SAFETY PRECAUTIONS

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION:
TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE
COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE.
REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral
triangle, is intended to alert the user to the presence of
uninsulated "dangerous voltage" within the product’s enclosure
that may be of sufficient magnitude to constitute a risk of
electric shock to persons.

The exclamation point within an equilateral triangle is intended
to alert the user to the presence of important operating
and maintenance (servicing) instructions in the literature
accompanying the appliance.

WARNING:
TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT
EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION:
TO COMPLETELY DISCONNECT THIS PRODUCT FROM THE MAINS, DISCONNECT
THE PLUG FROM THE WALL SOCKET OUTLET.
The mains plug is used to completely interrupt the power supply to
the unit and must be within easy access by the user.

NOTES ON USE

1. Avoid high temperatures.
   Allow for sufficient heat dispersion when installed in a rack.
2. Handle the power cord carefully.
   Hold the plug when unplugging the cord.
3. Keep the unit free from moisture, water, and dust.
4. Unplug the power cord when not using the unit for long periods of time.
5. Do not obstruct the ventilation holes.
6. Do not let foreign objects into the unit.
7. Do not let insecticides, benzene, and thinner come in contact with the unit.
8. Never disassemble or modify the unit in any way.
   Ventilation should not be impeded by covering the ventilation openings with
   items, such as newspapers, tablecloths or curtains.
9. Naked flame sources such as lighted candles should not be placed on the
   unit.
10. Observe and follow local regulations regarding battery disposal.
11. Do not expose the unit to dripping or splashing fluids.
    Do not place objects filled with liquids, such as vases, on the unit.
12. When the switch is in the OFF (STANDBY) position, the equipment is not
    completely switched off from MAINS.
13. The equipment shall be installed near the power supply so that the power
    supply is easily accessible.
14. Do not keep the battery in a place exposed to direct sunlight or in places
    with extremely high temperatures, such as near a heater.

IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings.
8. Use only with the cart, stand, tripod, bracket, or table
   specified by the manufacturer, or sold with the apparatus.
   When a cart is used, use caution when moving the cart/
   apparatus combination to avoid injury from tip-over.
9. Refer all servicing to qualified service personnel.
   Servicing is required when the apparatus has been damaged in any way,
   such as power-supply cord or plug is damaged, liquid has been spilled or
   objects have fallen into the apparatus, the apparatus has been exposed to
   rain or moisture, does not operate normally, or has been dropped.
10. Batteries shall not be exposed to excessive heat such as sunshine, fire or
    the like.

DECLARATION OF CONFORMITY

We declare under our sole responsibility that this product, to which this declaration relates, is in conformity with the following standards:
EN60065, EN55013, EN55020, EN61000-3-2 and EN61000-3-3.

DENON EUROPE
Division of D&M Germany GmbH
An der Kaufhalle 18, Nettetal,
D-41334 Germany

A NOTE ABOUT RECYCLING:
This product’s packaging materials are recyclable and can be reused. Please dispose of any materials in accordance with the local recycling regulations.
When discarding the unit, comply with local rules or regulations.
Batteries should never be thrown away or incinerated but disposed of in accordance with the local regulations concerning battery disposal.
This product and the supplied accessories, excluding the batteries, constitute the applicable product according to the WEEE directive.

CAUTIONS ON INSTALLATION

For proper heat dispersal, do not install this unit in a confined space, such as a bookcase or similar enclosure.
• More than 0.1 m is recommended.
• Do not place any other equipment on this unit.
After reading them, be sure to keep them for future reference.

Troubleshooting

Specifications
Features

- **A Universal Audio/Video player that plays Super Audio CD and DVD-Audio formats**
  The unit supports a variety of media and enables video and audio playback of your disc libraries with high quality (page 51, “Playable media”).

- **Supporting the Network operations**
  - When the unit is connected to the Internet, YouTube/NETFLIX service can be used.
  - Music, photos, video files stored on the device connected via the network can be played.
  - When the unit is connected to the Internet, privileged video can be downloaded from the Internet site to the built-in memory to enjoy BD-LIVE™ (page 13, “Connecting to a home network (LAN)”).

- **3D video playback**
  When the unit is connected to a 3D enabled TV with a high speed HDMI cable, you can enjoy 3D video.

- **Independent Block Construction for playing video and audio signals with high fidelity**
  The electronic circuits are separated to prevent electronic and electromagnetic noise caused by various electronic signals in the unit.

- **GUI equipped for good operability and visibility**
  This unit is equipped with an easy to see “Graphical User Interface” that uses menu displays and levels. The use of level displays increases operability of the this unit (page 37, “SETUP menu operation”).

- **HDMI control**
  By connecting a television or AV receiver that supports the HDMI control function to this unit using an HDMI cable, and enabling the HDMI control settings on each device, you can control other devices from one device (page 34, “HDMI control functions”).

---

Cautions on handling

- **Before turning the power switch on**
  Check once again that all connections are correct and that there are no problems with the connection cables.

- **Power is supplied to some of the circuitry even when the unit is set to the standby mode. When leaving home for long periods of time, be sure to unplug the power cord from the power outlet.**

- **Image persistence (image burn-in)**
  Do not leave still images of the disc menu, the unit menu, etc., displayed on the TV screen for long periods. This can result in image persistence (image burn-in) on the screen.

- **About condensation**
  If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly. If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

- **Cautions on using mobile phones**
  Using a mobile phone near this unit may result in noise. If that occurs, move the mobile phone away from the unit when it is in use.

- **Moving the unit**
  Be sure to remove a disc, turn off the power and unplug the power cord from the power outlet. Next, disconnect the connection cables to other system equipment before moving the unit.

- **About Care**
  - Wipe the cabinet and control panel clean with a soft cloth.
  - Follow the instructions when using a chemical cleaner.
  - Benzene, paint thinner or other organic solvents, as well as insecticide, may cause material changes and discoloration if brought into contact with the unit, and should, therefore, not be used.
  - Sufficiently ventilate the place of installation
  If the unit is left in a room full of the smoke from cigarettes, etc., for long periods of time, the surface of the optical pickup could get dirty, in which case it will not be able to read the signals properly.

---

DENON’s unique high quality playback technology “Denon Link HD”
By connecting to a DENON AV receiver compatible with Denon Link HD, the sound localization becomes more precise, reproducing a clear and three-dimensional sound image. Because this unit makes the integrated circuits operate while sharing the same clock with the AV receiver, the transmitted digital audio has less jitter. This effect applies to any media audio source.

AV Pure Direct playback where there is no interference between audio and video
This unit outputs audio and video separately from two HDMI connectors. This allows for clear signal transmission where there is little interference between signals.

---

Features

- **Denon Link HD** By connecting to a DENON AV receiver compatible with Denon Link HD, the sound localization becomes more precise, reproducing a clear and three-dimensional sound image.
- **Supporting the Network operations**
  - When the unit is connected to the Internet, YouTube/NETFLIX service can be used.
  - Music, photos, video files stored on the device connected via the network can be played.
  - When the unit is connected to the Internet, privileged video can be downloaded from the Internet site to the built-in memory to enjoy BD-LIVE™ (page 13, “Connecting to a home network (LAN)”).

- **3D video playback**
  When the unit is connected to a 3D enabled TV with a high speed HDMI cable, you can enjoy 3D video.

- **Independent Block Construction for playing video and audio signals with high fidelity**
  The electronic circuits are separated to prevent electronic and electromagnetic noise caused by various electronic signals in the unit.

- **GUI equipped for good operability and visibility**
  This unit is equipped with an easy to see “Graphical User Interface” that uses menu displays and levels. The use of level displays increases operability of the this unit (page 37, “SETUP menu operation”).

- **HDMI control**
  By connecting a television or AV receiver that supports the HDMI control function to this unit using an HDMI cable, and enabling the HDMI control settings on each device, you can control other devices from one device (page 34, “HDMI control functions”).

---

Caution on handling

- **Before turning the power switch on**
  Check once again that all connections are correct and that there are no problems with the connection cables.

- **Power is supplied to some of the circuitry even when the unit is set to the standby mode. When leaving home for long periods of time, be sure to unplug the power cord from the power outlet.**

- **Image persistence (image burn-in)**
  Do not leave still images of the disc menu, the unit menu, etc., displayed on the TV screen for long periods. This can result in image persistence (image burn-in) on the screen.

- **About condensation**
  If there is a major difference in temperature between the inside of the unit and the surroundings, condensation (dew) may form on the operating parts inside the unit, causing the unit not to operate properly. If this happens, let the unit sit for an hour or two with the power turned off and wait until there is little difference in temperature before using the unit.

- **Cautions on using mobile phones**
  Using a mobile phone near this unit may result in noise. If that occurs, move the mobile phone away from the unit when it is in use.

- **Moving the unit**
  Be sure to remove a disc, turn off the power and unplug the power cord from the power outlet. Next, disconnect the connection cables to other system equipment before moving the unit.

- **About Care**
  - Wipe the cabinet and control panel clean with a soft cloth.
  - Follow the instructions when using a chemical cleaner.
  - Benzene, paint thinner or other organic solvents, as well as insecticide, may cause material changes and discoloration if brought into contact with the unit, and should, therefore, not be used.
  - Sufficiently ventilate the place of installation
  If the unit is left in a room full of the smoke from cigarettes, etc., for long periods of time, the surface of the optical pickup could get dirty, in which case it will not be able to read the signals properly.
**Cautions on handling for 3D video**

Before viewing 3D video, refer to the considerations described in the instruction manuals and other documents for your 3D enabled TV and 3D compatible glasses together with this manual.

- Do not view 3D video if you have epilepsy or heart disease, if you have had photosensitivity reactions before, or when you do not feel well. Doing so may aggravate the symptoms.

- When you view 3D movies, etc., take a break adequately, once per movie as a guide. Prolonged viewing of 3D video may cause eye strain.

- Restrict viewing of 3D video to those aged six and over as a guide. Children do not respond to tiredness and discomfort expressly, so they may suddenly get sick. When children view 3D video, parents should keep their eyes open for signs of eye strain in children.

- Stop viewing 3D video when you see double images or you can not see 3D effects. Viewing 3D video continuously in these conditions may cause eye strain.

- Stop viewing 3D video when you feel something wrong, get tired, or get sick. Viewing 3D video continuously in these conditions may cause poor physical condition. Take a proper break.

- Pay attention to nearby people and objects. Reaching for something without a sense of distance due to 3D video or moving your body suddenly in response to a 3D video image when you take it for a real object may cause injury to nearby people or cause damages to nearby objects resulting in injury. Keep fragile objects away from your viewing area.

- Wear your vision correction glasses or contact lens under the 3D glasses if you have nearsightedness, farsightedness, anisometropia, or astigmatism. Viewing 3D video without correcting your vision may cause eye strain or decreased vision.

- Sit at a proper distance from the screen when you view 3D video. Sitting too close to the screen may cause eye strain or decreased vision. Sit at a distance that is recommended in the instruction manual for your TV.
Here, we explain the connections and basic operation methods for this unit.

- Connections  page 5
- Playback (Basic operation)  page 13
- Settings  page 27
Connections

Important information

Make connections before using this unit.

To create a home theater that can play back higher quality video and audio by fully utilizing the capabilities of this unit and your video devices, connect this unit to each of your video devices with HDMI cables.

Cables used for connections

<table>
<thead>
<tr>
<th>Audio and video cable</th>

<td></td>
</tr>
<tr>
<td>Audio cable</td>
<td>Ethernet cable (sold separately)</td>
</tr>
</tbody>
</table>

NOTE

- Do not plug in the power cord until all connections have been completed.
- When making connections, also refer to the operating instructions of the other devices being connected.
- Do not bundle power cords together with connection cables. Doing so can result in noise.

Connections

You can connect HDMI-compatible devices to the unit.

Connections with an HDMI cable offer the following benefits that cannot be achieved with other connection methods.

- **High quality playback by transmitting audio and video via digital signals**
  HDMI connections can transmit high-definition video and high-quality audio formats (Dolby Digital Plus, Dolby TrueHD, dts-HD Master Audio).
  HDMI connections also convey information required for playback between devices. The information is used for copyright protection and TV resolution recognition, the HDMI control function, etc.

- **Transmission of audio and video signals with a single HDMI cable**
  Previous connections require multiple audio and video cables, but HDMI connections require only a single HDMI cable to transmit audio and video signals. This allows wires in a home theater system, which tend to be complicated, to be more organized.

- **Mutual control through the HDMI control function (page 34)**
  This unit and the HDMI device connected via HDMI can be linked to perform operations such as power control.

- **3D video playback, supported (page 6, 42)**

There is more than one version of HDMI standard. The supported functions and the performance vary according to the version. To enjoy these functions, the HDMI device connected to this unit also needs to use the same version of the standard. For the version of the HDMI standard on the device connected to this unit, see the device’s manual.

Some TVs do not support audio input via HDMI connections. For details, see your TV’s manual.

- Connecting this unit to a TV or AV receiver via HDMI connections (page 7)
- Connecting a TV (page 7)
- HDMI control functions (page 34)
- HDMI (page 42)
HDMI function

This unit supports the following HDMI functions:

About 3D function
This unit supports output of 3D (3 dimensional) video signals of HDMI. To play back 3D video, you need a TV or AV receiver that provide support for the HDMI 3D function.

- When playing back 3D video, refer to the instructions provided in the manual of your playback device together with this manual.
- This unit can overlay video on the OPTION setting and information bar while playing back 3D video contents. Note that for some 3D video contents this unit cannot overlay video on the OPTION setting and information bar.
- If 2D video is converted to 3D video on the television, the menu screen and status display on this unit are not displayed correctly. To view the menu screen and status display on this unit correctly, turn the television setting that converts 2D video to 3D video off.

HDMI control function (page 34)
This function allows you to operate external devices from the unit.

- The HDMI control function may not work depending on the device it is connected to and its settings.

Deep Color (page 42, 59)
When a device supporting Deep Color is connected, use a cable compatible with “High Speed HDMI cable” or “High Speed HDMI cable with Ethernet”.

High definition digital audio format

<table>
<thead>
<tr>
<th>Copyright protection system</th>
</tr>
</thead>
<tbody>
<tr>
<td>In order to play back digital video and audio such as BD-Video or DVD-Video via HDMI connection, both this unit and TV or AV receiver need to support the copyright protection system known as HDCP (High-bandwidth Digital Content Protection System). HDCP is copyright protection technology comprised of data encryption and authentication of the connected AV devices. This unit supports HDCP.</td>
</tr>
<tr>
<td>If a device that does not support HDCP is connected, video and audio are not output correctly. Read the owner’s manual of your television or AV receiver for more information.</td>
</tr>
</tbody>
</table>

HDMI connections

This section describes four methods for connecting this unit and a television, connecting directly or via an AV receiver. Use an appropriate method depending on the television to be used. For the connection, use an HDMI cable.

- Use only HDMI (High Definition Multimedia Interface) cable that bears the HDMI logo (genuine HDMI product). Using cable without the HDMI logo (non-genuine HDMI product) may result in abnormal playback.
- When outputting Deep Color or 3D, etc., we recommend you use “High Speed HDMI cable” or “High Speed HDMI cable with Ethernet” for enhanced high-quality playback.

Connecting a TV

This connection is to connect the unit and a television directly. Connect a TV to the HDMI OUT MONITOR(VIDEO) connector.

When a TV is connected to the HDMI OUT AMP(AUDIO) connector, it may not function properly.

Connecting this unit to a TV or AV receiver via HDMI connections

This method is for connecting the unit to an AV receiver. Connect an AV receiver to the HDMI OUT AMP(AUDIO) connector.

When an AV receiver is connected to the HDMI OUT MONITOR(VIDEO) connector, it may not function properly.

- The unit can play both NTSC and PAL discs.
- This unit automatically determines whether the disc is NTSC or PAL. Note that the function to convert NTSC to PAL is not included.
**AV Pure Direct connection**

This shows how to make a connection in order to use the AV Pure Direct function.

The MONITOR(VIDEO) connector outputs video signals.
The AMP(AUDIO) connector outputs audio and black video signals.

To use the AV Pure Direct function, you must change the Pure Direct setting.
For how to change this setting, see page 27.

---

**Connecting an AV Receiver compatible with the Denon Link HD function**

By making a Denon Link HD connection to an AV Receiver compatible with the Denon Link HD function, you can enjoy higher quality playback compared with when only the HDMI connector connection is made.

* This unit automatically recognizes the Denon Link HD connection with an AV Receiver. Therefore, you do not need to make special settings.
* When a correct Denon Link HD connection is made, the DENON LINK HD indicator on the front panel lights.
* For how to make and set the Denon Link HD connection for your AV Receiver, see the owner’s manual of your AV Receiver.
* This unit does not support DENON LINK 2nd/3rd/4th.

---

**Connecting to a device equipped with a DVI-D connector**

Use an HDMI DVI-D conversion cable.

* The audio signal is not output. Make the appropriate audio connections for your devices.
* The video signal will be in RGB format.
* You cannot output to a DVI-D device that does not support HDCP (high-bandwidth digital content copyright protection system).
* Video may not be output depending on the combination of devices.
Connecting a 2-channel audio amplifier

This connection is for playback of audio of this unit, using a 2-channel audio device.

For software recorded in multi-channel, an analog signal down-mixed to 2-channel is output.

Connecting a USB memory device to the USB port

- You can enjoy music, video and photo stored on a USB memory device.
- For operating instructions see "Playing files (MEDIA PLAYER)" (page 19).

To connect a USB memory device to this unit.

DENON does not guarantee that all USB memory devices will operate or receive power. When using a portable USB connection type HDD of the kind to which an AC adapter can be connected to supply power, use the AC adapter.

- If the “USB” indicator does not light, turn the power off, reinsert the USB memory device, and turn the unit on again.

**NOTE**

- USB memory devices will not work via a USB hub.
- Do not use an extension cable when connecting a USB memory device. This may cause radio interference with other devices.
- Be sure to turn the power off when inserting or removing a USB memory device. Data stored in the USB memory device or the memory of the unit may be damaged.
- Compatibility of all USB memory devices is not guaranteed.
- For reformatting a USB memory device, format it with FAT16 or FAT32.
Connecting to a home network (LAN)

You can connect this unit to your home network (LAN) to perform various types of playbacks and operations as follows. Make network connections for this unit by carefully reading information on this page.

- Playback of network audio or video such as the media servers
- Playback of audio or video from online services
- BD-Live™

In addition, when an updated firmware becomes available for improving this unit, the update information is delivered from us to this unit over the network. You can then download the latest firmware.

For more information, select “Firmware Update” (page 39).

Network settings are necessary. See “Network” (page 40) for more information on network setting.

Required system

- Broadband internet connection
- Modem
  Device that connects to the broadband circuit and conducts communications on the Internet. A type that is integrated with a router is also available.
- Router
  When using this unit, we recommend you use a router equipped with the following functions:
  - Built-in DHCP server
  - Built-in 100BASE-TX switch
  - When connecting multiple devices, we recommend a switching hub with a speed of 100 Mbps or greater.
- Ethernet cable
  (CAT-5 or greater recommended)
  - Use only a shielded STP or ScTP LAN cable which is available at retailer.
  - The normal shielded-type Ethernet cable is recommended. If a flat-type cable or unshielded-type cable is used, other devices could be affected by noise.

NOTE

- If you have an Internet provider contract for a line on which network settings are made manually, make the settings at “Network” (page 40).
- With this unit, it is possible to use the DHCP and Auto IP functions to make the network settings automatically.
- When using this unit with the broadband router’s DHCP function enabled, this unit automatically performs the IP address setting and other settings.
  When using this unit connected to a network with no DHCP function, make the settings for the IP address, etc., at “Network” (page 40).
- When setting manually, check the setting contents with the network administrator.

For connections to the Internet, contact an ISP (Internet Service Provider) or a computer shop.
Connecting to a home network (LAN)

Checking the network connection

After connection, test the Internet connection with “Connection Test” (page 40) in “Network” on the SETUP menu.

- If “Network is FAILED.” is displayed in the test, check the IP address with “Network” in “Information” on the SETUP menu, then set “DHCP” to “Manual” (page 40).

- The unit can use the DHCP function to automatically set up the network.
- When setting up your network manually, after subscribing to an ISP, make the settings according to directions in “Network” on the SETUP menu (page 40).
- If you connect the unit to a network without a DHCP function, conduct IP address and other settings according to “Network” on the SETUP menu (page 40).
- The unit does not support PPPoE. If you subscribe to a service that is set with PPPoE, a PPPoE compatible router is required.
- When setting up the network manually, consult with your network administrator for the settings to make.

Registering the connected device for the network

For playing files stored on a device connected via a network, the device must have the unit registered in advance.
- For registering, refer to the operation manual supplied with the server.
- For Internet connections, use an ISP (Internet Service Provider). Ask your local dealer for details.

NOTE
- Do not connect an NETWORK connector directly to the LAN port/Ethernet connector on your computer.
- It is necessary to subscribe to an ISP in order to connect to the Internet. If you already have a broadband connection, there is no need to subscribe anew.
- The router you can use varies with the ISP. For more information, contact your ISP or PC dealer.
- DENON assumes no responsibility whatsoever for any communication errors or problems resulting from customer’s network environment or connected devices.

Checking the network connection

After you connect this unit to the router with a LAN cable, use the following procedures to check the network connection.

1 Press POWER  to turn on power to the unit.

- Switch the input source for the TV and AV receiver so that the video output from this unit is displayed on the TV screen.

2 Press SETUP.

3 Use  to select “General Settings” – “Network” – “Connection Test” (page 40).

The connection test starts.

- If the connection is not established, a message is displayed. Check the connection settings and connection environment.

Registering the connected device for the network

For playing files stored on a device connected via a network, the device must have the unit registered in advance.
- For registering, refer to the operation manual supplied with the server.
- For Internet connections, use an ISP (Internet Service Provider). Ask your local dealer for details.

NOTE
- Do not connect an NETWORK connector directly to the LAN port/Ethernet connector on your computer.
- It is necessary to subscribe to an ISP in order to connect to the Internet. If you already have a broadband connection, there is no need to subscribe anew.
- The router you can use varies with the ISP. For more information, contact your ISP or PC dealer.
- DENON assumes no responsibility whatsoever for any communication errors or problems resulting from customer’s network environment or connected devices.
Connecting the power cord

After completing all the connections, insert the power plug into the power outlet.

To household power outlet
(AC 100 – 240 V, 50/60 Hz)

Power cord (supplied)

NOTE

• Do not plug in the power cord until all connections have been completed.
• Do not bundle power cords together with connection cables. Doing so can result in humming or noise.
Playback

Media icons

This unit can play back various kinds of media including video, audio, and photos. In this owner’s manual, corresponding media icons are indicated next to titles for each operation description. The following table shows what content can be played back for each media.

<table>
<thead>
<tr>
<th>Video</th>
<th>Audio</th>
<th>Photo</th>
</tr>
</thead>
<tbody>
<tr>
<td>Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD</td>
<td>Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM, FLAC</td>
<td>JPEG, PNG</td>
</tr>
</tbody>
</table>

Operations enabled during playback

Settings enabled during playback

NOTE

The symbol (prohibited mark) may appear on the top left of the TV screen during an operation. This means that the operation being conducted is prohibited.

Depending on the disc, certain operations may not be as described in this manual. Check each disc owner’s manual for more information.

During playback of a 2-layered disc, pictures may stop momentarily. This happens when the 1st layer switches to the 2nd layer. This is not a malfunction.

Turn on the power

Before using a remote control, insert the batteries (page 49)

1. Press \( \text{POWER} \) to turn on power to the unit.
   - The power indicator flashes green and the power turns on.
   - “LOADING” appears on the display, and disc information is read.

2. Turn on the power of the TV and AV receiver.
   - The “NO DISC” message is displayed if a disc is not loaded.

3. Set the TV and AV receiver source to the unit input.

When power is switched to standby

Press either \( \text{POWER} \) on the remote control, or \( \text{X} \) on the unit.

- The power indicator flashes in green. Then the indicator lights in red and the power is turned off.

[Power indicator status in “Energy Saving Mode” (page 38)]

- Energy Saving Standby : Off
- Normal Standby : Red
- Quick Start : Red

When “Auto Standby” is “On” (page 38), the following states are maintained for about 30 minutes, and then the power is automatically turned to standby.

- Disc not loaded
- Playback has stopped
- Stopped due to resume function

NOTE

During power standby, a slight amount of power is consumed. To totally cut off the power, remove the power cord from the power outlet.
About playback information

Press INFO to display the information bar display or media player display.

- To close the display, press INFO until it goes away.

- Displayed content differs depending on the media being played.
- Also, the information displayed while playing and stopped differs.

Information bar display

This screen is displayed while video content is being played back.

1. Operation display
2. Video format display
3. Title / Group display
4. Chapter / Track display
5. Time display
6. Audio format display
7. HDMI output signal display

Media player display

This screen is displayed when audio data is played.

1. Playback information display
2. Media information display
3. Seek bar
Home menu screen

The unit can play music, photos, video files stored in the USB memory device connected to the front panel of the unit or on the server connected via the network. For playback operation, use the Home menu screen.

Opening the Home menu screen

1. Press HOME. The Home menu is displayed on the television screen.
2. Press ▲▼▲ to move the cursor to the menu item to be used.
3. Press ENTER.

About playback information

1. MEDIA PLAYER (page 19)
   Music, photos, or video files on PC or NAS in the network or a USB memory device that is in the network or connected to this unit are played back.
2. NETFLIX (page 21)
   The NETFLIX contents are played.
3. YouTube (page 21)
   The YouTube contents are played.
4. SETUP (page 35)
   The SETUP menu setup screen is displayed for setting the unit.
5. QUIT
   The Home menu is closed.
Playing BD and DVD-Video

1. Press POWER to turn on power to the unit.

2. Press OPEN/CLOSE to open the disc tray and insert the disc.

3. Press the disc tray closes and playback starts.

4. Set audio and subtitles in the disc menu to play back BD/DVD-Video.

5. Press TOP MENU or POP UP MENU to display the menu.

   - Top menu (Example)
     - Chapter
     - Chapter
     - Chapter
     - Chapter

   - Pop up menu (Example)

   The Blu-ray disc has the pop-up menu function. While playing back the main title of a Blu-ray disc that supports the pop-up menu, you can press POP UP MENU to select the audio, subtitles, chapters, etc. during playback.

   - Operations enabled during playback
     - Settings enabled during playback

When playing back a hybrid BD disc, use the following procedures to select the playback layer before inserting the disc [page 53]:

- Press and hold DISC LAYER repeatedly to select "BD".
- Press DISC LAYER to select the playback layer.

Multi-channel compressed audio signals (bitstreams) are recorded on some BD and DVD discs. This unit can output such compressed audio signals to the AV receiver as they are, and the AV receiver can then decode these signals. Note that when playing back sub video recorded on a BD disc it is necessary for this unit to decode signals, so you must switch the audio output method. In this case, by referring to "Playing BD-Video compatible with Bonus View" [page 30], switch the BD audio mode before playback.

---

BD multi-channel audio is not output

- When stereo (2-channel audio) is selected in the disc menu audio settings, multi-channel audio is not output.
- Select a multi-channel setting (such as 5.1-channel).
- Make sure that the connected HDMI device supports the multi-channel audio input.
Playing Super Audio CD

1. Press POWER \( \odot \) to turn on power to the unit.

2. Press and hold DISC LAYER repeatedly to select “Multi”.
   
   **NOTE**
   Select the disc layer before a disc is inserted.

   - Multi  Audio  BD
   - Multi  Super Audio CD
   - Audio  DVD-Audio
   - BD  Hybrid BD

3. Select the playback area and layer with DISC LAYER (\( \text{\textcopyright} \) page 54).
   - Multi  Stereo  CD
   - Multi  2-channel area of the HD layer.
   - Stereo  Stereo  CD
   - CD  CD layer

4. Press OPEN/CLOSE \( \uparrow \) to open the disc tray and insert the disc.

5. Press \( \uparrow \) to close the disc tray and start playback.

   The area/layer selected with DISC LAYER remains in the memory even when the power is turned off.

- Operations enabled during playback (\( \text{\textcopyright} \) page 27)
- Settings enabled during playback (\( \text{\textcopyright} \) page 27)

Playing CD

1. Press POWER \( \odot \) to turn on power to the unit.

2. Press OPEN/CLOSE \( \uparrow \) to open the disc tray and insert the disc.

3. Press \( \uparrow \).

   The disc tray closes and playback starts.

- Operations enabled during playback (\( \text{\textcopyright} \) page 27)
- Settings enabled during playback (\( \text{\textcopyright} \) page 27)
# Playing DVD-Audio

1. Press POWER to turn on power to the unit.

2. Press and hold DISC LAYER to select “Audio”.
   
   **NOTE**
   Select the disc layer before a disc is inserted.

   - Multi
   - Audio
   - BD
   - Super Audio CD
   - Audio
   - BD
   - Hybrid BD

3. Select the playback part with DISC LAYER.

   - Audio part
   - Video part

4. Press OPEN/CLOSE to open the disc tray and insert the disc.

5. Press ▶. The disc tray closes and playback starts for the selected part.

---

## Playing bonus group

DVD-Audio discs may have a bonus group that can be played after entering a password.

- **If you enter the wrong password**
  Select the bonus group again and enter the correct password.

## Selecting still images

When a DVD-Audio disc has still images on it, you can choose the image to display.

Press DVD A PAGE during playback. The next still image is displayed.

- **Operations enabled during playback**
  (See page 22)
- **Settings enabled during playback**
  (See page 27)
Files on a USB memory device, disc or a server connected to the unit are played using the Media Player of the unit.

- Before operation, start the server software of the computer (Windows Media Player, etc.), and make settings for the server contents so that files can be played via the network.
- For details, refer to the operation manual supplied with the server software.

1. Press HOME. The Home menu is displayed on the television screen.

2. Use △▽ to select “MEDIA PLAYER” then press ENTER. Devices connected to the unit are listed on the menu screen of Media Player.

3. Select a device on which a file to be played is stored with △▽, then press ENTER.

4. Use △▽ to select a folder to be played, then press ENTER. Folders classified by file type are listed on the menu screen.

   - Files are classified as follows:
     - Video: DivX, MPEG, AVI, WMV
     - Music: MP3, WMA, AAC, LPCM, FLAC
     - Photo: JPEG, PNG
     - AVCHD: AVCHD content
     - USB memory device only

   Here, “Photo” is selected as an example.

5. Select a file to be played on the file list on the screen with △▽, then press ENTER. A slide show begins and still images are switched at 1-10 second intervals.

   - With a large image file, the image may display for longer than the set time.
   - For the file types that can be played, see “Files” (page 52).
Changing the still image being played
Press ◀ or ▶.
Before playback or display of next image.

Pausing the display
Press II.
To cancel pause, press ►.

Changing interval of slide show
Press ◀ or ▶.

Changing the still image orientation
Press ◀ or ▶.
▲: Invert
▼: Mirror
◁: Rotate counterclockwise
▷: Rotate clockwise

Change the media for playback of a file
When the source of a file for playback is changed to another media, press ◀ to return to step 3 and select the media to be played.

Playback video or audio may be interrupted or playback may be disabled, depending on the connection environment of devices connected via the network.
If a file cannot be played on the unit, it may be played by converting the format on the connected device.
The connected device cannot play data from the unit.
It may require a little time to start playback, depending on the size of a file to be played.
For the file types that can be played, see “Files” (page 52).
Playing YouTube video

The operation for the video site YouTube is described here.

1. Press **HOME**. The Home menu is displayed on the television screen.
2. Use **△▽◁▷** to select “YouTube” then press **ENTER**. The unit connects to YouTube.
   - You can also press **YouTube** to select “YouTube” directly.
3. Select the contents that you want to watch using **△▽◁▷**, and press **ENTER**. Playback begins.

About YouTube

- YouTube is a video file-sharing service operated and managed by YouTube Inc.
- The unit can play video hosted by YouTube.
- YouTube and the YouTube logo are the registered trademarks of Google Inc.
- The YouTube content is independently managed by YouTube, LLC.
- YouTube content may include information that may be deemed inappropriate.
- This unit must be connected to a working Internet connection in order to watch YouTube. For seamless playback of YouTube video contents, the unit needs effective speed greater than 6 Mbps for HD video contents, and greater than 2 Mbps for SD video contents, between the unit and YouTube server.
- We recommend using a broadband line such as FITH (optical), ADSL, or CATV. The video content may not be displayed correctly, and/or may not be played seamlessly depending on the usage environment, or communication environment, or the connection status of the line, or on the traffic status of the line.
- You cannot connect to YouTube via a proxy.
- To set the language to be displayed on the screen, configure the settings in “Language” – BD Player Menus” (page 39) in the menu.

**NOTE**

- If buttons other than **△▽◁▷** or **ENTER** are pressed while watching YouTube, the button may not work, or a different function may operate.
- Some contents cannot be played using this unit.
- Available service details and screens may change or exit without prior notice.
- We cannot accept any responsibility for the content supplied by YouTube.
- If you have any inquiries about YouTube, contact YouTube through the official homepage [http://www.youtube.com](http://www.youtube.com).

Playing NETFLIX video

The operation for the NETFLIX streaming service is described here.

1. Press **HOME**. The Home menu is displayed on the television screen.
2. Use **△▽◁▷** to select “NETFLIX” then press **ENTER**.
   - You can also press **NETFLIX** to select “NETFLIX” directly.
3. Use **△▽◁▷** to select highlight a movie on your instant Queue.
4. Press **ENTER** a title that you want to watch. The second menu of title will appear.
5. Select “play” on the second menu and then press **ENTER**. Retrieving of title will be started.

For using “NETFLIX”, Internet connection is required. It is recommended to use a broadband line (effective speed 6 Mbps or more) such as FITH (optical), ADSL or CATV, etc.
- Even if the line speed is sufficient to make it viewable, pictures may be unstable, interrupted, or not viewed depending on the usage environment, communication environment, connecting line conditions, etc.
- The connection of NETFLIX may not be connected via proxy.
- For the usage conditions for NETFLIX, contact NETFLIX.
Operations enabled during playback

Media icons

This unit can play back various kinds of media including video, audio, and photos. In this owner’s manual, corresponding media icons are indicated next to titles for each operation description. The following table shows what content can be played back for each media.

<table>
<thead>
<tr>
<th>Media icons</th>
<th>Video : Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Audio : Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM, FLAC</td>
</tr>
<tr>
<td></td>
<td>Photo : JPEG, PNG</td>
</tr>
</tbody>
</table>

NOTE: Operations may not be available depending on the played back media or contents.

Pausing

Press 3 during playback.
The 3 indicator will light on the display.
- Resume normal playback by pressing 4.

Stopping

Press 2 during playback.
Playback stops.

About the resume function
When playback is stopped, the stop position is memorized.
- The 4 indicator flashes on the display. To resume play from the stop position, press 4 while stopped.

To cancel the resume function
Perform one of the following operations.
- Press 2 while stopped.
- Open the disc tray.
- Change the playback media mode with HOME.

NOTE
- The resume function does not work with disc menu playback or BD-J Blu-ray Disc Java compatible discs.
- The resume function does not work depending on the disc.
Operations enabled during playback

**Skipping to a desired chapter/track/file**

During playback, press 1 or 4.
- Press the button repeatedly to skip the chapter/track/file as many times as you press it.

**NOTE**
Skipping to the start of a title or group may be prohibited, depending on the media.

**Fast-forward/Fast-reverse**

During playback, press 6 or 7.
- Each time you press the button, the fast-forward/fast-reverse speed switches.
- The speed varies with the disc and file.
- Resume normal playback by pressing 1.

**NOTE**
- You cannot fast-forward/fast-reverse across files or tracks.
- Fast-forward/fast-reverse may be disabled with some DivX® files.
- Audio is not output during fast-forward/fast-reverse of a BD or DVD.

**Finding specific sections with search modes**

1. Press SEARCH to select a “Search”. The search mode setting bar is displayed at the top of the screen.
   - The search mode changes each time the button is pressed.

   ![Search Mode Bar](image)

2. Use ▼ to move the blue cursor to the item to search for and press ENTER.

   ![Search Mode Options](image)

   - Title/Group/Track search display
   - Chapter/Track search display
   - Title/Chapter Time search display
   - Track/Disc Time search display
   - Select “Title Time search” or “Chapter Time search”, using △▼, then press ENTER.

3. Enter the search criteria.
   - Once an entry is finalized, it searches for the specified location.
   - **6 – 9, +10**: Number entry
   - **ENTER**: Select
   - **CLEAR**: Clear

   **Entering numbers**
   - To enter 3: 3, ENTER®
   - To enter 26: 2, 6, ENTER® or +10, +10
   - To enter 138: 1, 3, 8, ENTER®
   - Depending on number of recorded songs or chapters, you may not need to use ENTER.
   - When the entry is wrong, press CLEAR to clear it.

**Search mode-compatible media and files**

<table>
<thead>
<tr>
<th>Search mode</th>
<th>0</th>
<th>1</th>
</tr>
</thead>
<tbody>
<tr>
<td>Title/Group/Track search</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Chapter/Track search</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Title/Chapter Time search</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Track/Disc Time search</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**NOTE**
- Search modes may not operate with some media.
- If you search during program/random playback, the program/random playback stops.
Memorizing locations to replay (Marker function)

You can attach a marker to a location you want to view or hear again, so that playback begins at that location.

1. Press SEARCH to select a “Marker search”. The Marker search mode setting bar is displayed at the top of the screen.

2. Press ENTER during playback. Memorize the current location under the selected number.

- Up to 12 locations can be memorized.
- The registered number is displayed in white letters.
- The elapsed playing time at the set location is displayed.

To play back memorized locations
Use < > to select the marker number, then press ENTER.

To erase markers
Select the marker number that you want to erase and press CLEAR.

Playing repeatedly (Repeat playback)

Press REPEAT during playback. The repeat mode icon is displayed at the top of the screen.

- The repeat mode changes each time the button is pressed.

- To resume normal playback, press REPEAT, and select “Repeat Off”.

About repeat modes
The available repeat modes vary depending on the disc or file you are playing.

<table>
<thead>
<tr>
<th>Mode</th>
<th>Title repeat</th>
<th>All repeat</th>
<th>Chapter repeat</th>
<th>Track repeat</th>
</tr>
</thead>
</table>

Operations enabled during playback

Playing repeatedly between specified points (A-B repeat)

1. During playback, press A – B at the desired starting point (A). The “A–” indicator will light on the display.
   - To cancel the starting point (A), press CLEAR.

2. Press A – B again at the desired ending point (B). The “B” indicator will light on the display, and A-B repeat playback will start.
   - To resume normal playback, press A – B, and select “Repeat Off”.

NOTE
- You cannot skip a title/file with A-B repeat.
- If you perform a search operation during A-B repeat playback, A-B repeat playback is cancelled.
- A-B repeat playback may not be available with some scenes.
- A-B repeat playback may not be available with some DivX® files.
- A-B repeat playback is not available with BD-J (Blu-ray Disc Java) compatible discs.

Some repeat modes may not be accessible depending on some media.
With some media, even when set to repeat playback, the disc may not return to the start of title or chapter, and may advance to the next scene.
Repeat playback is not available during A-B repeat playback.
Playing in random order
(Random playback)

Press RANDOM during playback.
The “RAND” lights on the display and
“Random Mode” is displayed on the screen.

Resuming normal playback
During random playback.

NOTE
Random playback may not be available with some media.

Playing in your preferred order
(Program playback)

You can program up to a maximum of 15 tracks.

1 Press PROG/DIRECT during playback.
The program setting screen appears.

2 Enter the track numbers you want to program on the program
setting screen.

   0 – 9, +10 : Number entry  ENTER : Set entry
   ▲ : Select  CLEAR : Clear

3 Press ▶.
Playback begins in the programmed order.
The “PROG” indicator lights on the display.

Checking the program contents
Press CALL.
• The programmed tracks are shown on the display of the unit each
time the button is pressed.

Erasing programmed tracks one by one
Press CLEAR on the program setting screen.

Display the program setting screen and press PROG/DIRECT.
• The “PROG” indicator lights off on the display.

If the unit is set to standby or the disc tray is opened, the program is
cloned.

NOTE
The programmed tracks can be set only for playback with CD and
Super Audio CD.

Playing images frame by frame

Press ■ while paused.
The disc advances frame by frame each
time the button is pressed.
• Resume normal playback by pressing ▶.

Frame by frame reverse playback is not available with the unit.
Operations enabled during playback

**Slow-forward/Slow-reverse**

Press `←` or `→` while paused.
- Each time you press the button, the slow playback speed switches.
  - 1/16  1/8  1/4  1/2
- Resume normal playback by pressing `▶`

Audio is not output during slow playback.

**Changing the subtitle**

During playback of a disc or file with recorded subtitles, you can switch the subtitles on/off as well as the subtitle language.

Press `SUBTITLE` during playback.
- The subtitle number currently being played is displayed.
- Each time you press the button, the subtitle switches.

1/3 English

**Switching the angle**

During playback of a BD or DVD-Video recorded with several camera angles, you can change the angle.

Press `ANGLE` during playback.
- The angle number for current playback is displayed.
- Each time you press the button, the angle switches.

1/2 Angle:

**Switching the audio**

With discs and files that have multiple audio track recording, you can change the audio during playback.

Press `AUDIO` during playback.
- The audio number currently being played is displayed.
- Each time you press the button, the audio switches.

1/2 English DTS-HD MA 7.1

- If multiple audio items are recorded, the current audio number/number of recorded audio items is displayed.

**NOTE**
- Depending on the media, audio switching may be restricted to operation of the disc menu. In this case, switch the audio on the disc menu.
- With a DivX® file, “MP3” or “Dolby Digital” audio formats and the number of recorded audio modes are displayed; the language option is not displayed.

Switching the subtitle

With discs and files that have multiple subtitle track recording, you can switch the subtitles on/off as well as the subtitle language.

Press `SUBTITLE` during playback.
- The subtitle number currently being played is displayed.
- Each time you press the button, the subtitle switches.

1/3 English

- If contents do not include subtitles, (prohibited mark) is displayed.
- Depending on the media, subtitle switching may be restricted to operation of the disc menu. In this case, switch the subtitles on the disc menu.
- With a DivX® file, the currently playing subtitle number and number of recorded subtitles are displayed; the language option is not displayed.

**NOTE**
- Angle changing may be restricted, depending on the disc.
Media icons

This unit can play back various kinds of media including video, audio, and photos. In this owner’s manual, corresponding media icons are indicated next to titles for each operation description. The following table shows what content can be played back for each media.

<table>
<thead>
<tr>
<th>Media Type</th>
<th>Supported Formats</th>
</tr>
</thead>
<tbody>
<tr>
<td>Video</td>
<td>Blu-ray Disc, DVD-Video, DivX plus HD, MPEG, AVI, WMV, AVCHD</td>
</tr>
<tr>
<td>Audio</td>
<td>Super Audio CD, CD, DVD-Audio, MP3, WMA, AAC, LPCM, FLAC</td>
</tr>
<tr>
<td>Photo</td>
<td>JPEG, PNG</td>
</tr>
</tbody>
</table>

Changing the brightness of the display (Dimmer control)

The brightness of the display can be changed.

Press DIMMER.

- The brightness changes each time the button is pressed.

<table>
<thead>
<tr>
<th>Bright</th>
<th>Dim</th>
<th>Off</th>
<th>Dark</th>
</tr>
</thead>
</table>

Playing high-quality audio (Pure direct function)

This enables you to play high quality audio by stopping the video signal, etc., output, and outputting the high quality analog audio signal.

Press PURE.

- The Pure Direct mode changes each time the button is pressed.

<table>
<thead>
<tr>
<th>Pure Direct 1</th>
<th>Pure Direct 2</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off</td>
<td>Pure Direct 1</td>
</tr>
</tbody>
</table>

AV Pure Direct (AV P.Direct)

- The HDMI OUT MONITOR(VIDEO) connector outputs only video signals.
- The HDMI OUT AMP(AUDIO) connector stops video signals and outputs audio signals.

- Pure Direct 1: This turns off the HDMI video output and display.
- Pure Direct 2: This turns off the HDMI video output.
- Off: This turns off pure direct function.

You cannot use PURE while the SETUP menu is displayed.
Video resolution

This section is for making the settings for video output resolution. Set them depending on the connected television.

- Press VIDEO RESOLUTION.
  - The resolution is changed as shown below each time VIDEO RESOLUTION is pressed.
  - You cannot set resolution individually for each HDMI output.
  - When you press and hold VIDEO RESOLUTION with the resolution appearing on the display, "HDMI INIT" appears on the display and the setting returns to the default.

- The default settings is underlined.

<table>
<thead>
<tr>
<th>Resolution</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>1080P24</td>
<td>1080 progressive, 24-frame</td>
</tr>
<tr>
<td>1080P</td>
<td>1080 progressive</td>
</tr>
<tr>
<td>1080i</td>
<td>1080 interlaced</td>
</tr>
<tr>
<td>480/576P</td>
<td>480/576 progressive</td>
</tr>
<tr>
<td>720P</td>
<td>720 progressive</td>
</tr>
</tbody>
</table>

Settings enabled during playback

- If the video resolution is not set to "Auto", set it to correspond with the resolution of your television/AV receiver.
- Images will not be projected normally if the television/AV receiver resolution and this unit’s output resolution do not match.
- Audio and video will be temporarily interrupted if the power of the connected device currently playing is turned off, or the input is switched.
- When you change the video resolution of the unit, it takes a few seconds up to about 10 seconds for validation between the unit and the connected device. Audio/video is not output during this period.
Adjusting the picture quality (Picture control)

You can adjust the picture quality to your liking.
The adjusted values can be stored in Memory 1 through Memory 5.

1. Press PICTURE ADJUST.
The currently set status is displayed.

2. Press ▲▼ to select a memory number to be used, and then press ENTER.

3. Press ▲▼ to select an item then press ENTER or ▶.

4. Change the setting with ▲▼.

To finalize picture adjustments

- Press PICTURE ADJUST after adjusting.
- The pop up menu of the picture adjustments is disappeared on the screen.

The picture adjustment settings are retained in memory even after the power is turned off.

NOTE

- During 3D playback, you cannot adjust “Video resolution” (p. 28) or “Adjusting the picture quality (Picture control)” (p. 29).
- You cannot set picture adjustments individually for each HDMI output.

<table>

Advanced version

This chapter describes how to set the HDMI control that links devices connected via HDMI to this unit, how to play back sub contents of Blu-ray discs, and other detailed settings.

- Convenient functions  page 32
- How to make detailed settings  page 35
Playing BD-Video compatible with Bonus View

With a BD disc that is compatible with bonus view (picture-in-picture), in addition to the main video (primary video) stored on the disc, you can playback the video director’s commentary and simultaneously ongoing sub-story, as well as sub-video such as alternative camera angles (secondary video).

1. Press OPTION while BD is being played back. The OPTION setting menu is displayed.

2. Use ▲▼ to select “BD Audio Mode”, then press ENTER or ►.

3. Switch the “BD Audio Mode” setting to “Mix Audio Output”.

4. Press ◀ and then ▲▼ to select the secondary video, and press ENTER or ►.
   Secondary videos that can be played back are displayed.

5. Use ▲▼ to select the desired secondary video.

- Off: Does not display Secondary Video.
- 1/X: Displays the first Secondary Video.
- 2/X: Displays the second Secondary Video.
- X/X: Displays the X th Secondary Video.

Note:
- “X” is the number of Secondary Videos recorded and differs depending on the disc.
- For using Bonus View, some BD discs require built-in memory or external memory.
- The unit has a built-in memory. If the memory capacity used for Bonus View will exceed the remaining built-in memory capacity, using a USB memory device of 1 GB or more is recommended.
- The playback method, etc., is determined by the disc, and varies depending on the disc. Refer to the operation guide of the relevant disc.
Playing back BD-Live™

For some Blu-ray discs, you can access dedicated sites for BD-Live™ contents on the Internet from the disc menu. In this case, you can download BD-Live™ contents on the Internet to this unit for playback. To play back BD-Live™ contents, this unit must be connected to the Internet. Establish the Internet connection by referring to “Connecting to a home network (LAN)” (page 10).

Select the save location of contents

Select the location to which BD-Live™ contents are downloaded. You can select to download to either the internal memory of this unit or your USB memory device. By default the contents are saved in the internal memory of this unit. To check the available internal memory space, see “BD DATA Information” (page 39) in the SETUP menu.

1. Press SETUP. The menu screen is displayed.
2. Use ▲▼◄► to go to “General Settings” – “System” – “BD DATA Utility” – “BD DATA Memory” (page 39) and then press ENTER.
3. Use ▲▼ to select the save location and then press ENTER.

- **Internal**: Saves BD-Live™ content files in the internal memory of this unit.
- **External**: Saves BD-Live™ content files in your USB memory device.

If you select “External”, connect your USB memory device to the USB port (page 9).

To check the available internal memory space, see “BD DATA Information” (page 39) in the SETUP menu. To download contents larger than the available space, use the USB memory device.

Playing back BD-Live™ contents

Before these steps, connect this unit to the Internet.

1. Press POWER to turn on power to the unit.
2. Press OPEN/CLOSE and insert BD that is compatible with BD-Live™.
3. From the disc menu, select the BD-Live™ playback icon and press ENTER. Contents are downloaded from the BD-Live™ download site and played back. Operations vary depending on the disc used. Follow the displayed guidance.

Depending on your network environment, it may take a long time to download or the download may not be completed. See “Connecting to a home network (LAN)” (page 10) for required specifications for your Internet connected devices.

NOTE

Insert or remove a USB memory device while the power is in standby. If you insert a USB memory device while the power is ON, the USB memory device may not be access.
**HDMI control functions**

The HDMI connection not only transmits video and audio but also conveys information between the connected devices. The HDMI control function conveys control signals between the devices to enable them to link with each other. This is a useful function. For example, when you perform a power-related operation on one device, then the corresponding power operation is also performed on other devices connected with that device.

### Operations possible by HDMI control
- Turning off the TV's power turns the unit’s power to standby.
- Operating the unit via the TV’s remote control. (When the TV’s remote control has player operation buttons)

### Setting procedure

1. From “HDMI AMP On” or “HDMI MONITOR On”, select the HDMI output connector for which you want to enable the HDMI control function.
   - SETUP menu “System” – “HDMI Control” *(Page 38)*
   - You cannot enable the HDMI control function for both HDMI outputs simultaneously. It is selectable.

2. Turn on all devices that are connected to the HDMI output connector set in step 1.

3. Set the HDMI control function for all devices connected by HDMI cable.
   - Please consult the operating instructions for the connected devices to check the settings.
   - Carry out steps 2 and 3 should any of the devices be unplugged.

4. To ensure that the unit’s HDMI video output is projected on the TV screen, change the input function of the TV and AV receiver.

5. When you turn the TV’s power to standby, check that the power of the unit and AV receiver also goes on standby.

---

If the HDMI control function does not operate properly, check the following points.
- Is the TV or AV receiver compatible with the HDMI control function?
- Are the HDMI control function settings of all equipment correct? (Step 3)
- After setting, did you add another HDMI device connection or make any changes in the connections? If so, make the settings again.
- Is HDMI control enabled output correct assignment?
- Is the unit in Energy Saving Standby?

**NOTE**

- Some functions may not operate depending on the connected TV or AV receiver. Check the owner’s manual of each device for details beforehand.
- When “HDMI Power Off Control” *(Page 38)* is set to “Off”, the unit does not go to standby even if the connected device is in the standby mode.
### How to make detailed settings

#### Menu map

By default, this unit has recommended settings defined. You can customize this unit based on your existing system and your preferences.

Pressing **SETUP** displays the SETUP menu. From this menu, you can move to various setting screens.

SETUP menu operation

1. Press SETUP.
   - The SETUP menu is displayed on the TV screen.
   - The SETUP menu can also be displayed from “SETUP” in the home menu (Page 15).

2. Press \( \Delta \nabla \downarrow \uparrow \) to select the menu to be set or operated.
   - To return to the previous item, press \( \downarrow \).

3. Press ENTER to enter a setting.

Text colors of selected items of the SETUP menu are as follows:
- White : These items can be selected.
- Gray : These items cannot be selected.

**NOTE**
The resume function is activated, you may not make correct settings.

Exiting the SETUP menu
Press SETUP while the SETUP menu is displayed.
- The SETUP menu display disappears.

Examples of SETUP menu screen displays
Typical examples are described below.

**Menu selection screen (Top menu)**

- Press \( \Delta \nabla \downarrow \uparrow \) to select and then press \( \downarrow \).
  (Or press ENTER.)

- Currently selected setup icon
- Currently selected setup item
- List of SETUP menu setup icons
- List of currently selected setup items

**List**
- Returns to the previous item. Use \( \uparrow \) to switch.
- Selected item. Switch the selected item using \( \Delta \nabla \).
- Switch to the next item. Use \( \downarrow \) to switch.

- List of items of currently selected advanced settings
- Currently selected advanced settings
General Settings
Settings for system, language, parental lock, network, etc. can be made.

System
Set the following settings.
- Screen saver settings
- Power saving mode settings
- HDMI control function settings
- Initialize settings
- Firmware update from the Internet
- BD-Live™ download data save location settings and initialization

Firmware Update
Updates the firmware of the unit via the Internet.

Check for Update: Checks if a newer version of firmware exists. Press ENTER to see the approximate amount of time required for the update. If the firmware is already updated to the latest version, the firmware updating operation starts after you press ENTER. When the update starts, a progress bar and the remaining time required to complete the update are displayed on the television screen. When the update completes, the units turns to the normal state.

Update Notification
Displays a notification message when there is any firmware available for update.

On: The message for updating is displayed on a television screen.
Off: The message for updating is not displayed on a television screen.

BD DATA Utility
Sets the save location for downloaded BD-Live™ data or initializes the internal memory.

BD Data Information: Displays the available internal memory space on this unit or the free space on the connected USB memory device.
FMT BD DATA: Initializes BD DATA for the internal memory of this unit or the connected USB memory device.
This operation deletes all data. When a USB memory device that stores the data is connected, never execute this operation.

BD DATA Memory: Selects the save location for BD-Live™ download contents.
- Internal: Saves in the internal memory of this unit.
- External: Saves in the USB memory device connected to this unit.
To download files larger than the available internal memory space on this unit, select "External".

Language
Set the playback audio, subtitles, and menu display languages.

- Index  page 66
Part names and functions

Front panel

For buttons not explained here, see the page indicated in parentheses ( ).

1. Power indicator
2. Power operation button (O)
3. PURE DIRECT button
4. Remote control sensor
5. Display
6. Disc tray open/close button (D)
7. USB port
8. Reverse-skip/Forward-skip buttons [◄◄, ►►]
9. Stop button (●)
10. Play button (▶)
11. Disc tray
12. DENON LINK HD indicator

If or is pressed when the power is in standby, the power is turned on.
Display

1. **Playback mode indicators**
   - **»**: During Playback
   - **II**: During pause and step-by-step playback
   - **PROG**: During program playback
   - **1 A-B**: During repeat playback

2. **Information display**
   Displays various information or playback elapsed time and so on of the disc.

3. **Audio channel indicators**
   - **2CH**: 2-channel playback
   - **MULTI**: Multi-channel playback

4. **HDMI output indicator**
   Lights when the HDMI connection is made.
   - Does not display when the HDMI cable is not correctly connected or when the HDMI connection is not verified.

5. **Time mode indicators**
   - **TOTAL**: Total time of Super Audio CD and CD
   - **SING**: Elapsed time of title/chapter/track/file being played
   - **REM**: Remaining time of title/chapter/track/file being played

6. **Group/Title/Track/Chapter indicators**

7. **Media indicators**
   - **BD**: BD
   - **DVD**: DVD-Video, DVD-R/+R/-RW/+RW
   - **DVD AUDIO**: DVD-Audio
   - **SUPER AUDIO CD**: Super Audio CD
   - **CD**: CD
   - **USB**: USB memory device
   - **NET**: NETWORK
   Lights when this unit is connected to the network.
Rear panel

For buttons not explained here, see the page indicated in parentheses ( ).

1. NETWORK connector
2. Denon Link HD connector
3. HDMI OUT connectors
4. MONITOR (VIDEO) OUT
5. AMP (AUDIO) OUT
6. AUDIO OUT connectors
7. MONITOR (VIDEO) IN
8. AMP (AUDIO) IN
9. REMOTE CONTROL jacks
10. Extension jack for future use.
11. RS-232C connector
12. Extension connector for future use.
13. AC inlet (AC IN)

NOTE
Do not touch the inner pins of the connectors on the rear panel.
Electrostatic discharge may cause permanent damage to the unit.

For software recorded in multi-channel, analog signals that have been down-mixed into 2 channels are output.
Remote control unit

For buttons not explained here, see the page indicated in parentheses ( ).

1. Disc tray OPEN/CLOSE button (·) (16, 19)
2. Remote control signal transmission/status display (50)
3. Number buttons (0 - 9, +10) (23, 25, 40, 40, 42)
4. Network content buttons (21)
5. Information button (INFO) (10)
6. AMP POWER button (X) (9)
7. AMP Source select buttons (SOURCE df) (14)
8. AMP MUTE button (·) (14)
9. TOP MENU button (16)
10. Cursor buttons (△▼▲▼) (16, 17)
11. RETURN button
12. System buttons
   - Fast-reverse/Fast-forward buttons (··, ··)
   - Play button (·)
   - Stop buttons (···, ···)
   - Pause/Still button (·)
   - Stop button (·)
13. A-B Repeat button (A-B) (20)
14. SUBTITLE button (20)
15. REPEAT button
16. ANGLE button
17. RED/GREEN/YELLOW/BLUE button
18. VIDEO RESOLUTION button (20)
19. DVD A PAGE button (10)
20. Remote control signal transmitter (69)
21. POWER button (G) (10)
22. Program/Direct button (PROG/DIRECT) (10)
23. CLEAR button (20, 24, 25)
24. CALL button (20)
25. DIMMER button (10)
26. SEARCH mode button (13, 20)
27. HOME button (10)
28. AMP VOLUME button (A Y) (10)
29. POP UP MENU button (10)
30. ENTER button (13, 14)
31. SETUP button (10)
32. AUDIO button (10)
33. RANDOM button (10)
34. Pure direct button (PURE) (27)
35. OPTION button (10)
36. PICTURE ADJUST button (10)
37. DISC LAYER button (17)

For operations with the buttons, follow the instruction guidance on the disc.

NOTE
- The vudu button cannot be used.
- The 1, 2, 3, and 4 buttons are for operations for DENON AV receivers. Depending on the specifications of the AV receiver used, operations may not be allowed with this remote control.
- Protection films are attached to the remote control surface and sensor part. Remove these protection films by using, for example, tapes before use.
Remote control unit

Inserting the batteries

1. Slide the rear lid in the direction of the arrow and remove it.

2. Load the two batteries properly as indicated by the marks in the battery compartment.

3. Put the rear cover back on.

- If the battery level is low, the remote control signal transmission/status display flashes 5 times when a button is pressed. In this case, replace the batteries soon.
- If the batteries are completely exhausted, the remote control signal transmission/status indicator goes dark.
- The remote control unit may function improperly if rechargeable batteries are used.

NOTE
- Insert the specified batteries in the remote control.
- Replace the batteries with new ones if the set does not operate even when the remote control is operated close to the unit. (The supplied batteries are only for verifying operation.)
- When inserting the batteries, be sure to do so in the proper direction, following the and marks in the battery compartment.
- To prevent damage or leakage of battery fluid:
  - Do not use a new battery together with an old one.
  - Do not use two different types of batteries.
  - Do not attempt to charge dry batteries.
  - Do not short-circuit, disassemble, heat or dispose of batteries in flames.
  - Do not keep the battery in a place exposed to direct sunlight or in places with extremely high temperatures, such as near a heater.
- If the battery fluid should leak, carefully wipe the fluid off the inside of the battery compartment and insert new batteries.
- Remove the batteries from the remote control if it will not be in use for long periods.
- Used batteries should be disposed of in accordance with the local regulations regarding battery disposal.

Operating range of the remote control

Point the remote control at the remote sensor when operating it.

Approx. 7 m

- The set may function improperly or the remote control may not operate if the remote control sensor is exposed to direct sunlight, strong artificial light from an inverter type fluorescent lamp or infrared light.
- When using 3D video devices that transmit radio communication signals (such as infrared signals etc.) between the various units (such as the monitor, 3D glasses, 3D transmitter unit etc.), the remote control unit may not operate due to interference from these radio communication signals. If this occurs, adjust the direction and distance of the 3D communication for each unit, and check that the remote control unit operation is not affected by these signals.
Remote control settings
(remote control side)

Switches when this unit remote control operates another DENON BD players in the vicinity.
Set the remote control code simultaneously on the unit, too (page 41 "Remote ID").

1 Hold POWER  and OPEN/CLOSE pressed simultaneously.
While these buttons are held pressed, the remote control signal transmission/status display flashes twice, and the remote control enters Setup mode.

2 When the number button “1” is pressed, the remote control ID is set to “DENON 1”.
When the number button “2” is pressed, the remote control ID is set to “DENON 2”.
When number key input is completed and the remote control signal transmission/status display flashes twice, the settings for the remote control are completed.

NOTE
- If you made the remote control settings incorrectly, the remote control signal transmission/status display flashes for 2 seconds, and then goes off. If this happens, the settings are incorrect and retry the settings.
- Match the signal code of the remote control with the signal code of the unit. If the remote control code is different, you cannot operate the this unit with the remote control.
- Even if you change the remote control code, set the SETUP menu “Others”–“Legacy Remote” (page 41) to “Off” when operating this unit with a remote control other than DENON’s.

If the signal code of the remote control does not match the signal code of the unit, the remote control code set on the unit is shown on the display.
[Example]
If the code setting on the unit is "DENON 1", and the setting on the remote control is "2", "PLAYER 1" is shown on the display.

</tbody>
</table>

**NOTE**

- A disc may not be accessible or may play incorrectly due to audio and video interruptions, etc., depending on the recording conditions when recorded with a BD recorder or DVD recorder.
- Unfinalised DVD-R/RW/+R/+RW, and CD-R/RV discs may not play back. Finalize discs before playing.
- Compatibility of a Blu-ray Disc as the specifications for Blu-ray Discs are new and advance day by day, discs of some types or versions may not be played with the unit. The firmware of this unit is updated periodically. Be sure to update the firmware to the latest version before using the unit.

The following discs will not play back on this unit.
- BD-RE Ver1.0 (BD disc with cartridge)
- BD-RE
g- DVD RAM
- CDV (Only the audio part can be played)
- CD-G (Only the audio signals can be output)
- Non-standard CD (CD with copy protection, etc.)
- Unauthorised disc (Pirated disc)
- Disc with recording area less than 55 mm in diameter
- Video Single Disc (VSD) / DVD Video CD / Super Video CD / Compact Disc-Interactive (CD-I) / Photo CD

1. BD-Video/DVD-Audio/DVD Video discs may not operate as described in this manual due to menu structure.
2. BD players and BD-Video discs, and DVD players and DVD Video discs each have their region codes (codes assigned for each region). Playback is not possible if the codes do not match.
3. Compatibility of a Blu-ray Disc as the specifications for Blu-ray Discs are new and advance day by day, discs of some types or versions may not be played with the unit. The firmware of this unit is updated periodically. Be sure to update the firmware to the latest version before using the unit.
4. Including dual-layer discs.

1. Files with digital rights management (DRM) other than those protected by DivX® and WMDRM of devices on the network cannot be played.
2. Except CD-R/RW. Some files may not be playable depending on the transfer rate (Bit rate).
Playable media

About DivX® Video-on-Demand (VOD)
- When you purchase or rent a DivX® file through the official site of DivX® Video-On-Demand (VOD) services, the unit registration code is required. For details, see “DivX Registration” (vPage 41).
- A DivX® VOD file recorded with a different code from the unit registration code cannot be played back.
- Some DivX® VOD files are restricted to a certain number of playable times. If your DivX® VOD file has such a limit, the number of playable times is displayed on the DivX® VOD display screen.
- Use <D> to select “Yes” if you want to play a file, or to select “No” if you do not want to play it. Then, press ENTER to confirm the selection.

NOTE
- ABOUT DIVX VIDEO: DivX® is a digital video format created by DivX, LLC, a subsidiary of Rovi Corporation. This is an official DivX Certified® device that plays DivX video. Visit divx.com for more information and software tools to convert your files into DivX videos.
- ABOUT DIVX VIDEO-ON-DEMAND: This DivX Certified® device must be registered in order to play purchased DivX Video-on-Demand (VOD) movies. To obtain your registration code, locate the DivX VOD section in your device setup menu. Go to vod.divx.com for more information on how to complete your registration.

USB memory device
- The unit supports the FAT 16 and FAT 32 file system. It does not support the NTFS file system.
- The limit of folders and files that can be displayed on the unit is as shown below. (The limit shown includes the root folder.)

<table>
<thead>
<tr>
<th>Folder/folder names</th>
<th>999</th>
</tr>
</thead>
<tbody>
<tr>

<td>60</td>
</tr>
</tbody>
</table>

- If there are too many characters to be displayed on one line, the display becomes scrollable.
- File names/title names/artist names/album names are displayed on the Media player display screen.

NOTE
- The unit supports high-speed USB file transfer (conforming to USB 2.0).
- A/V/PIP content stored on the USB memory device connected to the unit can also be played.
- USB memory devices of up to 2 TB are recognized.

About Discs and Files

BD-Video, DVD-Video
BD/DVD-Video discs are divided into several large sections (titles) and small sections (chapters). These sections are all allotted numbers, called title numbers and chapter numbers.

[Example]

<table>
<thead>
<tr>
<th>BD, DVD</th>
</tr>
</thead>
<tbody>
<tr>
<td>Title1</td>
</tr>
<tr>
<td>Chapter 1</td>
</tr>
<tr>
<td>Chapter 1</td>
</tr>
</tbody>
</table>

Hybrid BD
- Hybrid disc
Two-layer Hybrid BD with an BD layer and a DVD layer. The signals on the DVD layer can be played on a regular DVD player.

About DivX® Video-on-Demand (VOD)

The signals on the DVD layer can be played on a regular DVD player.

Hybrid BD
- Hybrid disc
Two-layer Hybrid BD with an BD layer and a DVD layer. The signals on the DVD layer can be played on a regular DVD player.
Super Audio CD

[Type of Super Audio CD]

- Single layer disc
  Single layer Super Audio CD with only an HD layer.

- Dual layer disc
  Super Audio CD with a dual HD layer, offering extended playing time and high sound quality.

- Hybrid disc
  Two-layer Super Audio CD with an HD layer and a CD layer. The signals on the CD layer can be played on a regular CD player.

* All Super Audio CD contain an HD (High Density) layer with high density Super Audio CD signals. This layer can contain a stereo channel area, a multi-channel area, or both a stereo channel and multi-channel area.

DVD-Audio

DVD-Audio discs are divided into several large sections (groups) and small sections (tracks). These sections are all allotted numbers, called group numbers and track numbers.

CD

CD is divided into several sections (tracks). These sections are all allotted numbers called track numbers.

File

Files, such as MP3/WMA/AAC/AVC/MPG/DivX®, etc., recorded on BD-R/-RE, DVD-R/-RW+/R+/RW, CD-R/RW and USB memory device are divided into large segments (folders) and small segments (files). Files are stored in folders, and folders can be placed for storage in a hierarchy. The unit can recognize up to 8 levels of folders.

* The limit of folders and files that can be displayed on the unit is as shown below. (The limit shown includes the root folder.)

<table>
<thead>
<tr>

</tbody>
</table>

* If there are too many characters to be displayed on one line, the display becomes scrollable.
* File names/title names/artist names/album names are displayed on the Media player display screen.

When writing MP3/WMA/AAC/AVC/MPG/DivX®, etc., files on a CD-R/RW disc, set the writing software’s format to “ISO9660”. The files may not play properly if they are recorded in other formats. For details, refer to the instructions of your writing software.
Cautions on using media

Inserting a disc
- Set the disc in the tray label side up.
- Make sure the disc tray is fully open when inserting the disc.
- Place the disc horizontally in the tray, aligned with the tray guide.

If a disc that cannot be played is loaded or the disc is loaded up-side-down, “NO DISC” or “UNK DISC” is displayed on the player’s display.

NOTE
- Only load one disc at a time. Loading two or more discs can damage the unit or scratch the discs.
- Do not use cracked or warped discs or discs that have been repaired with adhesive, etc.
- Do not use discs on which the sticky part of cellophane tape or labels is exposed or on which there are traces of where labels have been removed. Such discs can get caught inside the player and damage it.
- Do not use discs in special shapes, as they may damage the player.
- Do not push the disc tray in by hand when the power is off. Doing so could damage the set.

How to handle media
- Do not get fingerprints, oil or dirt on discs.
- Take special care not to scratch discs when removing them from their cases.
- Do not bend or heat discs.
- Do not enlarge the hole in the center.
- Do not write on the labeled (printed) surface with ball-point pens, pencils, etc., or stick new labels on discs.
- Condensation may form on discs if they are moved suddenly from a cold place (outside for example) to a warm place, but do not try to dry discs with a hairdryer, etc.
- Do not eject a USB memory device or turn off the unit while a USB memory device is being played. This may result in malfunction or loss of the USB memory device’s data.
- Do not attempt to open or modify USB memory device.
- USB memory device and files can be damaged by static electricity. Do not touch the metal contacts of an USB memory device with your fingers.
- Do not use warped USB memory device.
- After use, be sure to remove any disc or USB memory device, and store it in its proper case, to avoid dust, scratches and deformation.
- Do not store discs in the following places:
  1. Places exposed to direct sunlight for long periods of time
  2. Dusty or humid places
  3. Places exposed to heat from heaters, etc.

Cleaning discs
- If there are fingerprints or dirt on a disc, wipe them off before using the disc.
- Use a commercially available disc cleaning set or a soft cloth to clean discs.

How to handle media
- Gently wipe the disc from the inside towards the outside.

NOTE
- Do not wipe with a circular motion.

How to handle media
- Do not use record spray, antistatic agents, benzene, thinner or other solvents.

About copyrights
- Unauthorised copying, broadcasting, public performance and lending of discs are prohibited.
- This item incorporates copy protection technology that is protected by U.S. patents and other intellectual property rights of Rovi Corporation. Reverse engineering and disassembly are prohibited.
- Portions of this product are protected under copyright law and provided under license by ARIS/SOLANA/4C.
Copyright protection system (HDCP)

In order to play back digital video and audio such as BD-Video or DVD-Video via HDMI connection, both the player and TV or the AV receiver need to support the copyright protection system known as HDCP (High-bandwidth Digital Content Protection System). HDCP is copyright protection technology comprising data encryption and authentication of the connected AV device. Our this unit supports HDCP.

NOTE
If a device that does not support HDCP is connected, video and audio are not output correctly. Read the owner’s manual of your television or AV receiver for more information.

Cinavia notice

- This product uses Cinavia technology to limit the use of unauthorized copies of some commercially-produced film and videos and their soundtracks.
- When a prohibited use of an unauthorized copy is detected, a message will be displayed and playback or copying will be interrupted.
- To request additional information about Cinavia by mail, send a postcard with your mailing address to: Cinavia Consumer Information Center, P.O. Box 86851, San Diego, CA, 92138, USA.
The unit converts the format of digital audio signals recorded on media and output them.

- Audio signal input may not be supported depending on the HDMI compatible monitor/projector, etc. being used. When the unit is connected to this kind of device, audio signals are not output from the HDMI terminal.

*1 The output format is automatically changed depending on the audio format or number of channels that the connected HDMI device supports.

*2 When "BD Audio Mode" (page 30) is set to "Mix Audio Output", the secondary audio and interactive audio are mixed to output linear PCM.

*3 If the connected HDMI device does not support Dolby Digital Plus, Dolby TrueHD, or DTS-HD, the signal is output as Dolby digital or DTS Digital Surround bitstream. If it does not support the Dolby Digital or DTS Digital Surround bitstream, it is output as multi-linear PCM or 2-channel linear PCM.

*4 When "Video resolution" (page 28) is set to "480/576i" or "480/576P", DOLBY TrueHD and DTS-HD Master Audio bitstreams are output as DOLBY DIGITAL and DTS Digital Surround bitstreams, respectively. Also, the DSD multi-channel signals are output as DSD 2 channel signals.

*5 If the connected HDMI device does not support AAC, the signal is output as Linear PCM.

*6 When a device that does not support DSD is connected to the HDMI OUT AMP or MONITOR connector, linear PCM signals are output from the HDMI OUT connector.

This is an audio program included as a bonus commentary by members of the crew or director.

Audio commentary

16:9.

is 4:3 and a wide screen TV’s screen ratio is 16:9.

This is the length and width ratio of the TV screen. The conventional TV screen’s ratio is 4:3 and a wide screen TV's screen ratio is 16:9.

Audio commentary

This is an audio program included as a bonus feature in a DVD-Video or BD-Video. It uses a multi-audio function to provide an audio explanation or commentary by members of the crew or director, etc. to accompany the video.

BD-J (Blu-ray Disc Java)
BD-Video offer fun software with more interactive functions (games) that use Java applications.

BD-Live™
The unit can be connected to the Internet to enjoy a number of features, including additional contents such as special video or subtitles, games, etc.

Bit rate

This is the amount of video or audio data recorded on a disc that is read in one second.

Blu-ray disc

Blu-ray discs can record high-definition video movies of up to 25 GB for single-sided single-layer discs or 50 GB for single-sided dual-layer discs.

Bonus View

Special images for BD-Video. It includes comments from the movie director, simultaneously developing special images for BD-Video. It includes comments from the movie director, simultaneously developing special images for BD-Video, special images from the director, special images from the producer, etc.

Chapter

This is a break intended by the producer, who organizes the titles of BD or DVD-Video. The chapter search function searches for the beginning of this break.

Deep Color

This technology allows expression of more colors than the conventional 8-bit and can reproduce more natural colors without any color streaking.

Default Gateway

This device is the entry and exit point between an internal network and an external network (Internet, etc.).

DHCP (Dynamic Host Configuration Protocol)

This function assigns IP addresses automatically to network devices.

DivX

This is a video codec (video compression/ decompression software) developed by DivX, Inc. The compression technology is based on "MPEG-4 Part 2" (known as "MPEG-4 ASP"). It allows along video to be compressed into a small file while maintaining a high-quality image. It is available in the free “DivX” version or the paid “DivX PRO” version.

DLNA

An abbreviation of Digital Living Network Alliance. An industry group that was established to decide specifications for the mutual connection of audio visual devices and computers in a home network and the mutual utilization of music, photo and video data.

This unit is based on DLNA Home Networked Device Interoperability Guidelines.

DNS (Domain Name System)

A system that matches host names on the Internet to IP addresses.

Dolby Digital (5.1-ch Surround)

This is a stereoaphonic effect developed by Dolby Laboratories. This is a maximum of 5.1-channels, independent multi-channel audio system.

Downmix

This function converts the number of channels of surround audio to less channels for playback.

DTS

This is an abbreviation of Digital Theater System, which is a digital audio system developed by DTS. When playing audio on this system while connected to a device such as a DTS amplifier, accurate sound field position and realistic sound effects can be obtained, making you feel like you are in a movie theater.

DTS-HD

This audio technology provides an enhanced functionality and a higher quality of sound than conventional DTS and is adopted as an optional audio for Blu-ray disc. This technology supports multi-channel, high data transfer speed, high sampling frequency, and lossless audio playback. A maximum of 7.1 channels are supported on Blu-ray disc.

Dynamic range

The difference between the maximum, undistorted sound level and the minimum sound level that is discernible above the noise emitted by the device.

Finalizing

This process enables DVD/CD recorded with a recorder to be played by other players.

HDCP

When transmitting digital signals between devices, this copyright protection technology encrypts the signals to prevent content from being copied without authorization.

HDMI

This is an abbreviation of High-Definition Multimedia Interface, which is an AV digital interface that can be connected to a TV or amplifier. Video signal and audio signal can be connected with 1 cable.

Interlacing (interlaced scanning)

This conventional method used to project images on a TV displays 1 frame of image in half and half, respectively as 2 fields.

Interlacing (interlaced scanning)

This conventional method used to project images on a TV displays 1 frame of image in half and half, respectively as 2 fields.

Interactive audio

This is audio recorded in the titles of BD-Video, such as clicking sounds made during operations.

IP Address

An identification number that is assigned to each network device.

JPEG (Joint Photo graphic Experts Group)

This is a still picture data compression standard. Its ability to reduce the size of a file with relatively little deterioration in image quality means that it is widely used for storing images in video cameras, etc.

LAN (Local Area Network)

A wired or wireless network that connects devices together.

Linear PCM

This is an uncompressed PCM (Pulse Code Modulation) signal. This is the same system as the CD audio but uses 192 kHz, 96 kHz, and 48 kHz sampling frequencies on BD or DVD and provides higher sound quality than CD.

MAC Address

An unique identification number for network devices such as LAN cards.

MP3 (MPEG AudioLayer 3)

This is an internationally standardized audio data compression scheme, using the “MPEG-1” video compression standard. It compresses the data volume to about one eleventh its original size while maintaining sound quality equivalent to a music CD.

MPEG

This is an abbreviation of Moving Picture Experts Group, which is an international standard of the moving picture audio compression method. Images on BD and DVD are recorded using this method.

Picture-in-picture

This BD-Video function allows you to view scenes, such as the making of or commentary on the movie, in the secondary video while viewing the main story in the primary video.

</table>
If a problem occurs, firstly check the following:

1. Are the connections correct?
2. Is the set being operated as described in the owner’s manual?
3. Are other components operating properly?

If this unit does not operate properly, check the items listed in the table below. If the problem continues there may be a malfunction. In this case, disconnect the power immediately and contact your retail outlet.

### General

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
</table>
| Power does not turn on. | • Check if the power cord is properly connected.  
 • Plug the power supply cord into the household power outlet.  
 • The safety protection device may be activated. Unplug the power cord once, and wait for 6-10 seconds and then plug it in again. | 12, 15, 16 |
| Playback does not start even when ◄ or ► is pressed, or starts but stops immediately. | • Is there condensation inside the player or on the disc? (Let it sit for 1 to 2 hours with the power off.)  
 • When the disc is scratched or contaminated with fingerprints, the disc may not play correctly. Clean the disc or replace with a non-scratched disc.  
 • Is the disc loaded upside-down? Load the disc properly, with the side to be played face down.  
 • Is an unplayable disc loaded?  
 • No disc is inserted. Insert a disc. | 2, 56 |
| No return to startup screen when a disc is removed. | • There may be an internal error. Set the power to standby, wait awhile, then turn the power back on. | 13 |
| Buttons do not work or the unit stops responding. | • Operations may not be permitted by the disc.  
 • The safety protection device may be activated. Unplug the power cord once, and wait for 6-10 seconds and then plug it in again.  
 • Refer to the instructions of the disc. | 13, 15 |
| The camera angle does not switch. | • If the multiple angles are not recorded in a BD-Video or DVD-Video disc, the camera angle cannot be switched. Also, multiple angles may only be recorded for specific scenes. | 26 |
| Playback does not start when a title is selected. | • Playback may be prohibited by the viewing restriction setting. Check the “Parental Controls” setting on the SETUP menu. | 40 |
| I have forgotten the password for the rating level. | • On the SETUP menu, perform the “System” – “Reset” procedure. | 38 |

### Video

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause/Solution</th>
<th>Page</th>
</tr>
</thead>
</table>
| No picture appears. | • Switch the TV’s input setting to the external input connected to the player.  
 • Is the Pure Direct function set to “AV P.Direct”, “Pure Direct 1” or “Pure Direct 2”? Set it to “Off”.  
 • Does the setting of resolution on the match the connected device’s resolution?  
 • Is the resolution set according to the connected device by pressing VIDEO RESOLUTION on the remote control? Make settings for resolution.  
 • The HDMI cable is not connected securely. Connect the HDMI cable securely.  
 • The HDMI OUT connector is probably connected to a DVI IN connector of equipment. DVI connection does not support HDCP and the HDMI is not output correctly.  
 • The picture may be slightly disturbed right after fast-forwarding or reversing. This is not a malfunction.  
 | 7, 27, 28, 29, 56 |
| The picture is not displayed or is disrupted. | • When the disc is scratched or contaminated with fingerprints, the disc may not play correctly. Clean the disc or replace with a non-scratched disc.  
 • Is the disc loaded upside-down? Load the disc properly, with the side to be played face down.  
 • Is an unplayable disc loaded?  
 • No disc is inserted. Insert a disc.  
 | 13, 28 |
| The picture freezes momentarily during playback. | • If a disc is scratched or contaminated with fingerprints, the disc may not play correctly. Clean the disc or replace with a non-scratched disc.  
 • There may be a problem with the data recorded on the disc. | 56 |
| Subtitles are not displayed. | • Subtitles cannot be displayed for BD-Video, DVD-Video or DivX® files that do not contain subtitles.  
 • Is the subtitle setting “Off”? Use the disc menu or SUBTITLE to set the subtitles to display. | 56 |
| 3D video does not appear. | • Is 3D compatible TV connected to the HDMI MONITOR connector? When a TV that is not compatible with 3D is connected to the HDMI MONITOR connector, 3D video is not output from the HDMI AMP connector. | 27, 28 |
### Audio

License

This section describes software license used for DBT-3313UD. To maintain the correct content, the original (English) is used.

GNU GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

This License applies to any program or other work which contains a notice placed by the copyright holder, saying it may be distributed under the terms of this General Public License (the Program). You can copy, distribute and modify the Program under the terms of this License, or, if you qualify, under the terms of an alternate License that meets the requirements of section 5 (The Lesser Certain-Licensed Free Software Foundation License) and the terms of this License.

The requirements and uses of this License are governed by section 6 (The Free Program's Interface) of the license.

This section is intended to make the application of the license to a particular program clearly defined. It also acts as an viêm to the important feature that any other license terms are effectively set to zero if the free or open source software is altered or shared.

Our goal is to ensure that the C-source code is freely shareable and modifiable by anyone, while keeping the binary executable file less open in a relatively free environment of internal and external developers.

To protect your rights, we need to make restrictions that forbid anyone to deny you the rights to read, study, change, modify, and redistribute the software.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have.

You must ensure that they, too, receive or can get the source code.

These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

If you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you the right to copy, distribute and modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that they can make adjustments to suit their own needs.

Finally, any free program is threatened constantly by subtle issues of software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all. The precise terms and conditions for copying, distribution and modification follow.
END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program:

1. Give a copy of this License along with the program.

2. Make sure you know what code is derived from the GNU Library.

3. Do not misrepresent the origin of this program.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain non-interactive libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call the license the "Lesser" General Public License because it does not give you as much freedom as the ordinary General Public License. It also provides for a different limitation of the ability to link

END OF TERMS AND CONDITIONS

Exhibit B

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999
Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL.  It comes with the "same" as the GNU Library General Public License, section 2.1, hence the version number 2.1]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This General Public License applies to most software on the GNU Library, so that it is unambiguously covered by this license.

The ordinary General Public License therefore applies to many libraries.

This license, the Lesser General Public License, applies to some specially designated software packages: typically libraries of the Free Software Foundation and other authors who decide to use it. It is better strategy to use in any case, but in particular cases, based on the explanations below.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are made to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software and use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, and you modify or redistribute the library, you must modify the accompanying Program files of yours so they work correctly with the modified version of the library.

If you distribute the library, you must clearly state that you changed the program.

This license is a kind of "copyleft", the same as the GNU General Public License. However, it differs in that it is quite a bit less lenient.

For details, see the full text of the license in the file LICENSE-LIBRARY along with this file.

LICENSE

2
GNU LESSER GENERAL PUBLIC LICENSE

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0 This License Agreement applies to any software library or other program which you notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executable programs.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, other than a work in which the Library has been integrated verbatim or by way of a command line interface.

The "Library" is any such software library or work, and the "work based on the Library" is any of the five things, under Sections 1–4 above, made by combining or linking any one or more of the Library open source code files with or into or with other program which contains a notice placed by the copyright holder of the Library under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language.

Sections 3 and 4 apply equally to object code as to source code. This License becomes effective immediately if you present the required notices for all of the relevant materials received from the copyright holder.

2 Each licensee is addressed as "you".

A "work containing the Library" means the combination of the Library and a program that uses the Library (hereinafter referred to as "the work" and/or "the combination") such that the functions of the combined work cannot be performed in their entirety without use of the Library.

"Library" components of a combined work shall refer to the combined work as a whole and all of its constituent parts together, unless stated otherwise.

3 You may opt to apply the terms of the ordinary GNU General Public License, or of any later version, instead of to this License. (If a newer version than this License is released later, use the later version instead of this one, except as noted below.) Each licensee is addressed as "you".

4 You may copy and distribute the Library (or a portion of it, or an object code derivative of it, or a complete derived work, under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language.) in any amount.

You may modify version 3 or later of the Library as a whole, if you wish, and hereafter distribute your version as the modified version, a derivative work under copyright law: that is to say, a work containing the Library (or a portion of it) and other code to perform substantially the same functions and other code to accompany such a modified version.

If you distribute the modified Library, you must send the modified version under this License, and for any other derivative work, you must send the revised version to under this License (or a permission equivalent). This means that the simple publication of a copy on the Internet is not sufficient.

5 A program that contains no derivative of any portion of the Library, but is designed to work with the Library, is a "work that uses the Library". Such a work includes the library portions of the combination that run when the various library portions are linked together.

6 You must cause the files modified by you to carry a notice stating that you changed the files.

7 If you distribute an object code version of a work under this License, you must also make the corresponding source code and the object code from which the work was derived available at no charge to all third parties under the terms of this License (subject to subsections a and b below). You must make available the machine-readable corresponding source code under the terms of Sections 4 and 5 above (or a later version if you opt to apply another version).

8 You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

LICENSE
You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10 Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original copyright holder to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted here. You are not responsible for enforcing compliance by third parties with this License.

11 If as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a whole, this License is no longer granted.

If you implement a complete facility in your program that extracts royalty-free source code from a proprietary program, then the requirements of the GNU General Public License do not apply to the source code contained in that facility, but the rest of that facility is covered by the GNU General Public License.

12 The Free Software Foundation may publish revised versions of this License, in which the General Public License is altered so long as five conditions are met:

* Any included notice of copyright must include the complete text of the promise in section 10.
* Any included notice of warranty disclaimers must be accompanied by the complete text of this License.
* The whole text of this License must be included, unaltered in its entirety, in all copies of the library, or parts thereof, distributed by you.

The Library Author(s), as the authors of software distributed by you under the License, must be given prominent acknowledgement on the first pages of any such important documents.

The Free Software Foundation uses public domain tags to indicate that a tag’s碰碰车 is free software. These tags apply to any software distributed by you under the License.

End of TERMS AND CONDITIONS

Copyright

This Library is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110 1209 USA.

Additional Terms and Conditions

If you modify the Library, you may from time to time publish revised versions of the license that apply to your modifications and any such two published version.

The FreeType Project is distributed in several archive packages; some of them may contain, in addition to the FreeType font engine, various tools and contributions which rely on, or relate to, the FreeType Project. This license applies to all files found in such packages, and which do not fall under their own explicit license. The license text that follows applies to the FreeType font engine, some programs, documentation and makelibs, at the very least.

This license was inspired by the BSD, Artistic, and LGPL (Independent JPEG Group) licenses, which all encourage inclusion and use of free software in commercial and proprietary products alike. As a consequence, its main principle is that:

* We don't promise that this software works. However, we will be interested in any kind of bug reports ("as is" distribution)

* You can use this software for whatever you want, in parts or full form, without having to pay us (" royalty free usage")

* You may not pretend that you wrote this software if you use it, or only parts of it, in a program, you must acknowledge somewhere in your documentation that you have used the FreeType code ("credits")
We specifically permit and encourage the inclusion of this software, with or without modifications, in commercial products.

We disclaim all warranties covering The FreeType Project and assume no liability related to The FreeType Project. Finally, many people asked us for a preferred form for a credit/disclaimer to use in compliance with this license. We thus encourage you to use the following text:

"Portions of this software are copyright © year The FreeType Project (www.freetype.org). All rights reserved. Please replace "year" with the value from the FreeType version you actually use."

Legal Terms

Throughout this license, the terms ‘package’, ‘FreeType Project’, and ‘FreeType archive’ refer to the set of files originally distributed by the authors (David Turner, Robert Wilhelm, and Werner Lemborg) as the ‘FreeType Project’, be they named as alpha, beta or final release.

‘You’ refers to the licensor, or person using the project, where ‘using’ is in a generic term including compiling the project’s source code as well as linking it to form a ‘program’ or ‘executable’.

This program is referred to as ‘a program using the FreeType engine’.

This license applies to all files distributed in the original FreeType Project, including all source code, binaries and documentation, unless otherwise stated in the file in its original, unmodified form distributed in the original archive.

If you are unsure whether or not a particular file is covered by this license, you must contact us to verify.

The FreeType Project is copyright (C) 1996 2000 by David Turner, Robert Wilhelm, and Werner Lemborg. All rights reserved except as specified below.

No Warranty

THE FREETYPE PROJECT IS PROVIDED ‘AS IS’ WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. IN NO EVENT WILL ANY OF THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY DAMAGES CAUSED BY THE USE OF THE INABILITY TO USE OF THE FREETYPE PROJECT.

Redistributions

This license grants a worldwide, royalty free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project (in both source and object code forms) and derivative works thereof for any purpose, and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions:

- Redistributions of source code must retain this license file (FTL.TXT) unaltered; any additions, deletions or changes to the original file must be clearly indicated in accompanying documentation.
- The copyright notices of the unaltered, original files must be preserved in all copies of source files.
- Redistributions in binary form must provide a disclaimer that states that the software is based in part of the work of the FreeType Team, in the documentation distribution. Also, we encourage you to put an URL to the FreeType web page in your documentation, though this isn’t mandatory.

These conditions apply to any software derived from or based on the FreeType Project, not just the unmodified files. If you use our work, you must acknowledge us. However, no fee need be paid to us.

Advertising

Neither the FreeType authors and contributors nor you shall use the name of the other for commercial advertising, promotion, or in any manner of promoting your business. We suggest, but do not require, that you use one or more of the following phrases to refer to this software in your documentation or advertising materials:

"FreeType Project", "FreeType Engine", "FreeType Library", or "FreeType Distribution".

As you have not signed this license, you are not required to accept it. However, as the FreeType Project is copyrighted material, only this license, or a license identical in all respects to this license, grants you the right to use, distribute, and modify it.

Therefore, by using, distributing, or modifying the FreeType Project, you indicate that you understand and accept all the terms of this license.

Contacts

There are two mailing lists related to FreeType:

- freetype@freetype.org
- bug@freetype.org

Discusses general use and application of FreeType as well as future and wanted additions to the library.

If you are looking for support, start in this list if you are asking for help. Anything you post will help you in the documentation.

Discusses bugs, as well as engine internals, design issues, specific licenses, porting, etc.

Our home page can be found at

http://www.freetype.org

end of FTL.TXT

2 Redistributions

This license grants a worldwide, royalty free, perpetual and irrevocable right and license to use, execute, perform, compile, display, copy, create derivative works of, distribute and sublicense the FreeType Project (in both source and object code forms) and derivative works thereof for any purpose; and to authorize others to exercise some or all of the rights granted herein, subject to the following conditions:

- Redistributions of source code must retain this license file (FTL.TXT) unaltered; any additions, deletions or changes to the original file must be clearly indicated in accompanying documentation.
- Redistribution in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
- All advertising materials mentioning features or use of this software must display the following acknowledgment:
  "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)."
- The names "OpenSSL Toolkit" and "OpenSSL Project" must not be used to endorse or promote products derived from this software without prior written permission. For written permission, please contact openssl-core@openssl.org
- Products derived from this software may not be called "OpenSSL" nor may "OpenSSL" appear in their names without prior written permission of the OpenSSL Project.
- Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.
- The word ‘cryptographic’ can be left out if the routines supplied are not cryptographic related.

This software is provided by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/). This SOFTWARE IS PROVIDED BY THE OPENSSL PROJECT AS IS AND ANY EXPRESSED OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE OPENSSL PROJECT OR ITS CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

3 licenses

The OpenSSL toolkit stays under dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org

OpenSSL License

Copyright (c) 1998 2008 The OpenSSL Project All rights reserved

Redistributions in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1 Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

2 Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

3 All advertising materials mentioning features or use of this software must display the following acknowledgment:
   "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)."

4 Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

5 Further, the terms and conditions for distribution of OpenSSL by third party vendors must include the word ‘cryptographic’ in their names or i.d. They may not claim any relationship with or endorsement by the OpenSSL Project.

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com). This product includes software written by Tim Hudson (tjh@cryptsoft.com).

Original SSLeay License

Copyright (C) 1995 1998 Eric Young (eay@cryptsoft.com) All rights reserved

This package is an SSL implementation written by Eric Young (eay@cryptsoft.com).

The implementation was written so as to conform with Netscape SSL. This library is free for commercial and non-commercial use as long as the following conditions are agreed to. The following conditions apply to all code found in this distribution. The SSL documentation included with this distribution is covered by the same copyright terms except that the holder is Tim Hudson (tjh@cryptsoft.com).

Copyright remains Eric Young’s, and as such any Copyright notices in the code are not to be removed. If this package is used in a product, Eric Young should be given attribution as the author of the parts of the library used.

This can be in the form of a textual message at program startup or in documentation (online or textual) provided with the package.

Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.

Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

All other advertising materials mentioning features or use of this software must display the following acknowledgement:
   "This product includes software developed by the OpenSSL Project for use in the OpenSSL Toolkit (http://www.openssl.org/)."

This product includes cryptographic software written by Eric Young (eay@cryptsoft.com).

The word ‘cryptographic’ can be left out if the routines supplied are not cryptographic related.

If you include any Windows specific code (or a derivative thereof) from the app directory reimplementation code you must include an acknowledgement:

This product includes software written by Tim Hudson (tjh@cryptsoft.com).
