Before using the remote control unit

The remote control unit has a built-in lithium battery. Pull out the insulation sheet before use.

Replacing the battery

1. Pull out the battery case while pressing the tab.

2. Insert the lithium battery correctly into the battery compartment as indicated.

3. Replace the battery case in the original position.

NOTE

- When inserting the lithium battery, be sure to do so in the proper direction, following the + and - marks in the battery compartment.
- If the battery should have a leakage, immediately replace and dispose of the battery. In this case, there is a risk of burn when the liquid comes in contact with skins or clothes, so a great care should be taken. If the liquid accidentally comes in contact, wash with tap water and consult a doctor.
- Remove the battery from the remote control unit if it will not be in use for long periods.
Operating range of the remote control unit

Point the remote control unit at the remote sensor when operating it.
Features

- **Powerful sound with a compact body (25W + 25W high power)**
  You can enjoy music and games with more powerful sound on a computer, smartphone, or tablet. Realistic sound is achieved in spite of the compact size by combining passive radiator full range speakers that reproduce rich bass with our unique audio processing technology and a full digital amplifier.

- **Installation possible even in a small space (☞ p. 13)**
  This unit can be placed either horizontally or vertically. Do not worry about the installation place. You can place this unit even in a desk with a limited space. Furthermore, convenient speaker bases are supplied with this unit for altering the speaker angle. Adjust to your desired angle for listening.

- **Equipped with a USB-B port for upgrading audio on a computer**
  You can just connect a computer with this unit to enjoy content stored on the computer and streaming content with high quality audio.

- **Wireless connection with Bluetooth enabled devices (☞ p. 26)**
  You can connect Bluetooth enabled devices such as smartphones and tablets with this unit to listen to music while browsing email and Web sites in the Internet away from this unit. In addition, this unit supports high quality audio codecs, aptX and AAC, to enjoy music and games with a powerful sound.

- **NFC function included that enables one touch connection (☞ p. 30)**
  You can just touch this unit with an NFC enabled smartphone or tablet to turn on power to this unit and establish the Bluetooth connection.
Part names and functions

## Front panel

1. **Power button/display (①)**
   This turns the power on/to standby. ([p. 21](#))
   The power status is indicated as follows.
   - Power on: Lit
   - Standby: Off

2. **Input source switching key (②)**
   This switches input sources. ([p. 22](#))

3. **Wide Sound key (③)**
   This switches the Wide Sound function on/off. ([p. 32](#))

4. **Bluetooth key (④)**
   This switches the input to Bluetooth. This is also touched during the paring operation. ([p. 27](#))
Headphones jack (ג)
Used to connect headphones. When the headphones are plugged into this jack, audio will no longer be output from the speaker terminals.

NOTE
To prevent hearing loss, do not raise the volume level excessively when using headphones.

Auto Volume Adjust key (אי)
This switches the Auto Volume Adjust function on/off. (p. 32)

Display
This displays various pieces of information.

Remote control sensor
This receives signals from the remote control unit. (p. 6)

Volume adjustment wheel
This adjusts the volume level. (p. 22)
The wheel is lit when touched.

The volume level appears on the display.

Mute button (יל)
This mutes the output audio. (p. 22)
This button flashes when muting is on.

N mark (פי)
Touch this mark with a Bluetooth device that includes the NFC function when paring (registering) with it. (p. 30)
**Input source indicator**
The following is displayed depending on the selected input source.

<table>
<thead>
<tr>
<th>USB-DAC</th>
<th>ANALOG IN</th>
<th>Bluetooth</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image1.png" alt="Icon" /></td>
<td><img src="image2.png" alt="Icon" /></td>
<td><img src="image3.png" alt="Icon" /></td>
</tr>
</tbody>
</table>

**Wide Sound indicator**
Lit when the Wide Sound function is on.

**Auto Volume Adjust indicator**
Lit when the Auto Volume Adjust function is on.

**Headphones indicator**
Lit when the headphones are used.
### Rear panel

1. **Speaker terminals (SPEAKERS)**  
   Used to connect speakers. ([p. 17](#))

2. **Speaker Optimization switch (SPEAKER OPTIMIZATION)**  
   This switches the Speaker Optimization function on/off. ([p. 17](#))

3. **Analog audio input terminal (ANALOG IN)**  
   Use a stereo mini plug cable (sold separately) to connect between this terminal and a headphones jack on a portable music player, etc. ([p. 18](#))

4. **USB digital audio input terminal (USB-DAC)**  
   Used to connect to a computer with a USB port. ([p. 18](#))

5. **Subwoofer terminal (SUB WOOFER OUT)**  
   Used to connect a subwoofer with a built-in amplifier. ([p. 18](#))

6. **AC inlet (AC IN)**  
   Used to connect the supplied power cord. ([p. 19](#))
Remote control unit

1. **Power operation button (Φ)**
   This turns the power on/to standby. (p. 21)

2. **Bluetooth button ( pyplot)**
   This switches the input to Bluetooth. This is also pressed during the paring operation. (p. 27)

3. **VOLUME buttons (VOLUME ▲▼)**
   These adjust the volume level. (p. 22)

4. **Input source switching button ( pyplot)**
   This switches input sources. (p. 22)

5. **Wide Sound button ( pyplot)**
   This switches the Wide Sound function on/off. (p. 32)

6. **Auto Volume Adjust button ( pyplot)**
   This switches the Auto Volume Adjust function on/off. (p. 32)

7. **Mute button ( pyplot)**
   This mutes the output audio. (p. 22)
Installing this unit

This unit can be installed in two ways - horizontally or vertically. You can select how to install this unit according to the installation place and your preference.

Installing horizontally

This orientation is suitable for placing this unit under the monitor when you use a desktop computer.

When placing this unit horizontally, install as follows.

How to attach the CEOL carino base (for horizontal placement)

Attach the base to this unit as follows.

1. CEOL carino base (supplied)
Installing vertically

This orientation is suitable for placing a narrow place such as a place next to a laptop computer.

When placing this unit vertically, install as follows with the power button placed on the lower part.

How to attach the CEOL carino base (for vertical placement)

1. CEOL carino base (supplied)

2. To remove the base from this unit, follow the installation steps in the reverse order.
Speaker installation

You can use the speaker base to place the speaker in three angles. Adjust to your desired angle for placement.

**NOTE**
- You cannot remove the speaker net.
- Place the speaker and speaker base so that they do not rattle.
Connecting the speaker cables

Connect the speaker cable with a rubber tube (red) to the + speaker terminal (red), and the other cable to the - speaker terminal (black).

1. Peel off about 10 mm of sheathing from the tip of the speaker cable, then twist the core wire tightly.

2. Push the speaker terminal and insert the speaker cable into the cable insertion slot.

3. Release your finger from the speaker terminal to fix the speaker cable.

**NOTE**
Ensure that only the core wire part of the speaker cable is inserted. If the covered part is inserted, sound may not be output.
Storing speaker cables in the speaker base

You can use the cable winder to wind up the loose speaker cable for organized connections. Cable winders are stored under the speaker bases at the time of shipment.

NOTE
- When using the supplied speakers, turn on the SPEAKER OPTIMIZATION switch on the rear panel. Audio signals are output after audio processing optimized for the supplied speakers is performed.
- When using speakers other than the supplied ones, turn off the SPEAKER OPTIMIZATION switch on the rear panel. Audio signals are output for the playback source without any processing.
- Be careful not to have the speaker cable under the speaker base. Doing so may cause a rattle or abnormal sound.
Connecting devices

■ Computer (recommended system)

OS
- Windows® Vista, Windows 7, and Windows 8
- Mac OS X 10.6.3 or later

NOTE
Use a 3 m or less cable to connect to a computer.
Connecting the power cord

After completing all the connections, insert the power cord into the power outlet.

To household power outlet (230V, 50/60 Hz)

Power cord (supplied)

NOTE

Do not use a power cord other than the supplied one.
Contents

Basic operation
- Turning the power on 21
- Selecting the input source 22
- Adjusting the master volume 22

Playing a device
- Playing music on a computer (USB-DAC) 23
- Listening to music via an analog connection (ANALOG IN) 25
- Listening to music on a Bluetooth device 26

Convenient function menu
- Wide Sound function 32
- Auto Volume Adjust function 32
Basic operation

Turning the power on

1. Press $\#$ to turn on power to this unit.
   The power indicator is lit.

- Switching power to the standby mode

1. Press $\%$.
   The power indicator is turned off.

- You can also press $\%$ on the remote control unit for this operation.

**NOTE**
When the power is in the standby mode, some circuits are electrified. Before you go out or travel for a long period of time, disconnect the power cord from the power outlet.
Selecting the input source

Selecting USB-DAC or ANALOG IN

1 Touch \( \text{\textdagger} \) to select the input source for playback.
   The following icon appears on the display.

   USB-DAC: Plays back audio on the computer.

   ANALOG IN: Plays back the device connected to the ANALOG IN connector.

   You can also press \( \text{\textdagger} \) on the remote control unit for this operation.

Selecting Bluetooth

1 Touch \( \text{\textdagger} \).
   The following icon appears on the display.

   Bluetooth: Connects and plays back a Bluetooth device.

   You can also press \( \text{\textdagger} \) on the remote control unit for this operation.

Adjusting the master volume

1 Turn the volume adjustment wheel to adjust the volume level.
   The volume level appears on the display.

   Increasing the volume level: Turn the volume adjustment wheel clockwise.

   Decreasing the volume level: Turn the volume adjustment wheel counterclockwise.

   You can also press VOLUME \( \text{\textuparrow} \text{\textdownarrow} \) on the remote control unit for this operation.
   You can adjust the volume level between 0 and 60.

Turning off the sound temporarily (muting)

1 Press \( \text{\texttimes} \).
   \( \text{\texttimes} \) flashes and \( \text{\textbullet} \) appears on the display.
   • Press \( \text{\texttimes} \) again to cancel the muting.

   You can also press \( \text{\texttimes} \) on the remote control unit for this operation.
Playing a device

Connect the device you want to play back beforehand. ("Connecting devices" (p. 18))

Playing music on a computer (USB-DAC)

1. Turn on power to the computer.

2. Press $ to turn on power to this unit.
   The power indicator is lit.
   - The driver is automatically installed on the computer.

3. Touch $ to switch the input source to “USB-DAC”.
   $ appears on the display.

4. Set the audio signal destination to this unit on the computer.
   - This operation is required when you are playing back music on the computer for the first time.

   [Windows]
   ① Select “CEOL carino” in the sound menu screen on the computer and click “Set Default”.

   ![Sound menu screen](image)
[Mac OS]
① Select “System Preferences” in the Apple menu and click “Sound”.

② Click “Output” and select “CEOL carino” for “Select a device for sound output”.

5 Plays back audio on the computer. The speakers output music from the computer.

NOTE
- Perform operations such as playback and stop by using the player software on the computer.
- You can also adjust the volume level and equalizer on the computer.
- When the audio output format settings are changed on the computer, audio is temporarily interrupted.
- When this unit is in operation, no audio is output from the speakers for the computer.
- When the player software is running on the computer and you disconnect this unit from the computer, the player software may freeze. Make sure to exit the player software before disconnecting this unit from the computer.
- When an error occurs on the computer, disconnect the USB cable and restart the computer.
- Use a 3m or less cable to connect this unit to the computer.

Listening to music via a analog connection (ANALOG IN)

1 Press  to turn on power to this unit. The power indicator is lit.

2 Touch  to switch the input source to “ANALOG IN”.  appears on the display.

3 Play back music on the connected device. The speakers output music from the connected device.
Listening to music on a Bluetooth device

You can listen to music wirelessly by connecting this unit to a Bluetooth device via Bluetooth.

**Paring**

Paring (registration) is an operation that is required in order to connect a Bluetooth device to this unit using Bluetooth. When paired, the devices authenticate each other and can connect without mistaken connections occurring.

When using Bluetooth connection for the first time, you need to pair this unit and the Bluetooth device to be connected. This unit can store pairing information for a maximum of 8 devices.

**NOTE**

You cannot simultaneously output music from multiple Bluetooth devices.

**How to establish a Bluetooth connection**

There are three types of Bluetooth connection methods. Use an appropriate type depending on your environment.

- **Case 1** Paring with this unit for the first time  
  (p. 27)

- **Case 2** Connecting a Bluetooth device that this unit performed paring for before  
  (p. 29)

- **Case 3** Connecting a Bluetooth device with the NFC function via NFC  
  (p. 30)
Case 1: Paring with this unit for the first time

1. Turn on the Bluetooth function on the Bluetooth device.
   - For details, see the owner’s manual for your Bluetooth device.

2. Press  to turn on power to this unit.
   The power indicator is lit.

3. Touch  for 3 seconds or longer.
   The  indicator and  on the display flash fast and this enters the paring mode.
   - When you touch  for the first time after purchase, this unit automatically enters the paring mode.
4 Select “CEOL carino” from the list of devices displayed in the screen on the Bluetooth device. When the paring completes and the Bluetooth connection is established, the indicator on the display, which was flashing, is lit.

When “CEOL carino” is not displayed in the screen on the Bluetooth device, search for devices on the Bluetooth device.

When you are prompted for a pass key in the screen on the Bluetooth device, enter “0000”.

5 Play back music on the Bluetooth device.

The speakers output music that the Bluetooth device is playing back.

- Adjust to the appropriate volume level.
- When the paring fails, retry from step 3.
- To perform paring for another Bluetooth device, repeat steps 3 to 5 for each device you want to perform paring for.
- When no Bluetooth device is connected, appears on the display with a reduced brightness and flashes slowly.

**NOTE**

- The paring mode on this unit lasts for approx. 5 minutes. When the paring mode on this unit is canceled before the paring is completed, retry from step 3.
- This unit cannot perform paring against a Bluetooth device with a pass key other than “0000”.

- When the paring completes and the Bluetooth connection is established, the indicator on the display, which was flashing, is lit.
Case 2: Connecting a Bluetooth device that this unit performed paring for before

1. Turn on the Bluetooth function on the Bluetooth device.
   - For details, see the owner’s manual for your Bluetooth device.

2. Select “CEOL carino” from the list of devices displayed in the screen on the Bluetooth device.
   Power to this unit is automatically turned on and this unit attempts to establish the Bluetooth connection. When the Bluetooth connection is established, the indicator on the display, which was flashing, is lit.

3. Play back music on the Bluetooth device.
   The speakers output music from the Bluetooth device.
Case 3: Connecting a Bluetooth device with the NFC function via NFC

You can just touch this unit with a Bluetooth device to turn on power to this unit and perform paring or establish a connection between this unit and the Bluetooth device.

1. **Turn on the NFC function on the Bluetooth device.**
   - For details, see the owner’s manual for your Bluetooth device.

2. **Touch \[N\] on this unit with the NFC antenna part on the Bluetooth device.**
   Power to this unit is turned on and the \[\] indicator on the display flashes and this unit attempts to establish the Bluetooth connection. When the Bluetooth connection is established, the \[\] indicator on the display, which was flashing, is lit.
   - Complete operations as instructed by the Bluetooth device.

3. **Play back music on the Bluetooth device.**
   This unit outputs music from the Bluetooth device.
   - When you touch the N mark (\[N\]) on this unit with the Bluetooth device that is playing back music, this unit outputs that music.
   - Touch the N mark (\[N\]) again during the Bluetooth connection to disconnect the connection.
   - When you touch the N mark (\[N\]) with a different Bluetooth device during the Bluetooth connection, this unit stops playing back for the currently connected Bluetooth device and connects to the newly touched Bluetooth device.

**NOTE**
- Before establishing a NFC connection, cancel the lock function on the Bluetooth device.
- When you touch this unit with a Bluetooth device, do so softly.
Simultaneously connecting multiple Bluetooth devices (multi point function)

This unit can only output music from one connected Bluetooth device, but up to 3 Bluetooth devices can simultaneously be connected. (“Listening to music on a Bluetooth device” (p. 26))

If frequently used devices are connected, it is useful for switching the playback device because you do not have to reconnect them. Perform paring for devices you want to connect to beforehand.

Switching the playback device

1. Stop or pause the device that is currently played back.
2. Play back the device that you want to output music from.

Turn the power of this unit to standby before turning the Bluetooth function of the Bluetooth device off.
## Convenient function menu

### Wide Sound function
You can use the Wide Sound function to enjoy more spatial sound.

1. **Touch **appears on the display.

### Auto Volume Adjust function
Music sources on the Internet such as streaming music distribution services and YouTube have various volume levels. It is troublesome to adjust the volume level each time you switch the source. This function automatically adjusts to about the same volume level when you switch to a music source with a different volume level.

1. **Touch** appears on the display.

### NOTE
When you use the Auto Volume Adjust function, set to the maximum volume level on the playback device. If the volume level on the playback device is small, this unit may not be able to recognize the volume level difference between the playback sources, making the Auto Volume Adjust function useless.
Setting the auto standby mode

You can configure this unit to automatically switch to standby when you do not operate this unit for approx. 15 minutes with no audio input. At time of purchase, this mode is set to “On”.

Turning the auto standby mode off

1 Press  on this unit for 5 seconds or longer.
   “Auto Standby Off” appears on the display.

Turning the auto standby mode on

1 Press  on this unit for 5 seconds or longer.
   “Auto Standby On” appears on the display.

You can also press  on the remote control unit for this operation.

Turning the display on/off

You can turn off the display.

Turning the display off

1 Press  for 5 seconds or longer.
   “Display Off” appears on the display.

Turning the display on

1 Press  for 5 seconds or longer.
   “Display On” appears on the display.

You can also press  on the remote control unit for this operation.

Tips

I want to turn on power to this unit from a Bluetooth device
• Once you perform pairing between this unit and a Bluetooth device, you can turn on power to this unit by operating the Bluetooth device. Select “CEOL carino” from the list of Bluetooth devices to turn on power to this unit.

I want to switch the connection to a different Bluetooth device
• This unit can only output music from one connected Bluetooth device, but up to 3 Bluetooth devices can simultaneously be connected. To switch the connection easily, always have the frequently used Bluetooth devices connected. When multiple Bluetooth devices are connected and you want to switch to a different Bluetooth device, stop playback on the device that is currently played back and play back the Bluetooth device that you want to output music from. (p. 31)

I want to connect to an NFC enabled device via NFC
• Enable the NFC function on an NFC enabled device, and touch the N mark (N) on this unit with the NFC device. (p. 30)

I want to enjoy more spatial sound
• Touch the Wide Sound key (+)

I want to use speakers other than the supplied ones
• Connect speakers other than the supplied ones and turn off the SPEAKER OPTIMIZATION switch on the rear panel. (p. 17)

I want to turn off the display
• You can turn off the light of the display. Press ◙ for 5 seconds or longer. (p. 33)
Troubleshooting

1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are the other devices operating properly?

If this unit does not operate properly, check the corresponding symptoms in this section.

If the symptoms do not match any of those described here, consult your dealer as it could be due to a fault in this unit. In this case, disconnect the power immediately and contact the store where you purchased this unit.

<td>• When using a 3D video device, the remote control unit of this unit may not function due to effects of wireless communications between units (such as TV and glasses for 3D viewing). In this case, adjust the direction of units with the 3D communications function and their distance to ensure they do not affect operations from the remote control unit of this unit.</td>
<td>—</td>
</tr>
</tbody>
</table>
Resetting to factory settings

Perform this when this unit does not operate properly. Various settings are reset to the factory default values. Make settings again.

1 When this unit is in the standby mode, press \( \bigcirc \) while holding \( \circ \times \).

"INITIALIZE" appears on the display and this unit restarts.

**NOTE**

Paring information stored on this unit is also initialized. Perform paring again.
Types of playable digital audio input signals

Audio signals that can be input to USB-DAC

<table>
<thead>
<tr>
<th>Types of audio signals that can be input</th>

</table>
| Linear PCM (2-channel)                  | Sampling frequency: 44.1/48 kHz  
|                                         | Bit length: 16/24 bit         |

Audio signals with a sampling frequency of 48kHz or higher are played back after downsampling is performed on the computer.

Computer (recommended system)

OS
- Windows® Vista, Windows 7, and Windows 8
- Mac OS X 10.6.3 or later

This unit was checked the operation using the recommended system by us, but it does not guarantee the operation of all systems.

Playing back Bluetooth devices

This unit supports the following Bluetooth profiles.
- A2DP (Advanced Audio Distribution Profile) : When a Bluetooth device that supports this specification is connected, you can perform high quality streaming distribution of monaural and stereo audio data.
- AVRCP (Audio/Video Remote Control Profile) : When a Bluetooth device that supports this specification is connected, you can operate the Bluetooth device from this unit.

Bluetooth communications

The radio waves broadcast from this unit may interfere with operations on medical equipment. The radio wave interference may cause a malfunction. Therefore, make sure to turn off power to this unit and Bluetooth devices in the following places.
- Hospitals, trains, airplanes, gas stands, and other places where flammable gas may occur.
- Places near automatic doors and fire alarms.
Explanation of terms

Bluetooth
Technology for near field wireless communications. This unit can connect to Bluetooth devices wirelessly. To establish a Bluetooth connection, you must perform paring (registering) beforehand.

NFC (Near Field Communication)
Technology for near field wireless communications. You can just touch this unit with a device with the NFC function to establish a connection between this unit and the device.

Sampling frequency
Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal). The number of readings taken in one second is called the “sampling frequency”. The larger the value, the closer the reproduced sound is to the original.

Paring
Pairing (registration) is an operation that is required in order to connect a Bluetooth device to this unit using Bluetooth. When paired, the devices authenticate each other and can connect without mistaken connections occurring. When using Bluetooth connection for the first time, you need to pair this unit and the Bluetooth device to be connected. This unit can store pairing information for a maximum of 8 devices.

Protection circuit
This is a function to prevent damage to devices within the power supply when an abnormality such as an overload, excess voltage occurs or over temperature for any reason. If a malfunction occurs in this unit, the power indicator flashes in white and this unit switches to standby mode.

Linear PCM
Uncompressed PCM (Pulse Code Modulation) signals. Unlike lossy compression audio sources such as MP3, no audio quality or dynamic range deteriorates.

Specifications

■ Audio section

Rated output: 2-channel
20 W+20 W (6 Ω/ohms, 1 kHz, T.H.D. 0.7 %)

Maximum effective output power: 25 W+25 W (6 Ω/ohms, 1 kHz, T.H.D. 10 %)

Output connectors:
Speaker: 6-16 Ω/ohms (impedance)
Headphones: Φ3.5 mm jack

Total harmonic distortion rate (1 kHz, 1 W, 6 Ω/ohms):
ANALOG IN: 0.1 %

S/N ratio (10 W, 6 Ω/ohms, IHF-A):
ANALOG IN: 83 dB

Frequency response (1 W, 6 Ω/ohms):
10 Hz-20 kHz (+0.5 dB, –3 dB) (SPEAKER OPTIMIZATION: OFF)

■ USB section

Input data sampling frequency: 44.1 kHz, 48 kHz
Input data bit length: 16 bit, 24 bit
Bluetooth section

Communication system: Bluetooth version 3.0
Transmission power: Maximum 2.5 mW (Class2)
Maximum communication range: Approx. 10 m in line of sight *
Frequency band: 2.4 GHz band
Modulation method: FHSS (Frequency-Hopping Spread Spectrum)
Supported profiles: A2DP 1.3/AVRCP 1.5
Supported codecs: aptX Low Latency/AAC/SBC

* The actual communication range varies depending on the influence of such factors as obstructions between devices, electromagnetic waves from microwave ovens, static electricity, cordless phones, reception sensitivity, antenna performance, operating system, application software etc.

General

Power supply: AC230 V, 50/60 Hz
Power consumption: 15 W
Power consumption in standby mode: 0.3 W

Speaker section

Type: Full range/1 speaker, passive radiator type
Speaker impedance: 6 Ω/ohms
Max. permissible input: 25 W (IEC), 50 W (PEAK)
Average output sound pressure level: 82 dB (1 W/1 m)
Speaker unit: Full range (65 mm cone type x1), passive radiator type (85 mm x1)
Cable length: 1.5 m

For purposes of improvement, specifications and design are subject to change without notice.
**Dimensions**

Unit : mm

- **This unit (PMA-N2)**
  - Width: 120 mm
  - Height: 175 mm
  - Depth: 1627 mm

- **Speakers (SC-N2)**
  - Width: 175 mm
  - Height: 2660 mm
  - Depth: 67 mm

**Weight**

- This unit (including the CEOL carino base): 1.6 kg
- Speakers (including speaker bases and cable winders): 0.8 kg
