## SOLIDLY DESIGNED CD-PLAYER WITH DENON PREMIUM QUALITY.

To faithfully reproduce the original sound, the DCD-520AE is endowed with a wide range of audio technology that Denon has developed and refined over the years. For a sound that surpasses the quality expected in its class, Denon engineers have carefully selected parts for the audio section, the power unit and other areas on the basis of their contribution to high sound quality. The patterns for the digital circuits have been specially designed to

provide maximum protection from unwanted radiation and achieve low impedance. Denon engineers used rigorous listening tests to select the DCD-520AE's high-precision 32-bit/192 kHz D/A converter. This converter and the audio circuit design that Denon has developed over many years masterfully reproduces the delicate nuances of music in the audio signal.

### High precision 32-bit 192kHz D/A converter

Denon engineers used rigorous listening tests to select the DCD-520AE's high-precision 32-bit/192kHz D/A converter. This converter and the audio circuit design that Denon has developed over many years masterfully reproduce the delicate nuances of music in the audio signal.

### DAC master clock design, to suppress jitter and noise

The DCD-520AE features the same type of DAC that is used in our high-class CD player as a master of clock signals for all devices. Since these clock signals are generated by an oscillator circuit module, it is possible to obtain highly reliable oscillation unaffected by other elements.

### NEW FEATURES

- High precision 32-bit 192kHz D/A converter
- CD-R/CD-RW playback (MP3,WMA)
- 2 line fluorescent display
- Improved sound quality
- Newly designed remote controller

### Vibration-resistant design with Direct Mechanical Ground Construction

The power transformers, themselves a source of vibration, have been placed near the ground and immediately above the insulators to allow direct release to the ground and thoroughly prevent the propagation of unwanted vibration or noise.

### 2 line fluorescent display

Front display with 2 lines for easy operation.

### STATE-OF-THE-ART DENON SOLUTIONS FOR MAXIMISING CONTENT QUALITY

- Master Clock Design
- Vibration-resistant design with Direct Mechanical Ground Construction
- Original Denon Mechanism with central assembly drawer unit
- Carefully designed construction to preserve audio signal purity
- Minimum signal path design
- Strictly selected parts for high sound quality
- Aluminium front panel
- European sound-tuned

### EASE-OF-USE

- ECO friendly with low power consumption in stand by and auto power off
- Remote control unit equipped with buttons of different shapes and sizes based on their functions for easy operation
- Integration with the new PMA-520AE's remote control unit
- Folder Mode function, for playing only files stored in specific folders (used when playing discs with MP3/WMA files)
- Design matches the new PMA-520AE integrated amplifier

Specifications	
<b>CD section</b>	
Channels	2 channel stereo
Dynamic range	98 dB
Signal-to-noise ratio	105 dB
Total harmonic distortion	0.003% (1 kHz)
Channel separation	100 dB
<b>General</b>	
Power supply	AC 230 V, 50 Hz
Power consumption	13 W
Dimensions (W x H x D)	434 x 107 x 279 mm
Weight	4.0 kg
