SAFETY PRECAUTIONS

CAUTION:
TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING:
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION:
USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE. THIS PRODUCT SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT PROPERLY QUALIFIED SERVICE PERSONNEL.

IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings.
8. Install in accordance with the manufacturer’s instructions.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

CAUTION:
To completely disconnect this product from the mains, disconnect the plug from the wall socket outlet.
The mains plug is used to completely interrupt the power supply to the unit and must be within easy access by the user.

PRECAUTION:
Pour déconnecter complètement ce produit du courant secteur, débranchez la prise de la prise murale.
La prise secteur est utilisée pour couper complètement l’alimentation de l’appareil et l’utilisateur doit pouvoir y accéder facilement.

PRECAUCIÓN:
Para desconectar completamente este producto de la alimentación eléctrica, desconecte el enchufe del enchufe de la pared.
El enchufe de la alimentación eléctrica se utiliza para interrumpir por completo el suministro de alimentación eléctrica a la unidad y debe de encontrarse en un lugar al que el usuario tenga fácil acceso.

FCC INFORMATION (For US customers)

1. COMPLIANCE INFORMATION
   Product Name: Universal Audio / Video player
   Model Number: DBP-1611UD
   This product complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this product may not cause harmful interference, and (2) this product must accept any interference received, including interference that may cause undesired operation.
   Denon Electronics (USA), LLC
   100 Corporate Drive
   Mahwah, NJ 07430-2041
   Tel: (800) 497-8921

2. IMPORTANT NOTICE: DO NOT MODIFY THIS PRODUCT
   This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modification not expressly approved by DENON may void your authority, granted by the FCC, to use the product.

3. NOTE
   This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
   This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause cause harmful interference to radio or television reception, which can be determined by turning the product OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:
   • Reseat or relocate the receiving antenna.
   • Increase the separation between the equipment and receiver.
   • Connect the product into an outlet on a circuit different from that to which the receiver is connected.
   • Consult the local retailer authorized to distribute this type of product or an experienced radio/TV technician for help.

For Canadian customers:
This Class B digital apparatus complies with Canadian ICES-003. Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
### CAUTIONS ON INSTALLATION

**PRÉCAUTIONS D’INSTALLATION**

For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.
- More than 0.1 m (4 in.) is recommended.
- Do not place any other equipment on this unit.

**EMPLAZAMIENTO DE LA INSTALACIÓN**

Para la dispersión del calor adecuadamente, no instale este equipo en un lugar confinado tal como una librería o unidad similar.
- Se recomienda dejar más de 0.1 m (4 pulg.) alrededor.
- No coloque ningún otro equipo sobre la unidad.

### WARNINGS

- Avoid high temperatures. Allow for sufficient heat dispersion when installed in a rack.
- Handle the power cord carefully. Hold the plug when unplugging the cord.
- Keep the unit free from moisture, water, and dust.
- Unplug the power cord when not using the unit for long periods of time.
- Do not obstruct the ventilation holes.
- Do not let foreign objects into the unit.
- Do not let insecticides, benzene, and thinner come in contact with the unit.
- Never disassemble or modify the unit in any way.
- Ventilation should not be impeded by covering the ventilation openings with items, such as newspapers, tablecloths or curtains.
- Naked flame sources such as lighted candles should not be placed on the unit.
- Observe and follow local regulations regarding battery disposal.
- Do not handle the mains cord with wet hands.

### AVERTISSEMENTS

- Eviter des températures élevées. Tenir compte d’une dispersion de chaleur suffisante lors de l’installation sur une étagère.
- Manipuler le cordon d’alimentation avec précaution. Tenir la prise lors du débranchement du cordon.
- Protéger l’appareil contre l’humidité, l’eau et la poussière.
- Débrancher le cordon d’alimentation lorsque l’appareil n’est pas utilisé pendant de longues périodes.
- Ne pas obstruer les trous d’aération.
- Ne pas laisser des objets étrangers dans l’appareil.
- Ne pas mettre en contact des insecticides, du benzène et un diluant avec l’appareil.
- Ne jamais démonter ou modifier l’appareil d’une manière ou d’une autre.
- Ne pas recouvrir les orifices de ventilation avec des objets tels que des journaux, nappes ou rideaux. Cela entraverait la ventilation.
- Ne jamais placer de flamme nue sur l’appareil, notamment des bougies allumées.
- Veillez à respecter les lois en vigueur lorsque vous jetez les piles usagées.
- L’appareil ne doit pas être exposé à l’eau ou à l’humidité.
- Ne pas poser d’objet contenant du liquide, par exemple un vase, sur l’appareil.
- Ne pas manipuler le cordon d’alimentation avec les mains mouillées.
- Lorsque l’interrupteur est sur la position OFF, l’appareil n’est pas complètement déconnecté du secteur (MAINS).
- L’appareil sera installé près de la source d’alimentation, de sorte que cette dernière soit facilement accessible.

### NOTAS SOBRE EL USO

- Evite altas temperaturas. Permite la sufi ciente dispersión del calor cuando está instalado en la consola.
- Maneje el cordón de energía con cuidado. Sostenga el enchufe cuando desconecte el cordón de energía.
- Mantenga el equipo libre de humedad, agua y polvo.
- Desconecte el cordón de energía cuando no utilice el equipo por mucho tiempo.
- No obstruya los orificios de ventilación.
- No deje objetos extraños dentro del equipo.
- No permita el contacto de insecticidas, gasolina y diluyentes con el equipo.
- Nunca desarme o modifi que el equipo de ninguna manera.
- La ventilación no debe quedar obstruida por haberse cubierto las aperturas con objetos como periódicos, manteles o cortinas.
- No deberán colocarse sobre el aparato fuentes infl amables sin protección, como velas encendidas.
- A la hora de deshacerse de las pilas, respete la normativa para el cuidado del medio ambiente.
- No exponer el aparato al goteo o salpicaduras cuando se utilice.
- No colocar sobre el aparato objetos llenos de líquido, como jarros.
- No maneje el cable de alimentación con las manos mojadas.
- Cuando el interruptor está en la posición OFF, el equipo no está completamente desconectado de la alimentación MAINS.
- El equipo se instalará cerca de la fuente de alimentación de manera que resulte fácil acceder a ella.

### EMPLAZAMIENTO DE LA INSTALACIÓN

- Evitar altas temperaturas. Permite la sufi ciente dispersión del calor cuando está instalado en la consola.
- Maneje el cordón de energía con cuidado. Sostenga el enchufe cuando desconecte el cordón de energía.
- Mantenga el equipo libre de humedad, agua y polvo.
- Desconecte el cordón de energía cuando no utilice el equipo por mucho tiempo.
- No obstruya los orificios de ventilación.
- No deje objetos extraños dentro del equipo.
- No permita el contacto de insecticidas, gasolina y diluyentes con el equipo.
- Nunca desarme o modifi que el equipo de ninguna manera.
- La ventilación no debe quedar obstruida por haberse cubierto las aperturas con objetos como periódicos, manteles o cortinas.
- No deberán colocarse sobre el aparato fuentes infl amables sin protección, como velas encendidas.
- A la hora de deshacerse de las pilas, respete la normativa para el cuidado del medio ambiente.
- No exponer el aparato al goteo o salpicaduras cuando se utilice.
- No colocar sobre el aparato objetos llenos de líquido, como jarros.
- No maneje el cable de alimentación con las manos mojadas.
- Cuando el interruptor está en la posición OFF, el equipo no está completamente desconectado de la alimentación MAINS.
- El equipo se instalará cerca de la fuente de alimentación de manera que resulte fácil acceder a ella.
Thank you for purchasing this DENON product. To ensure proper operation, please read these owner’s manual carefully before using the product.

After reading them, be sure to keep them for future reference.

About this manual

Operation buttons
The operations described in this manual are based mainly on use of the remote control buttons.

Symbols
This symbol indicates a reference page on which related information is described.

This symbol indicates a supplementary information and tips for operations.

This symbol indicates points to remember operations or function limitations.

Illustrations
Note that the illustrations in these instructions may differ from the actual unit for explanation purposes.
Before turning the power switch on
Check once again that all connections are correct and that there are no problems with the connection cables.

Power is supplied to some of the circuitry even when the unit is set to the standby mode. When leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

Image persistence (image burn-in)
Do not leave still images of the disc menu, the unit menu, etc., displayed on the TV screen for long periods. This can result in image persistence (image burn-in) on the screen.

About condensation
If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.

If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

Do not view 3D video if you have epilepsy or heart disease, if you have had photosensitivity reactions before, or when you do not feel well.

Do not view 3D video if you have epilepsy or heart disease, if you have had photosensitivity reactions before, or when you do not feel well. Doing so may aggravate the symptoms.

When you view 3D movies, etc., take a break adequately, once per movie as a guide.

Prolonged viewing of 3D video may cause eye strain.

Restrict viewing of 3D video to those aged six and over as a guide.
Children do not respond to tiredness and discomfort expressly, so they may suddenly get sick.
When children view 3D video, parents should keep their eyes open for signs of eye strain in children.

Stop viewing 3D video when you see double images or you can not see 3D effects.
Viewing 3D video continuously in these conditions may cause eye strain.

Stop viewing 3D video when you feel something wrong, get tired, or get sick.
Viewing 3D video continuously in these conditions may cause poor physical condition. Take a proper break.

Pay attention to nearby people and objects.
Reaching for something without a sense of distance due to 3D video or moving your body suddenly in response to a 3D video image when you take it for a real object may cause injury to nearby people or cause damages to nearby objects resulting in injury. Keep fragile objects away from your viewing area.

Wear your vision correction glasses or contact lens under the 3D glasses if you have nearsightedness, farsightedness, anisometropia, or astigmatism.
Viewing 3D video without correcting your vision may cause eye strain or decreased vision.

If you have had photosensitivity reactions before, or when you do not feel well, please consult a doctor before using this unit.

CAUTION:
Do not view 3D video if you have epilepsy or heart disease, if you have had photosensitivity reactions before, or when you do not feel well. Doing so may aggravate the symptoms.

Stop viewing 3D video when you see double images or you can not see 3D effects.
Viewing 3D video continuously in these conditions may cause eye strain.

Stop viewing 3D video when you feel something wrong, get tired, or get sick.
Viewing 3D video continuously in these conditions may cause poor physical condition. Take a proper break.

Pay attention to nearby people and objects.
Reaching for something without a sense of distance due to 3D video or moving your body suddenly in response to a 3D video image when you take it for a real object may cause injury to nearby people or cause damages to nearby objects resulting in injury. Keep fragile objects away from your viewing area.

Wear your vision correction glasses or contact lens under the 3D glasses if you have nearsightedness, farsightedness, anisometropia, or astigmatism.
Viewing 3D video without correcting your vision may cause eye strain or decreased vision.

Sit at a proper distance from the screen when you view 3D video.
Sitting too close to the screen may cause eye strain or decreased vision. Sit at a distance that is recommended in the instruction manual for your TV.
Simple version (Simple setup guide)

This section briefly describes the procedures from connecting this unit and a television or AV receiver, using an HDMI cable, to start playback after unpacking.

- Before connecting the unit, turn off the power to all devices.
- For operation of the connected devices, refer to the user manuals for each device.

1. **Connect** (page 4)
   - Connect this unit and a television or an AV receiver using an HDMI cable.

2. **Turn on power** (page 5)
   - Turn on power

3. **Set up the audio** (page 6)
   - Press MODE to set up audio.

4. **Play back disc** (page 7)
   - Enjoy Blu-ray Disc and DVD.
This section describes two methods for connecting this unit and a television, connecting directly or via an AV receiver. Use an appropriate method depending on the television to be used. For the connection, use an HDMI cable (sold separately).

- If the device to be connected to the unit does not support the HDMI connection, see “Basic connections” (page 9), and make connections depending upon the conditions.
- Use only HDMI (High Definition Multimedia Interface) cable that bears the HDMI logo (genuine HDMI product). Using cable without the HDMI logo (non-genuine HDMI product) may result in abnormal playback.
- When outputting Deep Color or 1080p, etc., we recommend you use “High Speed HDMI cable” or “High Speed HDMI cable with Ethernet” for enhanced high-quality playback.

### TV

This method is for connecting the unit and a television directly.

### AV receiver and TV

This method is for connecting the unit to an AV receiver.
Connect the supplied power cord to the unit, and plug it into an AC outlet.

**NOTE**
- Be sure to insert the power plug firmly. Incomplete connection results in noise.
- Do not plug in the power cord until all connections have been completed.
- Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

1. Turn on the power of the TV and AV receiver.

2. Set the TV and AV receiver source to the unit input.

3. Press **POWER ON** to turn on power to the unit.
   - The power indicator flashes green and the power turns on.
   - Then the power indicator remains lit in green.

• “LOADING” appears on the display, and disc information is read.
• The “NO DISC” message is displayed if a disc is not loaded.

Before using a remote control, insert the batteries (page 44 “Inserting the batteries”).
Set up the audio (HD Audio Setup)

An audio format recorded on a Blu-ray Disc is an HD Audio (High Definition Audio) format, such as Dolby TrueHD, Dolby Digital Plus, DTS-HD, etc. For playing back audio of an HD Audio format, the AV receiver to which the unit is to be connected must support HD Audio playback. This section describes the setting for audio output depending on the AV receiver to be connected, outputting the Audio format as-is or converting to normal digital audio.

1. Press ▲. The disc tray opens.

2. Place the disc on the disc tray with the label side up.

3. Press ▲. The disc tray closes, and playback of the disc begins.

4. Press MODE. Displays a menu of items that can be set.

5. Use ▲ ▼ to select “BD Audio Mode”, then press ENTER or ▶.

6. Use ▲ ▼ to select “HD Audio Output” or “Mix Audio Output”, then press ENTER.

For listening to a BD disc with high quality
Set “BD Audio Mode” to “HD Audio Output”.
• HD audio of a BD disc is output from the unit.

• Only main audio of HD audio is output.
• Before connecting the unit to an AV receiver, check that the receiver supports HD audio playback. If it does not, the unit outputs the signal converted to LPCM from the HDMI output terminal. HD audio is not output.

For listening to subaudio of a BD disc (interactive audio or secondary audio)
Set “BD Audio Mode” to “Mix Audio Output”.
• When the unit plays a BD, HD Audio of the BD is converted to normal digital audio and output.

Specifications of interactive audio or secondary audio differ depending on the Blu-ray Disc. For details, refer to the package or operation manual supplied with the Blu-ray Disc.
4 Play back disc

1 Press TOP MENU or MENU.
The menu stored on the disc is displayed.

2 Select the playback title or chapter from the top menu for playback.

[Example]

Disc menu

- Title menu
- Chapter
- Stop
- Settings
- Subtitle
- Audio Setup
- Angle
- Sub Title

Playback

When power is switched to standby

Press either POWER OFF on the remote control, or ON/STANDBY on the unit. • The power indicator flashes in green. Then the indicator lights in red and the power is turned off.

[Power indicator status in standby mode]

- Power Saving Standby : Off
- Normal Standby : Red

When "Auto Power Mode" is "On" (page 34), the following states are maintained for about 30 minutes, and then the power is automatically turned to standby.
- Disc not loaded
- Playback has stopped
- Stopped due to resume function

NOTE

During power standby, a slight amount of power is consumed. To totally cut off the power, remove the power cord from the power outlet.

**Basic connections**

**Important information**

- Connect this unit as follows before using. Make connections according to the equipment you are connecting.
- Some settings of this unit may be necessary depending on the connection method. Check each connection item for more information.
- Select the cables (sold separately) according to the components being connected.

**NOTE**

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components being connected.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in noise.

**Connecting an AV receiver**

For connecting using an HDMI cable, see “Connect” (page 4). This section describes the connections not using an HDMI cable.

**Connecting to an AV receiver with an analog 2-channel audio input terminal**

- This connection is recommended when the specifications of an AV receiver connected to the unit are as follows:
  - Not supporting HDMI input
  - Not supporting digital audio (coaxial) input
- Select the connector to use and connect the device.

**Cables used for connections**

Connecting to an AV receiver with a digital audio input terminal

• This connection is recommended when the specifications of an AV receiver connected to the unit are as follows:
  • Not supporting HDMI input
  • Supporting digital audio (coaxial) input
• This connection enables faithfully playing a disc that supports 5.1-channel output.
• Select the connector to use and connect the device.

Connecting an AV receiver

When playing back Dolby Digital Plus/Dolby TrueHD/DTS-HD audio recorded on a BD disc, this unit outputs Dolby Digital or DTS bitstream from its digital audio output terminal.

**NOTE**

• Dolby TrueHD/Dolby Digital Plus/DTS-HD audio signals are not output with this connection. When outputting Dolby TrueHD/Dolby Digital Plus/DTS-HD audio signals, do so with an HDMI connection (on page 4).
• Super Audio CD’s DSD signal cannot be output. Also, during CD layer playback, 44.1 kHz/16-bit Linear PCM is output.
• Do not output DTS audio signals to an AV receiver that does not support DTS. Playing back a BD/DVD disc with recorded DTS content can generate noise and even damage your speakers.
**Connecting a TV**

- This connection is to connect the unit and a television directly.
- Check the television’s audio and video terminals and connect to one of them.

**Cables used for connections**

<table>
<thead>
<tr>

</tbody>
</table>

**NOTE**

- Do not connect this unit’s video output via a VCR (Video Cassette Recorder). Some media contain copy prohibiting signals, which will disturb the screen image.
- The unit can play both NTSC and PAL discs.

- **When connected to the television’s component video input terminal**
  
  Press **RESOLUTION** according to the resolution of the connected television (page 22).
  
  - This unit’s component video output supports 480i/576i/480p/576p/720p/1080i output.
  - Images will not be projected normally if the television resolution and this unit’s output resolution do not match.
  - Copyright protected DVD is output in 480i/576i or 480p/576p.

- **Connecting to a device equipped with a DVI-D connector**
  
  Use an HDMI DVI-D conversion cable.
  
  - The audio signal is not output. Make the appropriate audio connections for your devices.
  - The video signal will be in RGB format.
  - You cannot output to a DVI-D device that does not support HDCP (high-bandwidth digital content copyright protection system).
  - Video may not be output depending on the combination of devices.
Connecting a 2-channel audio amplifier
This connection is for playback of audio of this unit, using a 2-channel audio device.

For software recorded in multi-channel, an analog signal down-mixed to 2-channel is output.

Cables used for connections

<table>
<thead>

Audio cable

When multi-channel audio is to be converted to 2-channel audio and output, change the setting for a connected Coaxial digital output to PCM from Bitstream, then make the setting for the sampling rate for digital audio output, depending on the device (page 39 “Down Sampling”).

NOTE
If you play back BD/DVD or other media with an incorrect configuration, a deafening noise occurs that may damage your speakers.
Playback (Basic operation)

This section describes the display screen for each media and the procedures for playback. The icons show the category of content applicable to each operation.

- **Video**: Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD
- **Audio**: Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM
- **Photo**: JPEG

### About playback information

Press DISPLAY to display the information bar display or media player display.

- To close the display, press DISPLAY until it goes away.
- Displayed content differs depending on the media being played. Also, the information displayed while playing and stopped differs.

#### Information bar display

This screen is displayed when video data such as on a Blu-ray Disc, DVD-Video, etc. are played.

1. **Playback information**

### Operations enabled during playback (page 17)

- About playback information (page 13)
- Playing BD and DVD-Video (page 14)
- Playing Super Audio CD (page 15)
- Playing CD (page 16)
- Playing DVD-Audio (page 16)

### Basic settings (page 21)

#### NOTE

- The symbol (prohibited mark) may appear on the top left of the TV screen during an operation. This means that the operation being conducted is prohibited.
- Depending on the disc, certain operations may not be as described in this manual. Check each disc owner’s manual for more information.
- During playback of a 2-layered disc, pictures may stop momentarily. This happens when the 1st layer switches to the 2nd layer. This is not a malfunction.

The icons show the category of content applicable to each operation.
Playing BD and DVD-Video

1. Press POWER ON to turn on power to the unit.

2. Press SOURCE on the unit to select “DISC MODE”.

3. Select “BD” with DISC LAYER.
   • The Media changes each time DISC LAYER is pressed for 2 seconds.

   Multi: Super Audio CD
   Audio: DVD-Audio
   BD: Hybrid BD

4. Select “BD layer” or “DVD layer” for DISC LAYER for playback of a hybrid BD disc (page 47).
   • The above setting is necessary only for BD hybrid discs.

   [Example] Select the disc layer before a disc is inserted.

5. Insert a disc.
   Press ▲ to open/close the disc tray.

6. Press ▶.
   Playback begins.

7. During DVD-Video playback, press TOP MENU or POP UP MENU to display the menu.
   • If the menu continues, press △ ▽ ◀ ▶ to get to the next part.
   • With BD, depending on the disc, you can select title and chapter from the pop up menu.

8. Make the settings shown below on the disc menu.
   • Subtitle language
   • Audio language
   • Audio format etc.

   [Example]
   • Disc menu

   • Top menu

   • Pop up menu

   [Example] Bonus view

   Main video (primary video)
   Sub video (secondary video)

Playing BD-Video compatible with Bonus View

With a disc that is compatible with bonus view (picture-in-picture), in addition to the main video (primary video) stored on the disc, you can play back the video director’s commentary and simultaneously ongoing sub-story, as well as sub-video such as alternative camera angles (secondary video).

Pausing (page 17)
Stopping (page 17)
Skipping to a desired chapter/track/file (page 17)
Fast-forward/fast-reverse (page 17)
Finding specific sections with search modes (page 17)
Memorizing locations to replay (Marker function) (page 17)
Playing repeatedly (Repeat playback) (page 17)
Playing repeatedly between specified points (A-B repeat) (page 17)
Playing images frame by frame (page 17)
Slow-forward/slow-reverse (page 17)
Switching primary audio (page 17)
Changing the primary subtitle (page 17)
Switching the angle (page 17)
Playing BD and DVD-Video

1 Press MODE (page 24).

2 Use △▽ to select “Secondary Video”, and then press ENTER or ▶.

3 Use △▽ to select the desired secondary video.
   Off → 1/X → 2/X → X/X
   Off: Does not display Secondary Video.
   1/X: Displays the first Secondary Video.
   2/X: Displays the second Secondary Video.
   X/X: Displays the X th Secondary Video.
   • “X” is the number of Secondary Videos recorded and differs depending on the disc.

   • For using Bonus View, some BD discs require built-in memory or external memory.
   • The unit has a built-in memory. If the memory capacity used for Bonus View will exceed the remaining built-in memory capacity, using a USB memory device of 1 GB or more is recommended.
   • The playback method, etc., is determined by the disc, and varies depending on the disc. Refer to the operation guide of the relevant disc.

Enjoying BD-LIVE™

If the unit is connected to the Internet environment, you can enjoy a BD-LIVE™ function, using a disc that supports BD-LIVE™. For details on functions and operations of BD-LIVE™, see the information displayed on the screen after inserting a BD-LIVE™ disc.

1 Select “Internal” of “BD Data Utility” – “BD-Live Memory” (page 34).

2 Check that the connection and settings for the Internet are completed (page 36 “Connection Test”).

3 Insert a Blu-ray Disc that supports BD-LIVE™ into the unit.

4 Select “BD-LIVE™” from the Disc menu.

   • When BD-LIVE™ is used, the downloaded contents are stored in the built-in memory of the unit.
   • The unit has a built-in memory. If the memory capacity used for BD-LIVE™ will exceed the remaining built-in memory capacity, using a USB memory device of 1 GB or more is recommended.
   • Depending on your network environment, it may take time to connect to the network or connection may not be possible.

   NOTE USB memory devices (page 26, 45)
   • For using a USB memory device, set “BD Data Utility” – “BD-Live Memory” to “External” (page 34).
   • The USB memory device must have been initialized (page 34 “BD Data Information”).
   • Insert or remove a USB memory device while the power is in standby. If you insert a USB memory device while the power is ON, the USB memory device may not be access.

Playing Super Audio CD

1 Press POWER ON to turn on power to the unit.

2 Press SOURCE on the unit to select “DISC MODE”.

3 Select “Multi” with DISC LAYER.

   • The Media changes each time DISC LAYER is pressed for 2 seconds.

   Multi Super Audio CD
   Audio DVD-Audio
   BD Hybrid BD

4 Select the playback area and layer with DISC LAYER (page 47).

   Multi Plays the multi-channel area of the HD layer.
   Stereo Plays the 2-channel area of the HD layer.
   CD Plays the CD layer.

   NOTE
   Select the disc layer before a disc is inserted.

5 Insert a disc.
   Press ▲ to open/close the disc tray.

6 Press ◄.
   Playback of the selected area and layer begins.

   • To play a disc in multichannel mode, connect the unit to an AV receiver, using an HDMI cable.
   • The area/layer selected with DISC LAYER remains in the memory even when the power is turned off.
Playing Super Audio CD

Operations enabled during playback

This section describes the operations enabled during playback for each media.

The icons show the category of content applicable to each operation.

Video : Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD
Audio : Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM
Photo : JPEG

Playback (Basic operation) (page 13)

- Pausing (page 17)
- Stopping (page 17)
- Skipping to a desired chapter/track/file (page 17)
- Fast-forward/fast-reverse (page 17)
- Finding specific sections with search modes (page 18)
- Memorizing locations to replay (Marker function) (page 18)
- Playing repeatedly (Repeat playback) (page 19)
- Playing repeatedly between specified points (A-B repeat) (page 19)
- Playing images frame by frame (page 19)
- Slow-forward/slow-reverse (page 19)
- Switching primary audio (page 19)
- Changing the primary subtitle (page 20)
- Switching the angle (page 20)
- Playing in random order (Random playback) (page 20)
- Playing in your preferred order (Program playback) (page 20)

Basic settings (page 21)

Pausing

Press II during playback.
The II indicator will light on the display.
• Resume normal playback by pressing ▶.

Stopping

Press ■ during playback.
Playback stops.

About the resume function

When playback is stopped, the stop position is memorized.
• The ► indicator flashes on the display. To resume play from the stop position, press ► while stopped.

To cancel the resume function

Perform one of the following operations.
• Press ■ while stopped.
• Open the disc tray.
• Change the playback media mode with HOME.

• The resume function does not work with menu playback or BD-J (Blu-ray Disc Java) compatible discs.
• The resume function is cancelled when the power is cut off by unplugging the power cord and when the power is set to standby.
• The resume function does not work depending on the disc.

Skipping to a desired chapter/track/file

During playback, press ◀ ◀ ◀ or ▶ ▶. ◀ ◀ ◀ Playback begins from the start of the chapter/track/file being played.
▶ ▶ Playback begins from the start of the next chapter/track/file.
• Continue pressing and skip to the chapter/track/file by the number of times pressed.

NOTE

Skipping to the start of a title or group may be prohibited, depending on the disc.

Fast-forward/fast-reverse

During playback, press ◀ ◀ ◀ or ▶ ▶. ◀ ◀ ◀ The fast-forward/fast-reverse speed changes in the sequence of x1, x2, x3, x4, x5, and normal speed each time the button is pressed.
▶ ▶ The speed varies with the disc and file.
• Resume normal playback by pressing ▶.

• You cannot fast-forward/fast-reverse across files or tracks during program or random playback.
• Fast-forward/fast-reverse may be disabled with some DivX® files.
• Audio is not output during fast-forward/fast-reverse of a BD or DVD.

The icons show the category of content applicable to each operation.

Video

For details of the media corresponding to each icon, see “Playable media” (page 45).
Finding specific sections with search modes

1. Press SRCH to select a search.
The search mode setting bar is displayed at the top of the screen.

- The search mode changes each time the button is pressed.

2. Move the blue cursor at the upper part of the screen to the mode to be searched for, using ▲ ▼, then press ENTER.

- Title/Group/Track search display
- Chapter/Track search display
- Enter the time, using the number buttons or ▲ ▼, then press ENTER.
- The playback of the designated part begins.

- Title/Chapter Time search display
- Track/Disc Time search display
- Select “Title Time search” or “Chapter Time search”, using ▲ ▼, then press ENTER.
- Then enter the time using the number buttons or ▲ ▼, then press ENTER.
- The playback of the designated part begins.

3. Enter search conditions or make settings on the search mode setting bar.
Once an entry is finalized, it searches for the specified location.

- Number entry
- 0 ~ 9, +10
- Select
- ENTER
- Playback
- CLEAR
- Clear

- Entering numbers
To enter 3. ENTER*
To enter 26. ENTER* or +10 +10 6
To enter 138. ENTER*

* Depending on number of recorded songs or chapters, you may not need to use ENTER.
- Time search works with title and chapters playback time.
- When an input is not correct, press CLEAR. The previous status is retrieved.

NOTE
- If you search during program/random playback, the program/random playback stops.
- Search modes may not operate with some discs.

When the entry mode for title/chapter/title time/chapter time search continues for about 5 seconds with no operation, it is cancelled.
- When the power is set to standby or the disc is removed, the set marker is deleted.

Memorizing locations to replay (Marker function)

You can attach a marker to a location you want to view or hear again, so that playback begins at that location.

1. Press SRCH to select a Marker search.
The Marker search mode setting bar is displayed at the top of the screen.

2. Press ENTER during playback.
- The location is registered for the selected marker number.
- The marker numbers “01” to “12” are registered in this order.
- The registered number is displayed in white letters.
- The elapsed playing time at the set location is displayed.

To play back memorized locations.
Use ▲ ▼ to select the marker number, then press ENTER.

To erase markers.
Each time CLEAR is pressed, the marker number is erased from up to date registered.

- Subtitles may not appear depending on the locations you have memorized.
- The markers you have set will be erased if you turn the power to standby or eject the disc.
- The marker function does not operate across titles and groups.
- Marker search can only be performed during playback.
- The marker function does not work depending on the disc.
Playing repeatedly (Repeat playback)

Press REPEAT during playback.
The repeat mode icon is displayed at the top of the screen.

- The repeat mode changes each time the button is pressed.
- To resume normal playback, press REPEAT, and select “Repeat Off”.

[About repeat modes]
The available repeat modes vary depending on the disc or file you are playing.

1. During playback, press A – B at the desired starting point (A).
   The “A–” indicator will light on the display.
   - To cancel the starting point (A), press CLEAR.

2. Press A – B again at the desired ending point (B).
   The “B” indicator will light on the display, and A-B repeat playback will start.
   - The A-B repeat mode icon is displayed on the top of the screen.
   - To resume normal playback, press A – B, and select “Repeat Off”.

Some repeat modes may not be accessible depending on some discs.
With some discs, even when set to repeat playback, the disc may not return to the start of title or chapter, and may advance to the next scene.
Repeat playback is not available during A-B repeat playback.

Playing images frame by frame

Press II while paused.
The disc advances frame by frame each time the button is pressed.
- Resume normal playback by pressing ▶.

Frame by frame reverse playback is not available with the unit.

Playing repeatedly between specified points (A-B repeat)

Press ▶ or ◀ while paused.
The speed changes in the sequence of 1/16, 1/8, 1/4, 1/2, and normal speed each time the button is pressed.
- Resume normal playback by pressing ◀.

Audio is not output during slow-forward/slow-reverse playback.

Switching primary audio

With discs and files that have multiple audio track recording, you can change the audio during playback.

Press AUDIO during playback.
- The audio number currently being played is displayed.
- Each time AUDIO is pressed, the audio supported by a disc is changed.

If multiple audio items are recorded, the current audio number/number of recorded audio items is displayed.

- Depending on the disc, audio switching may be restricted to operation of the disc menu. In this case, switch the audio on the disc menu.
- With a DivX® file, “MP3” or “Dolby Digital” audio formats and the number of recorded audio modes are displayed. “- – –” appears for audio other than these.
- With DTS-CD (5.1 music disc), you cannot switch audio modes.
Changing the primary subtitle

During playback of a disc or file with recorded subtitles, you can switch the subtitles on/off as well as the subtitle language.

Press SUBTITLE during playback.
- The subtitle number currently being played is displayed.
- Each time SUBTITLE is pressed, the subtitle language supported by a disc is changed.

Playing in random order
(Random playback)

Press RAND during playback.
The “RAND” lights on the display and “Random Mode” is displayed on the screen.

Resuming normal playback
Press RAND during random playback.

Random playback may not be available with some discs.

Playing in your preferred order
(Program playback)

You can program up to a maximum of 15 tracks.

1 Press PROG/DIRECT during playback.
The “PROG” indicator lights on the display, and the program setting screen appears.

Resuming normal playback
Press PROG/DIRECT during program playback.
- The program setting screen appears and press PROG/DIRECT.

Erasing programmed tracks one by one
Press CLEAR on the program setting screen.
- If the unit is set to standby or the disc tray is opened, the program is cleared.

Checking the program contents
Press CALL while stopped.
- The programmed tracks are shown on the display of the unit each time the button is pressed.
- You can also check the contents of the program on the unit’s display.
- Repeat playback is available during program playback.

Switching the angle

During playback of a BD or DVD-Video recorded with several camera angles, you can change the angle.

Press ANGLE during playback.
The angle number for current playback is displayed.
- Each time ANGLE is pressed, the angle supported by a disc is changed.

NOTE
Angle changing may be restricted, depending on the disc.

Operations enabled during playback

The icons show the category of content applicable to each operation. For details of the media corresponding to each icon, see “Playable media” (page 45).
Basic settings

This section describes the setting operations for basic settings available with the remote control.

The icons show the category of content applicable to each operation.

- **Video**: Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD
- **Audio**: Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM
- **Photo**: JPEG

Basic connections (page 9)

Playback (Basic operation) (page 13)

- Changing the brightness of the display (Dimmer control) (page 21)
- Playing high-quality audio (Pure direct function) (page 21)
- HDMI control functions (page 21)
- Video resolution (page 22)
- Adjusting the picture quality (Picture control) (page 23)
- Mode setting (page 24)

The icons show the category of content applicable to each operation.

## Changing the brightness of the display (Dimmer control)

The brightness of the display can be changed.

Press **DIMMER**.

- The brightness changes each time the button is pressed.

  - Normal ➔ Dim ➔ Dark ➔ Off

## Playing high-quality audio (Pure direct function)

This enables you to play high quality audio by stopping the video signal, etc., output, and outputting the analog audio signal only.

Press **PURE DIRECT** while stopped.

- The Pure Direct mode changes each time the button is pressed.

  - Pure Direct1 ➔ Pure Direct2 ➔ Off

### Pure Direct 1
This turns off the digital audio output, video output, and display.

### Pure Direct 2
This turns off the digital audio output and video output.

### Off
This turns off the pure direct function.

- You cannot use **PURE DIRECT** while the GUI menu is displayed.
- The pure direct setting returns to "Off" when the unit is put in standby mode.

## HDMI control functions

When you make HDMI connections with a TV or AV receiver compatible with this unit and HDMI control functions, you can perform the following operations by setting up the HDMI control functions of each device.

- **TV or AV receiver power is turned on by operating the unit and functions change with this unit input.**
- **Turning off the TV’s power turns the unit’s power to standby.**
- **Operating the unit via the TV’s remote control.**
  (When the TV’s remote control has player operation buttons)

1. **Set the HDMI control function to “On”.**
   GUI menu “System” – “HDMI Control” (page 34).

2. **Turn on all the equipment connected by HDMI cable.**

3. **Set the HDMI control function for all equipment connected by HDMI cable.**

   - Please refer to the owner’s manuals of connected devices for how to make settings.
   - Carry out steps 2 and 3 if any of the equipment was unplugged.

4. **To ensure that the unit’s HDMI video output is projected on the TV screen, change the input function of the TV and AV receiver.**

5. **When you turn the TV’s power to standby, check that the power of the unit and AV receiver also goes on standby.**

If the HDMI control function does not operate properly, check the following points.

- **Is the TV or AV receiver compatible with the HDMI control function?**
- **Are the HDMI control function settings of all equipment correct?** (Step 3)
- **After setting, did you add another HDMI device connection or make any changes in the connections? If so make the settings again.**

### NOTE

- **Some functions may not operate depending on the connected TV or AV receiver.** Check the owner’s manual of each device for details beforehand.
- **When “HDMI Power Off Control” (page 34) is set to “Off”, the unit does not go to standby even if the connected device is in the standby mode.**

For details of the media corresponding to each icon, see “Playable media” (page 45).
Video resolution

This section is for making the settings for television resolution. Set them depending on the connected television.

Press RESOLUTION.
- The resolution is changed as shown below each time RESOLUTION is pressed.
- The default settings is underlined.

Auto 1080P24 1080P 1080i 720P
(Source Direct) (1080i) (1080i) (720p)
1080P24 1080P 1080i 720P
(1080i) (1080i) (1080i) (720p)
1080P24 1080P 1080i 720P
(1080i) (1080i) (1080i) (720p)
1080P24 1080P 1080i 720P
(1080i) (1080i) (1080i) (720p)

HDMI output settings

Most movies on Blu-ray disc are recorded at 24 frames per second, the same as movie film. If the unit is set like this, images with the same quality as movies can be enjoyed. The setting for outputting signals with 24 video frames in HDMI mode is made here. Then images with fluid motion can be enjoyed when video of 1080P24 (1080 progressive, 24-frame) is played.

NOTE
You can not use HDMI mode while the GUI menu is displayed.

Press HDMI MODE.
- The current status of HDMI output is displayed on the display.
- Each time HDMI MODE is pressed, “24P ON” and “24P OFF” are toggled.
- The default setting is “24P OFF”.

24P ON
- If the connected television supports “1080P24”, use this setting.
- After making settings, set Video Resolution to “1080P24” or “SourceDirect”.

24P OFF
- If the connected television does not support “1080P24”, use this position.

NOTE
When you make the following settings, this unit will output video signals from an HDMI OUT connector with a resolution of 1080P24 (1080 progressive, 24-frame).
- RESOLUTION setting: Set to “Auto”, “Source Direct”, or “1080P24”.
- HDMI mode setting: Set to “24P ON”.
- Television resolution supports 1080P24 (1080 progressive, 24-frame).

Under these setting conditions, no video signals are output from VIDEO OUT and COMPONENT VIDEO OUT connectors. To output video signals, press HDMI MODE and set HDMI output to “24P OFF”.

• This unit’s component video output supports 480i/576i/480p/576p/720p/1080i output.
• If the Video resolution is not set to “Auto”, set it to correspond with the resolution of your television.
• Images will not be projected normally if the television resolution and this unit’s output resolution do not match.
• Audio and video will be temporarily interrupted if the power of the connected device currently playing is turned off, or the input is switched.
• When you change the HDMI video resolution of the unit, it takes a few seconds up to about 10 seconds for validation between the unit and the connected device. Audio/video is not output during this period.

When you make the following settings, this unit will output video signals from an HDMI OUT connector with a resolution of 1080P24 (1080 progressive, 24-frame).
- RESOLUTION setting: Set to “Auto”, “Source Direct”, or “1080P24”.
- HDMI mode setting: Set to “24P ON”.
- Television resolution supports 1080P24 (1080 progressive, 24-frame).

Under these setting conditions, no video signals are output from VIDEO OUT and COMPONENT VIDEO OUT connectors. To output video signals, press HDMI MODE and set HDMI output to “24P OFF”.

NOTE
When you make the following settings, this unit will output video signals from an HDMI OUT connector with a resolution of 1080P24 (1080 progressive, 24-frame).
- RESOLUTION setting: Set to “Auto”, “Source Direct”, or “1080P24”.
- HDMI mode setting: Set to “24P ON”.
- Television resolution supports 1080P24 (1080 progressive, 24-frame).

Under these setting conditions, no video signals are output from VIDEO OUT and COMPONENT VIDEO OUT connectors. To output video signals, press HDMI MODE and set HDMI output to “24P OFF”.
Adjusting the picture quality (Picture control)

You can adjust the picture quality to your liking. The adjusted values can be stored in Memory 1 through Memory 5.

1 Press PICTURE ADJUST. The currently set status is displayed.

2 Press △▽ to select a memory number to be used, and then press ENTER.

3 Press △▽ to select an item then press ENTER or ▶.

4 Change the setting with △▽.

- Refer to the table on the right for information on the different settings.

To finalize picture adjustments

Press PICTURE ADJUST after adjusting.

- The pop up menu of the picture adjustments is disappeared on the screen.

The picture adjustment settings are retained in memory even after the power is turned off.

Advanced connections

Connecting to a USB memory device

MP3 or JPEG, etc. files stored on a USB memory device can be played.

Connecting a USB memory device

Insert a USB memory device into the USB port firmly.

- After the USB memory device is inserted and the power of the unit is turned on, check that the “USB” indicator on the display of the unit lights.
- For files that can be played on the unit, see page 46.
- If the “USB” indicator does not light, turn the power off, reinsert the USB memory device, and turn the unit on again.

NOTE

- Insert a USB memory device straight into the USB port. If the USB memory device is forcibly inserted, the unit or the device may be damaged.
- Some USB memory devices may protrude from the USB port. Do not use excessive force to insert it into the USB port, or push the protruded part forcibly.
- Do not insert an object other than a USB memory device into the USB port. It may damage the unit.
- Do not leave a USB memory device near small children. A child may swallow it.
- For connecting a USB memory device, do not use an extension cable.
- The USB port of the unit and a computer cannot be connected with a USB cable.
- Do not use for charging portable audio players or mobile phones.

Removing a USB memory device

Press POWER OFF to turn the power off then remove the USB memory device from the USB port.

NOTE

- Be sure to turn the power off when inserting or removing a USB memory device. Data stored in the USB memory device or the memory of the unit may be damaged.
- In any case where data stored in a USB memory device are damaged or deleted, we will not compensate for the stored contents or any associated damage or try to restore the contents stored in a USB memory device.
- Compatibility of all USB memory devices is not guaranteed.
- For reformating a USB memory device, format it with FAT16 or FAT32.

Connecting to a network

When the unit is connected to the Internet, you can enjoy following functions.

- Playback of a Blu-ray disc supporting BD-LIVE™ (page 16).
- Playback of music, photos, video files stored on a device on the network (page 28).
- Playback of YouTube contents (page 31).
- Playback of Netflix contents (page 31).
- Downloading for updating the latest firmware via the network (page 34).

After connection, make settings for the Internet connection and check it before using Media Server, YouTube or Netflix.

Video cable

| Component video cable | (sold separately) |
| (Green) | |
| (Blue) | |
| (Red) | |

Ethernet Cable

| Ethernet cable | (sold separately) |

NOTE

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components being connected.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in noise.
### System requirements

**Internet connection via broadband.**

**Modem**

A device that connects to the broadband and conducts communications on the Internet. Some modems also incorporate a router.

**Router**

When using the unit, we recommend a router with the following features.
- Built-in DHCP (Dynamic Host Configuration Protocol) server.
- This function automatically assigns an IP address on the LAN.
- Built-in 100BASE-TX switch (built-in switching hub compatible with speeds upwards of 100 Mbps)

**Computer (recommended system)**

- **OS**
  - Windows® XP Service Pack2 or more or Windows Vista
- **Software**
  - Server software supporting Windows Media Player ver.11 or DLNA.

**Ethernet cable (CAT-5 or greater recommended)**

- An ethernet cable is not included with the unit.
- Use only shielded STP or ScTP LAN cable which is available at retailer.
- We recommend a shielded straight cable (normal type) for Ethernet connections.
- If you use the flat type or a non-shielded cable, the noise may adversely affect other devices.

---

### Checking the network connection

After connection, test the Internet connection with “Connection Test” in “Network” on the GUI menu (page 36).
- If “Network is FAILED.” is displayed in the test, check the IP address with “Network” in “Information” on the GUI menu, then set “DHCP” to “Manual” (page 36).

- The unit can use the DHCP function to automatically set up the network.
- When setting up your network manually, after subscribing to an ISP, make the settings according to directions in “Network” on the GUI menu (page 36).
- If you connect the unit to a network without a DHCP function, conduct IP address and other settings according to “Network” on the GUI menu (page 36).
- The unit does not support PPPoE. If you subscribe to a service that is set with PPPoE, a PPPoE compatible router is required.
- When setting up the network manually, consult with your network administrator for the settings to make.

### Registering the connected device for the network

For playing files stored on a device connected via a network, the device must have the unit registered in advance.
- For registering, refer to the operation manual supplied with the server.

**NOTE**

- Do not connect an ETHERNET connector directly to the LAN port/Ethernet connector on your computer.
- It is necessary to subscribe to an ISP in order to connect to the Internet. If you already have a broadband connection, there is no need to subscribe anew.
- The router you can use varies with the ISP. For more information, contact your ISP or PC dealer.
- DENON assumes no responsibility whatsoever for any communication errors or problems resulting from customer’s network environment or connected devices.

For Internet connections, use an ISP (Internet Service Provider). Ask your local dealer for details.
Playback (Advanced operation)

This section describes the playback of files stored in the DVD, CD or USB memory device and the operation of Home menu.

- Opening the Home menu screen (page 28)
- Playing files (MEDIA PLAYER) (page 28)
- Playing YouTube video (page 31)
- “Playing Netflix video picture” (page 31)

How to make detailed settings (page 32)

Home menu screen

The unit can play music, photos, video files stored in the USB memory device connected to the front panel of the unit or on the server connected via the network. For playback operation, use the Home menu screen.

Opening the Home menu screen

1. Press HOME.
   The Home menu is displayed on the television screen.
2. Press △▽◀▶ to move the cursor to the menu item to be used.
3. Press ENTER.

Home menu screen

1. MEDIA PLAYER (page 28)
   The unit can play music, photos, video files stored on the device connected via the network or in the USB memory device connected to the front panel of the unit.
2. NETFLIX (page 31)
   The Netflix contents are played.
3. YouTube (page 31)
   The YouTube contents are played.
4. QUIT
   The Home menu is closed.
5. SETUP (page 32)
   The GUI menu setup screen is displayed for setting the unit.

Playing files (MEDIA PLAYER)

Files on a USB memory device, disc or a server connected to the unit are played using the Media Player of the unit.

- Before operation, start the server software of the computer (Windows Media Player, etc.), and make settings for the server contents so that files can be played via the network.
- For details, refer to the operation manual supplied with the server software.

1. Select “Media Player” on the Home menu screen with △▽ ◀▶, then press ENTER.
   Devices connected to the unit are listed on the menu screen of Media Player.

2. Select a device on which a file to be played is stored with △▽ then press ENTER.

   - If the server connected to the unit is not displayed on the menu screen of Media Player, select “DLNA Search” on the screen with △▽, then press ENTER to search for the server.
   - If the server is not displayed as a result of searching, check the connection of the server to the unit once again.
   - If you perform such operations as adding or deleting a file on the connected DLNA server, information of the DLNA server may not be displayed. If this happens, turn off and on the unit’s power again.
3 Select a folder to be played with $\Delta \nabla \downarrow$, then press ENTER.
- Folders classified by file type are listed on the menu screen.
- Files are classified as follows:
  - Video : DivX, MPEG, AVI, WMV
  - Music : MP3, WMA, AAC, LPCM
  - Photo : JPEG

Here, “Photo” is selected as an example.

<table>
<thead>
<tr>
<th>Item 1/4</th>
<th>Media Player</th>
</tr>
</thead>
<tbody>
<tr>
<td>USB1</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Type:Folder</td>
</tr>
<tr>
<td></td>
<td>Photo, Music, Video</td>
</tr>
</tbody>
</table>

4 Select a file to be played on the file list on the screen with $\Delta \nabla \downarrow$, then press ENTER.
Playback begins.
- A slide show begins and still images are switched at 1-10 second intervals.

<table>
<thead>
<tr>
<th>Item 1/5</th>
<th>Media Player</th>
</tr>
</thead>
<tbody>
<tr>
<td>USB1/Photo/Big City</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Type:Still</td>
</tr>
<tr>
<td></td>
<td>City001, City002, City003, City004, City005</td>
</tr>
</tbody>
</table>

- With a large image file, the image may display for longer than the set time.
- For the file types that can be played, see “Files” (page 46).

### Changing the still image being played
Press $\ll, \gg, \gtrless$.
- Before playback or display of next image.

### Pausing the display
Press $\ll$. 
- To cancel pause, press $\gg$.

### Changing interval of slide show
Press $\ll, \gg$.

### Changing the still image orientation
Press $\Delta \nabla \downarrow$.

- $\Delta$ Invert
- $\nabla$ Contrarotate
- $\downarrow$ Rotate clockwise

- $\gg$ Mirror

### Change the media for playback of a file
When the source of a file for playback is changed to another media, press $\gg$ to return to step 2 and select the media to be played.

**DISC MODE**
If the source of a file to be played is changed from the USB media player or server to a disc, you can also change the media with the procedures below.

1. Press $\gg$.
   - Playback of a file from a USB memory device or server stops.
   - When “$\gg$” flashes on the display, press $\gg$ again to turn “$\gg$” off.

2. Press SOURCE.
   - The playback mode of the unit is changed to disc mode.

3. Press $\gg$.
   - Playback begins.
Playing playlist

Favorite files on a USB memory device, disc are played using the playlist.

1. Select a file to be played on the file list on the screen with △, then press ▶.

2. Press POP UP MENU. The menu of playlist is displayed.

3. Press ENTER. File is added to playlist.

4. Select a playlist on which a file to be played is Stored with △.

5. Playing files.
   See “Playing files (MEDIA PLAYER)” (page 28)

   • If the unit is set to standby, the playlist is cleared.

Playing Kodak Picture CD

This unit can also run JPEG files stored on Kodak Picture CD. You can enjoy picture images on the display device set by playing back the picture CD. For details of Kodak picture CD, contact a shop that provides developing service of Kodak Inc.

1. If a Kodak Picture CD is inserted in the disc tray of the unit, a slide show begins on the screen.

2. Pressing ■ stops the slide show, and the thumbnail screen is displayed.

3. Use △ ◄ ◄ ◄ to select a desired picture to be played back, then press ENTER.
   An image will be played back from the selected track and go to the next one in turn.

4. Pressing POP UP MENU with the thumbnail screen displayed shows the screen for describing the playback operations.
### Changing the still image being played
Press  
- Before playback or display of next image.

### Pausing the display
Press II.
- To cancel pause, press ➤.

### Changing interval of slide show
Press ◀▶▶.

### Changing the still image orientation
Press △▼◄►.
- Invert
- Mirror
- Contrarotate
- Rotate clockwise

### Returning to the thumbnail display screen
Press ▼.

### Playing YouTube video
The operation for the video site YouTube is described here.

1. Press △▼◄► to select “YouTube” in the “Home Menu”, and press ENTER. The unit connects to YouTube.

2. Select the contents that you want to watch using △▼◄►, and press ENTER. Playback begins.

### About YouTube
- YouTube is a video file-sharing service operated and managed by YouTube Inc.
- The unit can play video hosted by YouTube.
- YouTube and the YouTube logo are the registered trademarks of Google Inc.
- The YouTube content is independently managed by YouTube, LLC.
- YouTube content may include information that may be deemed inappropriate.
- This unit must be connected to a working Internet connection in order to watch YouTube. For seamless playback of YouTube video contents, the unit needs effective speed greater than 6 Mbps for HD video contents, and greater than 2 Mbps for SD video contents, between the unit and YouTube server.
- We recommend using a broadband line such as fiber optic, ADSL, or CATV. The video content may not be displayed correctly, and/or may not be played seamlessly depending on the usage environment or communication environment, or the connection status of the line, or on the traffic status of the line.
- You cannot connect to YouTube via a proxy.
- To set the language to be displayed on the screen, configure the settings in “Language”–“GUI Language” in the GUI menu.

### Playing Netflix video picture
The operation for the Netflix streaming service is described here.

1. Select “NETFLIX” on the Home menu, then press ENTER. Your instant Queue screen will appear on your TV.

2. Use △▼◄► to select highlight a movie on your instant Queue.

3. Press ENTER a title that you want to watch. The second menu of title will appear.

4. Select “play” on the second menu and then press ENTER. Retrieving of title will be started. Press △ to return to your instant Queue.

### NOTE
- For using “Netflix”, Internet connection is required. It is recommended to use a broadband line (effective speed 6 Mbps or more) such as FITH (optical) ADSL, CATV, etc.
- Even if the line speed is sufficient to make it viewable, pictures may be unstable, interrupted, or not viewed depending on the usage environment, communication environment, connecting line conditions, etc.
- The connection of Netflix may not be connected via proxy.
- For the usage conditions for Netflix, contact Netflix.
# How to make detailed settings

## Menu map

Pressing **SETUP** displays the GUI menu. From this menu, you can move to various setting screens.

**General Setting** (page 34)

### System Information

- Display MAC Address.
GUI menu operation

1 Press SETUP.
   The GUI menu is displayed on the TV screen.
   • The GUI menu is also displayed when you press SETUP of the Home menu.

2 Press ▲▼ ◄► to select the menu to be set or operated.
   • To return to the previous item, press ◄.

3 Press ENTER to enter a setting.

Text colors of selected items of the GUI menu are as follows:
• White : These items can be selected.
• Gray : These items cannot be selected.

NOTE
You must use the GUI menu to make settings or operate while a disc or USB memory device is not inserted. In cases in which the resume function is activated, you may not make correct settings.

Exiting the GUI menu
Press SETUP while the GUI menu is displayed.
• The GUI menu display disappears.

Examples of GUI menu screen displays

**General Setting**

Settings for system, language, parental lock, network, etc. can be made.

### System

Set the following settings.
- Screen saver settings
- Power saving mode settings
- HDMI control function settings
- Initialize settings
- Firmware update from the Internet
- BD-LIVE Memory switching settings

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Setting details</th>
</tr>
</thead>
</table>
| **Screen Saver** | Sets the screensaver.  
- **On**: The screensaver function activates when stop or pause status continues for about three minutes.  
- **Off**: Does not use the screensaver. |
| **Auto Power Mode** | This setting automatically sets the power to standby.  
- **On**: This setting automatically sets the power to standby if any of the following states continues for approximately 30 minutes.  
  - Disc not loaded  
  - Playback stopped  
  - Stopped due to the resume function  
- **Off**: Does not use the auto power mode. |
| **Power Saving** | Sets to power saving mode during standby.  
- **Power Saving Standby**: This is the lowest power consumption mode. During standby, operations are not accepted via HDMI control. Power indicator status in standby mode: **Off**.  
- **Normal Standby**: During standby, operations are accepted via HDMI control. Power consumption is slightly higher at this time. Power indicator status in standby mode: **Red**. |
| **HDMI Control** | Links the unit and a device connected with an HDMI cable that supports HDMI control.  
- **On**: Links with the device connected to HDMI.  
- **Off**: Disables the HDMI control function.  
  - For the HDMI control function to operate, it is necessary for the unit or HDMI-compatible TV connected to the unit to have an HDMI connection.  
  - Refer to “HDMI control functions” (page 21) for more information on HDMI control functions.  
  - After the “HDMI Control” setting has been changed, always turn off the power to the connected equipment and then turn it back on. |
| **HDMI Power Off Control** | Links the unit and a device connected with an HDMI cable that supports HDMI control.  
- **On**: Turns the unit’s power to standby through linkage to the TV.  
- **Off**: Does not turn the unit’s power to standby through linkage to the TV. |
| **Initialize** | All settings including audio mode and picture quality are set to default settings.  
- **Cancel**: Does not initialize.  
- **OK**: Executes initialization. |

### Setting items

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Setting details</th>
</tr>
</thead>
</table>
| **Firmware Update** | Updates the firmware of the unit via the Internet.  
- **Check for Update**: Checks if a newer version of firmware exists. Press **ENTER** to see the approximate amount of time required for the update.  
  - If the firmware is already updated to the latest version, the firmware updating operation starts after you press **ENTER**.  
  - When the update starts, a progress bar and the remaining time required to complete the update are displayed on the television screen. When the update completes, the units turns on again and returns to the normal state.  
- **Update Notification**: Displays the message for updating on a television screen just after the power is turned on.  
  - **On**: The message for updating is displayed on a television screen.  
  - **Off**: The message for updating is not displayed on a television screen. |
| **BD Data Utility** | Initializes the BD data stored in the built-in memory or external memory used for BD-Live.  
- **BD Data Information**: The BD data used for BD-Live are initialized. The space remaining in the memory being used is displayed.  
  - **FMT BD Data**: Initializes the space for BD data being used for BD-Live.  
  - This operation deletes all data. When a USB memory device that stores the data is inserted, never execute this operation.  
- **BD-Live Memory**: Built-in memory or external memory is selected for the BD-Live memory.  
  - **Internal**: The built-in memory is used.  
  - **External**: The USB memory device inserted in the unit is used.  
  - If the file size used for BD-Live will exceed the remaining built-in memory capacity, select “External” (page 15). |

**NOTE**

When the following message is displayed after “Firmware Update” (page 34), follow the instructions in the message to perform operations.

**“Disconnect the power plug of the unit from the outlet, wait approximately 30 seconds, and then insert the plug again before use.”**

</tr>
</tbody>
</table>

**NOTE**

3D video playback operations may differ according to the disc to be used. Refer to the instruction manual supplied with your disc.

**NOTE**

When passing 3D video signals output from this device through an AV receiver to a 3D enabled TV, the AV receiver must also be compatible with inputting / outputting 3D video signals.

To view 3D video, use a 3D enabled TV.

- To connect the unit with a 3D enabled TV, use a high speed HDMI cable.
- During 3D playback, you cannot adjust “Video Resolution” (page 22), “HDMI output Settings” (page 22), or “Adjusting the picture quality” (page 23).

Part names and functions

Front panel

For buttons not explained here, see the page indicated in parentheses ( ).

1. Power operation button (ON/STANDBY) (5, 7)
   Turns power to this unit on and off (standby).
2. Power indicator (5, 7)
3. DISC LAYER button (14 – 16)
4. PURE DIRECT button (11, 22)
5. RESOLUTION button (11, 22)
6. Remote control sensor (44)
7. Disc tray open/close button (6, 14 – 16)
8. SOURCE button (29)
9. USB port (26)
10. Reverse-skip/Forward-skip buttons (8, 9) (17)
11. Stop button (II) (17)
12. Pause/Still button (II) (17)
13. Play button (▶) (6, 14 – 16)
14. Disc tray (6)
15. Display (41)
16. HDMI output indicator (41)
17. Media indicators
   BD : BD
   DVD : DVD-Video, DVD-R/+R/-RW/+RW
   DVD AUDIO : DVD-Audio
   SUPER AUDIO CD : Super Audio CD
   CD : CD
   USB : USB memory device
   NET : NETWORK
   Displays the inserted media and contents via Network.

Display

1. Playback mode indicators
   ◄ : During playback
   II : During pause and step-by-step playback
   PROG : During program playback
   RAND : During random playback
   1 A-B : During repeat playback
2. Information display
   Displays various information or playback elapsed time and so on of the disc.
3. Playback format indicators
4. Downmix indicator
   Displayed when playing back downmix permitted audio.
5. Angle information indicator
   Displayed when a scene on the currently playing disc has been shot at various angles.
6. Audio channel indicators
   Displays the number of audio signal channels during playback.
   2CH : 2-channel playback
   MULTI : Multi-channel playback
7. Time mode indicators
   TOTAL : Total time of Super Audio CD and CD
   SING : Elapsed time of title/chapter/track/file being played
   REM : Remaining time of title/chapter/track/file being played
8. Group/Title/Track/Chapter indicators
9. HDMI output indicator
   Display when HDMI video or audio signals are being output.
   Does not display when the HDMI cable is not correctly connected or when the HDMI connection is not verified.
10. Media indicators
   BD : BD
    DVD : DVD-Video, DVD-R/+R/-RW/+RW
    DVD AUDIO : DVD-Audio
    SUPER AUDIO CD : Super Audio CD
    CD : CD
    USB : USB memory device
    NET : NETWORK
    Displays the inserted media and contents via Network.
Rear panel

For buttons not explained here, see the page indicated in parentheses ( ).

- **AC inlet (AC IN)** (5)
- **ETHERNET connector** (27)
- **HDMI OUT connector** (4)
- **DIGITAL OUT COAXIAL connector** (10, 12)
- **VIDEO OUT connector** (9 – 11)
- **COMPONENT VIDEO OUT connectors** (9 – 11)

**2ch AUDIO OUT connectors** (11, 12)
For software recorded in multi-channel, analog signals that have been down-mixed into 2 channels are output.

**ROOM TO ROOM IN/OUT jacks**
Extension jack for future use.

**NOTE**
- Do not touch the inner pins of the connectors on the rear panel. Electrostatic discharge may cause permanent damage to the unit.
- Do not put your finger or foreign object in the fan opening. Doing so could cause injury or unit failure.

38. PURE DIRECT button (PURE) .................................... (21)
39. DISC LAYER button (D. L) ......................................... (14 – 16)

NOTE
• When power is in standby, press 1 and 4 to turn the power on.
• You can use Q6 when operating the BD pop up menu screen, etc.
Remote control

Inserting the batteries

1. Slide the rear lid in the direction of the arrow and remove it.
2. Load the two batteries properly as indicated by the marks in the battery compartment.
3. Put the rear cover back on.

If the battery level is low, the remote control signal transmission/status display flashes 5 times when a button is pressed. In this case, replace the batteries soon.

- If the batteries are completely exhausted, the remote control signal transmission/status indicator goes dark.

NOTE
- Insert the specified batteries in the remote control.
- Replace the batteries with new ones if the set does not operate even when the remote control is operated close to the unit. (The supplied batteries are only for verifying operation.)
- When inserting the batteries, be sure to do so in the proper direction, following the  和  marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - Do not attempt to charge dry batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
  - Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.
  - If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
  - Remove the batteries from the remote control if it will not be in use for long periods.
  - Used batteries should be disposed of in accordance with the local regulations regarding battery disposal.

Operating range of the remote control

Point the remote control at the remote sensor when operating it.

Approx. 23 ft /7 m

NOTE
The set may function improperly or the remote control may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.

Remote control settings (remote control side)

Switches when this unit remote control operates another DENON BD players in the vicinity.
Set the remote control code simultaneously on the unit, too (page 37 “Remote ID”).

1. Hold POWER ON and OPEN/CLOSE pressed simultaneously.
   While these buttons are held pressed, the remote control signal transmission/status display flashes twice, and the remote control enters Setup mode.

2. When the number button “1” is pressed, the remote control ID is set to “DENON 1”. When the number button “2” is pressed, the remote control ID is set to “DENON 2”.
   When number key input is completed and the remote control signal transmission/status display flashes twice, the settings for the remote control are completed.

   If the signal code of the remote control does not match the signal code of the unit, the remote control code set on the unit is shown on the display.

   [Example]
   If the code setting on the unit is “DENON 1”, and the setting on the remote control is “2”, “PLAYER 1” is shown on the display.

   NOTE
   - If you made the remote control settings incorrectly, the remote control signal transmission/status display flashes for 2 seconds, and then goes off. If this happens, the settings are incorrect and retry the settings.
   - Match the signal code of the remote control with the signal code of the unit. If the remote control code is different, you cannot operate the this unit with the remote control.
   - Even if you change the remote control code, set the GUI menu “Others”-“Receive Legacy Remocon” (page 37) to “OFF” when operating this unit with a remote control other than DENON’s.

NOTE

- A disc may not be accessible or may play incorrectly due to audio and video interruptions, etc., depending on the recording conditions when recorded with a BD recorder or DVD recorder.

The following discs will not play back on this unit.
- BD-RE Ver1.0 (BD disc with cartridge)
- BD-ROM/BD-R/BD-RE discs containing recorded movie, still image, audio, and/or other, files
- BD XL
- HD DVD
- DVD-RAM
- CDV (Only the audio part can be played)
- CD-S (Only the audio signals can be output)
- Non-standard CD (CD with copy protection, etc.)
- Unauthorised disc (Pirated disc)
- Disc with recording area less than 55 mm in diameter
- Video Single Disc (VSD) / CVD/ Video CD / Super Video CD / CompactDisc-Interactive (CD-I) / Photo CD

USB memory device

- The unit supports the FAT16 and FAT 32 file system. It does not support the NTFS file system.
- The limit of folders and files that can be displayed on the unit is as shown below. (The limit shown includes the root folder.)

| Folder layers | 8 |
| Folders       | 999 |
| Files         | 999 |
| File names, folder names | 32 |
| Artist names, song titles | 60 |

- If there are too many characters to be displayed on one line, the display becomes scollable.
- File names/title names/artist names/album names are displayed on the Media player display screen.

NOTE
- Insert and remove a USB memory device with the power set to standby. If it is inserted or removed with the power on, the recorded files cannot be loaded or may be damaged.
- It is not compatible with an MP3 player, digital camera, a USB device for a mobile phone, etc.
- The unit cannot charge a USB device.
- The unit supports high-speed USB file transfer (conforming to USB 2.0).
- The unit does not support a card reader, USB extension cable, or USB hub.
- AVCHD content stored on the USB memory device connected to the unit can also be played.

### About DivX® Video-on-Demand (VOD)

- When you purchase or rent a DivX® file through the official site of DivX® Video-On-Demand (VOD) services, the unit registration code is required. For details, see “DivX Registration” (page 37).
- A DivX® VOD file recorded with a different code from the unit registration code cannot be played back.
- Some DivX® VOD files are restricted to a certain number of playable times. If your DivX® VOD file has such a limit, the number of playable times is displayed on the DivX® VOD display screen.
- Use < > to select “Yes” if you want to play a file, or to select “No” if you do not want to play it. Then, press ENTER to confirm the selection.
- **NOTE**
  - ABOUT DIVX PLUS™ HD: DivX® is a digital video format created by DivX, Inc. This is an official DivX Certified® device that plays DivX video, including DivX Plus™ HD video (H.264/.MKV) up to 1080p and premium content. Visit www.divx.com for more information and software tools to convert your files into DivX video.
  - ABOUT DIVX VIDEO-ON-DEMAND: This DivX Certified® device must be registered in order to play DivX Video-on-Demand (VOD) content. To generate the registration code, locate the DivX VOD section in the device setup menu. Go to vod.divx.com with this code to complete the registration process and learn more about DivX VOD.

- Depending on recording conditions, these files may not be playable.
- If a file name/title name/artist name/album name includes characters that are not supported for the Media player display, it may not be displayed correctly.
- JPEG pictures recorded in the progressive system cannot be displayed.
- Variable Bit Rate (VBR) is not supported (when playback is possible, the time display in the display window will speed up and slow down).
About Discs and Files

BD-Video, DVD-Video

BD/DVD-Video discs are divided into several large sections (titles) and small sections (chapters). These sections are all allotted numbers, called title numbers and chapter numbers.

[Example]

Hybrid BD

- Hybrid disc

Two-layer Hybrid BD with a BD layer and a DVD layer. The signals on the DVD layer can be played on a regular DVD player.

Super Audio CD

[Type of Super Audio CD]

- Single layer disc

Single layer Super Audio CD with only an HD layer*.

- Dual layer disc

Super Audio CD with a double HD layer*, offering extended playing time and high sound quality.

- Hybrid disc

Two-layer Super Audio CD with an HD layer* and a CD layer. The signals on the CD layer can be played on a regular CD player.

* All Super Audio CD contain an HD (High Density) layer with high density Super Audio CD signals. This layer can contain a stereo channel area, a multi-channel area, or both a stereo channel and multi-channel area.

CD

CD is divided into several sections (tracks). These sections are all allotted numbers called track numbers.

File

Files, such as MP3/WMA/AAC/LPCM/JPEG/DivX®, recorded on DVD-R/RW/+R/+RW, CD-R/RW and USB memory device are divided into large segments (folders) and small segments (files). Files are stored in folders, and folders can be placed for storage in a hierarchy. The unit can recognize up to 8 levels of folders.

DVD-Audio

DVD-Audio discs are divided into several large sections (groups) and small sections (tracks). These sections are all allotted numbers, called group numbers and track numbers.

When writing MP3/WMA/AAC/JPEG/DivX® files on a CD-R/RW disc, set the writing software’s format to “ISO9660”. The files may not play properly if they are recorded in other formats. For details, refer to the instructions of your writing software.
Cautions on using media

Inserting a disc

- Set the disc in the tray label side up.
- Make sure the disc tray is fully open when inserting the disc.
- Place the disc horizontally in the tray, aligned with the tray guide.

If a disc that cannot be played is loaded or the disc is loaded up-sidewards, “NO DISC” is displayed on the player’s display.

**NOTE**

- Only load one disc at a time. Loading two or more discs can damage the unit or scratch the discs.
- Do not use cracked or warped discs or discs that have been repaired with adhesive, etc.
- Do not use discs on which the sticky part of cellophane tape or labels is exposed or on which there are traces of where labels have been removed. Such discs can get caught inside the player and damage it.
- Do not use discs in special shapes, as they may damage the player.

- Do not push the disc tray in by hand when the power is off. Doing so could damage the set.

How to handle media

- Do not get fingerprints, oil or dirt on discs.
- Take special care not to scratch discs when removing them from their cases.
- Do not bend or heat discs.
- Do not enlarge the hole in the center.
- Do not write on the labeled (printed) surface with ball-point pens, pencils, etc., or stick new labels on discs.
- Condensation may form on discs if they are moved suddenly from a cold place (outdoors for example) to a warm place, but do not try to dry discs with a hairdryer, etc.
- Do not eject a USB memory device or turn off the unit while a USB memory device is being played. This may result in malfunction or loss of the USB memory device’s data.
- Do not attempt to open or modify USB memory device.
- USB memory device and files can be damaged by static electricity. Do not touch the metal contacts of an USB memory device with your fingers.
- Do not use warped USB memory device.
- After use, be sure to remove any disc or USB memory device, and store it in its proper case, to avoid dust, scratches and deformation.
- Do not store discs in the following places:
  1. Places exposed to direct sunlight for long periods of time
  2. Dusty or humid places
  3. Places exposed to heat from heaters, etc.

Cleaning discs

- If there are fingerprints or dirt on a disc, wipe them off before using the disc.
- Use a commercially available disc cleaning set or a soft cloth to clean discs.

- Gently wipe the disc from the inside towards the outside.
- Do not wipe with a circular motion.

**NOTE**

Do not use record spray, antistatic agents, benzene, thinner or other solvents.

About copyrights

- Unauthorised copying, broadcasting, public performance and lending of discs are prohibited.
- This item incorporates copy protection technology that is protected by U.S. patents and other intellectual property rights of Rovi Corporation. Reverse engineering and disassembly are prohibited.
- Portions of this product are protected under copyright law and provided under license by ARIS/SOLANA/4C.
### Other information

#### About digital signal audio output

The unit can convert the format of digital audio signals recorded on media and output them. Make settings for a digital audio signal depending on the specifications of the connected device.

- Audio signal input may not be supported depending on the HDMI compatible monitor (projector, etc.) being used.
- When the unit is connected to this kind of device, audio signals are not output from the HDMI terminal.

**Media/Files** | **Audio format** | **Analog Audio Output Terminal** | **Digital Audio Output Terminal (Coaxial)** | **HDMI Output Terminal (*1, *2, *4)**

DTS-CD

---

1. The output format is automatically changed depending on the audio format or number of channels that the connected HDMI device supports.
2. If “BD audio mode” is set to “Mix Audio Output”, secondary audio and interactive audio are mixed and output (page 6, 24).
3. Contents of DTS-HD MA 5.1ch/192 kHz are output as 5.1ch/96 kHz.
4. If the connected HDMI device does not support Dolby Digital Plus, Dolby TrueHD, or DTS-HD, the signal is output as Dolby digital or DTS Digital Surround bit stream. If it does not support the Dolby Digital or DTS Digital Surround bit stream, it is output as multi-linear PCM or 2-channel linear PCM.
5. If the connected HDMI device does not support DSD, the signal is output as Linear PCM. If a DSD signal is output from the HDMI output terminal, the signal output from the analog audio output terminals is muted.
6. If the connected HDMI device does not support AAC, the signal is output as Linear PCM.
7. If the connected HDMI device does not support HE-AAC, the signal is not output.
8. If the connected HDMI device does not support HE-AAC, the signal is not output.
### Copyright protection system (HDCP)

In order to play back digital video and audio such as BD-Video or DVD-Video via HDMI connection, both the player and TV or the AV receiver need to support the copyright protection system known as HDCP (High-bandwidth Digital Content Protection System). HDCP is copyright protection technology comprising data encryption and authentication of the connected AV device. Our this unit supports HDCP.

**NOTE**

If a device that does not support HDCP is connected, video and audio are not output correctly. Read the owner’s manual of your television or AV receiver for more information.

**Explanation of Terms**

**Numerics**

- **4:3 letterbox**
  When a wide (16:9) disc is played on the unit while connected to a 4:3 TV, this function displays the image with a black area at the top and bottom.

- **4:3 pan-and-scan**
  When a wide (16:9) disc is played on the unit while connected to a 4:3 TV, this function cuts the left and right of the displayed image to the 4:3 size according to the disc’s control information.

- **A**
  **AACL (Advanced Audio Coding)**
  This is an internationally standardized audio data compression scheme. It has a compression ratio 1.4 times higher than the “MP3 audio compression scheme adopted for “MPEG-1.”

- **Aspect ratio**
  This is the length and width ratio of the TV screen. The conventional TV screen’s ratio is 4:3 and a wide screen TV’s screen ratio is 16:9.

- **Audio commentary**
  This is an audio program included as a bonus feature in a DVD-Video or BD-Video. It uses a multi-audio function to provide an audio explanation or commentary by members of the crew or director, etc. to accompany the video.

- **B**
  **BD-J (Java)**
  BD-Video offer fun software with more interactive functions (games) that use Java applications.

- **BD-LIVE**
  The unit can be connected to the Internet to enjoy a number of features, including additional contents such as special video or subtitles, network games, etc.

- **Bit rate**
  This is the amount of video or audio data recorded on a disc that is read in one second.

- **Blu-ray disc**
  This is a one-sided, one-layer disc with 25 GB capacity for recording high vision video movie and games.

- **Bonus View**
  Special images for BD-Video. It includes comments from the movie director, simultaneously developing sub-stories, and images from different angles.

- **C**
  **Chapter**
  This is a break intended by the producer, who organizes the titles of BD or DVD-Video. The chapter search function searches for the beginning of this break.

- **Deep Color**
  This technology allows expression of more colors than the conventional 8-bit and can reproduce more natural colors without any color streaking.

- **Default Gateway**
  This device is the entry and exit point between an internal network and an external network (Internet, etc.).

- **DHCP (Dynamic Host Configuration Protocol)**
  This function assigns IP addresses automatically to network devices.

- **DivX**
  This is a video codec (video compression/decompression software) developed by DivX, Inc. The compression technology is based on “MPEG-4 Part 2” (known as “MPEG-4 ASP”). It allows along video to be compressed into a small file while maintaining a high-quality image. It is available in the free “DivX” version or the paid “DivX PRO” version.

- **DLNA**
  An abbreviation of Digital Living Network Alliance. An industry group that was established to decide specifications for the mutual connection of audio visual devices and computers in a home network and the mutual utilization of music, photo and video data. This unit is based on DLNA Home Networked Device Interoperability Guidelines.

- **DNS (Domain Name System)**
  A system that matches host names on the Internet to IP addresses.

- **Dolby Digital**
  This is the amount of video or audio data recorded on a disc that is read in one second.

- **Dolby Digital Plus**
  This is a stereophonic effect developed by Dolby Laboratories. This is a maximum of 5.1 channels, independent multi-channel audio system.

- **Dolby TrueHD**
  This is an extended version of Dolby Digital and is a high sound quality, digital audio technology adopted as an optional audio for Blu-ray discs.

- **DTS**
  This is an abbreviation of Digital Theater System, which is a digital audio system developed by DTS. When playing audio on this system while connected to a device such as a DTS amplifier, accurate sound field position and realistic sound effects can be obtained, making you feel like you are in a movie theater.

- **DTS-HD**
  This audio technology provides an enhanced functionality and a higher quality of sound than conventional DTS and is adopted as an optional audio for Blu-ray disc. This technology supports multi-channel, high data transfer speed, high sampling-frequency, and lossless audio playback. A maximum of 7.1 channels are supported on Blu-ray discs.

- **Dynamic range**
  The difference between the maximum, undistorted sound level and the minimum sound level that is discernible above the noise emitted by the device.

- **F**
  **Finalizing**
  This process enables BD/DVD/CD recorded with a recorder to be played by other players.

- **H**
  **HDCP**
  When transmitting digital signals between devices, this copyright protection technology encrypts the signals to prevent content from being copied without authorization.

- **HDMI**
  This is an abbreviation of High-Definition Multimedia Interface, which is an AV digital interface that can be connected to a TV or amplifier. Video signal and audio signal can be connected with 1 cable.

- **I**
  **Interlacing (interlaced scanning)**
  This conventional method used to project images on a TV displays 1 frame of image in half and half, respectively as 2 fields.

- **Interactive audio**
  This is audio recorded in the titles of BD-Video, such as clicking sounds made during operations.

- **IP Address**
  An identification number that is assigned to each network device.

- **J**
  **JPEG (Joint Photo graphic Experts Group)**
  This is a still picture data compression standard. Its ability to reduce the size of a file with relatively little deterioration in image quality means that it is widely used for storing images in video cameras, etc.

- **LAN (Local Area Network)**
  A wired or wireless network that connects devices together.

- **L**
  **LFE**
  This is an abbreviation of Low Frequency Effect, which is an output channel that emphasizes low-frequency effect sounds. Surround audio is intensified by outputting 20 Hz to 120 Hz deep bass.

- **Linear PCM**
  This is an uncompressed PCM (Pulse Code Modulation) signal. This is the same system as the CD audio but uses 192 kHz, 96 kHz, and 48 kHz sampling frequencies on BD or DVD and provides higher sound quality than CD.
### MAC Address
A unique identification number for network devices such as LAN cards.

### MP3 (MPEG AudioPlayer 3)
This is an internationally standardized audio data compression scheme, using the "MPEG-1" video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

### MPEG
This is an abbreviation of Moving Picture Experts Group, which is an international standard of the moving picture audio compression method. Images on BD and DVD are recorded using this method.

### Netflix
This is a video streaming distribution service offered by Netflix Inc. in the United States.

### Picture-in-picture
This BD-Video function allows you to view scenes, such as the making of or commentary on the movie, in the secondary video while viewing the main story in the primary video.

### Pop up menu
This type of menu is recorded with BD software. While playing back a BD, this menu can be displayed on the front of the screen and can be operated.

### Primary audio
This audio signal is recorded in the main story in BD-Video.

### Primary subtitle
This subtitle is recorded in the main story in BD-Video.

### Primary video
This video signal is recorded in the main story in BD-Video.

### Progressive (sequential scanning)
This is a system for scanning the video signal that displays 1 frame of video as one image. Compared to the interface system, this system provides images with less flickering and bleeding.

### Proxy
This is a hookup to secure high-speed access and safe transmission for connecting to the Internet from the internal network.

### Rating
Depending on the age of the viewer, this function restricts the playing of BD-Video or DVD-Video. The unit can be set to restrict viewing in 0 to 254 levels for BD-Video, and 1 to 8 levels for DVD-Video.

### Region code
This code indicates the country or region where the BD or DVD-Video can be played back.
# Troubleshooting

If a problem occurs, firstly check the following:

1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are other components operating properly?

If this unit does not operate properly, check the items listed in the table below. If the problem continues there may be a malfunction. In this case, disconnect the power immediately and contact your retail outlet.

### General

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power does not turn on.</td>
<td>• Check if the power cord is properly connected. • Plug the power supply cord into the power outlet. • The safety protection device may be activated. Unplug the power cord once, and wait for 5-10 seconds and then plug it in again.</td>
<td>5</td>
</tr>
<tr>
<td>Playback does not start even when ► is pressed, or starts but stops immediately.</td>
<td>• Is there condensation inside the player or on the disc? (Let it sit for 1 to 2 hours with the power off.) • When the disc is scratched or contaminated with fingerprints, the disc may not play correctly. Clean the disc or replace with a non-scratched disc. • Is the disc loaded upside-down? Load the disc properly, with the side to be played face down. • Is an unplayable disc loaded? • No disc is inserted. Insert a disc.</td>
<td>2, 48</td>
</tr>
<tr>
<td>No return to start-up screen when a disc is removed.</td>
<td>There may be an internal error. Set the power to standby, wait awhile, then turn the power back on.</td>
<td>5</td>
</tr>
<tr>
<td>Buttons do not work or the unit stops responding.</td>
<td>• Operations may not be permitted by the disc. • The safety protection device may be activated. Unplug the power cord once, and wait for 5-10 seconds and then plug it in again. • Refer to the instructions of the disc.</td>
<td>13</td>
</tr>
<tr>
<td>The camera angle does not switch.</td>
<td>• If the multiple angles are not recorded in a BD-Video or DVD-Video, the camera angle cannot be switched. Also, multiple angles may only be recorded for specific scenes.</td>
<td>20</td>
</tr>
<tr>
<td>Playback does not start when a title is selected.</td>
<td>• Playback may be prohibited by the viewing restriction setting. Check the “Ratings” setting on the GUI menu.</td>
<td>35</td>
</tr>
<tr>
<td>I have forgotten the password for the rating level.</td>
<td>• On the GUI menu, perform the “System” – “Initialize” procedure.</td>
<td>34</td>
</tr>
</tbody>
</table>

### Video

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>No picture appears.</td>
<td>• Switch the TV’s input setting to the external input connected to the player. • Is the Pure Direct function set to “Pure Direct 1” or “Pure Direct 2”? Set it to “Off”. • Check the connection of the video/component video cable. • Is it set to “24p Output On” by pressing HDMI MODE on the remote control? If so, no video signals are output from the video and component video terminals during playback of certain discs. • Does the setting of resolution on the match the connected device’s resolution? • Is the resolution is set according to the connected device by pressing RESOLUTION on the remote control? Make settings for resolution. • The video cable is not connected securely. Connecte the video cable securely. • The HDMI OUT connector is probably connected to a DVI IN connector of equipment. DVI connection does not support HDCP and the video is not output correctly.</td>
<td>5, 21, 9, 10, 22, 22, 9 – 11</td>
</tr>
<tr>
<td>The picture is not displayed or is disrupted. The picture of a BD-Video or DVD-Video disc is in black and white.</td>
<td>The picture may be slightly disturbed right after fast-forwarding or reversing. This is not a malfunction. Connect the unit’s video/component video output either directly to the TV or to the TV via the AV receiver. Do not connect via a VCR, (video cassette recorder). Some discs include copy prohibit signals, and when such discs are played via a VCR the copy guard system may disrupt the picture. • Is a disc that is not compatible with the player or a disc with a different region number loaded? (This player supports region code “A” for BD-Video discs, “1” or “ALL” for DVD-Video discs.)</td>
<td>17, 11, 45</td>
</tr>
<tr>
<td>The picture freezes momentarily during playback.</td>
<td>If a disc is scratched or contaminated with fingerprints, the disc may not play correctly. Clean the disc or replace with a non-scratched disc. • There may be a problem with the data recorded on the disc.</td>
<td>48, 45</td>
</tr>
<tr>
<td>Subtitles are not displayed.</td>
<td>• Subtitles cannot be displayed for BD-Video, DVD-Video or DivX® files that do not contain subtitles. • Is the subtitle setting “Off”? Use the disc menu or SUBTITLE to set the subtitles to display.</td>
<td>20, 20</td>
</tr>
</tbody>
</table>
## Audio

<table>

<tr>
<td>No sound or the sound is hard to hear.</td>
<td>• Check the audio connections of connected devices and speakers.</td>
<td>9 – 12</td>
</tr>
<tr>
<td></td>
<td>• Is the power connected audio devices turned on? Is the input selection set to the input to which the unit is connected?</td>
<td>–</td>
</tr>
<tr>
<td></td>
<td>• Is the audio output properly selected?</td>
<td>6, 19, 49</td>
</tr>
<tr>
<td>No sound.</td>
<td>• The unit is in reverse play, fast forward, fast reverse, slow forward, slow reverse or pause mode. Return to the normal playback.</td>
<td>19</td>
</tr>
<tr>
<td></td>
<td>• The HDMI OUT connector is probably connected to a DVI IN connector of equipment. DVI connection does not support HDCP and the audio is not output correctly.</td>
<td>11, 50</td>
</tr>
<tr>
<td></td>
<td>• Is the Pure Direct function set to “Pure Direct 1” or “Pure direct 2”? Set it to “Off”.</td>
<td>21</td>
</tr>
<tr>
<td>Interactive audio is not output.</td>
<td>• Set “BD Audio mode” to “Mix Audio Output” using the Mode setting menu.</td>
<td>6, 24</td>
</tr>
<tr>
<td>Multi-channel audio is not output.</td>
<td>• Is the multi-channel audio selected? Press AUDIO of the remote control to switch from audio supported by a disc to multi-channel audio.</td>
<td>19</td>
</tr>
<tr>
<td>The 192 kHz digital audio is not output from the DIGITAL OUT COAXIAL connector.</td>
<td>• “Audio Output” – “Down Sampling” on the GUI menu is not set to 192 kHz. Set “Down Sampling” to 192 kHz.</td>
<td>38</td>
</tr>
<tr>
<td></td>
<td>• The content stored in a disc to be played back is copyright protected. Even if “Down Sampling” is set to 192 kHz, the audio signal is output using 48 kHz.</td>
<td>38</td>
</tr>
</tbody>
</table>

## HDMI

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Video and audio are not output via the HDMI connection.</td>
<td>• Check the connection of the HDMI cable.</td>
<td>4</td>
</tr>
<tr>
<td></td>
<td>• Is the “HDMI” indicator on the display of the unit lit?</td>
<td>21</td>
</tr>
<tr>
<td></td>
<td>• Is the Pure Direct function set to “Pure Direct 1” or “Pure Direct 2”? Set it to “Off”.</td>
<td>21</td>
</tr>
<tr>
<td></td>
<td>• Check whether the connected display device or other device supports HDCP. This unit will not output a video signal unless the other device supports HDCP. See the owner’s manual of your TV, AV receiver, etc.</td>
<td>50</td>
</tr>
<tr>
<td></td>
<td>• Check that the setting of the HDMI video resolution supports the resolution of the connected device. When set to “Auto”, this unit makes the setting automatically.</td>
<td>22</td>
</tr>
<tr>
<td>Video and audio are not output via the HDMI connection.</td>
<td>• Turn off power of the unit and then turn it back on.</td>
<td>4, 5</td>
</tr>
<tr>
<td></td>
<td>• Turn off power of the connected device and then turn it back on.</td>
<td>4, 5</td>
</tr>
<tr>
<td></td>
<td>• Unplug the HDMI cable and then plug it in again.</td>
<td>4, 5</td>
</tr>
<tr>
<td></td>
<td>• When you connect the unit to an AV receiver, first connect the unit directly to a television and check the video and audio output. If output is performed properly, connect the unit to the AV receiver again and check the AV receiver setting.</td>

</table>

## USB memory device

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>My USB memory device cannot be read.</td>
<td>• The format of the USB memory device does not match this unit or the USB memory device is not compatible.</td>
<td>34</td>
</tr>
<tr>
<td></td>
<td>• Is the playback media mode set to “USB MODE”? Select “USB” with SOURCE.</td>
<td>28, 29</td>
</tr>
<tr>
<td>Data stored in a USB memory device cannot be displayed (read).</td>
<td>• Has the unit initialized the USB memory device with applicable formats? (FAT16/FAT32)</td>
<td>26</td>
</tr>
<tr>
<td></td>
<td>• Are you using a USB hub? If so, directly connect the USB memory device to a USB port on the front panel of the unit.</td>
<td>26</td>
</tr>
<tr>
<td></td>
<td>• Are you using a USB extension cable? If so, directly connect the USB memory device to the USB port on the front panel of the unit.</td>
<td>46</td>
</tr>
<tr>
<td></td>
<td>• Are the USB memory device contents applicable to this unit? Use the “Files” menu to confirm whether the contents are applicable to the unit.</td>
<td>26</td>
</tr>
<tr>
<td></td>
<td>• When a USB memory device of 192 MB or less is formatted with FAT32, this unit may not be able to read it. If that is the case, format it with FAT16.</td>
<td>26</td>
</tr>
<tr>
<td></td>
<td>• This unit does not support a USB memory device containing encrypted data.</td>
<td>–</td>
</tr>
<tr>
<td>The USB memory device is not recognized.</td>
<td>• Some USB memory devices cannot be operated by the power supplied from this unit. The unit supplies 5 V/1 A to a USB memory device that is compatible with the specifications of this unit.</td>
<td>–</td>
</tr>
<tr>
<td></td>
<td>• Check if the USB memory device is firmly connected to the USB port.</td>
<td>26</td>
</tr>
<tr>
<td>Files that begin with “.” cannot be played.</td>
<td>• When content created by Mac OS X is copied into a USB memory device, all contents as well as hidden files are copied. Although the extension of this file is the same as the extension of the content, it is actually not the content. Delete this file using another OS such as Windows.</td>
<td>–</td>
</tr>
<tr>
<td>Unable to play back BD-LIVE / bonus view.</td>
<td>• Does the USB memory device have more than 1 GB of available space?</td>
<td>15</td>
</tr>
<tr>
<td></td>
<td>• Has the USB memory device been initialized by the unit?</td>
<td>34</td>
</tr>
<tr>
<td></td>
<td>• Was the USB memory device inserted while the power of the unit was on? (Insert the USB memory device while the unit is in the standby status.)</td>
<td>26</td>
</tr>

### Specifications

#### Audio performance

**Signal format:** NTSC, PAL

**Applicable discs /memory device:**

- (1) BD-Video disc:
  - 12 cm, 1 side, 1 layer; 12 cm, 1 side, 2 layers
- (2) DVD-Video / DVD-Audio disc:
  - 12 cm, 1 side, 1 layer; 12 cm, 1 side, 2 layers /
  - 12 cm, 2 sides, 2 layers (1 side, 1 layer) /
  - 8 cm, 1 side, 1 layer; 8 cm, 1 side, 2 layers /
  - 8 cm, 2 sides, 2 layers (1 side, 1 layer)
- (3) Super Audio CD:
  - 12 cm, 1 layer / 12 cm, 2 layer / 12 cm, Hybrid
- (4) Compact Disc (CD-DA):
  - 12 cm / 8 cm disc

**Video output:**

- Output level: 1 Vp-p (75 Ω)
- Output terminal: Pin-jack, 1 set
- Y output level: 1 Vp-p (75 Ω)
- Pb/Cb output level / Pr/Cr output level: 0.648 Vp-p (75 Ω)
- Output terminal: Pin-jack, 1 set
- HDMI terminal: 19-pin HDMI terminals, 1 set
- HDMI ver.: 1.4a
- (Deep Colour, Dolby Digital Plus, Dolby TrueHD, DTS-HD, 3D)

**Analog audio output:**

- Output level: 2 Vrms (10 kHz)
- 2 channels output terminal: Pin-jack, 1 set

**Audio output characteristics:**

- (1) Frequency response:
  - 1: BD (Linear PCM)
  - 2 Hz - 22 kHz (48 kHz sampling)
  - 2 Hz - 44 kHz (96 kHz sampling)
  - 2 Hz - 88 kHz (192 kHz sampling)
  - 2: DVD (Linear PCM)
  - 2 Hz - 22 kHz (48 kHz sampling)
  - 2 Hz - 44 kHz (96 kHz sampling)
  - 2 Hz - 88 kHz (192 kHz sampling)
  - 3: Super Audio CD
  - 2 Hz - 40 kHz
  - 4: CD
  - 2 Hz - 20 kHz

- (2) S/N ratio: 115 dB
- (3) Total harmonic distortion: 1 kHz, 0.0025 % (BD)
- (4) Dynamic range: 100 dB (BD)

**Digital audio output:**

- Coaxial digital output: Pin-jack, 1 set

### General

- **Power supply:** AC 120 V, 60 Hz
- **Power consumption:** 25 W
- **Maximum external dimensions:** 434 (W) x 107 (H) x 319 (D) mm (17-1/8” x 4-1/4” x 12-9/16”)
- **Weight:** 4.2 kg (9.3 lbs)

### Remote control (RC-1151)

- **Remote control type:** Infrared pulse
- **Batteries:** R6/AA Type (two batteries)
- **Maximum external dimensions:** 156 (W) x 21 (H) x 180 (D) mm (6-1/8” x 0-3/4” x 7-3/8”)
- **Weight:** 155 g (5.5 oz, including batteries)

---

Some functions may not be used under certain operating conditions, but this is not failure of the unit. Read the description in this Owner’s Manual for details on correct operations.

The volume may differ from disc to disc. This is due to the differences in how the signals are recorded on the disc and is not a malfunction.

During programmed playback, it is not possible to perform random playback or to start playback from a desired track or file.

Some functions are prohibited on some discs.

For purposes of improvement, specifications and design are subject to change without notice.

License

This section describes software license used for DBP-1611U0. To maintain the correct content, the original (English) is used.

Exhibit 1

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991
Copyright (C) 1989, 1991
Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

The GNU General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to share and change free software--that you have the freedom to make sure the software is free for all its users.

When someone speaks of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to share and change free software--that you have the freedom to make sure the software is free for all its users.

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and unrelated works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same section of the Program under multiple licenses, this License and its terms are applicable to all sections that a recipient of the Program contains. Thus, you may not modify the program in such a way as to include different permissions for different licensees, without the consent of all licensees.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your own copies and distribute them to your neighbors, under the conditions stated below. You must keep intact all notices that refer to this License and to the absence of any warranty.

You may offer to distribute executable or object code under your own terms and conditions, on an unmodified source code condition, provided that you do not modify the license notice from this License.

The source code for the modified work should be made available under the terms of this License, either by distributing the source code for the modified work itself under the terms of this License, or by publishing an appropriate notice.

3. You may distribute a complete coherent compilation of a work modified by you. Such a compilation shall include your notice as a part of its overall copyright notice.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.

You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or a legislative act, you cannot distribute the Program (or any work based on the Program), we promise not to sue you for infringement.

If your only means of making the Program accessible to the public at large is to work for a fee or to sell copies of a Nature program which is itself covered by this License, then you may charge a reasonable fee or sale price for the work. However, nothing else grants you permission to modify or distribution the Program or its derivative works. These actions are prohibited by law if you do not accept this License.

We are not responsible for the content of this Legal Notice.

This License is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.
END OF TERMS AND CONDITIONS
How to Apply These Terms to Your New Programs
If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

You can use these terms and these metaterms for licensing a new program. This is considered the most straightforward way to operate the greatest number of programs by everyone as early as possible.

Notices
Example notices for use by authors or publishers to accompany their program are included in the GNU General Public License. These notices can be added to any notice in any document created especially for a given program or library, or on a printed sheet accompanying a library or any other printed program documentation for that program or library. If the library does not have its own notices written for it, the publisher of the library may add its own notices to the library. This must be done carefully to avoid infringing on the work as done by others (see The GNU General Public License for details).

Each license notice has a accompanying text which must be included. This allows the user to verify that the conditions of the license have been met.

The GNU General Public License is intended to guarantee your freedom to share and change free software so the software is free for all its users. The terms permit all possible ways of running free software. As aajar, we recommend you copy, change, and distribute the library under these terms, and that you COPYRIGHT THE LIBRARY UNDER THESE TERMS SO YOUR LICENSOR WILL NOT HAVE TO REPEAT THEM IN EACH OF YOUR DOCUMENTS.

This License is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110 1301 USA.

END OF TERMS AND CONDITIONS
in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, an application might be unable to compute square roots as a result of the failure of any of the functions that are part of the library.)

3. You may copy and distribute verbatim copies of this License.

4. You may modify your copy or copies of this License or any portion of it, and distribute the resulting work, provided you accompany your changes to the License with a written notice that they do not form a derivative work and that you made your changes under this License.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work does not have to come with the Library, and the Library itself is not considered a part of such a work.

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, or (2) distributes a pre-compiled object code version of the library, with a suitable mechanism of linking compiled object code of the library with other code for use as a whole, if that library has been distributed under the terms of subsection 1a). The object code must be in a format compatible with the object code distributed by the Library writer, so that the user can combine an object code version of the library with previously compiled object code produced by the user to produce a completely executable program containing the library.

c) Accompany the work with a written offer, valid for at least three years, to give to the end user a complete copy of a version of the Library that is the same as the version distributed by the Library writer; but this offer is not required for an unmodified derivative of the Library that is made available under the terms of subsection 1a).

1. You must copy and distribute the machine-readable contents of your Modification under the terms of this License, and thus license the Modification under the terms of this License. You must make a good faith effort to ensure that,
9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted herein, including when the Library is modified by you or anyone else.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) to a deprive the Library or its derivative works, or parts thereof, of the rights specified in this License (this is called "severance"), then you may induce people who receive copies of the Library directly or indirectly through your work, if any, to be granted the same freedoms that you have. Any other action, if legally possible, is prohibited without the explicit written consent of the copyright holder.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

14. If the Library specifies a version number of this License which applies to it and/or "any later version", you have the option of following the terms and conditions of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, QUALITY, PERFORMANCE, ACCURACY, EFFECTIVENESS, OVERLAPS, CORRECTNESS, WORKING, LACK OF VIRUSES, OR LACK OF INFECTIOUS CODE.

16. IN NO EVENT SHALL THE COPYRIGHT OWNER OR ANY OTHER PARTY WHO MAY MODIFY AND/OR DISTRIBUTES THE LIBRARY AS PERMITTED UNDER THIS LICENSE BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO PERFORM AS PERMITTED UNDER THE TERMS OF THIS LICENSE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

When you distribute a modification of the library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under terms that are consistent, to the extent possible, with these terms. Such a license agreement may be included in source code or distributed with the Library.

END OF TERMS AND CONDITIONS

The FreeType Project is licensed under this license, and you should check the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

Exhibit-E

The FreeType Project License

2006 Jan 27
Copyright 1996 2002, 2006 by
David Turner, Robert Wilhelm, and Werner Lemborg

Introduction

The FreeType Project is distributed in several archive packages, some of them may contain, in addition to the FreeType font engine, various tools and contributions which rely on, or relate to, the FreeType Project. The FreeType font engine, the test programs, and most of the utilities, are freely distributable. However, the test contributed packages, and which do not fall under their own explicit license. The license affects thus the FreeType font engine, the test programs and most of the utilities, at the very least. This license was inspired by the BSD, Artistic, and LGPL (Independent JPEG Group) licenses, which all encourage inclusion and use of free software in commercial and freeware products alike. As a consequence, its main points are that:

• We don't promise that this software works. However, we will be interested in any kind of bug reports: (as is) distribution
• You can use this software for whatever you want, in parts or full form, without having to pay us. (royalty free usage)
• You may not pretend that you wrote this software. If you used it, or only parts of it, in a program, you must acknowledge somewhere in your documentation that you have used the FreeType code. (credits)

*/
2. Redistribution
This license grants a worldwide, royalty free, perpetual and non-exclusive right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project documentation in source and object code forms and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions:

Redistribution of source code must retain this license file (`FTL.TXT`) unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files.

Redistribution in binary form must provide a disclaimer that states that the software is based in part of the work of the FreeType Team, in the distribution documentation. We also encourage you to put an URL to the FreeType web page in your documentation, though this isn't mandatory.

These conditions apply to any software derived from or based on the FreeType Project, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

3. Advertising
Neither the FreeType authors and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission. We suggest, but do not require, that you use one or more of the following phrases to refer to this software in your documentation or advertising materials: `FreeType Project`, `FreeType Engine`, `FreeType library`, or `FreeType Distribution`.

As you have not signed this license, you are not required to accept it. However, as the FreeType Project is copyrighted material, only this license, or another one contracted with the authors, grants you the right to use, distribute, and modify it. Therefore, by using, distributing, or modifying the FreeType Project, you indicate that you understand and accept all the terms of this license.

4. Contacts
There are two mailing lists related to FreeType:

- freeftype@freetype.org
  Discusses general use and applications of FreeType, as well as future and wanted additions to the library and distribution.
  If you are looking for support, start in this list if you haven't found anything to help you in the documentation.

- freeftype-devel@gnunet.org
  Discusses bugs, as well as engine internals, design issues, specific licenses, porting, etc.

Our home page can be found at http://www.freetype.org

end of FTL.TXT

---

We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products. We disclaim all warranties covering The FreeType Project and assume no liability related to The FreeType Project.

Finally, many people asked us for a preferred form for a credit-line to use in compliance with this license. We thus encourage you to use the following text:

Portions of this software are copyright © year > The FreeType Project (www.freetype.org). All rights reserved.

Please replace <year> with the value from the FreeType version you actually use.

Legal Terms

0. Definitions

Throughout this license, the terms 'package', 'FreeType Project', and 'FreeType archive' refer to the set of files originally distributed by the authors (David Turner, Robert Wilhelm, and Werner Lemborg) as the 'FreeType Project', be they named as alpha, beta, or final release.

"You" refers to the licensee, or person using the project, whereas "we" is a generic term including compiling the project's source code as well as linking it to form a 'program' or 'executable'.

This program is referred to as a 'program using the FreeType engine'.

This license applies to all files distributed in the original FreeType Project, including all source code, binaries and documentation, unless otherwise stated in the file in its original, unmodified form a distributed in the original archive.

If you are unsure whether or not a particular file is covered by this license, you must contact us to verify this.

The FreeType Project is copyright (C) 1999-2000 by David Turner, Robert Wilhelm, and Werner Lemborg. All rights reserved except as specified below.

1. No Warranty

THE FREETYPE PROJECT IS PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OR THE INABILITY TO USE, OF THE FREETYPE PROJECT.

---

### Exhibit-F

**LICENSE ISSUES**

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit.

See below for the actual license texts. Actually both licenses are BSD style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

**OpenSSL License**

This license is an academic/personal免费 license. You can freely use it for any purpose.

Copyright © 1998 1999 The OpenSSL Project. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All other advertising materials mentioning features or use of this software must display the following acknowledgment:

    This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).

This product is distributed in the hope that it will be useful, but WITHOUT ANY EXPRESS OR IMPLIED WARRANTY; without even the IMPLIED WARRANTIES OF MERCHANTABILITY, NONINFRINGEMENT, OR FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT SHALL THE OPENSSL PROJECT OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Copyright (C) 1995 1998 Eric Young (eay@cryptsoft.com) All rights reserved.

This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with Netscape SSL.

The library is free for commercial and non commercial use as long as the following conditions are adhered to.

The following conditions apply to all code found in this distribution, be it the RC4, RSA, Hash, DES, etc., code, not just the SSL code.

The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young's, and as such any Copyright notices in the code are not to be removed.

If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used.

This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All other advertising materials mentioning features or use of this software must display the following acknowledgment:

    This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)

"The word 'cryptographic' can be left out if the rouines from the library being used are not cryptographic related :").

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgment:

    "This product includes software written by Tim Hudson (tjh@cryptsoft.com)"
This software is provided as is and any express or implied warranties, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose are disclaimed. In no event shall the authors or contributors be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

The Unix configuration script "configure" was produced with GNU Autoconf. It is copyright by the Free Software Foundation and is freely distributable.
