audyssey® Setup. This automatically makes the optimized speaker settings for the new listening environment (page 172).

I want to combine a desired video with the current music.
• Set “Video Select” in the option menu to “On”. You can combine the current music with your desired video source from Set-top Box or DVD, etc. while listening to music from Tuner, CD, PHONO or the Internet radio (page 105).

I want to play back photos from Flickr at the same time while listening to the Internet radio.
• After playing back photos from Flickr, start the slide show on the Internet radio playback screen (page 104).

I want to delete unused input sources.
• Set unused input sources for “Hide Sources” in the menu. This allows you to skip unused input sources when rotating the SOURCE SELECT knob on this unit (page 170).

I want to enjoy the same music in all zones at the home party, etc.
• Set “All Zone Stereo” in the option menu to “On”. This allows you to simultaneously play back in ZONE2 the music that is played back in MAIN ZONE (page 107).

I want to minimize the delay in video signals when I’m playing a game on my game console.
• When the video is delayed against button operations with the controller on the game console, set “Video Mode” in the menu to “Game” (page 165).

How to add Wi-Fi to the AV receiver?
• Connect a wireless LAN converter (sold separately) to the NETWORK connector on this unit.
Troubleshooting

If a problem should arise, first check the following:
1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are the other devices operating properly?

If this unit does not operate properly, check the items listed in the table below. Should the problem persist, there may be a malfunction. In this case, disconnect the power immediately and contact your store of purchase.

### Power does not turn on / Power is turned off

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause / Solution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power does not turn on.</td>
<td>• Check whether the power plug is correctly inserted into the power outlet.</td>
<td>52</td>
</tr>
</tbody>
</table>
| Power automatically turns off. | • The sleep timer is set. Turn on the power again.  
• “Auto Standby” is set. “Auto Standby” is triggered when there is no operation for a set amount of time. To disable “Auto Standby”, set “Auto Standby” on the menu to “Off”. | 126 198 |
| Power turns off and the power indicator flashes in red approx. every 2 seconds. | • Due to the temperature rise within this unit, the protection circuit is working. Turn off the power and wait about an hour until this unit sufficiently cools down. Then, turn on the power again.  
• Please re-install this unit in a place having good ventilation. | 250 |
| Power turns off and the power indicator flashes in red approx. every 0.5 seconds. | • Check the speaker connection. The protection circuit may have been activated because speaker cable core wires came in contact with each other or a core wire was disconnected from the connector and came in contact with the rear panel of this unit. After unplugging the power cord, take corrective action such as firmly re-twisting the core wire or taking care of the connector, and then reconnect the wire.  
• Turn down the volume and turn on the power again.  
• This unit’s amplifier circuit has failed. Turn off the power and please contact the Denon service adviser. | 28 54, 55 |
## Operations cannot be performed through the remote control unit

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
</table>
| Operations cannot be performed through the remote control unit. | • Batteries are worn out. Replace with new batteries.  
• Operate the remote control unit within a distance of about 7 m from this unit and at an angle of within 30°.  
• Remove any obstacle between this unit and the remote control unit.  
• Insert the batteries in the proper direction, checking the Θ and Θ marks.  
• The set’s remote control sensor is exposed to strong light (direct sunlight, inverter type fluorescent bulb light, etc.). Move the set to a place in which the remote control sensor will not be exposed to strong light.  
• The operation target zone does not correspond to the zone setting specified on the remote control unit. Press MAIN, ZONE2 or ZONE3 to select the zone to operate.  
• The remote control unit operating mode is used to operate other devices. Press AVR to set the operating mode to AVR.  
• When using a 3D video device, the remote control unit of this unit may not function due to effects of infrared communications between units (such as TV and glasses for 3D viewing). In this case, adjust the direction of units with the 3D communications function and their distance to ensure they do not affect operations from the remote control unit of this unit. | 8

</tbody>
</table>
| When using HDMI ZONE2, no video or audio is output from the TV in ZONE2. | • Check that the power is on for ZONE2.  
• Check the input source for ZONE2.  
• The AUX 1-HDMI 7 connector on the front panel does not support the HDMI ZONE2 function.  
• In ZONE2, playback is only possible when the input signals are HDMI signals.  
• When the TV does not support the input audio format, audio is not output. Set the audio format to “PCM” on the playback device. Alternatively, set “ZONE2 Setup” – “HDMI Audio” in the menu to “PCM”.  
• When the TV is not compatible with the resolution of the input video, no video is output. Set the output resolution on the playback device to a resolution that is compatible with the TV. | 137  
137  
196  
–    |
| When using HDMI ZONE2, MAIN ZONE audio is played back as PCM.           | • When the same input source is selected for MAIN ZONE and ZONE2, the audio format is limited according to the specifications of the TV in ZONE2.                                                               | –    |
Resetting factory settings

Perform this procedure if the display is abnormal or if operations cannot be performed. Note that when the microprocessor is reset, all the settings are reset to their default values and setup will need to be performed again.

1 Turn off the power using \( \).
2 Press \( \) while simultaneously pressing INFO and BACK.
3 Once the display starts flashing at intervals of about 1 second, release the two buttons.

- If in step 3 the display does not flash at intervals of about 1 second, start over from step 1.
About HDMI

HDMI is an abbreviation of High-Definition Multimedia Interface, which is an AV digital interface that can be connected to a TV or amplifier. With the HDMI connection, high definition video and high quality audio formats adopted by Blu-ray disc players (Dolby Digital Plus, Dolby TrueHD, DTS-HD, DTS-HD Master Audio) can be transmitted, which is not possible with the analog video transmission. Furthermore, in the HDMI connection, audio and video signals can be transmitted through a single HDMI cable, while in conventional connections it is necessary to provide audio and video cables separately for connection between devices. This allows you to simplify the wiring configuration that tends to be quite complex in a home theater system. This unit supports the following HDMI functions.

• **Deep Color**
  An imaging technology supported by HDMI. Unlike RGB or YCbCr, which uses 8 bits (256 shades) per color, it can use 10 bits (1024 shades), 12 bits (4096 shades), or 16 bits (65536 shades) to produce colors in higher definition. Both devices linked via HDMI must support Deep Color.

• **“x.v.Color”**
  This function lets HDTVs display colors more accurately. It enables display with natural, vivid colors. “x.v.Color” is trademark of Sony Corporation.

• **3D**
  This unit supports input and output of 3D (3 dimensional) video signals of HDMI. To play back 3D video, you need a TV and player that provide support for the HDMI 3D function and a pair of 3D glasses.

• **4K**
  This unit supports input and output of 4K Ultra HD (3840 x 2160 pixels) video signals of HDMI.

• **Content Type**
  It automatically makes settings suitable for the video output type (content information).

• **Adobe RGB color, Adobe YCC601 color**
  The color space defined by Adobe Systems Inc. Because it is a wider color space than RGB, it can produce more vivid and natural images.

• **sYCC601 color**
  Each of these color spaces defines a palette of available colors that is larger than the traditional RGB color model.

• **Auto Lip Sync**
  This function can automatically correct delay between the audio and video. Use a TV that is compatible with the Auto Lip Sync function.
• **HDMI pass through**
  Even when the power to this unit is set to standby, signals input from the HDMI input connector are output to a TV or other device that is connected to the HDMI output connector.

• **HDMI control**
  If you connect the unit and an HDMI control function compatible TV or player with an HDMI cable and then enable the HDMI control function setting on each device, the devices will be able to control each other.
  • Power off link
    This unit power off can be linked to the TV power off step.
  • Audio output destination switching
    From the TV, you can switch whether to output audio from the TV or the AV amplifier.
  • Volume adjustment
    You can adjust this unit’s volume in the TV volume adjustment operation.
  • Input source switching
    You can switch this unit input sources through linkage to TV input switching.
    When playing the player, this unit input source switches to the source for that player.

• **ARC (Audio Return Channel)**
  This function transmits audio signals from the TV to this unit through the HDMI cable and plays back the audio from the TV on this unit based on the HDMI control function.
  If a TV without the ARC function is connected via HDMI connections, video signals of the playback device connected to this unit are transmitted to the TV, but this unit cannot play back the audio from the TV. If you want to enjoy surround audio for TV program, a separate audio cable connection is required. In contrast, if a TV with the ARC function is connected via HDMI connections, no audio cable connection is required. Audio signals from the TV can be input to this unit through the HDMI cable between this unit and the TV. This function allows you to enjoy surround playback on this unit for the TV.
## Supported audio formats

</tbody>
</table>

## Supported video signals

- 480i
- 576p
- 1080p 60/50/24Hz
- 480p
- 720p 60/50Hz
- 1080i 60/50Hz

## Copyright protection system

In order to play back digital video and audio such as BD-Video (Blu-ray Disc) or DVD-Video via HDMI connection, both this unit and TV and the player need to support the copyright protection system known as HDCP (High-bandwidth Digital Content Protection System). HDCP is copyright protection technology comprised of data encryption and authentication of the connected AV devices. This unit supports HDCP.

- If a device that does not support HDCP is connected, video and audio are not output correctly. Read the owner’s manual of your television or player for more information.

- When connecting this unit to a device that is compatible with the Deep Color, 4K, ARC function, use a “High Speed HDMI cable with Ethernet”.

Video conversion function

This unit automatically converts the input video signals as shown in the diagram below before outputting them to the TV.

- The main zone video conversion function is compatible with the following formats: NTSC, PAL, SECAM, NTSC4.43, PAL-N, PAL-M and PAL-60.
This unit can convert the input video signals to the resolution that is set for “Resolution” (page 166) in the menu before outputting them to the TV.

This item can be selected when a Dolby TrueHD signal is played.

This item can be selected when a Dolby Digital or DTS signal is played.

This item can be selected when a Dolby Digital or DTS signal or DVD-Audio is played.

This setting is available when the set sound mode name contains “+PLII”.

During playback in PURE DIRECT mode, the surround parameters are the same as in DIRECT mode.

Audio is output when “Subwoofer Mode” (page 188) in the menu is set to “LFE+Main”.

This setting is unavailable when the set sound mode name contains “+PLII Music” or “+NEO:X Music”.

This setting is possible when the sound mode is “Cinema” mode.

This setting is available when the set sound mode name contains “+Neo:X”.

This setting is possible when the set sound mode name contains “+Neo:X Music”.

This setting is available when the Dynamic EQ (page 156) is set to “On”.

This item cannot be set when Audyssey® Setup (Speaker Calibration) has not been performed.

This item cannot be set when “MultEQ” XT32” (page 156) is set to “Off” or “Graphic EQ”.

This item can be set when the input signal is analog, PCM 48 kHz or 44.1 kHz.

In this sound mode, bass is +6 dB, and treble is +4 dB. (Default)
### Types of input signals, and corresponding sound modes

- This indicates the default sound mode.
- This indicates the selectable sound mode.

*1 – *5, *9, *10: page 244
This item can be selected when surround back speakers are used.

2 The Cinema mode or Music mode can be selected. When using a single surround back speaker, the Music mode is used.

3 This item can be selected when front height speakers are used.

4 The Cinema mode, Music mode or Game mode can be selected. This item can be selected when using any of the Surround back, Front height or Front wide speaker.

5 The Cinema mode, Music mode or Game mode can be selected.

6 This item can be selected when the input signal is DTS-HD MASTER AUDIO.

7 This item can be selected when the input signal is DTS-HD HI RESOLUTION.

8 This item can be selected when the input signal is DTS 96/24.

9 The default sound mode for the AirPlay playback is DIRECT. (Default)

10 This item can be selected when the input signals contain surround back signals.
Explanation of terms

**AirPlay**
AirPlay sends (plays) contents recorded in iTunes or on an iPhone/iPod touch/iPad to a compatible device via the network.

**ALAC (Apple Lossless Audio Codec)**
This is a codec for lossless audio compression method developed by Apple Inc. This codec can be played back on iTunes, iPod or iPhone. Data compressed to approximately 60 – 70 % can be decompressed to exactly the same original data.

**App Store**
App Store is a site that sells application software for such devices as the iPhone or iPod Touch, and is operated by Apple Inc.

**Audyssey Dynamic EQ®**
Dynamic EQ solves the problem of deteriorating sound quality as volume is decreased by taking into account human perception and room acoustics. Audyssey Dynamic EQ® works in tandem with Audyssey MultEQ® XT32 to provide well-balanced sound for every listener at any volume level.

**Audyssey Dynamic Surround Expansion (A-DSX)**
Audyssey DSX® is a scalable system that adds new speakers to improve surround sound vividness. Starting with a 5.1 system Audyssey DSX® first adds Wide channels for the biggest impact on envelopment. Research in human hearing has proven that information from the Wide channels is much more critical in the presentation of a realistic soundstage than the Back Surround channels found in traditional 7.1 systems. Audyssey DSX® then creates a pair of Height channels to reproduce the next most important acoustical and perceptual cues. In addition to these new Wide and Height channels, Audyssey DSX® applies Surround Envelopment Processing to enhance the blend between the front and surround channels.

**Audyssey Dynamic Volume®**
Dynamic Volume solves the problem of large variations in volume level between television programs, commercials, and between the soft and loud passages of movies. Audyssey Dynamic EQ® is integrated into Dynamic Volume so that as the playback volume is adjusted automatically, the perceived bass response, tonal balance, surround impression, and dialog clarity remain the same.

**Audyssey MultEQ® XT32**
MultEQ® XT32 is a room equalization solution that calibrates any audio system so that it can achieve optimum performance for every listener in a large listening area. Based on several room measurements, MultEQ® XT32 calculates an equalization solution that corrects for both time and frequency response problems in the listening area and also performs a fully automated surround system setup.
DLNA
DLNA and DLNA CERTIFIED are trademarks and/or service marks of Digital Living Network Alliance.
Some contents may not be compatible with other DLNA CERTIFIED® products.

Dolby Digital
Dolby Digital is a multi-channel digital signal format developed by Dolby Laboratories.
A total of 5.1-channels are played: 3 front channels (“FL”, “FR” and “C”), 2 surround channels (“SL” and “SR”) and the “LFE” channel for low frequency effects.
Because of this, there is no crosstalk between channels and a realistic sound field with a “three-dimensional” feeling (sense of distance, movement and positioning) is achieved. This delivers a thrilling surround sound experience in the home.

Dolby Digital EX
Dolby Digital EX is a 6.1-channel surround format from Dolby Laboratories that allows users to enjoy in their homes the “DOLBY DIGITAL SURROUND EX” audio format jointly developed by Dolby Laboratories and Lucasfilm. The 6.1-channels of sound, including surround back channel, provide improved sound positioning and expansion of the surround sound field.

Dolby Digital Plus
Dolby Digital Plus is an improved Dolby Digital signal format that is compatible with up to 7.1-channels of discrete digital sound and also improves sound quality thanks to extra data bit rate performance. It is upwardly compatible with conventional Dolby Digital, so it offers greater flexibility in response to the source signal and the conditions of the playback device.

Dolby Pro Logic II
Dolby Pro Logic II is a matrix decoding technology developed by Dolby Laboratories.
Regular music such as that on CDs is encoded into 5-channels to achieve an excellent surround effect.
The surround channel signals are converted into stereo and full band signals (with a frequency response of 20 Hz to 20 kHz or greater) to create a “three-dimensional” sound image offering a rich sense of presence for all stereo sources.

Dolby Pro Logic IIx
Dolby Pro Logic IIx is a further improved version of the Dolby Pro Logic II matrix decoding technology.
Audio signals recorded in 2-channels are decoded to achieve a natural sound with up to 7.1-channels.
There are three modes: “Music” suited for playing music, “Cinema” suited for playing movies, and “Game” which is optimized for playing games.
Dolby Pro Logic IIz
Dolby Pro Logic IIz introduces a new dimension to Home Entertainment through the addition of a pair of front height channels. Compatible with stereo, 5.1-channel and 7.1-channel content, Dolby Pro Logic IIz provides enhanced spaciousness, depth and dimension to movies, concert video and video game playback while maintaining the full integrity of the source mix.
Dolby Pro Logic IIz identifies and decodes spatial cues that occur naturally in all content, directing this information to the front height channels, complementing the performance of left and right surround sound speakers. Content that is encoded with Dolby Pro Logic IIz height channel information can be even more revealing, with perceptually discrete height channel information bringing an exciting new dimension to home entertainment.
Dolby Pro Logic IIz, with front height channels is also an ideal alternative for households that cannot support the placement of back surround speakers of a typical 7.1-channel system but may have bookshelf space available to support the addition of height speakers.

Dolby TrueHD
Dolby TrueHD is a high definition audio technology developed by Dolby Laboratories, using lossless coding technology to faithfully reproduce the sound of the studio master.
This format provides the facility to support up to 8 audio channels with a sampling frequency of 96 kHz/24 bit resolution and up to 6 audio channels with a sampling frequency of 192 kHz/24 bit resolution. Dolby TrueHD is adopted for applications that put very high importance on sound quality.

Downmix
This function converts the number of channels of surround audio to a lower number of channels and plays back according to the system’s configuration.

DTS
This is an abbreviation of Digital Theater System, which is a digital audio system developed by DTS.
DTS delivers a powerful and dynamic surround sound experience, and is found in the world’s finest movie theaters and screening rooms.

DTS 96/24
DTS 96/24 is a digital audio format enabling high sound quality playback in 5.1-channels with a sampling frequency of 96 kHz and 24 bit quantization on DVD-Video.

DTS Digital Surround
DTS Digital Surround is the standard digital surround format of DTS, Inc., compatible with a sampling frequency of 44.1 or 48 kHz and up to 5.1-channels of digital discrete surround sound.

DTS-ES™ Discrete 6.1
DTS-ES™ Discrete 6.1 is a 6.1-channel discrete digital audio format adding a surround back (SB) channel to the DTS digital surround sound.
Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.

DTS-ES™ Matrix 6.1
DTS-ES™ Matrix 6.1 is a 6.1-channel audio format that inserts a surround back (SB) channel to the DTS digital surround sound through matrix encoding. Decoding of conventional 5.1-channel audio signals is also possible according to the decoder.
DTS Express
DTS Express is an audio format supporting low bit rates (max. 5.1-channels, 24 to 256 kbps).

DTS-HD
This audio technology provides higher sound quality and enhanced functionality than the conventional DTS and is adopted as an optional audio for Blu-ray Disc. This technology supports multi-channel, high data transfer speed, high sampling frequency, and lossless audio playback. Maximum 7.1-channels are supported in Blu-ray Disc.

DTS-HD High Resolution Audio
DTS-HD High Resolution Audio is an improved version of the conventional DTS, DTS-ES and DTS 96/24 signals formats, compatible with sampling frequencies of 96 or 48 kHz and up to 7.1-channels of discrete digital sound. High data bit rate performance provides high quality sound. This format is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS-HD Master Audio
DTS-HD Master Audio is a lossless audio format created by Digital Theater System (DTS). This format provides the facility to support up to 8 audio channels with a sampling frequency of 96 kHz/24 bit resolution and up to 6 audio channels with a sampling frequency of 192 kHz/24 bit resolution. It is fully compatible with conventional products, including conventional DTS digital surround 5.1-channel data.

DTS Neo:X
This matrix decoding technology uses the DTS NEO:X decoder to playback 2-channel source or 5.1/6.1/7.1-channel surround sources as a maximum of 9.1-channel surround sound. There are 3 modes: “Music” suited for playing music, “Cinema” suited for playing movies, and “Game” which is optimized for playing games.

Dynamic range
The difference between the maximum undistorted sound level and the minimum discernible level above the noise emitted by the device.
FLAC
FLAC stands for Free lossless Audio Codec, and is a lossless free audio file format. Lossless means that the audio is compressed without any loss in quality.
The FLAC license is as shown below.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:
• Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.
• Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
• Neither the name of the Xiph.org Foundation nor the names of its contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS “AS IS” AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE FOUNDATION OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

HDCP
When transmitting digital signals between devices, this copyright protection technology encrypts the signals to prevent content from being copied without authorization.

iTunes
iTunes is the name of the multimedia player provided by Apple Inc. It enables management and playback of multimedia contents including music and movies. iTunes supports many main file formats including AAC, WAV, and MP3.
LFE
This is an abbreviation of Low Frequency Effect, which is an output channel that emphasizes low frequency effect sound. Surround audio is intensified by outputting 20 Hz to 120 Hz deep bass to the system subwoofer(s).

MAIN ZONE
The room where this unit is placed is called the MAIN ZONE.

Modem
Device that connects to your broadband internet provider, and is very often supplied with the service.
A type that is integrated with a router is also often available.

MP3 (MPEG Audio Layer-3)
This is an internationally standardized audio data compression scheme, using the “MPEG-1” video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

MPEG (Moving Picture Experts Group), MPEG-2, MPEG-4
These are the names for digital compression format standards used for the encoding of video and audio. Video standards include “MPEG-1 Video”, “MPEG-2 Video”, “MPEG-4 Visual”, “MPEG-4 AVC”. Audio standards include “MPEG-1 Audio”, “MPEG-2 Audio”, “MPEG-4 AAC”.

Progressive (sequential scanning)
This is a scanning system of the video signal that displays 1 frame of video as one image. Compared to the interlace system, this system provides images with less flickering and jagged edges.

Protection circuit
This is a function to prevent damage to devices within the power supply when an abnormality such as an overload, excess voltage occurs or over temperature for any reason.
In this unit, the power indicator blinks and the unit enters standby mode when an abnormality occurs.

Sampling frequency
Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal).
The number of readings taken in one second is called the “sampling frequency”. The larger the value, the closer the reproduced sound is to the original.

Speaker impedance
This is an AC resistance value, indicated in Ω (Ohms). Greater power can be obtained when this value is smaller.
vTuner
This is a free online content server for Internet Radio. Note that usage fees are included in upgrade costs.
For inquiries about this service, visit the vTuner site below.
vTuner website: http://www.radiodenon.com
This product is protected by certain intellectual property rights of Nothing Else Matters Software and BridgeCo. Use or distribution of such technology outside of this product is prohibited without a license from Nothing Else Matters Software and BridgeCo or an authorized subsidiary.

Windows Media DRM
This is a copyright protection technology developed by Microsoft. Content providers are using the digital rights management technology for Windows Media contained in this device (WM-DRM) to protect the integrity of their content (Secure Content) so that their intellectual property, including copyright, in such content is not misappropriated. This device uses WM-DRM software to play Secure Content (WM-DRM Software). If the security of the WM-DRM Software in this device has been compromised, owners of Secure Content (Secure Content Owners) may request that Microsoft revoke the WM-DRM Software’s right to acquire new licenses to copy, display and/or play Secure Content. Revocation does not alter the WM-DRM Software’s ability to play unprotected content. A list of revoked WM-DRM Software is sent to your device whenever you download a license for Secure Content from the Internet or from a PC. Microsoft may, in conjunction with such license, also download revocation list onto your device on behalf of Secure Content Owners.

Windows Media Player Ver.11 or later
This is a media player distributed free of charge by Microsoft Corporation. It can play playlists created with Ver.11 or later of Windows Media Player, as well as WMA, DRM WMA, WAV, and other files.

WMA (Windows Media Audio)
This is audio compression technology developed by Microsoft Corporation. WMA data can be encoded using Windows Media® Player. To encode WMA files, only use applications authorized by Microsoft Corporation. If you use an unauthorized application, the file may not work properly.

ZONE2
This unit can operate in a room other than the room where this unit is placed (MAIN ZONE) (ZONE2 playback). The room for ZONE2 playback is called ZONE2.

ZONE3
This unit can operate in a room other than the room where this unit is placed (MAIN ZONE) (ZONE3 playback). The room for ZONE3 playback is called ZONE3.

“Made for iPod” and “Made for iPhone” mean that an electronic accessory has been designed to connect specifically to iPod, or iPhone, respectively, and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards. Please note that the use of this accessory with iPod, or iPhone, may affect wireless performance. AirPlay, the AirPlay logo, iPad, iPhone, iPod, iPod classic, iPod nano, iPod shuffle and iPod touch are trademarks of Apple Inc., registered in the U.S. and other countries.

- Individual users are permitted to use iPhone, iPod, iPod classic, iPod nano, iPod shuffle, and iPod touch for private copy and playback of non-copyrighted contents and contents whose copy and playback is permitted by law. Copyright infringement is prohibited by law.

Windows Media and the Windows logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries.

Adobe, the Adobe logo and Reader are either registered trademarks or trademarks of Adobe Systems Incorporated in the United States and/or other countries.
Specifications

Audio section

- Power amplifier
  
  Rated output:
  
  Front:
  125 W + 125 W (8 Ω/ohms, 20 Hz – 20 kHz with 0.05 % T.H.D.)
  165 W + 165 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)

  Center:
  125 W (8 Ω/ohms, 20 Hz – 20 kHz with 0.05 % T.H.D.)
  165 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)

  Surround:
  125 W + 125 W (8 Ω/ohms, 20 Hz – 20 kHz with 0.05 % T.H.D.)
  165 W + 165 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)

  Surround back / Front height / Front wide:
  125 W + 125 W (8 Ω/ohms, 20 Hz – 20 kHz with 0.05 % T.H.D.)
  165 W + 165 W (6 Ω/ohms, 1 kHz with 0.7 % T.H.D.)

  Dynamic power:
  130 W x 2-channel (8 Ω/ohms)
  190 W x 2-channel (4 Ω/ohms)

  Output connectors:
  6 – 16 Ω/ohms
• Analog
  Input sensitivity/Input impedance: 200 mV/47 kΩ/kohms
  Frequency response: 10 Hz – 100 kHz — +1, –3 dB (DIRECT mode)
  S/N: 102 dB (IHF–A weighted, DIRECT mode)
  Distortion: 0.005 % (20 Hz – 20 kHz) (DIRECT mode)
  Rated output: 1.2 V

• Digital
  D/A output: Rated output — 2 V (at 0 dB playback)
  Total harmonic distortion — 0.008 % (1 kHz, at 0 dB)
  S/N ratio — 102 dB
  Dynamic range — 100 dB

Digital input:
  Format — Digital audio interface

• Phono equalizer (PHONO input — MEDIA PLAYER OUT)
  Input sensitivity: 2.5 mV
  RIAA deviation: ±1 dB (20 Hz to 20 kHz)
  S/N: 74 dB (IHF–A weighted, with 5 mV input)
  Rated output: 150 mV
  Distortion factor: 0.03 % (1 kHz, 3 V)
### Video section

- **Standard video connectors**
  - **Input/output level and impedance:** 1 Vp-p, 75 Ω/ohms
  - **Frequency response:** 5 Hz – 10 MHz — 0, –3 dB

- **Color component video connector**
  - **Input/output level and impedance:**
    - Y signal — 1 Vp-p, 75 Ω/ohms
    - Pb / Cs signal — 0.7 Vp-p, 75 Ω/ohms
    - Pr / Cr signal — 0.7 Vp-p, 75 Ω/ohms
  - **Frequency response:** 5 Hz – 60 MHz — 0, –3 dB

### Tuner section

(ANTENNA input – MEDIA PLAYER OUT) [FM]

- **Receiving Range:** 87.5 MHz – 108.0 MHz
- **Usable Sensitivity:** 1.2 μV (12.8 dBf)
- **50 dB Quieting Sensitivity:**
  - MONO  2.8 μV (20.2 dBf)
- **S/N (IHF–A weighted):**
  - MONO  70 dB
  - STEREO  67 dB
- **Distortion (1 kHz):**
  - MONO  0.7 % (1 kHz)
  - STEREO  1.0 % (1 kHz)
■ General

Power supply: AC 230 V, 50/60 Hz
Power consumption: 670 W
Power consumption in standby mode: 0.1 W
Power consumption in CEC standby mode: 0.5 W
Power consumption in network standby mode: 2.7 W (Default)

For purposes of improvement, specifications and design are subject to change without notice.

FastDelegate

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CODE PROJECT OPEN LICENSE (“LICENSE”). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HEREIN, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE AUTHOR GRANTS YOU THE RIGHTS CONTAINED HEREIN IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO ACCEPT AND BE BOUND BY THE TERMS OF THIS LICENSE, YOU CANNOT MAKE ANY USE OF THE WORK.

1. Definitions.
   a. “Articles” means, collectively, all articles written by Author which describes how the Source Code and Executable Files for the Work may be used by a user.
   b. “Author” means the individual or entity that offers the Work under the terms of this License.
   c. “Derivative Work” means a work based upon the Work or upon the Work and other pre-existing works.
   d. “Executable Files” refer to the executables, binary files, configuration and any required data files included in the Work.
   e. “Publisher” means the provider of the website, magazine, CD-ROM, DVD or other medium from or by which the Work is obtained by You.
   f. “Source Code” refers to the collection of source code and configuration files used to create the Executable Files.
g. “Standard Version” refers to such a Work if it has not been modified, or has been modified in accordance with the consent of the Author, such consent being in the full discretion of the Author.

h. “Work” refers to the collection of files distributed by the Publisher, including the Source Code, Executable Files, binaries, data files, documentation, whitepapers and the Articles.

i. “You” is you, an individual or entity wishing to use the Work and exercise your rights under this License.

2. Fair Use/Fair Use Rights. Nothing in this License is intended to reduce, limit, or restrict any rights arising from fair use, fair dealing, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, the Author hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:
   a. You may use the standard version of the Source Code or Executable Files in Your own applications.
   b. You may apply bug fixes, portability fixes and other modifications obtained from the Public Domain or from the Author. A Work modified in such a way shall still be considered the standard version and will be subject to this License.
   c. You may otherwise modify Your copy of this Work (excluding the Articles) in any way to create a Derivative Work, provided that You insert a prominent notice in each changed file stating how, when and where You changed that file.
   d. You may distribute the standard version of the Executable Files and Source Code or Derivative Work in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution.

   e. The Articles discussing the Work published in any form by the author may not be distributed or republished without the Author’s consent. The author retains copyright to any such Articles. You may use the Executable Files and Source Code pursuant to this License but you may not repost or republish or otherwise distribute or make available the Articles, without the prior written consent of the Author.
   
   Any subroutines or modules supplied by You and linked into the Source Code or Executable Files this Work shall not be considered part of this Work and will not be subject to the terms of this License.

4. Patent License. Subject to the terms and conditions of this License, each Author hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, import, and otherwise transfer the Work.

5. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:
   a. You agree not to remove any of the original copyright, patent, trademark, and attribution notices and associated disclaimers that may appear in the Source Code or Executable Files.
   b. You agree not to advertise or in any way imply that this Work is a product of Your own.
   c. The name of the Author may not be used to endorse or promote products derived from the Work without the prior written consent of the Author.
   d. You agree not to sell, lease, or rent any part of the Work. This does not restrict you from including the Work or any part of the Work inside a larger software distribution that itself is being sold. The Work by itself, though, cannot be sold, leased or rented.
   e. You may distribute the Executable Files and Source Code only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy of the Executable Files or Source Code You distribute and ensure that anyone receiving such Executable Files and Source Code agrees that the terms of this License apply to such Executable Files and/or Source Code. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients’ exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute the Executable Files or Source Code with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License.
   f. You agree not to use the Work for illegal, immoral or improper purposes, or on pages containing illegal, immoral or improper material. The Work is subject to applicable export laws. You agree to comply with all such laws and regulations that may apply to the Work after Your receipt of the Work.
6. Representations, Warranties and Disclaimer. THIS WORK IS PROVIDED “AS IS”, “WHERE IS” AND “AS AVAILABLE”, WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OR GUARANTEES. YOU, THE USER, ASSUME ALL RISK IN ITS USE, INCLUDING COPYRIGHT INFRINGEMENT, PATENT INFRINGEMENT, SUITABILITY, ETC. AUTHOR EXPRESSLY DISCLAIMS ALL EXPRESS, IMPLIED OR STATUTORY WARRANTIES OR CONDITIONS, INCLUDING WITHOUT LIMITATION, WARRANTIES OR CONDITIONS OF MERCHANTABILITY, MERCHANTABILITY QUALITY OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTY OF TITLE OR NON-INFRINGEMENT, OR THAT THE WORK (OR ANY PORTION THEREOF) IS CORRECT, USEFUL, BUG-FREE OR FREE OF VIRUSES. YOU MUST PASS THIS DISCLAIMER ON WHENEVER YOU DISTRIBUTE THE WORK OR DERIVATIVE WORKS.

7. Indemnity. You agree to defend, indemnify and hold harmless the Author and the Publisher from and against any claims, suits, losses, damages, liabilities, costs, and expenses (including reasonable legal or attorneys’ fees) resulting from or relating to any use of the Work by You.

8. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL THE AUTHOR OR THE PUBLISHER BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK OR OTHERWISE, EVEN IF THE AUTHOR OR THE PUBLISHER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

9. Termination. a. This License and the rights granted hereunder will terminate automatically upon any breach by You of any term of this License. Individuals or entities who have received Derivative Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 6, 7, 8, 9, 10 and 11 will survive any termination of this License.

b. If You bring a copyright, trademark, patent or any other infringement claim against any contributor over infringements You claim are made by the Work, your License from such contributor to the Work ends automatically.

c. Subject to the above terms and conditions, this License is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, the Author reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

d. This License constitutes the entire agreement between the parties with respect to the Work licensed herein. There are no understandings, agreements or representations with respect to the Work not specified herein. The Author shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Author and You.

10. Publisher. The parties hereby confirm that the Publisher shall not, under any circumstances, be responsible for and shall not have any liability in respect of the subject matter of this License. The Publisher makes no warranty whatsoever in connection with the Work and shall not be liable to You or any party on any legal theory for any damages whatsoever, including without limitation any general, special, incidental or consequential damages arising in connection to this license. The Publisher reserves the right to cease making the Work available to You at any time without notice.

11. Miscellaneous a. This License shall be governed by the laws of the location of the head office of the Author or if the Author is an individual, the laws of location of the principal place of residence of the Author.

b. If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this License, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

c. No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.

d. This License constitutes the entire agreement between the parties with respect to the Work licensed herein. There are no understandings, agreements or representations with respect to the Work not specified herein. The Author shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Author and You.
