SAFETY PRECAUTIONS

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
9. Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
11. Only use attachments/accessories specified by the manufacturer.
12. Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
13. Unplug this apparatus during lightning storms or when unused for long periods of time.
14. Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
15. Batteries shall not be exposed to excessive heat such as sunshine, fire or the like.

CAUTION: USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE. THIS PRODUCT SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT PROPERLY QUALIFIED SERVICE PERSONNEL.

Laser Class (IEC 60825-1:2001)

“CLASS 1 LASER PRODUCT”

FCC INFORMATION (For US customers)

1. COMPLIANCE INFORMATION
   Product Name: Universal Audio / Video player
   Model Number: DPB-1611UD
   This product complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this product may not cause harmful interference, and (2) this product must accept any interference received, including interference that may cause undesired operation.
   Denon Electronics (USA), LLC
   (a D & M Holdings Company)
   100 Corporate Drive
   Mahwah, NJ 07430-2041
   Tel. (800) 497-8921

2. IMPORTANT NOTICE: DO NOT MODIFY THIS PRODUCT
   This product, when installed as indicated in the instructions contained in this manual, meets FCC requirements. Modification not expressly approved by DENON may void your authority, granted by the FCC, to use the product.

3. NOTE
   This product has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.
   This product generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this product does cause harmful interference to radio or television reception, which can be determined by turning the product OFF and ON, the user is encouraged to try to correct the interference by one or more of the following measures:
   - Reorient or relocate the receiving antenna.
   - Increase the separation between the equipment and receiver.
   - Connect the product into an outlet on a circuit different from that to which the receiver is connected.
   - Consult the local retailer authorized to distribute this type of product or an experienced radio/TV technician for help.

For Canadian customers:

This Class B digital apparatus complies with Canadian ICES-003.
Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.
### WARNINGS

- Avoid high temperatures.
- Handle the power cord carefully.
- Keep the unit free from moisture, water, and dust.
- Unplug the power cord when not using the unit for long periods of time.
- Do not obstruct the ventilation holes.
- Do not let insects or foreign objects enter the unit.
- Do not let insecticides, benzene, and thinner come in contact with the unit.
- Never disassemble or modify the unit in any way.
- Do not place any liquids on the unit.
- Do not handle the mains cord with wet hands.
- When the switch is in the OFF position, the equipment is not completely switched off from MAINS.
- The equipment shall be installed near the power supply so that the power supply is easily accessible.

### CAUTIONS ON INSTALLATION

- For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.
  - More than 0.1 m (4 in.) is recommended.
  - Do not place any other equipment on this unit.

### WARNINGS

- Eviter des températures élevées.
- Tenir compte d’une dispersion de chaleur suffisante lors de l’installation sur une étagère.
- Manipuler le cordon d’alimentation avec précaution.
- Tenir la prise lors du débranchement du cordon.
- Protéger l’appareil contre l’humidité, l’eau et la poussière.
- Débrancher le cordon d’alimentation lorsque l’appareil n’est pas utilisé pendant de longues périodes.
- Ne pas obstruer les trous d’aération.
- Ne pas laisser des objets étrangers dans l’appareil.
- Ne pas mettre en contact des insecticides, du benzène et un diluant avec l’appareil.
- Ne jamais démonter ou modifier l’appareil d’une manière ou d’une autre.
- Ne pas recouvrir les orifices de ventilation avec des objets tels que des journaux, nappes ou rideaux. Cela entraverait la ventilation.
- Ne jamais placer de fl amme nue sur l’appareil, notamment des bougies allumées.
- Veillez à respecter les lois en vigueur lorsque vous jetez les piles usagées.
- L’appareil ne doit pas être exposé à l’eau ou à l’humidité.
- Ne pas poser d’objet contenant du liquide, par exemple un vase, sur l’appareil.
- Ne pas manipuler le cordon d’alimentation avec les mains mouillées.
- Lorsque l’interrupteur est sur la position OFF, l’appareil n’est pas complètement déconnecté du SECTEUR (MAINS).
- L’appareil sera installé près de la source d’alimentation, de sorte que cette dernière soit facilement accessible.

### WARNINGS

- Evite altas temperaturas.
- Permite la suficiente dispersión del calor cuando está instalado en la consola.
- Maneje el cordón de energía con cuidado.
- Sostenga el enchufe cuando desconecte el cordón de energía.
- Mantenga el equipo libre de humedad, agua y polvo.
- Desconecte el cordón de energía cuando no utilice el equipo por mucho tiempo.
- No obstruya los orificios de ventilación.
- No deje objetos extraños dentro del equipo.
- No permita el contacto de insecticidas, gasolina y diluyentes con el equipo.
- Nunca desarme o modifique el equipo de ninguna manera.
- La ventilación no debe quedar obstruida por haberse cubierto las aperturas con objetos como periódicos, manteles o cortinas.
- No deberán colocarse sobre el aparato fuentes inflamables sin protección, como velas encendidas.
- A la hora de deshacerse de las pilas, respete la normativa para el cuidado del medio ambiente.
- No exponer el aparato al goteo o salpicaduras cuando se utilice.
- No colocar sobre el aparato objetos llenos de líquido, como jarros.
- No maneje el cable de alimentación con las manos mojadas.
- Cuando el interruptor está en la posición OFF, el equipo no está completamente desconectado de la alimentación MAINS.
- El equipo se instalará cerca de la fuente de alimentación de manera que resulte fácil acceder a ella.

### ADVERTENCIAS

- Evite altas temperaturas.
- Permita la suficiente dispersión del calor cuando está instalado en la consola.
- Maneje el cordón de energía con cuidado.
- Sostenga el enchufe cuando desconecte el cordón de energía.
- Mantenga el equipo libre de humedad, agua y polvo.
- Desconecte el cordón de energía cuando no utilice el equipo por mucho tiempo.
- No obstruya los orificios de ventilación.
- No deje objetos extraños dentro del equipo.
- No permita el contacto de insecticidas, gasolina y diluyentes con el equipo.
- Nunca desarme o modifique el equipo de ninguna manera.
- La ventilación no debe quedar obstruida por haberse cubierto las aperturas con objetos como periódicos, manteles o cortinas.
- No deberán colocarse sobre el aparato fuentes inflamables sin protección, como velas encendidas.
- A la hora de deshacerse de las pilas, respete la normativa para el cuidado del medio ambiente.
- No exponer el aparato al goteo o salpicaduras cuando se utilice.
- No colocar sobre el aparato objetos llenos de líquido, como jarros.
- No maneje el cable de alimentación con las manos mojadas.
- Cuando el interruptor está en la posición OFF, el equipo no está completamente desconectado de la alimentación MAINS.
- El equipo se instalará cerca de la fuente de alimentación de manera que resulte fácil acceder a ella.

### CAUTIONS ON INSTALLATION

- Pour permettre la dissipation de chaleur requise, n’installez pas cette unité dans un espace confiné tel qu’une bibliothèque ou un endroit similaire.
  - Une distance de plus de 0.1 m (4 po) est recommandée.
  - Ne placez aucun matériel sur cet appareil.

### CAUTIONS ON INSTALLATION

- Para la dispersión del calor adecuadamente, no instale este equipo en un lugar confinado tal como una librería o unidad similar.
  - Se recomienda dejar más de 0.1 m (4 pulg.) alrededor.
  - No coloque ningún otro equipo sobre la unidad.
Thank you for purchasing this DENON product. To ensure proper operation, please read these owner’s manual carefully before using the product. After reading them, be sure to keep them for future reference.

About this manual

■ Operation buttons
The operations described in this manual are based mainly on use of the remote control buttons.

■ Symbols
This symbol indicates a reference page on which related information is described.

This symbol indicates a supplementary information and tips for operations.

This symbol indicates points to remember operations or function limitations.

■ Illustrations
Note that the illustrations in these instructions may differ from the actual unit for explanation purposes.
Cautions on handling

Before turning the power switch on
Check once again that all connections are correct and that there are no problems with the connection cables.

Power is supplied to some of the circuitry even when the unit is set to the standby mode. When leaving home for long periods of time, be sure to unplug the power cord from the power outlet.

Image persistence (image burn-in)
Do not leave still images of the disc menu, the unit menu, etc., displayed on the TV screen for long periods. This can result in image persistence (image burn-in) on the screen.

About condensation
If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly.

If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

Cautions on using mobile phones
Using a mobile phone near this unit may result in noise. If that occurs, move the mobile phone away from the unit when it is in use.

Moving the unit
Be sure to remove a disc, turn off the power and unplug the power cord from the power outlet. Next, disconnect the connection cables to other system equipment before moving the unit.

About Care
• Wipe the cabinet and control panel clean with a soft cloth.
• Follow the instructions when using a chemical cleaner.
• Benzene, paint thinner or other organic solvents, as well as insecticide, may cause material changes and discoloration if brought into contact with the unit, and should, therefore, not be used.

Sufficiently ventilate the place of installation
If the unit is left in a room full of the smoke from cigarettes, etc., for long periods of time, the surface of the optical pickup could get dirty, in which case it will not be able to read the signals properly.

3D video playback
When the unit is connected to a 3D enabled TV with a high speed HDMI cable, you can enjoy 3D video.

Direct Mechanical Ground Construction, supporting high-quality HD sound and video by suppressing vibration
The disc mechanism that causes vibration is arranged at the center of the unit to transmit vibration out through the base, enabling video and audio playback of high quality.

Independent Block Construction for playing video and audio signals with high fidelity
The electronic circuits are separated to prevent electronic and electromagnetic noise caused by various electronic signals in the unit.

GUI equipped for good operability and visibility
This unit is equipped with an easy to see “Graphical User Interface” that uses menu displays and levels. The use of level displays increases operability of the this unit (page 33 “GUI menu operation”).

HDMI control
By connecting a television or AV receiver that supports the HDMI control function to this unit using an HDMI cable, and enabling the HDMI control settings on each device, you can control other devices from one device (page 21 “HDMI control functions”).

Supporting the Network operations
• When the unit is connected to the Internet, Netflix and YouTube service can be used.
• Music, photos, video files stored on the device connected via the network can be played.
• When the unit is connected to the Internet, privileged video can be downloaded from the Internet site to the built-in memory to enjoy BD-LIVE™ (page 26 “Connecting to a network”).

3D video playback
When the unit is connected to a 3D enabled TV with a high speed HDMI cable, you can enjoy 3D video.

Moving the unit
Be sure to remove a disc, turn off the power and unplug the power cord from the power outlet. Next, disconnect the connection cables to other system equipment before moving the unit.

Direct Mechanical Ground Construction, supporting high-quality HD sound and video by suppressing vibration
The disc mechanism that causes vibration is arranged at the center of the unit to transmit vibration out through the base, enabling video and audio playback of high quality.

Supporting the Network operations
• When the unit is connected to the Internet, Netflix and YouTube service can be used.
• Music, photos, video files stored on the device connected via the network can be played.
• When the unit is connected to the Internet, privileged video can be downloaded from the Internet site to the built-in memory to enjoy BD-LIVE™ (page 26 “Connecting to a network”).

3D video playback
When the unit is connected to a 3D enabled TV with a high speed HDMI cable, you can enjoy 3D video.

Cautions on handling for 3D video
Before viewing 3D video, refer to the considerations described in the instruction manuals and other documents for your 3D enabled TV and 3D compatible glasses together with this manual.

• Do not view 3D video if you have epilepsy or heart disease, if you have had photosensitivity reactions before, or when you do not feel well.

• When you view 3D movies, etc., take a break adequately, once per movie as a guide.

• Restrict viewing of 3D video to those aged six and over as a guide.

• Stop viewing 3D video when you see double images or you can not see 3D effects.

• Stop viewing 3D video when you feel something wrong, get tired, or get sick.

• Pay attention to nearby people and objects.

• Wear your vision correction glasses or contact lens under the 3D glasses if you have nearsightedness, farsightedness, anisometropia, or astigmatism.

• Sit at a proper distance from the screen when you view 3D video.

Do not view 3D video if you have epilepsy or heart disease, if you have had photosensitivity reactions before, or when you do not feel well.

Doing so may aggravate the symptoms.

When you view 3D movies, etc., take a break adequately, once per movie as a guide.

Restrict viewing of 3D video to those aged six and over as a guide.

Children do not respond to tiredness and discomfort expressly, so they may suddenly get sick. When children view 3D video, parents should keep their eyes open for signs of eye strain in children.

Stop viewing 3D video when you see double images or you can not see 3D effects.

Viewing 3D video continuously in these conditions may cause eye strain.

Stop viewing 3D video when you feel something wrong, get tired, or get sick.

Viewing 3D video continuously in these conditions may cause poor physical condition. Take a proper break.

Pay attention to nearby people and objects.

Reaching for something without a sense of distance due to 3D video or moving your body suddenly in response to a 3D video image when you take it for a real object may cause injury to nearby people or cause damages to nearby objects resulting in injury. Keep fragile objects away from your viewing area.

Wear your vision correction glasses or contact lens under the 3D glasses if you have nearsightedness, farsightedness, anisometropia, or astigmatism.

Viewing 3D video without correcting your vision may cause eye strain or decreased vision.

Sit at a proper distance from the screen when you view 3D video.

Sitting too close to the screen may cause eye strain or decreased vision. Sit at a distance that is recommended in the instruction manual for your TV.
This section briefly describes the procedures from connecting this unit and a television or AV receiver, using an HDMI cable, to start playback after unpacking.

- Before connecting the unit, turn off the power to all devices.
- For operation of the connected devices, refer to the user manuals for each device.

1. **Connect** *(page 4)*
   - Connect this unit and a television or an AV receiver using an HDMI cable.

2. **Turn on power** *(page 5)*
   - Press ON / STANDBY to turn on the power.

3. **Set up the audio** *(page 6)*
   - Press MODE to set up audio.

4. **Play back disc** *(page 7)*
   - Enjoy Blu-ray Disc and DVD.
Connect

This section describes two methods for connecting this unit and a television, connecting directly or via an AV receiver. Use an appropriate method depending on the television to be used. For the connection, use an HDMI cable (sold separately).

• If the device to be connected to the unit does not support the HDMI connection, see “Basic connections” (page 9), and make connections depending upon the conditions.
• Use only HDMI (High Definition Multimedia Interface) cable that bears the HDMI logo (genuine HDMI product). Using cable without the HDMI logo (non-genuine HDMI product) may result in abnormal playback.
• When outputting Deep Color or 1080p, etc., we recommend you use “High Speed HDMI cable” or “High Speed HDMI cable with Ethernet” for enhanced high-quality playback.

TV

This method is for connecting the unit and a television directly.

AV receiver and TV

This method is for connecting the unit to an AV receiver.
Connect the supplied power cord to the unit, and plug it into an AC outlet.

**NOTE**
- Be sure to insert the power plug firmly. Incomplete connection results in noise.
- Do not plug in the power cord until all connections have been completed.
- Do not bundle power cords together with connection cables. Doing so can result in humming or noise.

1. **Turn on power**
   - **Turn on the power of the TV and AV receiver.**
   - **Set the TV and AV receiver source to the unit input.**

2. **Press POWER ON to turn on power to the unit.**
   - The power indicator flashes green and the power turns on.
   - Then the power indicator remains lit in green.

3. “LOADING” appears on the display, and disc information is read.
   - The “NO DISC” message is displayed if a disc is not loaded.
   - Before using a remote control, insert the batteries (page 44 “Inserting the batteries”).
Set up the audio (HD Audio Setup)

An audio format recorded on a Blu-ray Disc is an HD Audio (High Definition Audio) format, such as Dolby TrueHD, Dolby Digital Plus, DTS-HD, etc. For playing back audio of an HD Audio format, the AV receiver to which the unit is to be connected must support HD Audio playback. This section describes the setting for audio output depending on the AV receiver to be connected, outputting the Audio format as-is or converting to normal digital audio.

1. Press ▲. The disc tray opens.

2. Place the disc on the disc tray with the label side up.

3. Press ▲. The disc tray closes, and playback of the disc begins.

NOTE
• Do not push the disc tray in by hand. It may damage the player.
• Some discs require pressing ► to start playback. In this case, press ► to start playback.

4. Press MODE. Displays a menu of items that can be set.

5. Use ▲ ▼ to select “BD Audio Mode”, then press ENTER or ►.

6. Use ▲ ▼ to select “HD Audio Output” or “Mix Audio Output”, then press ENTER.

For listening to a BD disc with high quality
Set “BD Audio Mode” to “HD Audio Output”.
• HD audio of a BD disc is output from the unit.

• Only main audio of HD audio is output.
• Before connecting the unit to an AV receiver, check that the receiver supports HD audio playback. If it does not, the unit outputs the signal converted to LPCM from the HDMI output terminal. HD audio is not output.

For listening to subaudio of a BD disc (interactive audio or secondary audio)
Set “BD Audio Mode” to “Mix Audio Output”.
• When the unit plays a BD, HD Audio of the BD is converted to normal digital audio and output.

Specifications of interactive audio or secondary audio differ depending on the Blu-ray Disc. For details, refer to the package or operation manual supplied with the Blu-ray Disc.
Play back disc

1 Press TOP MENU or MENU.
The menu stored on the disc is displayed.

2 Select the playback title or chapter from the top menu for playback.

[Example]

- Disc menu
  - Title 1
  - Top menu
    - Chapter 2
    - Chapter 3
    - Chapter 4
    - Chapter 5
    - Chapter 6
  - Pop up menu
    - Popup menu
      - Title 1
      - Title 2
      - Bonus title

When power is switched to standby

Press either POWER OFF on the remote control, or ON/STANDBY on the unit.
- The power indicator flashes in green. Then the indicator lights in red and the power is turned off.

[Power indicator status in standby mode]
- Power Saving Standby : Off
- Normal Standby : Red

When “Auto Power Mode” is “On” (page 34), the following states are maintained for about 30 minutes, and then the power is automatically turned to standby.
- Disc not loaded
- Playback has stopped
- Stopped due to resume function

NOTE
During power standby, a slight amount of power is consumed. To totally cut off the power, remove the power cord from the power outlet.
Basic version

This section describes the operations for enjoying video and audio on a disc.

- Basic connections  page 9
- Playback (Basic operation)  page 13
- Basic settings  page 21

Refer to the pages indicated below for information on connecting and playing back the various media and external devices.

Basic connections

Important information

- Connect this unit as follows before using. Make connections according to the equipment you are connecting.
- Some settings of this unit may be necessary depending on the connection method. Check each connection item for more information.
- Select the cables (sold separately) according to the components being connected.

NOTE

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components being connected.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in noise.

Connecting an AV receiver

For connecting using an HDMI cable, see “Connect” (page 4). This section describes the connections not using an HDMI cable.

Connecting to an AV receiver with an analog 2-channel audio input terminal

- This connection is recommended when the specifications of an AV receiver connected to the unit are as follows:
  - Not supporting HDMI input
  - Not supporting digital audio (coaxial) input
  - Select the connector to use and connect the device.

Cables used for connections

<table>

Connecting to an AV receiver with a digital audio input terminal

- This connection is recommended when the specifications of an AV receiver connected to the unit are as follows:
  - Not supporting HDMI input
  - Supporting digital audio (coaxial) input
- This connection enables faithfully playing a disc that supports 5.1-channel output.
- Select the connector to use and connect the device.

When playing back Dolby Digital Plus/Dolby TrueHD/DTS-HD audio recorded on a BD disc, this unit outputs Dolby Digital or DTS bitstream from its digital audio output terminal.

**NOTE**

- Dolby TrueHD/Dolby Digital Plus/DTS-HD audio signals are not output with this connection. When outputting Dolby TrueHD/Dolby Digital Plus/DTS-HD audio signals, do so with an HDMI connection (page 4).
- Super Audio CD’s DSD signal cannot be output. Also, during CD layer playback, 44.1 kHz/16-bit Linear PCM is output.
- Do not output DTS audio signals to an AV receiver that does not support DTS. Playing back a BD/DVD disc with recorded DTS content can generate noise and even damage your speakers.
Connecting a TV

- This connection is to connect the unit and a television directly.
- Check the television’s audio and video terminals and connect to one of them.

Cables used for connections

**NOTE**

- Do not connect this unit’s video output via a VCR (Video Cassette Recorder). Some media contain copy prohibiting signals, which will disturb the screen image.
- The unit can play both NTSC and PAL discs.

☐ When connected to the television’s component video input terminal

Press RESOLUTION according to the resolution of the connected television ([**page 22**]).

- This unit’s component video output supports 480i/576i/480p/576p/720p/1080i output.
- Images will not be projected normally if the television resolution and this unit’s output resolution do not match.
- Copyright protected DVD is output in 480i/576i or 480p/576p.

☐ Connecting to a device equipped with a DVI-D connector

Use an HDMI DVI-D conversion cable.

- The audio signal is not output. Make the appropriate audio connections for your devices.
- The video signal will be in RGB format.
- You cannot output to a DVI-D device that does not support HDCP (high-bandwidth digital content copyright protection system).
- Video may not be output depending on the combination of devices.
Connecting a 2-channel audio amplifier

This connection is for playback of audio of this unit, using a 2-channel audio device.

For software recorded in multi-channel, an analog signal down-mixed to 2-channel is output.

---

NOTE

If you play back BD/DVD or other media with an incorrect configuration, a deafening noise occurs that may damage your speakers.
Playback (Basic operation)

This section describes the display screen for each media and the procedures for playback. The icons show the category of content applicable to each operation.

- **Video**: Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD
- **Audio**: Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM
- **Photo**: JPEG

### Operations enabled during playback

- About playback information (page 13)
- Playing BD and DVD-Video (page 14)
- Playing Super Audio CD (page 15)
- Playing CD (page 16)
- Playing DVD-Audio (page 16)

### Basic settings

- Basic settings (page 21)

### About playback information

- Press DISPLAY to display the information bar display or media player display.
  - To close the display, press DISPLAY until it goes away.
  - Displayed content differs depending on the media being played. Also, the information displayed while playing and stopped differs.

#### Information bar display

This screen is displayed when video data such as on a Blu-ray Disc, DVD-Video, etc. are played.

1. **Playback information**
   - Play (▶)
   - Stop (■)
   - Pause (II)
   - Reverse Skip (←) / Forward Skip (→)
   - Fast Reverse (◂) / Fast Forward (▸)
   - Slow Reverse (◂◂) / Slow Forward (▸▸)

2. **Video format display**

3. **Title / Group display**

4. **Chapter / Track display**

5. **Time display**
   - Title Elapsed / Remain time
   - Chapter Elapsed / Remain time
   - Group Elapsed / Remain time
   - Track Elapsed / Remain time

6. **Audio format display**

7. **HDMI output signal display**
   (When the connected HDMI device)

#### Media player display

This screen is displayed when audio data is played.

1. **Playback information**
   - Play (▶)
   - Stop (■)
   - Pause (II)
   - Reverse Skip (←) / Forward Skip (→)
   - Fast Reverse (◂) / Fast Forward (▸)
   - Slow Reverse (◂◂) / Slow Forward (▸◂)

2. **Media information**
   - Type
   - Total Time
   - Title
   - Artist
   - Album
   - Genre
   - Artwork

---

**NOTE**

- The symbol (prohibited mark) may appear on the top left of the TV screen during an operation. This means that the operation being conducted is prohibited.
- Depending on the disc, certain operations may not be as described in this manual. Check each disc owner’s manual for more information.
- During playback of a 2-layered disc, pictures may stop momentarily. This happens when the 1st layer switches to the 2nd layer. This is not a malfunction.
Playing BD and DVD-Video

1 Press POWER ON to turn on power to the unit.

2 Press SOURCE on the unit to select “DISC MODE”.

3 Select “BD” with DISC LAYER.
   • The Media changes each time DISC LAYER is pressed for 2 seconds.
   
   Multi: Super Audio CD
   Audio: DVD-Audio
   BD: Hybrid BD

4 Select “BD layer” or “DVD layer” for DISC LAYER for playback of a hybrid BD disc (page 47).
   
   BD: Plays the BD layer of the BD hybrid disc.
   DVD: Plays the DVD layer of the BD hybrid disc.
   • The above setting is necessary only for BD hybrid discs.

NOTE
Select the disc layer before a disc is inserted.

5 Insert a disc.
   Press ▲ to open/close the disc tray.

6 Press ▶.
   Playback begins.

7 During DVD-Video playback, press TOP MENU or POP UP MENU to display the menu.
   • If the menu continues, press ▲▼◄► to get to the next part.
   • With BD, depending on the disc, you can select title and chapter from the pop up menu.

8 Make the settings shown below on the disc menu.
   • Subtitle language
   • Audio language
   • Audio format etc.

   [Example]
   • Disc menu
   • Top menu
   • Pop up menu

Playing BD-Video compatible with Bonus View

With a disc that is compatible with bonus view (picture-in-picture), in addition to the main video (primary video) stored on the disc, you can play back the video director’s commentary and simultaneously ongoing sub-story, as well as sub-video such as alternative camera angles (secondary video).

Main video (primary video)
Sub video (secondary video)

[Example] Bonus view

The icons show the category of content applicable to each operation.
Playing BD and DVD-Video

1 Press MODE (page 24).

2 Use △▽ to select “Secondary Video”, and then press ENTER or ▶.

3 Use △▽ to select the desired secondary video.

   Off ➔ 1/X ➔ 2/X ➔ X/X

   Off  Does not display Secondary Video.
   1/X  Displays the first Secondary Video.
   2/X  Displays the second Secondary Video.
   X/X  Displays the X th Secondary Video.

   • “X” is the number of Secondary Videos recorded and differs depending on the disc.

   • For using Bonus View, some BD discs require built-in memory or external memory.
   • The unit has a built-in memory. If the memory capacity used for Bonus View will exceed the remaining built-in memory capacity, using a USB memory device of 1 GB or more is recommended.
   • The playback method, etc., is determined by the disc, and varies depending on the disc. Refer to the operation guide of the relevant disc.

Enjoying BD-LIVE™

If the unit is connected to the Internet environment, you can enjoy a BD-LIVE™ function, using a disc that supports BD-LIVE™. For details on functions and operations of BD-LIVE™, see the information displayed on the screen after inserting a BD-LIVE™ disc.

1 Select “Internal” of “BD Data Utility” – “BD-Live Memory” (page 34).

2 Check that the connection and settings for the Internet are completed (page 36 “Connection Test”).

3 Insert a Blu-ray Disc that supports BD-LIVE™ into the unit.

4 Select “BD-LIVE™” from the Disc menu.

• When BD-LIVE™ is used, the downloaded contents are stored in the built-in memory of the unit.
• The unit has a built-in memory. If the memory capacity used for BD-LIVE™ will exceed the remaining built-in memory capacity, using a USB memory device of 1 GB or more is recommended.
• Depending on your network environment, it may take time to connect to the network or connection may not be possible.

NOTE USB memory devices (page 26, 45)

   • For using a USB memory device, set “BD Data Utility” – “BD-Data Memory” to “External” (page 34).
   • The USB memory device must have been initialized (page 34 “BD Data Utility” – “BD Data Information”).
   • Insert or remove a USB memory device while the power is in standby. If you insert a USB memory device while the power is ON, the USB memory device may not be access.

Playing Super Audio CD

1 Press POWER ON to turn on power to the unit.

2 Press SOURCE on the unit to select “DISC MODE”.

3 Select “Multi” with DISC LAYER.

   • The Media changes each time DISC LAYER is pressed for 2 seconds.

   Multi  Super Audio CD
   Audio  DVD-Audio
   BD  Hybrid BD

4 Select the playback area and layer with DISC LAYER (page 47).

   Multi  Plays the multi-channel area of the HD layer.
   Stereo  Plays the 2-channel area of the HD layer.
   CD  Plays the CD layer.

NOTE

   Select the disc layer before a disc is inserted.

5 Insert a disc.

   Press ▲ to open/close the disc tray.

6 Press ▶.

   Playback of the selected area and layer begins.

   • To play a disc in multichannel mode, connect the unit to an AV receiver, using an HDMI cable.
   • The area/layer selected with DISC LAYER remains in the memory even when the power is turned off.
Playing Super Audio CD

- Pausing (page 17)
- Stopping (page 17)
- Skipping to a desired chapter/track/file (page 17)
- Fast-forward/fast-reverse (page 17)
- Finding specific sections with search modes (page 18)
- Playing repeatedly (Repeat playback) (page 19)
- Playing repeatedly between specified points (A-B repeat) (page 19)
- Switching primary audio (page 19)
- Playing in random order (Random playback) (page 20)
- Playing in your preferred order (Program playback) (page 20)

Playing DVD-Audio

1. Press POWER ON to turn on power to the unit.

2. Press SOURCE on the unit to select “DISC MODE”.

3. Select “Audio” with DISC LAYER.
   - The Media changes each time DISC LAYER is pressed for 2 seconds.
     - Multi ➔ Audio ➔ BD

4. Select the playback part with DISC LAYER (page 47).
   - Audio ➔ Plays the audio part.
   - Video ➔ Plays the video part.

5. Insert a disc.

- Pausing (page 17)
- Stopping (page 17)
- Skipping to a desired chapter/track/file (page 17)
- Fast-forward/fast-reverse (page 17)
- Finding specific sections with search modes (page 18)
- Playing repeatedly (Repeat playback) (page 19)
- Playing repeatedly between specified points (A-B repeat) (page 19)
- Switching primary audio (page 19)
- Playing in random order (Random playback) (page 20)
- Playing in your preferred order (Program playback) (page 20)

Playing bonus group

DVD-Audio discs may have a bonus group that can be played after entering a password.

If you enter the wrong password

Select the bonus group again and enter the correct password.

Selecting still images

When a DVD-Audio disc has still images on it, you can choose the image to display.

Press PAGE + during playback. The next still image is displayed.

- Pausing (page 17)
- Stopping (page 17)
- Skipping to a desired chapter/track/file (page 17)
- Fast-forward/fast-reverse (page 17)
- Finding specific sections with search modes (page 18)
- Playing repeatedly (Repeat playback) (page 19)
- Playing repeatedly between specified points (A-B repeat) (page 19)
- Switching primary audio (page 19)
- Playing in random order (Random playback) (page 20)
- Playing in your preferred order (Program playback) (page 20)

The icons show the category of content applicable to each operation. Video  Audio  Photo  For details of the media corresponding to each icon, see “Playable media” (page 45).
Operations enabled during playback
This section describes the operations enabled during playback for each media.
The icons show the category of content applicable to each operation.

Video : Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD
Audio : Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM
Photo : JPEG

Playback (Basic operation) (page 13)

- Pausing (page 17)
- Stopping (page 17)
- Skipping to a desired chapter/track/file (page 17)
- Fast-forward/fast-reverse (page 17)
- Finding specific sections with search modes (page 18)
- Memorizing locations to replay (Marker function) (page 18)
- Playing repeatedly (Repeat playback) (page 19)
- Playing repeatedly between specified points (A-B repeat) (page 19)
- Playing images frame by frame (page 19)
- Slow-forward/slow-reverse (page 19)
- Switching primary audio (page 19)
- Changing the primary subtitle (page 20)
- Switching the angle (page 20)
- Playing in random order (Random playback) (page 20)
- Playing in your preferred order (Program playback) (page 20)

Basic settings (page 21)

Pausing
Press \(\) during playback.
The \(\) indicator will light on the display.
- Resume normal playback by pressing \(\)

Stopping
Press \(\) during playback.
Playback stops.

About the resume function
When playback is stopped, the stop position is memorized.
- The \(\) indicator flashes on the display. To resume play from the stop position, press \(\) while stopped.

To cancel the resume function
Perform one of the following operations.
- Press \(\) while stopped.
- Open the disc tray.
- Change the playback media mode with HOME.
- The resume function does not work with menu playback or BD-J (Blu-ray Disc Java) compatible discs.
- The resume function is cancelled when the power is cut off by unplugging the power cord and when the power is set to standby.
- The resume function does not work depending on the disc.

Skipping to a desired chapter/track/file
During playback, press \(\) or \(\)
- \(\) Playback begins from the start of the chapter/track/file being played.
- \(\) Playback begins from the start of the next chapter/track/file.
- Continue pressing and skip to the chapter/track/file by the number of times pressed.

NOTE
Skipping to the start of a title or group may be prohibited, depending on the disc.

Fast-forward/fast-reverse
During playback, press \(\) or \(\)
- The fast-forward/fast-reverse speed changes in the sequence of x1, x2, x3, x4, x5, and normal speed each time the button is pressed.
- The speed varies with the disc and file.
- Resume normal playback by pressing \(\)
- You cannot fast-forward/fast-reverse across files or tracks during program or random playback.
- Fast-forward/fast-reverse may be disabled with some DivX® files.
- Audio is not output during fast-forward/fast-reverse of a BD or DVD.
Finding specific sections with search modes

1. Press SRCH to select a search.

   The search mode setting bar is displayed at the top of the screen.

   - The search mode changes each time the button is pressed.

   Search  →  Marker Search  →  Off

2. Move the blue cursor at the upper part of the screen to the mode to be searched for, using ◄ ►, then press ENTER.

   1. Title/Group/Track search display
   2. Chapter/Track search display
   3. Title/Chapter Time search display
   4. Track/Disc Time search display

   - Enter the time, using the number buttons or ◄ ►, then press ENTER.
   - The playback of the designated part begins.

3. Enter search conditions or make settings on the search mode setting bar.

   Once an entry is finalized, it searches for the specified location.

   0 – 9, +10  Number entry
   △▼  Select
   ENTER  Playback
   CLEAR  Clear

   - Entering numbers
   To enter 3  3
   To enter 26  2, 6, ENTER
   To enter 138  1, 3, 8, ENTER
   * Depending on number of recorded songs or chapters, you may not need to use ENTER.
   - Time search works with title and chapters playback time.
   - When an input is not correct, press CLEAR. The previous status is retrieved.

   NOTE
   - If you search during program/random playback, the program/random playback stops.
   - Search modes may not operate with some discs.

   When the entry mode for title/chapter/title time/chapter time search continues for about 5 seconds with no operation, it is cancelled.
   - When the power is set to standby or the disc is removed, the set marker is deleted.

   • The elapsed playing time at the set location is displayed.
   • The markers you have set will be erased if you turn the power to standby or eject the disc.

Memorizing locations to replay (Marker function)

You can attach a marker to a location you want to view or hear again, so that playback begins at that location.

1. Press SRCH to select a Marker search.
   The Marker search mode setting bar is displayed at the top of the screen.

   Title: 00 Chapter: 00 Time: 00:00

   01 02 03 04 05 06 07 08 09

2. Press ENTER during playback.
   - The location is registered for the selected marker number.
   - The marker numbers “01” to “12” are registered in this order.
   - The registered number is displayed in white letters.
   - The elapsed playing time at the set location is displayed.

   To play back memorized locations.

   Use ◄ ► to select the marker number, then press ENTER.

   To erase markers.

   Each time CLEAR is pressed, the marker number is erased from up to date registered.

   • Subtitles may not appear depending on the locations you have memorized.
   • The markers you have set will be erased if you turn the power to standby or eject the disc.
   • The marker function does not operate across titles and groups.
   • Marker search can only be performed during playback.
   • The marker function does not work depending on the disc.
Playing repeatedly (Repeat playback)

Press REPEAT during playback. The repeat mode icon is displayed at the top of the screen.

- The repeat mode changes each time the button is pressed.
- To resume normal playback, press REPEAT, and select “Repeat Off”.

[About repeat modes]
The available repeat modes vary depending on the disc or file you are playing.

<table>
<thead>
<tr>
<th>Contents</th>
<th>Mode</th>
<th>Display</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Title repeat</td>
<td>C</td>
</tr>
<tr>
<td></td>
<td>All repeat</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Chapter repeat</td>
<td>C1</td>
</tr>
<tr>
<td></td>
<td>Track repeat</td>
<td></td>
</tr>
</tbody>
</table>

- Some repeat modes may not be accessible depending on some discs.
- With some discs, even when set to repeat playback, the disc may not return to the start of title or chapter, and may advance to the next scene.
- Repeat playback is not available during A-B repeat playback.

Playing repeatedly between specified points (A-B repeat)

1. During playback, press A – B at the desired starting point (A).
   The “A–” indicator will light on the display.
   - To cancel the starting point (A), press CLEAR.

2. Press A – B again at the desired ending point (B).
   The “B” indicator will light on the display, and A-B repeat playback will start.
   - The A-B repeat mode icon is displayed on the top of the screen.
   - To resume normal playback, press A – B, and select “Repeat Off”.

Slow-forward/slow-reverse

Press ◀ or ▶ while paused.
The speed changes in the sequence of 1/16, 1/8, 1/4, 1/2, and normal speed each time the button is pressed.
- Resume normal playback by pressing ◄.

Audio is not output during slow-forward/slow-reverse playback.

Switching primary audio

With discs and files that have multiple audio track recording, you can change the audio during playback.

Press AUDIO during playback.
- The audio number currently being played is displayed.
- Each time AUDIO is pressed, the audio supported by a disc is changed.

- If multiple audio items are recorded, the current audio number/number of recorded audio items is displayed.

- Depending on the disc, audio switching may be restricted to operation of the disc menu. In this case, switch the audio on the disc menu.
- With a DivX® file, “MP3” or “Dolby Digital” audio formats and the number of recorded audio modes are displayed. “– – –” appears for audio other than these.
- With DTS-CD (5.1 music disc), you cannot switch audio modes.

Playing images frame by frame

Press □ while paused.
The disc advances frame by frame each time the button is pressed.
- Resume normal playback by pressing ◄.

Frame by frame reverse playback is not available with the unit.
Changing the primary subtitle
During playback of a disc or file with recorded subtitles, you can switch the subtitles on/off as well as the subtitle language.

Press SUBTITLE during playback.
- The subtitle number currently being played is displayed.
- Each time SUBTITLE is pressed, the subtitle language supported by a disc is changed.

Playing in random order (Random playback)

Press RAND during playback.
The “RAND” lights on the display and “Random Mode” is displayed on the screen.

Resuming normal playback
Press RAND during random playback.
Random playback may not be available with some discs.

Playing in your preferred order (Program playback)

You can program up to a maximum of 15 tracks.

Press PROG/DIRECT during playback.
The “PROG” indicator lights on the display, and the program setting screen appears.

1. Press PROG/DIRECT during playback.
The “PROG” indicator lights on the display, and the program setting screen appears.

2. Enter the track numbers you want to program on the program setting screen.
0 – 9, +10 Number entry
△ ▽ Select
ENTER Set entry
CLEAR Clear

Checking the program contents
Press CALL while stopped.
- The programmed tracks are shown on the display of the unit each time the button is pressed.
- You can also check the contents of the program on the unit’s display.
- Repeat playback is available during program playback.

Resuming normal playback
Press PROG/DIRECT during program playback.
- The program setting screen appears and press PROG/DIRECT.

Erasing programmed tracks one by one
Press CLEAR on the program setting screen.
- If the unit is set to standby or the disc tray is opened, the program is cleared.

Switching the angle
During playback of a BD or DVD-Video recorded with several camera angles, you can change the angle.

Press ANGLE during playback.
- The angle number for current playback is displayed.
- Each time ANGLE is pressed, the angle supported by a disc is changed.

NOTE
Angle changing may be restricted, depending on the disc.

Program playback is not available for music files or DVD-audio.
Changing the brightness of the display
(Dimmer control)

The brightness of the display can be changed.

Press DIMMER.
• The brightness changes each time the button is pressed.

Playing high-quality audio
(Pure direct function)

This enables you to play high quality audio by stopping the video signal, etc., output, and outputting the analog audio signal only.

Press PURE DIRECT while stopped.
• The Pure Direct mode changes each time the button is pressed.

HDMI control functions

When you make HDMI connections with a TV or AV receiver compatible with this unit and HDMI control functions, you can perform the following operations by setting up the HDMI control functions of each device.

• TV or AV receiver power is turned on by operating the unit and functions change with this unit input.
• Turning off the TV’s power turns the unit’s power to standby.
• Operating the unit via the TV’s remote control.

1 Set the HDMI control function to “On”. GUI menu “System” – “HDMI Control” (page 34).
2 Turn on all the equipment connected by HDMI cable.
3 Set the HDMI control function for all equipment connected by HDMI cable.
• Please refer to the owner’s manuals of connected devices for how to make settings.
• Carry out steps 2 and 3 if any of the equipment was unplugged.

4 To ensure that the unit’s HDMI video output is projected on the TV screen, change the input function of the TV and AV receiver.

5 When you turn the TV’s power to standby, check that the power of the unit and AV receiver also goes on standby.

If the HDMI control function does not operate properly, check the following points.
• Is the TV or AV receiver compatible with the HDMI control function?
• Are the HDMI control function settings of all equipment correct? (Step 3)
• After setting, did you add another HDMI device connection or make any changes in the connections? If so make the settings again.

NOTE
• Some functions may not operate depending on the connected TV or AV receiver. Check the owner’s manual of each device for details beforehand.
• When “HDMI Power Off Control” (page 34) is set to “Off”, the unit does not go to standby even if the connected device is in the standby mode.
Video resolution

This section is for making the settings for television resolution. Set them depending on the connected television.

Press RESOLUTION.

• The resolution is changed as shown below each time RESOLUTION is pressed.

<table>
<thead>
<tr>
<th>RESOLUTION</th>
<th>SOURCE DIRECT</th>
<th>480/576i</th>
<th>480/576P</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto</td>
<td>Source Direct</td>
<td>480/576i (480/576 interlaced)</td>
<td>480/576P (480/576 progressive)</td>
</tr>
<tr>
<td>1080P24</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1080 progressive, 24-frame)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1080P</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1080 progressive)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>1080i</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(1080 interlaced)</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>720P</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>(720 progressive)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

• The default settings is underlined.

• This unit’s component video output supports 480i/576i/480p/576p/720p/1080i output.

• If the Video resolution is not set to “Auto”, set it to correspond with the resolution of your television.

• Images will not be projected normally if the television resolution and this unit’s output resolution do not match.

• Audio and video will be temporarily interrupted if the power of the connected device currently playing is turned off, or the input is switched.

• When you change the HDMI video resolution of the unit, it takes a few seconds up to about 10 seconds for validation between the unit and the connected device. Audio/video is not output during this period.

NOTE

When you make the following settings, this unit will output video signals from an HDMI OUT connector with a resolution of 1080P24 (1080 progressive, 24-frame).

• RESOLUTION setting: Set to “Auto”, “Source Direct”, or “1080P24”.

• HDMI mode setting: Set to “24P ON”.

• Television resolution supports 1080p24 (1080 progressive, 24-frame).

Under these setting conditions, no video signals are output from VIDEO OUT and COMPONENT VIDEO OUT connectors. To output video signals, press HDMI MODE and set HDMI output to “24P OFF”.

HDMI output settings

Most movies on Blu-ray disc are recorded at 24 frames per second, the same as movie film. If the unit is set like this, images with the same quality as movies can be enjoyed.

The setting for outputting signals with 24 video frames in HDMI mode is made here. Then images with fluid motion can be enjoyed when video of 1080P24 (1080 progressive, 24-frame) is played.

NOTE

You can not use HDMI mode while the GUI menu is displayed.

Press HDMI MODE.

• The current status of HDMI output is displayed on the display.

• Each time HDMI MODE is pressed, “24P ON” and “24P OFF” are toggled.

• The default setting is “24P OFF”.

24P ON

• If the connected television supports “1080P24", use this setting.

• After making settings, set Video Resolution to “1080P24” or “SourceDirect”.

24P OFF

• If the connected television does not support “1080P24“, use this position.
Adjusting the picture quality (Picture control)

You can adjust the picture quality to your liking.
The adjusted values can be stored in Memory 1 through Memory 5.

1. Press PICTURE ADJUST.
The currently set status is displayed.

   ![Picture Adjust Menu](image)

   - Memory1
     - 3DNR
     - BNR
     - MNR
     - Contrast
     - Brightness
     - Gamma Correct.

2. Press △▽ to select a memory number to be used, and then press ENTER.

3. Press △▽ to select an item then press ENTER or ▶.

4. Change the setting with △▽.
   - Refer to the table on the right for information on the different settings.

To finalize picture adjustments
Press PICTURE ADJUST after adjusting.
• The pop up menu of the picture adjustments is disappeared on the screen.

The picture adjustment settings are retained in memory even after the power is turned off.

Connecting to a USB memory device

Insert a USB memory device into the USB port firmly.
- After the USB memory device is inserted and the power of the unit is turned on, check that the “USB” indicator on the display of the unit lights.

• For files that can be played on the unit, see page 46.
• If the “USB” indicator does not light, turn the power off, reinsert the USB memory device, and turn the unit on again.

NOTE
- Insert a USB memory device straight into the USB port. If the USB memory device is forcibly inserted, the unit or the device may be damaged.
- Some USB memory devices may protrude from the USB port. Do not use excessive force to insert it into the USB port, or push the protruded part forcibly.
- Do not insert an object other than a USB memory device into the USB port. It may damage the unit.
- Do not leave a USB memory device near small children. A child may swallow it.
- For connecting a USB memory device, do not use an extension cable.
- The USB port of the unit and a computer cannot be connected with a USB cable.
- Do not use for charging portable audio players or mobile phones.

Removing a USB memory device

Press POWER OFF to turn the power off then remove the USB memory device from the USB port.

NOTE
- Be sure to turn the power off when inserting or removing a USB memory device. Data stored in the USB memory device or the memory of the unit may be damaged.
- In any case where data stored in a USB memory device are damaged or deleted, we will not compensate for the stored contents or any associated damage or try to restore the contents stored in a USB memory device.
- Compatibility of all USB memory devices is not guaranteed.
- For reformatting a USB memory device, format it with FAT16 or FAT32.

Connecting to a network

When the unit is connected to the Internet, you can enjoy following functions.
- Playback of a Blu-ray disc supporting BD-LIVE™ (page 16).
- Playback of music, photos, video files stored on a device on the network (page 28).
- Playback of YouTube contents (page 31).
- Playback of Netflix contents (page 31).
- Downloading for updating the latest firmware via the network (page 34).

After connection, make settings for the Internet connection and check it before using Media Server, YouTube or Netflix.

Cables used for connections

Audio and video cables
- HDMI cable (sold separately)
- Audio and video cable (supplied)
  - White
  - Red
  - Yellow
- Component video cable (sold separately)
  - Green
  - Blue
  - Red
- Ethernet cable (sold separately)

NOTE
- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other components being connected.
- Be sure to connect the left and right channels properly (left with left, right with right).
- Do not bundle power cords together with connection cables. Doing so can result in noise.
**System requirements**

Internet connection via broadband.

**Modem**
A device that connects to the broadband and conducts communications on the Internet. Some modems also incorporate a router.

**Router**
When using the unit, we recommend a router with the following features.
- Built-in DHCP (Dynamic Host Configuration Protocol) server.
- This function automatically assigns an IP address on the LAN.
- Built-in 100BASE-TX switch (built-in switching hub compatible with speeds upwards of 100 Mbps)

**Computer (recommended system)**
- OS
  Windows® XP Service Pack2 or more or Windows Vista
- Software
  Server software supporting Windows Media Player ver.11 or DLNA.

**Ethernet cable (CAT-5 or greater recommended)**
- An ethernet cable is not included with the unit.
- Use only shielded STP or ScTP LAN cable which is available at retailer.
- We recommend a shielded straight cable (normal type) for Ethernet connections.
- If you use the flat type or a non-shielded cable, the noise may adversely affect other devices.

---

**Checking the network connection**

After connection, test the Internet connection with "Connection Test" in "Network" on the GUI menu (page 36).
- If "Network is FAILED." is displayed in the test, check the IP address with "Network" in "Information" on the GUI menu, then set "DHCP" to "Manual" (page 36).

- The unit can use the DHCP function to automatically set up the network.
- When setting up your network manually, after subscribing to an ISP, make the settings according to directions in “Network” on the GUI menu (page 36).
- If you connect the unit to a network without a DHCP function, conduct IP address and other settings according to “Network” on the GUI menu (page 36).
- The unit does not support PPPoE. If you subscribe to a service that is set with PPPoE, a PPPoE compatible router is required.
- When setting up the network manually, consult with your network administrator for the settings to make.

**Registering the connected device for the network**

For playing files stored on a device connected via a network, the device must have the unit registered in advance.
- For registering, refer to the operation manual supplied with the server.

For Internet connections, use an ISP (Internet Service Provider). Ask your local dealer for details.

**NOTE**
- Do not connect an ETHERNET connector directly to the LAN port/Ethernet connector on your computer.
- It is necessary to subscribe to an ISP in order to connect to the Internet. If you already have a broadband connection, there is no need to subscribe anew.
- The router you can use varies with the ISP. For more information, contact your ISP or PC dealer.
- DENON assumes no responsibility whatsoever for any communication errors or problems resulting from customer’s network environment or connected devices.
Playback (Advanced operation)

This section describes the playback of files stored in the DVD, CD or USB memory device and the operation of Home menu.

- Opening the Home menu screen (page 28)
- Playing files (MEDIA PLAYER) (page 28)
- Playing YouTube video (page 31)
- “Playing Netflix video picture” (page 31)
- How to make detailed settings (page 32)

Home menu screen

The unit can play music, photos, video files stored in the USB memory device connected to the front panel of the unit or on the sever connected via the network. For playback operation, use the Home menu screen.

Opening the Home menu screen

1. Press HOME. The Home menu is displayed on the television screen.
2. Press \( \Delta \) or \( \nabla \) to move the cursor to the menu item to be used.
3. Press ENTER.

Playing files (MEDIA PLAYER)

Files on a USB memory device, disc or a server connected to the unit are played using the Media Player of the unit.

1. Before operation, start the server software of the computer (Windows Media Player, etc.), and make settings for the server contents so that files can be played via the network.
2. For details, refer to the operation manual supplied with the server software.

1. Select “Media Player” on the Home menu screen with \( \Delta \) or \( \nabla \), then press ENTER. Devices connected to the unit are listed on the menu screen of Media Player.

2. Select a device on which a file to be played is stored with \( \Delta \) or \( \nabla \) then press ENTER.

The icons show the category of content applicable to each operation. For details of the media corresponding to each icon, see “Playable media” (page 45).
3 Select a folder to be played with △ ▽ ◄, then press ENTER.
- Folders classified by file type are listed on the menu screen.
- Files are classified as follows:
  - Video: DivX, MPEG, AVI, WMV
  - Music: MP3, WMA, AAC, LPCM
  - Photo: JPEG

Here, “Photo” is selected as an example.

<table>
<thead>
<tr>
<th>Item 1/4</th>
<th>Media Player</th>

</tr>
<tr>
<td></td>
<td>City005</td>
</tr>
</tbody>
</table>

- With a large image file, the image may display for longer than the set time.
- For the file types that can be played, see “Files” (page 46).

Changing the still image being played
Press ◄ ◄. 
- Before playback or display of next image.

Pausing the display
Press II. 
- To cancel pause, press ►.

Changing interval of slide show
Press ◄ ◄ ►.

Changing the still image orientation
Press △ ▽ ◄. 
△: Invert 
▽: Mirror 
◄: Contrarotate 
►: Rotate clockwise

Change the media for playback of a file
When the source of a file for playback is changed to another media, press ◄ to return to step 2 and select the media to be played.

DISC MODE
If the source of a file to be played is changed from the USB media player or server to a disc, you can also change the media with the procedures below.

1 Press ■. 
Playback of a file from a USB memory device or server stops. 
- When “►” flashes on the display, press ■ again to turn “►” off.

2 Press SOURCE. 
The playback mode of the unit is changed to disc mode.

3 Press ►. 
Playback begins.
About playback information (page 13)
Pausing (page 17)
Stopping (page 17)
Skipping to a desired chapter/track/file (page 17)
Fast-forward/fast-reverse (page 17)
Finding specific sections with search modes (page 18)
Memorizing locations to replay (Marker function) (page 18)
Playing repeatedly (Repeat playback) (page 19)
Playing repeatedly between specified points (A-B repeat) (page 19)
Playing images frame by frame (page 19)
Switching primary audio (page 19)
Changing the primary subtitle (page 20)
Switching the angle (page 20)

• Playback Video or audio may be interrupted or playback may be disabled, depending on the connection environment of devices connected via the network.
• If a file cannot be played on the unit, it may be played by converting the format on the connected device.
• The connected device cannot play data from the unit. • It may require a little time to start playback, depending on the size of a file to be played.
• For the file types that can be played, see “Files” (page 46).

Playing playlist

1 Select a file to be played on the file list on the screen with △, then press ▶.

2 Press POP UP MENU. The menu of playlist is displayed.

3 Press ENTER. File is added to playlist.

4 Select a playlist on which a file to be played is stored with △ ◀.

5 Playing files.
See “Playing files (MEDIA PLAYER)” (page 28)

• If the unit is set to standby, the playlist is cleared.

Playing Kodak Picture CD

This unit can also run JPEG files stored on Kodak Picture CD. You can enjoy picture images on the display device set by playing back the picture CD. For details of Kodak picture CD, contact a shop that provides developing service of Kodak Inc.

1 If a Kodak Picture CD is inserted in the disc tray of the unit, a slide show begins on the screen.

2 Pressing ■ stops the slide show, and the thumbnail screen is displayed.

3 Use △ ◀ ◆ to select a desired picture to be played back, then press ENTER. An image will be played back from the selected track and go to the next one in turn.

4 Pressing POP UP MENU with the thumbnail screen displayed shows the screen for describing the playback operations.
Changing the still image being played
Press $\ll\ll\ll\ll$
• Before playback or display of next image.

Pausing the display
Press $\ll$
• To cancel pause, press $\ll$.

Changing interval of slide show
Press $\ll\ll\ll\ll$

Changing the still image orientation
Press $\Delta\n\Delta\n\Delta$
• Invert
• Mirror
• Rotate clockwise

Returning to the thumbnail display screen.
Press $\ll$

Playing YouTube video
The operation for the video site YouTube is described here.

1 Press $\Delta\n\Delta\n\Delta$ to select “YouTube” in the “Home Menu”, and press ENTER.
The unit connects to YouTube.

2 Select the contents that you want to watch using $\Delta\n\Delta\n\Delta$, and press ENTER.
Playback begins.

About YouTube
• YouTube is a video file-sharing service operated and managed by YouTube Inc.
• The unit can play video hosted by YouTube.
• YouTube and the YouTube logo are the registered trademarks of Google Inc.
• The YouTube content is independently managed by YouTube, LLC.
• YouTube content may include information that may be deemed inappropriate.

• This unit must be connected to a working Internet connection in order to watch YouTube. For seamless playback of YouTube video contents, the unit needs effective speed greater than 6 Mbps for HD video contents, and greater than 2 Mbps for SD video contents, between the unit and YouTube server.
• We recommend using a broadband line such as fiber optic, ADSL, or CATV. The video content may not be displayed correctly, and / or may not be played seamlessly depending on the usage environment or communication environment, or the connection status of the line, or on the traffic status of the line.
• You cannot connect to YouTube via a proxy.
• To set the language to be displayed on the screen, configure the settings in “Language”−“GUI Language” in the GUI menu.

NOTE
• If buttons other than $\Delta\n\Delta\n\Delta$ or ENTER are pressed while watching YouTube, the button may not work, or a different function may operate.
• Some contents cannot be played using this unit.
• Available service details and screens may change or exit without prior notice.
• We cannot accept any responsibility for the content supplied by YouTube.
• If you have any inquiries about YouTube, contact YouTube through the official homepage http://www.youtube.com.

Playing Netflix video picture
The operation for the Netflix streaming service is described here.

1 Select “NETFLIX” on the Home menu, then press ENTER.
Your instant Queue screen will appear on your TV.

2 Use $\Delta\n\Delta\n\Delta$ to select highlight a movie on your instant Queue.

3 Press ENTER a title that you want to watch.
The second menu of title will appear.

4 Select “play” on the second menu and then press ENTER.
Retrieving of title will be started.
Press $\Delta$ to return to your instant Queue.

NOTE
• For using “Netflix”, Internet connection is required. It is recommended to use a broadband line (effective speed 6 Mbps or more) such as FITH (optical) ADSL, CATV, etc.
• Even if the line speed is sufficient to make it viewable, pictures may be unstable, interrupted, or not viewed depending on the usage environment, communication environment, connecting line conditions, etc.
• The connection of Netflix may not be connected via proxy.
• For the usage conditions for Netflix, contact Netflix.
How to make detailed settings

Menu map

Pressing SETUP displays the GUI menu. From this menu, you can move to various setting screens.

General Setting (page 34)
Settings for screen display, etc. are made.

- Screen Saver
- Auto Power Mode

Audio Output

System Information (page 39)
MAC Address is displayed.

Display MAC Address.
GUI menu operation

1 Press SETUP. The GUI menu is displayed on the TV screen.
   • The GUI menu is also displayed when you press SETUP of the Home menu.

2 Press \( \Delta \nabla \leftarrow \rightarrow \) to select the menu to be set or operated.
   • To return to the previous item, press \( \downarrow \).

3 Press ENTER to enter a setting.

Text colors of selected items of the GUI menu are as follows:
• White : These items can be selected.
• Gray : These items cannot be selected.

**NOTE**

You must use the GUI menu to make settings or operate while a disc or USB memory device is not inserted. In cases in which the resume function is activated, you may not make correct settings.

**Exiting the GUI menu**

Press SETUP while the GUI menu is displayed.
• The GUI menu display disappears.

---

**Examples of GUI menu screen displays**

Typical examples are described below.

**Menu selection screen (Top menu)**

1 List of GUI menu setup icons
2 Currently selected setup icon
3 Currently selected setup item
4 List of currently selected setup items

Press \( \downarrow \) to select “” and then press \( \uparrow \).
(Or press ENTER.)

**List of items**

7 Returns to the previous item. Use \( \downarrow \) to switch.
8 Switch to the next item. Use \( \uparrow \) to switch.
9 Selected item. Switch the selected item using \( \Delta \nabla \).
## General Setting

**System**

Settings for system, language, parental lock, network, etc. can be made.

Set the following settings.
- Screen saver settings
- Power saving mode settings
- HDMI control function settings
- Initialize settings
- Firmware update from the Internet
- BD-LIVE Memory switching settings

### Setting items

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Setting details</th>
</tr>
</thead>
</table>
| **Screen Saver** | Sets the screensaver.  
  **On**: The screensaver function activates when stop or pause status continues for about three minutes.  
  **Off**: Does not use the screensaver. |
| **Auto Power Mode** | This setting automatically sets the power to standby.  
  **On**: This setting automatically sets the power to standby if any of the following states continues for approximately 30 minutes.  
  - Disc not loaded  
  - Playback stopped  
  - Stopped due to the resume function  
  **Off**: Does not use the auto power mode. |
| **Power Saving** | Sets to power saving mode during standby.  
  **Power Saving Standby**: This is the lowest power consumption mode. During standby, operations are not accepted via HDMI control. Power indicator status in standby mode: Off  
  **Normal Standby**: During standby, operations are accepted via HDMI control. Power consumption is slightly higher at this time. Power indicator status in standby mode: Red |
| **HDMI Control** | Links the unit and a device connected with an HDMI cable that supports HDMI control.  
  **On**: Links with the device connected to HDMI.  
  **Off**: Disables the HDMI control function.  
  - For the HDMI control function to operate, it is necessary for the unit or HDMI-compatible TV connected to the unit to have an HDMI connection.  
  - Refer to "HDMI control functions" (page 21) for more information on HDMI control functions.  
  - After the "HDMI Control" setting has been changed, always turn off the power to the connected equipment and then turn it back on. |
| **HDMI Power Off Control** | Links the power of the unit and a device connected with an HDMI cable that supports HDMI control.  
  **On**: Turns the unit’s power to standby through linkage to the TV.  
  **Off**: Does not turn the unit’s power to standby through linkage to the TV. |
| **Initialize** | All settings including audio mode and picture quality are set to default settings.  
  **Cancel**: Does not initialize.  
  **OK**: Executes initialization. |

### Setting items

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Setting details</th>
</tr>
</thead>
</table>
| **Firmware Update** | Updates the firmware of the unit via the Internet.  
  **Check for Update**: Checks if a newer version of firmware exists. Press Enter to see the approximate amount of time required for the update. If the firmware is already updated to the latest version, the firmware updating operation starts after you press ENTER. When the update starts, a progress bar and the remaining time required to complete the update are displayed on the television screen. When the update completes, the units turns on again and returns to the normal state. |
| **Update Notification** | Displays the message for updating on a television screen just after the power is turned on.  
  **On**: The message for updating is displayed on a television screen.  
  **Off**: The message for updating is not displayed on a television screen. |
| **BD Data Utility** | Initializes the BD data stored in the built-in memory or external memory used for BD-Live.  
  **BD Data Information**: The BD data used for BD-Live are initialized. The space remaining in the memory being used is displayed.  
  **FMT BD Data**: Initializes the space for BD data being used for BD-Live.  
  - This operation deletes all data. When a USB memory device that stores the data is inserted, never execute this operation.  
  **BD-Live Memory**: Built-in memory or external memory is selected for the BD-Live memory.  
  - **Internal**: The built-in memory is used.  
  - **External**: The USB memory device inserted in the unit is used.  
  - If the file size used for BD-Live will exceed the remaining built-in memory capacity, select “External” (page 15). |

### NOTE

When the following message is displayed after “Firmware Update” (page 34), follow the instructions in the message to perform operations.  

"Disconnect the power plug of the unit from the outlet, wait approximately 30 seconds, and then insert the plug again before use."

---

**Remote control operation buttons**

- **SETUP**: Displaying the menu
- **Cancel the menu**
- **Move the cursor** (Up/Down/Left/Right)
- **ENTER**: Decision the setting
- **RETURN**: Return to previous menu

### Audio Setting

Settings for audio output are made.

#### Audio Output

Set the audio output.

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Setting details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Coaxial</strong></td>
<td>For selecting the format output from the digital audio output terminals.</td>
</tr>
<tr>
<td><strong>Bitstream</strong></td>
<td>For selecting if the device connected to the unit supports Dolby Digital or DTS Digital Surround.</td>
</tr>
<tr>
<td><strong>PCM</strong></td>
<td>For selecting when the device connected to the unit does not support Dolby Digital or DTS Digital Surround.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>For outputting no audio signal from the digital audio output terminal of the unit.</td>
</tr>
</tbody>
</table>

For converting audio signals, see “About digital signal audio output” (page 49).

#### HDMI

For selecting the format output from the HDMI output terminals.

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Setting details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Bitstream</strong></td>
<td>For selecting when the device connected to the unit supports Dolby TrueHD/Dolby Digital Plus/Dolby Digital or DTS-HD/DTS Digital Surround. The output format is automatically selected according to the audio format or the number of channels supported by the connected HDMI device.</td>
</tr>
<tr>
<td><strong>PCM</strong></td>
<td>For selecting when a device connected to the unit does not support Dolby TrueHD/Dolby Digital Plus/Dolby Digital or DTS-HD/DTS Digital Surround.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>For outputting no audio signal from the HDMI output terminal of the unit.</td>
</tr>
</tbody>
</table>

For converting audio signals, see “About digital signal audio output” (page 49).

---

### Video Setting

Sets up 3D video software playback.

#### 3D Output Setting

Sets up video outputs for 3D video playback (only for HDMI).

<table>
<thead>
<tr>
<th>Setting items</th>
<th>Setting details</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Auto</strong></td>
<td>Automatically determines whether the video software is 3D or 2D and plays it back.</td>
</tr>
<tr>
<td><strong>Off</strong></td>
<td>Always outputs 2D video signals.</td>
</tr>
</tbody>
</table>

#### TV Screen Size Setting

Sets up the screen size of your 3D enabled TV.

Use ▲▼< or 0 – 9 to enter three digits for the screen size of your TV in the setting screen, and press ENTER for confirmation.

The default setting is “046” (46’ TV screen size).

Set up the correct size, otherwise you may not be able to view 3D video properly.

---

**NOTE**

3D video playback operations may differ according to the disc to be used. Refer to the instruction manual supplied with your disc.

When passing 3D video signals output from this device through an AV receiver to a 3D enabled TV, the AV receiver must also be compatible with inputting / outputting 3D video signals.

To view 3D video, use a 3D enabled TV.

- To connect the unit with a 3D enabled TV, use a high speed HDMI cable.
- During 3D playback, you cannot adjust “Video Resolution” (page 22), “HDMI output Settings” (page 22), or “Adjusting the picture quality” (page 23).

---

**NOTE**

If “BD audio mode” is set to “HD Audio Output” with MODE on the remote control, BD secondary audio and interactive audio are not output.

Part names and functions

Front panel

For buttons not explained here, see the page indicated in parentheses ( ).

1 Power operation button (ON/STANDBY) ........................................... (5, 7)
   Turns power to this unit on and off (standby).
2 Power indicator ................................................................. (5, 7)
3 DISC LAYER button ....................................................... (14 – 16)
4 PURE DIRECT button .......................................................... (21)
5 RESOLUTION button .................................................... (11, 22)
6 Remote control sensor ......................................................... (44)
7 Disc tray open/close button ........................................... (6, 14 – 16)
   If 7 or 8 is pressed when the power is in standby, the power is turned on.
8 Power indicator ................................................................. (5, 7)
9 SOURCE button ............................................................... (29)
10 USB port .............................................................................. (26)
11 Reverse-skip/Forward-skip buttons (►◄, ►►) ........................................... (17)
12 Stop button (■) ................................................................. (17)
13 Pause/Still button (II) ............................................................ (17)
14 Play button (►) ................................................................. (6, 14 – 16)
15 Disc tray .............................................................................. (6)
16 Display .............................................................................. (41)

Display

1 Playback mode indicators
   ➤ : During Playback
   II : During pause and step-by-step playback
   PROG : During program playback
   RAND : During random playback
   A-B : During repeat playback
2 Information display
   Displays various information or playback elapsed time and so on of the disc.
3 Playback format indicators
4 Downmix indicator
   Displayed when playing back downmix permitted audio.
5 Angle information indicator
   Displayed when a scene on the currently playing disc has been shot at various angles.
6 Audio channel indicators
   Displays the number of audio signal channels during playback.
   2CH : 2-channel playback
   MULTI : Multi-channel playback
7 Time mode indicators
   TOTAL : Total time of Super Audio CD and CD
   SING : Elapsed time of title/chapter/track/file being played
   REM : Remaining time of title/chapter/track/file being played
8 Group/Title/Track/Chapter indicators
9 HDMI output indicator
   Display when HDMI video or audio signals are being output.
10 Media indicators
   BD : BD
   DVD : DVD-Video, DVD-R/+R/-RW/+RW
   DVD AUDIO : DVD-Audio
   SUPER AUDIO CD : Super Audio CD
   CD : CD
   USB : USB memory device
   NET : NETWORK
   Displays the inserted media and contents via Network.

Information
Rear panel

For buttons not explained here, see the page indicated in parentheses ( ).

1. AC inlet (AC IN) ........................................ (5)
2. ETHERNET connector ................................... (27)
3. HDMI OUT connector .................................... (4)
4. DIGITAL OUT COAXIAL connector ................. (10, 12)
5. VIDEO OUT connector ................................... (9 – 11)
6. COMPONENT VIDEO OUT connectors .......... (9 – 11)
7. 2ch AUDIO OUT connectors ......................... (11, 12)

For software recorded in multi-channel, analog signals that have been down-mixed into 2 channels are output.

8. ROOM TO ROOM IN/OUT jacks
Extension jack for future use.

NOTE
• Do not touch the inner pins of the connectors on the rear panel. Electrostatic discharge may cause permanent damage to the unit.
• Do not put your finger or foreign object in the fan opening. Doing so could cause injury or unit failure.
Remote control

For buttons not explained here, see the page indicated in parentheses ( ).

1. Remote control signal transmitter ........................................ (44)
2. Disc tray OPEN/CLOSE button ( △ ) .................................. (6, 14 – 16)
3. Remote control signal transmission/status display ................. (44)
4. RESOLUTION button (RES.) ...................................................... (11, 22)
5. HDMI MODE button .................................................................. (22)
6. Number buttons (0 – 9, +10) ..................................................... (18, 20)
7. DISPLAY button ......................................................................... (13)
8. RESOLUTION button (RES.) ...................................................... (11, 22)
9. Remote control signal transmission/status display ................. (44)
10. ENTER button ............................................................................ (18, 20, 33)
11. TOP MENU button (T) ............................................................... (14)
12. SETUP button ............................................................................ (33)
13. Fast-reversing button ( ◄◄) ....................................................... (17)
14. Reverse-skip button ( ◄◄) ......................................................... (17)
15. Pause/Still button (II) ............................................................... (17)
16. A/B/C/D buttons ....................................................................
17. PICTURE ADJUST button (PICT) ........................................ (23)
18. PAGE + button ........................................................................ (16)
19. POWER buttons (POWER OFF/ON) ......................................... (5)
20. DIMMER button ..................................................................... (21)
21. Program/Direct button (PROG/DIRECT) ................................. (20)
22. Ramdom button (RAND) ........................................................ (20)
23. CLEAR button .......................................................................... (18, 20)
24. CALL button ............................................................................ (20)
25. SEARCH mode button (SRCH) ................................................ (18)
26. A-B Repeat button (A-B) ........................................................ (19)
27. REPEAT button ........................................................................ (19)
28. HOME button ......................................................................... (28)
29. AUDIO button ......................................................................... (19)
30. ANGLE button .................................................................
31. MENU/POP UP MENU button .................................................. (14)
32. Cursor buttons (△ ▽ ◄ ►) ............................................................ (14, 33)

NOTE

• When power is in standby, press 4 and 8 to turn the power on.
• You can use 1 when operating the BD pop up menu screen, etc.
Inserting the batteries

1. Slide the rear lid in the direction of the arrow and remove it.
2. Load the two batteries properly as indicated by the marks in the battery compartment.
3. Put the rear cover back on.

If the battery level is low, the remote control signal transmission/status display flashes 5 times when a button is pressed. In this case, replace the batteries soon.
- If the batteries are completely exhausted, the remote control signal transmission/status indicator goes dark.

NOTE
- Insert the specified batteries in the remote control.
- Replace the batteries with new ones if the set does not operate even when the remote control is operated close to the unit. (The supplied batteries are only for verifying operation.)
- When inserting the batteries, be sure to do so in the proper direction, following the and marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - Do not attempt to charge dry batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
  - Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control if it will not be in use for long periods.
- Used batteries should be disposed of in accordance with the local regulations regarding battery disposal.

Operating range of the remote control

Point the remote control at the remote sensor when operating it.

Approx. 23 ft /7 m

NOTE
- The set may function improperly or the remote control may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.

Remote control settings (remote control side)

Switches when this unit remote control operates another DENON BD players in the vicinity.
Set the remote control code simultaneously on the unit, too (page 37 “Remote ID”).

1. Hold POWER ON and OPEN/CLOSE pressed simultaneously.
   While these buttons are held pressed, the remote control signal transmission/status display flashes twice, and the remote control enters Setup mode.

2. When the number button “1” is pressed, the remote control ID is set to “DENON 1”.
   When the number button “2” is pressed, the remote control ID is set to “DENON 2”.

When number key input is completed and the remote control signal transmission/status display flashes twice, the settings for the remote control are completed.

NOTE
- If the signal code of the remote control does not match the signal code of the unit, the remote control code set on the unit is shown on the display.

[Example]
If the code setting on the unit is “DENON 1”, and the setting on the remote control is “2”, “PLAYER 1” is shown on the display.

NOTE
- If you made the remote control settings incorrectly, the remote control signal transmission/status display flashes for 2 seconds, and then goes off. If this happens, the settings are incorrect and retry the settings.
- Match the signal code of the remote control with the signal code of the unit. If the remote control code is different, you cannot operate the this unit with the remote control.
- Even if you change the remote control code, set the GUI menu “Others”-“Receive Legacy Remocon” (page 37) to “OFF” when operating this unit with a remote control other than DENON’s.

The following discs will not play back on this unit.
- BD-RE Ver1.0 (BD disc with cartridge)
- BD-ROM/BD-R/BD-RE discs containing recorded movie, still image, audio, and/or other, files
- BDXL
- HD DVD
- DVD-RAM
- CDV (Only the audio part can be played)
- CD-G (Only the audio signals can be output)
- Non-standard CD (CD with copy protection, etc.)
- Unauthorized disc (Pirated disc)
- Disc with recording area less than 55 mm in diameter
- Video Single Disc (VSD) / CVD/ Video CD / Super Video CD / Compact Disc-Interactive (CD-I) / Photo CD

*1 BD-Video/DVD-Audio/DVD-Video discs may not operate as described in this manual due to menu structure.
*2 BD players and BD-Video discs, and BD/DVD players and DVD-Video discs each have their region codes (codes assigned for each region). Playback is not possible if the codes do not match.
*3 Compatibility of a Blu-ray Disc as the specifications for Blu-ray Discs are new and advance day by day, discs of some types or versions may not be played with the unit. The firmware of this unit is updated periodically. Be sure to update the firmware to the latest version before using the unit.

USB memory device

- The unit supports the FAT16 and FAT 32 file system. It does not support the NTFS file system.
- The limit of folders and files that can be displayed on the unit is as shown below. (The limit shown includes the root folder.)

<table>
<thead>
<tr>
<th>Folder layers</th>
<th>8</th>
</tr>
</thead>
<tbody>
<tr>
<td>Folders</td>
<td>999</td>
</tr>
<tr>
<td>Files</td>
<td>999</td>
</tr>
<tr>
<td>File names, folder names</td>
<td>32</td>
</tr>
<tr>
<td>Artist names, song titles</td>
<td>60</td>
</tr>
</tbody>
</table>

- If there are too many characters to be displayed on one line, the display becomes scrollable.
- File names/title names/artist names/album names are displayed on the Media player display screen.

**NOTE**

- Insert and remove a USB memory device with the power set to standby. If it is inserted or removed with the power on, the recorded files cannot be loaded or may be damaged.
- It is not compatible with an MP3 player, digital camera, a USB device for a mobile phone, etc.
- The unit cannot charge a USB device.
- The unit supports high-speed USB file transfer (conforming to USB 2.0).
- The unit does not support a card reader, USB extension cable, or USB hub.
- AVCHD content stored on the USB memory device connected to the unit can also be played.

### About DivX® Video-on-Demand (VOD)

- When you purchase or rent a DivX® file through the official site of DivX® Video-On-Demand (VOD) services, the unit registration code is required. For details, see “DivX Registration” (page 37).
- A DivX® VOD file recorded with a different code from the unit registration code cannot be played back.
- Some DivX® VOD files are restricted to a certain number of playable times. If your DivX® VOD file has such a limit, the number of playable times is displayed on the DivX® VOD display screen.
- Use ← → to select “Yes” if you want to play a file, or to select “No” if you do not want to play it. Then, press ENTER to confirm the selection.

### NOTE

- ABOUT DIVX PLUS™ HD: DivX® is a digital video format created by DivX, Inc. This is an official DivX Certified® device that plays DivX video, including DivX Plus™ HD video (H.264/.MKV) up to 1080p and premium content. Visit www.divx.com for more information and software tools to convert your files into DivX video.
- ABOUT DIVX VIDEO-ON-DEMAND: This DivX Certified® device must be registered in order to play DivX Video-on-Demand (VOD) content. To generate the registration code, locate the DivX VOD section in the device setup menu. Go to vod.divx.com with this code to complete the registration process and learn more about DivX VOD.

---

- Depending on recording conditions, these files may not be playable.
- If a file name/title name/artist name/album name includes characters that are not supported for the Media player display, it may not be displayed correctly.
- JPEG pictures recorded in the progressive system cannot be displayed.
- Variable Bit Rate (VBR) is not supported (when playback is possible, the time display in the display window will speed up and slow down).
About Discs and Files

BD-Video, DVD-Video

BD/DVD-Video discs are divided into several large sections (titles) and small sections (chapters). These sections are all allotted numbers, called title numbers and chapter numbers.

Example

Hybrid BD

• Hybrid disc

Two-layer Hybrid BD with an BD layer and a DVD layer.

The signals on the DVD layer can be played on a regular DVD player.

Super Audio CD

[Type of Super Audio CD]

• Single layer disc

Single layer Super Audio CD with only an HD layer.

• Dual layer disc

Super Audio CD with a double HD layer, offering extended playing time and high sound quality.

• Hybrid disc

Two-layer Super Audio CD with an HD layer and a CD layer.

The signals on the CD layer can be played on a regular CD player.

* All Super Audio CD contain an HD (High Density) layer with high density Super Audio CD signals. This layer can contain a stereo channel area, a multi-channel area, or both a stereo channel and multi-channel area.

DVD-Audio

DVD-Audio discs are divided into several large sections (groups) and small sections (tracks). These sections are all allotted numbers, called group numbers and track numbers.

CD

CD is divided into several sections (tracks). These sections are all allotted numbers called track numbers.

File

Files, such as MP3/WMA/AAC/LPCM/JPEG/DivX®, recorded on DVD-R/RW/+R/+RW, CD-R/RW and USB memory device are divided into large segments (folders) and small segments (files). Files are stored in folders, and folders can be placed for storage in a hierarchy. The unit can recognize up to 8 levels of folders.

When writing MP3/WMA/AAC/JPEG/DivX® files on a CD-R/RW disc, set the writing software’s format to “ISO9660”. The files may not play properly if they are recorded in other formats. For details, refer to the instructions of your writing software.
Cautions on using media

Inserting a disc

• Set the disc in the tray label side up.
• Make sure the disc tray is fully open when inserting the disc.
• Place the disc horizontally in the tray, aligned with the tray guide.

If a disc that cannot be played is loaded or the disc is loaded up-side-down, “NO DISC” is displayed on the player’s display.

**NOTE**

• Only load one disc at a time. Loading two or more discs can damage the unit or scratch the discs.
• Do not use cracked or warped discs or discs that have been repaired with adhesive, etc.
• Do not use discs on which the sticky part of cellophane tape or labels is exposed or on which there are traces of where labels have been removed. Such discs can get caught inside the player and damage it.
• Do not use discs in special shapes, as they may damage the player.

• Do not push the disc tray in by hand when the power is off. Doing so could damage the set.

How to handle media

• Do not get fingerprints, oil or dirt on discs.
• Take special care not to scratch discs when removing them from their cases.
• Do not bend or heat discs.
• Do not enlarge the hole in the center.
• Do not write on the labeled (printed) surface with ball-point pens, pencils, etc., or stick new labels on discs.
• Condensation may form on discs if they are moved suddenly from a cold place (outdoors for example) to a warm place, but do not try to dry discs with a hairdryer, etc.
• Do not eject a USB memory device or turn off the unit while a USB memory device is being played. This may result in malfunction or loss of the USB memory device’s data.
• Do not attempt to open or modify USB memory device.
• USB memory device and files can be damaged by static electricity. Do not touch the metal contacts of an USB memory device with your fingers.
• Do not use warped USB memory device.
• After use, be sure to remove any disc or USB memory device, and store it in its proper case, to avoid dust, scratches and deformation.
• Do not store discs in the following places:
  1. Places exposed to direct sunlight for long periods of time
  2. Dusty or humid places
  3. Places exposed to heat from heaters, etc.

Cleaning discs

• If there are fingerprints or dirt on a disc, wipe them off before using the disc.
• Use a commercially available disc cleaning set or a soft cloth to clean discs.

Gently wipe the disc from the inside towards the outside.

**NOTE**

Do not use record spray, antistatic agents, benzene, thinner or other solvents.

About copyrights

• Unauthorised copying, broadcasting, public performance and lending of discs are prohibited.
• This item incorporates copy protection technology that is protected by U.S. patents and other intellectual property rights of Rovi Corporation. Reverse engineering and disassembly are prohibited.
• Portions of this product are protected under copyright law and provided under license by ARIS/SOLANA/4C.
## About digital signal audio output

The unit can convert the format of digital audio signals recorded on media and output them. Make settings for a digital audio signal depending on the specifications of the connected device.

- Audio signal input may not be supported depending on the HDMI compatible monitor (projector, etc.) being used.

When the unit is connected to this kind of device, audio signals are not output from the HDMI terminal.

### Notes

- The output format is automatically changed depending on the audio format or number of channels that the connected HDMI device supports.
- If "BD audio mode" is set to "MIX Audio Output", secondary audio and interactive audio are mixed and output (see page 6, 24).
- Contents of DTS-HD MA 5.1ch/192 kHz are output as 5.1ch/96 kHz.
- If the connected HDMI device does not support Dolby Digital Plus, Dolby TrueHD, or DTS-HD, the signal is output as Dolby digital or DTS Digital Surround bit stream. If it does not support the Dolby Digital or DTS Digital Surround bit stream, it is output as multi-linear PCM or 2-channel linear PCM.
- If the connected HDMI device does not support DSD, the signal is output as Linear PCM. If a DSD signal is output from the HDMI output terminal, the signal output from the analog audio output terminals is muted.
- If the connected HDMI device does not support AAC, the signal is output as Linear PCM.
- If the connected HDMI device does not support HE-AAC, the signal is not output.

Explanation of Terms

Numerics

4.3 letterbox
When a wide (16:9) disc is played on the unit while connected to a 4:3 TV, this function displays the image with a black area at the top and bottom.

4.3 pan-and-scan
When a wide (16:9) disc is played on the unit while connected to a 4:3 TV, this function cuts the left and right of the displayed image to the 4:3 size according to the disc's control information.

A

AACS (Advanced Audio Coding)
This is an internationally standardized audio data compression scheme. It has a compression ratio 1.4 times higher than the “MP3 audio compression scheme adopted for “MPEG-1.

Aspect ratio
This is the length and width ratio of the TV screen. The conventional TV screen’s ratio is 4:3 and a wide screen TV’s screen ratio is 16:9.

Audio commentary
This is an audio program included as a bonus feature in a DVD-Video or BD-Video. It uses a multi-audio function to provide an audio explanation or commentary by members of the crew or director, etc. to accompany the video.

B

BD-J (Java)
BD-Video offer fun software with more interactive functions (games) that use Java applications.

BD-LIVE
The unit can be connected to the Internet to enjoy a number of features, including additional contents such as special video or subtitles, network games, etc.

Bit rate
This is the amount of video or audio data recorded on a disc that is read in one second.

Blu-ray disc
This is a one-sided, one-layer disc with 25 GB capacity for recording high vision video movie and games.

Bonus View
Special images for BD-Video. It includes comments from the movie director, simultaneously developing sub-stories, and images from different angles.

Chapter
This is a break intended by the producer, who organizes the titles of BD or DVD-Video. The chapter search function searches for the beginning of this break.

Deep Color
This technology allows expression of more colors than the conventional 8-bit and can reproduce more natural colors without any color streaking.

Default Gateway
This device is the entry and exit point between an internal network and an external network (Internet, etc.).

DHCP (Dynamic Host Configuration Protocol)
This function assigns IP addresses automatically to network devices.

DivX
This is a video codec (video compression/decompression software) developed by DivX, Inc. The compression technology is based on “MPEG-4 Part 2” (known as “MPEG-4 ASP”). It allowsalong video to be compressed into a small file while maintaining a high-quality image. It is available in the free “DivX” version or the paid “DivX PRO” version.

DLNA
An abbreviation of Digital Living Network Alliance. An industry group that was established to decide specifications for the mutual connection of audio visual devices and computers in a home network and the mutual utilization of music, photo and video data. This unit is based on DLNA Home Networked Device Interoperability Guidelines.

DNS (Domain Name System)
A system that matches host names on the Internet to IP addresses.

Dolby Digital (5.1-ch Surround)
This is a stereophonic effect developed by Dolby Laboratories. This is a maximum of 5.1 channels, independent multi-channel audio system.

Dolby Digital Plus
This is an extended version of Dolby Digital and is a high sound quality, digital audio technology adopted as an optional audio for Blu-ray discs.

Dolby TrueHD
This is a lossless coding technology is adopted as an optional audio for Blu-ray disc and supports 7.1 channels.

Downmix
This function converts the number of channels of surround audio to less channels for playback.

DTS
This is an abbreviation of Digital Theater System, which is a digital audio system developed by DTS. When playing audio on this system while connected to a device such as a DTS amplifier, accurate sound field position and realistic sound effects can be obtained, making you feel like you are in a movie theater.

DTS-HD
This audio technology provides an enhanced functionality and a higher quality of sound than conventional DTS and is adopted as an optional audio for Blu-ray disc. This technology supports multi-channel, high data transfer speed, high sampling-frequency, and lossless audio playback. A maximum of 7.1 channels are supported on Blu-ray discs.

Dynamic range
The difference between the maximum, undistorted sound level and the minimum sound level that is discernible above the noise emitted by the device.

Finalizing
This process enables BD/DVD/CD recorded with a recorder to be played by other players.

HDCP
When transmitting digital signals between devices, this copyright protection technology encrypts the signals to prevent content from being copied without authorization.

HDMI
This is an abbreviation of High-Definition Multimedia Interface, which is an AV digital interface that can be connected to a TV or amplifier. Video signal and audio signal can be connected with 1 cable.

Interlacing (interlaced scanning)
This conventional method used to project images on a TV displays 1 frame of image in half and half, respectively as 2 fields.

Interactive audio
This is audio recorded in the titles of BD-Video, such as clicking sounds made during operations.

IP Address
An identification number that is assigned to each network device.

JPEG (Joint Photographic Experts Group)
This is a still picture data compression standard. Its ability to reduce the size of a file with relatively little deterioration in image quality means that it is widely used for storing images in video cameras, etc.

LAN (Local Area Network)
A wired or wireless network that connects devices together.

LFE
This is an abbreviation of Low Frequency Effect, which is an output channel that emphasizes low-frequency effect sounds. Surround audio is intensified by outputting 20 Hz to 120 Hz deep bass.

Linear PCM
This is an uncompressed PCM (Pulse Code Modulation) signal. This is the same system as the CD audio but uses 192 kHz, 96 kHz, and 48 kHz sampling frequencies on BD or DVD and provides higher sound quality than CD.
MAC Address
A unique identification number for network devices such as LAN cards.

MP3 (MPEG AudioPlayer 3)
This is an internationally standardized audio data compression scheme, using the “MPEG-1” video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

MPEG
This is an abbreviation of Moving Picture Experts Group, which is an international standard of the moving picture audio compression method. Images on BD and DVD are recorded using this method.

Netflix
This is a video streaming distribution service offered by Netflix Inc. in the United States.

Picture-in-picture
This BD-Video function allows you to view scenes, such as the making of or commentary on the movie, in the secondary video while viewing the main story in the primary video.

Pop up menu
This type of menu is recorded with BD software. While playing back a BD, this menu can be displayed on the front of the screen and can be operated.

Primary audio
This audio signal is recorded in the main story in BD-Video.

Primary subtitle
This subtitle is recorded in the main story in BD-Video.

Primary video
This video signal is recorded in the main story in BD-Video.

Progressive (sequential scanning)
This is a system for scanning the video signal that displays 1 frame of video as one image. Compared to the interface system, this system provides images with less flickering and bleeding.

Proxy
This is a hookup to secure high-speed access and safe transmission for connecting to the Internet from the internal network.

Rating
Depending on the age of the viewer, this function restricts the playing of BD-Video or DVD-Video. The unit can be set to restrict viewing in 0 to 254 levels for BD-Video, and 1 to 8 levels for DVD-Video.

Region code
This code indicates the country or region where the BD or DVD-Video can be played back.

Sampling frequency
Sampling involves taking a reading of a sound wave (analog signal) at regular intervals and expressing the height of the wave at each reading in digitized format (producing a digital signal). The number of readings taken in one second is called the “sampling frequency”. The larger the value, the closer the reproduced sound is to the original.

Secondary audio
This is audio content, such as the director’s comments, and other data recorded in the bonus view of BD-Video.

Secondary subtitle
This subtitle, such as the director’s comments and other data recorded in the bonus view of BD-Video.

Subnet Mask
A 32-bit value that defines which bits in an IP address are reserved for a network address for identifying the network.

Title
This is the unit of content that consists of chapters of BD or DVD-Video. Some BD or DVD-Video may include multiple titles.

WMA (Windows Media Audio)
This is audio compression technology developed by Microsoft Corporation. WMA data can be encoded using Windows Media® Player Ver.7, 7.1, Windows Media® Player for Windows® XP and Windows Media® Player 9 Series. To encode WMA files, only use applications authorized by Microsoft Corporation. If you use an unauthorized application, the file may not work properly.

x.v.Color
This function lets HDTVs display colors more accurately. It enables display with natural, vivid colors. “x.v.Color” is a Sony registered trademark.

YouTube
This is the video-content sharing site managed by YouTube Inc.
# Troubleshooting

If a problem occurs, firstly check the following:

1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are other components operating properly?

If this unit does not operate properly, check the items listed in the table below. If the problem continues there may be a malfunction.

In this case, disconnect the power immediately and contact your retail outlet.

## [General]

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Power does not turn on.</td>
<td>• Check if the power cord is properly connected.</td>
<td>5</td>
</tr>
<tr>
<td>• Plug the power supply cord into the power outlet.</td>
<td></td>
<td>5</td>
</tr>
<tr>
<td>• The safety protection device may be activated. Unplug the power cord once, and wait for 5-10 seconds and then plug it in again.</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Playback does not start even when → is pressed, or starts but stops immediately.</td>
<td>• Is there condensation inside the player or on the disc? (Let it sit for 1 to 2 hours with the power off.)</td>
<td>2</td>
</tr>
<tr>
<td>• When the disc is scratched or contaminated with fingerprints, the disc may not play correctly. Clean the disc or replace with a non-scratched disc.</td>
<td>• The disc loaded upside-down? Load the disc properly, with the side to be played face down.</td>
<td>6</td>
</tr>
<tr>
<td>• Is an unplayable disc loaded?</td>
<td>• No disc is inserted. Insert a disc.</td>
<td>45</td>
</tr>
<tr>
<td>No return to start-up screen when a disc is removed.</td>
<td>• There may be an internal error. Set the power to standby, wait awhile, then turn the power back on.</td>
<td>5</td>
</tr>
<tr>
<td>Buttons do not work or the unit stops responding.</td>
<td>• Operations may not be permitted by the disc.</td>
<td>13</td>
</tr>
<tr>
<td>• The safety protection device may be activated. Unplug the power cord once, and wait for 5-10 seconds and then plug it in again.</td>
<td>• Refer to the instructions of the disc.</td>
<td>5</td>
</tr>
<tr>
<td>The camera angle does not switch.</td>
<td>• If the multiple angles are not recorded in a BD-Video or DVD-Video, the camera angle cannot be switched. Also, multiple angles may only be recorded for specific scenes.</td>
<td>20</td>
</tr>
<tr>
<td>Playback does not start when a title is selected.</td>
<td>• Playback may be prohibited by the viewing restriction setting. Check the “Ratings” setting on the GUI menu.</td>
<td>35</td>
</tr>
<tr>
<td>I have forgotten the password for the rating level.</td>
<td>• On the GUI menu, perform the “System” – “Initialize” procedure.</td>

License

This section describes software license used for DBP-1611UD. To maintain the correct content, the original (English) is used.

Exhibit: GNU GENERAL PUBLIC LICENSE

Version 2, June 1991
Copyright (C) 1989, 1991
Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The “Program”, below, refers to any such program or work which has been distributed under this license by its copyright holder.

The “Program”, below, refers to any such program or work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The “Program”, below, refers to any such program or work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The Program “or a work based on the Program” means either the Program or any derivative work under copyright law: that is, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term “modification”.)

Each licensee is addressed as “you”.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

You may copy and distribute verbatim copies of the Program’s output without Limiting Conditions on all or part of it, as long as you also meet any of these conditions:

1. You must copy and distribute the source code along with verbatim copies of the output, and keep all the copyright notices, so that anyone who receives a copy is free to redistribute it under these terms. You may charge a fee for the cost of physically distributing verbatim copies of the output, or for distribution through online or electronic means.

2. You may modify the Program or any portion of it, and redistribute the modifications following the same terms, so long as you also meet any of these conditions:

a) If the Program as you received it, or any part of it, contains a notice which says that it may be distributed under the terms of this License (without any Limiting Conditions), then that notice must also be included in all copies of the Program, and in all parts of it that are distributed later.

b) If the Program was modified and redistributed by someone else after being distributed by you, it must still carry the notice that the Program as a whole is under these terms. Thekernel of a system derived from the Program may still be covered by this license even if the system as a whole is not covered.

c) If the program was modified and redistributed by someone else after being distributed by you, it must still carry the notice that the Program as a whole is under these terms. The kernel of a system derived from the Program may still be covered by this license even if the system as a whole is not covered.

3. You may offer to distribute the Program (or any version of it) under the terms of this License, or for a charge covered under the terms of this License, and offer to license the Program to do so, on a volitional basis, by patent license or otherwise.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will have no licenses under this License, so as long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. The recipient may accept only those terms, which, by their nature, are consistent with the purposes of this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. In the setting ofcopyright law, this means that you cannot offer a modified version of the Program with a different license, except as permitted by the authors of the modification.

8. If you coordinate the effort among several sites to distribute the same version of the Program (i.e., the same version of the same work) by electronic means, you may designate a site (or the same site). This designates a “location” for the purpose of this License.

9. LICENSE
END OF TERMS AND CONDITIONS
How to Apply These Terms to Your New Programs
If you develop a new program, and you want it to be distributed under these Terms with the greatest possible freedom, and avoid enforced limitations on freedom to do things that you as a programmer wish to do, you want to make it free software in the GNU General Public License. To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each separate notice should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>
This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.
This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.
You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110 1301 USA.

Also add information on how to contact you electronically (including the Internet address if you have one):

GNU Lesser General Public License
Version 2.1, February 1999
Copyright (C) 1991, 1999 Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

This license applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this license. However, the copyright holder has no obligation to distribute this program under these terms in the same version with earlier versions of it.

This License is designed to ensure that the program development by individual programmers is会使 the program free for all users, with no limits on who is allowed to do what.

1. PREAMBLE

The purpose of this License is to make a relatively free program.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to libraries that are specially designed to link with a wide range of applications.

We use a shorter license for these libraries. These libraries may be used, modified, and distributed by anyone under these terms.

We have designed this License to be effective in the most commonly used situations, but it contains different other terms to the extent that there is a need or a desire to do so, in order to prevent a total dominance of the most common free software development by full domination of the mouth of that development by any individual or group.

Typical libraries added using this license include tiny free utility programs, library functions (headers or static libraries) with short code, and libraries intended to be used inside another library.

2.Definitions

"Library" means a collection of function procedures and/or data prepared so as to be conveniently used with other linked programs.

A "work based on the library" means either the whole Library or any part of it combined with other programs (or a compile-time conversion of the library) to produce a work that is itself a library.

The "Library" comprises both the Library code and its user documentation. The "Library" does not include its user documentation.

3.License conditions for Libraries

This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder saying it may be distributed under the terms of this Library License. The "Library" comprises both the Library code and its user documentation.

The terms and conditions for Professional Programs set out below are designed to make them use the Library in a way consistent with what the copyright holder believes to be the most freedom-restricting for a program containing the Library. Such Programs have certain special properties that make them different from ordinary programs.

3.1 License conditions for a Professional Program

3.1.1 Library licensing.

The Library may be incorporated entirely or in part into other run-time libraries.

3.1.2 Output of a Professional Program.

The Library is licenced only under this License when incorporated into other run-time libraries.

3.1.3 Use in linking.

When a Program is linked with the Library, the combination of the two is a library, and must be licenced under the terms of the Library License.

3.1.4 Use after modification of the Library.

If you modify a copy of the Library, and, in accordance with Section 3 above, distribute an output file containing the modified Library, and say in your documentation that the modified program contains material covered by this License, you must ensure that your use of that material is consistent with the conditions of this License.

3.2 Use and distribution of a Work based on the Library.

You may use a Work based on the Library or a Modified Version of it under the terms of a license that, notwithstanding any other provisions that license, permits modified versions of that Work to be made and distributed for your purpose.

3.3 Use and distribution of linking products.

As a special exception, if an Program is linked directly or indirectly with the Library (或其他应用), and contained in an executable file produced by any compile/link step, it does not fall under Section 3 of the Library License, and may be distributed in any way that does not violate Section 1 of the Library License.

4.lnclusion of code derived from the Library.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a patent license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the terms of this license. The terms and conditions of this license itself cannot be changed except in the specific exception described above.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to libraries that are specially designed to link with a wide range of applications. The ordinary GNU General Public License is quite suitable to use for all but certain applications. We use this license for libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary GNU General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides less protection from linking restrictions on free libraries.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as part of a larger free software distribution.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the library is modified so as to complement the other free software that uses it.

The difference between this License and the ordinary GNU General Public License is mainly that this License preserves your freedom to link the library with proprietary programs that call into it. Some would consider this License a kind of "moosepatent license", but we call it "Lesser" General Public License instead of "incompatible" or "limited" GNU GPL.
LICENSE
9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library as a whole, which consists of all the contributors’ copyrighted works and/or derivative works under this License.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link, and modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted hereunder, because you have received the library under the same conditions that you have endeavored to impose on the persons to whom you distribute the library. Therefore, the recipient has received the intellectual property rights to modify or distribute the library simply by virtue of receiving copies of the library from you, provided their use does not violate multiple copyrights.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot modify or distribute the Library so as to satisfy both these conditions and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries so excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation has no obligation to provide software maintained and/or distributed under this License with any warranty other than the warranty that comes standard with most Free Software, derived from the GNU General Public License.

14. If you wish to alter your copy of the library or its derivative works in any way so as to make it different from what it would otherwise become in the absence of any modification by you, then you may alter it, provided that you comply and maintain corresportion with the modified version of the library as a whole.

15. No warranty is provided for the library except as it may be expressed by other parties, as described above. WARRANTIES AND/OR REMEDIES FOR ANY OTHER LIABILITY WHATSOEVER ARISING FROM THIS LICENSE OR FROM THE USE OF THIS SOFTWARE INCLUDING BUT NOT LIMITED TO LIABILITY FOR LOSS OF DATA OR PROFIT, OR ANY OTHER DAMAGE.

NO WARRANTY

16. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

17. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR ANY OTHER PARTY WHO MAY MODIFY AND/OR DISTRIBUTIONS THE LIBRARY AS PERMITTED UNDER THIS LICENSE, BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, CONSEQUENTIAL OR EXEMPLARY DAMAGES, OR FOR LOSS OF PROFITS OR REVENUE, COSTS, OR EXPENSES OF ANY KIND ARISING OUT OF ANY FAILURE OF THE SOFTWARE OR MEDIATION WITH YOUR COPY OF THE SOFTWARE OR ANY INCONVENIENCE RESULTING FROM THE USE OF THE SOFTWARE.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

When you distribute a new library, you are permitted to distribute your work under your own terms and conditions; you are not subject to the conditions below. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library as a whole, which consists of all the contributors’ copyrighted works and/or derivative works under this License (or, alternatively, under the terms of the ordinary General Public License).

To apply this License, you must do the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.
We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products.
We disclaim all warranties Covering The FreeType Project and assume no liability related to The FreeType Project.
Finally, many people asked us for a preferred form for a creditline to be used in compliance with this license.
We thus encourage you to use the following text:
Portions of this software are copyright © year The FreeType Project (www.freetype.org). All rights reserved.  *
* Please replace ©year with the value from the FreeType version you actually use.

Legal Terms

0. Definitions

Throughout this license, the terms ‘package’, ‘FreeType Project’, and ‘FreeType archive’ refer to the set of files originally distributed by the authors (David Turner, Robert Wilhelm, and Werner Lemberg) as the ‘FreeType Project’, be they named as alpha, beta or final release.
‘You’ refers to the licensee, or person using the project, whether using a specific project term including compiling the project’s source code as well as linking it to a program or ‘executable’.
This program is referred to as 'a program using the FreeType engine'.
This file applies to all files distributed in the original FreeType Project, including all source code, binaries and documentation, unless otherwise stated in the file’s original, unmodified form a distributed in the original archive.
If you are unsure whether or not a particular file is covered by this license, you must contact us to verify this.
The FreeType Project is copyright (C) 1996-2000 by David Turner, Robert Wilhelm, and Werner Lemberg. All rights reserved except as specified below.

1. No Warranty

THE FREETYPE PROJECT IS PROVIDED 'AS IS' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OR THE INABILITY TO USE, OF THE FREETYPE PROJECT.

2. Redistribution

This license grants a worldwide, royalty free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project (including source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions:

- Redistribution of source code must retain this license file ('FTL.TXT') unaltered; any additions, deletions or changes to the original files must be clearly indicated in accompanying documentation. The copyright notices of the unaltered, original files must be preserved in all copies of source files.

- Redistribution in binary form must provide a disclaimer that states that the software is based in part of the work of the FreeType Team, in the distribution documentation. We also encourage you to put an URL to the FreeType web page in your documentation, though this isn't mandatory.

These conditions apply to any software derived from or based on the FreeType Project, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

3. Advertising

Neither the FreeType authors and contributors nor you shall use the name of the other for commercial, advertising, or promotional purposes without specific prior written permission. We suggest but do not require, that you use one or more of the following phrases to refer to this software in your documentation or advertising materials: 'FreeType Project', 'FreeType Engine', 'FreeType library', or 'FreeType Distribution'.
As you have not signed this license, you are not required to accept it. However, as the FreeType Project is copyrighted material, only this license, or another one contracted with the authors, grants you the right to use, distribute, and modify it.
Therefore, by using, distributing, or modifying the FreeType Project, you indicate that you understand and accept all the terms of this license.

4. Contacts

There are two mailing lists related to FreeType:

- freetype@list freelists.org

Discusses general use and applications of FreeType, as well as future and wanted additions to the library and distribution.

If you are looking for support, start in this list if you haven't found anything to help you in the documentation.

- freetype-devel@nongnu.org

Discusses bugs, as well as engine internals, design issues, specific licenses, porting, etc.

Our home page can be found at

http://www.freetype.org

### Exhibit-F

#### LICENSE ISSUES

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit.

See below for the actual license texts. Actually both licenses are BSD style Open Source licenses.

For the OpenSSL Project, many licenses are used in case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

#### OpenSSL License

Copyright (C) 1998 2008 The OpenSSL Project. All rights reserved.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All other materials mentioning features or use of this software must display the following acknowledgment:

   This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).

#### Original SSLeay License

Copyright (C) 1995 1998 Eric Young (eay@cryptsoft.com)

All rights reserved.

This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with Netscape SSL.

This library is free for commercial and non-commercial use as long as the following conditions are adhered to. The following conditions apply to all code found in this distribution, be it the RSA, DH, DES, etc., code, not just the SSL code. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com). Copyright remains Eric Young’s, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used.

This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3. All other materials mentioning features or use of this software must display the following acknowledgment:

   This product includes cryptographic software written by Eric Young (eay@cryptsoft.com)

The word 'cryptographic' can be left out if the rambles from the library being used are not cryptographic related :).

4. If you include any Windows specific code (or a derivative thereof) from the apps directory (application code) you must include an acknowledgement:

   This product includes software written by Tim Hudson (tjh@cryptsoft.com)

---

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).
This product includes software written by Tim Hudson (tjh@cryptsoft.com).

LICENSE
This software is provided by Eric Young 'as is' and any express or implied warranties, including, but not limited to, the implied warranties of MERCHANTABILITY and FITNESS FOR A PARTICULAR PURPOSE are DISCLAIMED. In no event shall the Authors or contributors be liable for any direct, indirect, incidental, special, exemplary, or consequential damages (including, but not limited to, procurement of SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, provided that the above copyright notice and this permission notice appear in all copies of the Software, and that both the above copyright notice(s) and this permission notice appear in supporting documentation.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Exhibit-G

LibJPEG

In plain English:
1. We don’t promise that this software works. (But if you find any bugs, please let us know!)
2. You can use this software for whatever you want. You don’t have to pay us.
3. You can’t pretend that you wrote this software. If you use it in a program, you must acknowledge somewhere in your documentation that you’ve used this code.

In legalese:
The authors make NO WARRANTY or representation, either express or with respect to this software’s quality, accuracy, merchantability, or fitness for a particular purpose.

This software is provided as ‘AS IS’, and you, the user, assume the entire risk as to its quality and accuracy. This software is copyright (C) 1991 1998, Thomas G. Lane. All Rights Reserved except as specified below.

Permission is hereby granted, to use, copy, modify, distribute this software (or portions thereof) for any purpose, without the subject to these conditions:
1. If any part of the source code for this software is distributed, then this README file must be included, with this copyright and warranty notice unaltered, and any additions, deletions, or changes to the original files must be clearly indicated in accompanying documentation.
2. If only executable code is distributed, then the accompanying documentation must state that "this software is based in part on the work of the Independent JPEG Group.”
3. Permission for use of this software is granted only if the user accepts full responsibility for any undesirable consequences; the authors accept NO LIABILITY for damages of any kind.

These conditions apply to any software derived from or based on the LGPL code, not just to the unmodified library. If you incorporate the LGPL code into a larger program, you must redistribute the program in source code form.

The above copyright notice(s) list the conditions and the following disclaimer. The Software is provided as 'AS IS', WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF THIRD PARTY RIGHTS.

This software is provided by Eric Young 'as is' and any express or implied warranties, including, but not limited to, the implied warranties of MERCHANTABILITY and FITNESS FOR A PARTICULAR PURPOSE are DISCLAIMED. In no event shall the Authors or CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, provided that the above copyright notice(s) and this permission notice appear in all copies of the Software, and that both the above copyright notice(s) and this permission notice appear in supporting documentation.

The Software is provided "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Exhibit-K

COPYRIGHT

Permission to use, copy, modify, distribute this software for any purpose without fee is hereby granted, provided that this entire notice is included in all copies of the software, and that copies of any software which is or includes a copy or modification of this software and in all copies of the supporting documentation. THIS SOFTWARE IS BEING PROVIDED "AS IS", WITHOUT ANY EXPRESS OR IMPLIED WARRANTY. IN NO EVENT SHALL THE AUTHOR OR LUCENT MAKES ANY REPRESENTATION OR WARRANTY OF ANY KIND CONCERNING THE MERCHANTABILITY OF THIS SOFTWARE OR ITS FITNESS FOR ANY PARTICULAR PURPOSE.

License Information for the Software Used in the Unit

About GPL (GNU-General Public License), LGPL (GNU Lesser General Public License) License
This product uses GPL/LGPL software and software made by other companies.
After you purchase this product, you may procure, modify or distribute the source code of the GPL/ LGPL software that is used in the product.
DENON provides the source code based on the GPL and LGPL licenses at the actual cost upon your request to our customer service center. However, note that we make no guarantees concerning the source code. Please also understand that we do not offer support for the contents of the source code.
