SAFETY INSTRUCTIONS

13. Power-Cord Protection – Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.

14. Outdoor Antenna Grounding – If an outside antenna or cable system is connected to the product, the antenna or cable system should be grounded to provide some protection against voltage surges and static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.

15. Lightning – For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.

16. Power Lines – An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, as contact with them could be fatal.

17. Servicing – Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.

18. Damage Requiring Service – Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:

a) When the power-supply cord or plug is damaged, b) If liquid has been spilled, or objects have fallen into the product, c) If the product has been exposed to rain or water, d) If the product does not operate normally by following the operating instructions, e) If the product has been dropped or damaged in any way, and f) When the product exhibits a distinct change in performance – this indicates a need for service.

19. Replacement Parts – When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

20. Safety Check – Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

21. Wall or Ceiling Mounting – The product should be mounted to a wall or ceiling only as recommended by the manufacturer.

22. Heat – The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.

NOTE: This CD player uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 5°C (41°F) — 35°C (95°F).

CERTIFICATION
THIS PRODUCT COMPLIES WITH DHHS RULES 21 CFR SUBCHAPTER J APPLICABLE AT DATE OF MANUFACTURE.

CAUTION:
USE OF CONTROLS OR ADJUSTMENTS OR REPERFORM OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

THE COMPACT DISC PLAYER SHOULD NOT BE ADJUSTED OR REPAIRED BY ANYONE EXCEPT PROPERLY QUALIFIED SERVICE PERSONNEL.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

This Class B digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations.

Cet appareil numérique de la classe B respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada.

CAUTION:
TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER OR BACK CASTEING OR USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol within an equilateral triangle is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating, maintenance (servicing) instructions in the literature accompanying the appliance.

ATTENTION
POUR ÉVITER LES CHOC ÉLECTRIQUE, INTÉROUPE LA LAMPE LA PLUS LÂCHE DE LA FICHE DANS LA BORNE CORRESPONDANTE DE LA PRISE ET FOURNISSOU JUSQU’AU FOND.

1. Read Instructions – All the safety and operating instructions should be read before use.
2. Retain Instructions – The safety and operating instructions should be retained for future reference.
3. Heed Warnings – All warnings and the product and in the operating instructions should be adhered to.
4. Follow Instructions – All operating and use instructions should be followed.
5. Cleaning – Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners.
6. Attachments – Do not use attachments not recommended by the manufacturer as they may cause hazards.
7. Water and Moisture – Do not use this product near water – for example, near a bath tub, wash bowl, kitchen sink, or laundry tub, in wet basements, or near swimming pools and the like.
8. Accessories – Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product.
9. Product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the combination to overturn.
10. Ventilation – Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from over-heating. These openings must not be blocked or covered.
11. Power Sources – This product should be operated only from the type of power source indicated on the marking label.
12. Grounding or Polarization – This product may be equipped with a polarized alternating current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

CAUTION:
TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

FOR CANADA MODEL ONLY

CAUTION
RISK OF ELECTRIC SHOCK DO NOT OPEN

NOTE:
This CD player uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 5°C (41°F) — 35°C (95°F).

LABELS (for U.S.A. model only)

WARNING:
TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION:
1. Handle the power supply cord carefully.
   Do not damage or deform the power supply cord. If it is damaged or deformed, it may cause electric shock or malfunction when used. When removing from wall outlet, be sure to remove by holding the plug attachment and not by pulling the cord.
2. Do not open the top cover
   To prevent electric shock, do not open the top cover.
   If problems occur, contact your DENON DEALER.
3. Do not place anything inside
   Do not place metal objects or spill liquid inside the system.

Electric shock or malfunction may result.

Please, record and retain the Model name and serial number of your set on the rating label.
Model No. DCD-F101
Serial No.

NOTE:
This CD player uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 5°C (41°F) — 35°C (95°F).
**ACCESSORIES**

Check that the following parts are included in the package aside from the main unit:

1 Stereo Audio Cord ..................................... 1
2 System Connector Cable ................................ 1
3 Operating Instructions .................................. 1
4 Service Station List ..................................... 1

**MAIN FEATURES**

1. **Enhanced Multilevel Δ-Σ D/A converter**
   Enhanced Multilevel noise shaping (Δ-Σ) D/A converters with superior resolution offers reproduction of the original sound field with rich musical expression.

2. **CD-R/RW playback**
   This set can play finalized CD-R/RW discs. Note however that depending on the recording quality, it may not be able to play certain CD-R/RW discs.

3. **Optical digital output terminals**
   The DCD-F101 is equipped with optical digital output terminals for digital signal transfer, allowing digital-to-digital recording onto MDs and DATs with little deterioration of sound quality.

4. **Convenient system functions**
   The DCD-F101 is equipped with such system functions as auto function selection and auto power on that simplify operation when connected in a system with the D-F101 series. In addition, the major operations of each system unit can be performed with the system remote control unit (RC-327) included with the receiver. (DRA-F101)

**BEFORE USING**

Read the following before using the set.

- **Before turning on the power**
  Check again that all connections are correct and that there are no problems with the connection cords. Be sure to unplug the power cord before connecting or disconnecting the connection cords.

- **Moving the set**
  To prevent short-circuits or damage to the connection cords always unplug the power cord and disconnect the connection cords between all other audio components when moving the set.

- **Condensation (dew)**
  Condensation (water droplets) may be produced on internal optical lenses or discs in the following cases:
  - Directly after a heater is turned on.
  - When the set is in a steamy or humid room.
  - When the set is moved abruptly from a cold place (room) to a warm room.
  - Should condensation occur:
    The signals on the disc cannot be read and the set will not function properly. Remove the disc then let the set sit with the power on. The condensation will evaporate in one hour or less, at which time the set will function normally.

- **Store this instructions in safe place**
  After reading, store these instructions along with the warranty in a safe place. Also fill in the items on the back paper for your convenience.

- **Illustrations in this manual**
  Note that some of the illustrations used for explanations in this manual may differ from the actual set.

- **Do not set TVs (even small ones) or other objects on top of this unit.**

---

3 CAUTIONS ON INSTALLATION

The CD player uses a microcomputer for controlling internal electronic circuits. In the event that the player is used while a near-by tuner or TV is turned on, although unlikely, interference could occur either in the sound from the tuner or the picture of the TV. To avoid this, please take the following precautions.

- Keep the CD player as far away from the tuner or TV set as possible.
- Keep the power cable and connecting cable of the CD player separate from the antenna wires of the tuner and TV.

- Interference is particularly likely to occur when an indoor antenna or a 300 Ω/ohms feeder cable is used. Thus, use of an outdoor antenna and 75 Ω/ohms coaxial cable is strongly recommended.

4 CONNECTIONS

Connecting to the D-F101 Series

- When connecting to a receiver other than the one in the D-F101 series, there is no need to make connection 2. Note that in this case none of the system functions (auto power on, etc.) will work.

- System operations such as the auto power on function can only be used if stereo audio cords and system cords are connected between all the system components. Be sure to securely connect all the connection cords between all the units.

- Disconnecting a system cord during system operation may result in malfunction. Be sure to unplug the power cords before changing the connections.

- Install the components in such a way that the ventilation holes of the receiver (DRA-F101) are not obstructed.

- Use the AC OUTLET for audio equipment only. Do not use them for hair dryers, etc.

- The DCD-F101 can also be used when connected to a receiver other than the one in the D-F101 series. In this case, none of the system functions (auto power on, etc.) will work.

1. Connect the DCD-F101’s LINE OUT jacks to the receiver’s CD input jacks using the included stereo audio cord.

2. Connect the DCD-F101’s SYSTEM CONNECTOR jack (1 or 2) to the SYSTEM CONNECTOR jack (1 or 2) of the Receiver (DRA-F101) using the included system cord.

3. Connect the unit’s power cord to the AC outlet on the Receiver (DRA-F101).

NOTES:

- Do not plug power cords into power outlets until all connections have been completed.
- Check the left and right channels and be sure to interconnect them correctly (R to R, L to L).
- Plug in the power cords securely. Incomplete connections will result in noise.
- Clipping the power cords and connection cords together may result in humming or noise.
- After unplugging the power cord, wait at least 5 seconds before plugging it back in.

Recommended System Installation

- To ensure performance and stability, install the D-F101 series as shown below.
- Do not place another component directly on top of the receiver (DRA-F101).
5) PART NAMES AND FUNCTIONS

(1) Front Panel

1. Power operation switch (ON/STANDBY)
   - When pressed once, the power turns on and the display lights.
   - When pressed again, the standby mode is set.
   - The LED color changes as follows, according to the condition:
     During power ON: green
     During STANDBY: red

2. Disc holder open/close button (▲)
   - Press this button to open and close the disc holder.
   - When pressed in the standby mode, the power turns on automatically and the disc holder opens.

3. Display
   - Refer to page 3.

4. Repeat button
   - Press this for repeat playback. (Refer to page 11.)

5. Automatic/reverse button (◄/◄)
   - Use this button to find the beginning of the desired track. (Refer to page 9.)

6. Manual search reverse button (◄)
   - Press this button to reverse the disc. (Refer to page 10.)

7. Manual search forward button (►)
   - Press this button to forward the disc. (Refer to page 10.)

8. Automatic/manual search forward button (►)
   - Use this button to find the beginning of the desired track. (Refer to page 8.)

9. Stop button (■)
   - Press this button to stop playback.

10. Play/Pause button (►/■)
    - Press this button to start playing the disc.
    - When pressed while the disc holder is open, the disc holder closes and playback starts.
    - Press this button to stop playback temporarily.
    - To resume playback, press either the pause button (■) or the play button (►).

(2) Rear Panel

12. Output jacks (LINE OUT)
    - Connect these to the CD input jacks on the amplifier.
    - When connecting the DCD-F101 in a system with the D-F101 series, be sure to connect these jacks to the CD input jacks on the receiver (DRA-F101).

13. Digital output jack (DIGITAL OUT OPTICAL)
    - Digital data is output in optical form from this jack.

14. System connectors (SYSTEM CONNECTOR 1 and 2)
    - When connecting the DCD-F101 in a system with the D-F101 series, connect these to the system connector on the Receiver (DRA-F101) using the included system cords.

15. Power cord
    - Connect this unit's power cord to the AC outlet on the Receiver (DRA-F101).

(3) Display

16. Mode indicators
    - These indicate the various modes.
    - REPEAT:
      These indicators light as follows each time the repeat button is pressed:

(4) Time display

- When a disc is loaded
  - In the stop mode:
    - Total disc playing time
    - In the play and pause modes:
      - Elapsed time of current track
      - In the play and pause modes:
        - Elapsed time of current track

- When no disc is loaded or when the disc data cannot be read properly, “00:00:00” is displayed.

- The display switches as follows each time the time button is pressed:

- EDIT:
  - Editing operations are performed from the system remote control unit (RC-027) included with the receiver (DRA-F101). They can only be performed when the components are connected in a system.
  - This lights when performing editing operations on a cassette tape. (Refer to page 13.)

- PROG:
  - This lights during programming and programmed playback.
    - ▶ lights during playback.
    - ► flashes during manual search in the play mode.

- RANDOM:
  - This lights in the random play mode.

17. Track number display section
    - When a disc is loaded
      - In the stop mode:
        - Total number of tracks on disc
      - In the play and programmed play modes:
        - Number of track currently playing

18. Elapsed time of current track

19. Remaining time of current track

20. Total remaining time on disc
6 REMOTE CONTROL

Names and Functions of System Remote Control Unit Buttons (The RC-927 is included with the DRA-F101.)

- The CD related buttons on the system remote control unit included with the receiver are explained below.
- Buttons not explained here function in the same way as the corresponding buttons on the main unit.
(Refer to pages 3 and 6.)

7 CAUTIONS ON HANDLING DISCS

- The types of discs listed on the table below can be used on the DCD-F101.
  The marks are indicated on the disc labels or jackets.

<table>
<thead>
<tr>
<th>Usable discs</th>
<th>Mark (logo)</th>
<th>Recorded signals</th>
<th>Disc size</th>
</tr>
</thead>
<tbody>
<tr>
<td>CD</td>
<td></td>
<td>Digital audio</td>
<td>12 cm</td>
</tr>
<tr>
<td>CD-R</td>
<td></td>
<td></td>
<td>8 cm</td>
</tr>
<tr>
<td>CD-RW (NOTE 1)</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

NOTE 1: According to recording quality, some CD-R/RW cannot be played.

Discs

- Only the discs including the marks shown on page 7 can be played on the DCD-F101. Note, however, that discs with special shapes (heart-shaped discs, hexagonal discs, etc.) cannot be played on the DCD-F101. Do not attempt to play such discs, as they may damage the player.

Cleaning Discs

- Fingerprints or dirt on the disc may lower sound and picture quality or cause breaks in playback. Wipe off fingerprints or dirt.
- Use a commercially available disc cleaning set or a soft cloth to wipe off fingerprints or dirt.

Holding Discs

- Avoid touching the surface of discs when loading and unloading them.
- Be careful not to get fingerprints on the signal surface (the side which shines in rainbow colors).

NOTE:
- Do not use record spray or antistatic. Also do not use volatile chemicals such as benzene or thinner.

Wipe gently from the middle outwards. Do not wipe with a circular motion.

Record Thinner benzene spray

Cautions on Handling Discs

- Do not get fingerprints, grease or dirt on discs.
- Be especially careful not to scratch discs when removing them from their cases.
- Do not bend discs.
- Do not heat discs.
- Do not enlarge the center hole.
- Do not write on the labeled (printed) side with a ball-point pen or a pencil.
- Water droplets may form on the surface if the disc is moved suddenly from a cold place to a warm one. Do not use a hairdryer, etc., to dry the disc.

Cautions on Storing Discs

- Always eject discs after playing.
- Keep discs in their cases to protect them from dust, scratches and warping.
- Do not put discs in the following places:
  1. Places exposed to direct sunlight for long periods of time
  2. Humid or dusty places
  3. Places exposed to heat from heaters, etc.

8 OPENING AND CLOSING THE DISC HOLDER AND LOADING DISCS

1. Turn on the power.

2. Press the disc holder open/close button.

3. Being careful not to touch the disc's data surface, set the disc in the disc tray with the labeled side facing up.
   - Make sure the disc holder is fully open when loading discs.
   - Set 12 cm discs in the outer disc guide (Fig. 1), 8 cm discs in the inner disc guide (Fig. 2).
   - Make sure the disc is flat.

4. Press the disc holder open/close button to close the disc holder.

5. When the disc holder closes, the total number of tracks on the disc and the total playing time appear on the display, and the numbers on the music calendar light up to the number of tracks on the disc.

6. When the play button is pressed after a disc is set on the disc tray, the disc holder closes and playback starts.

NOTES:
- If your finger or another object should get caught in the disc holder, stay calm and press the disc holder open/close button (A).
- Do not put foreign objects in the disc holder. Doing so could result in damage.
- Do not press on the disc holder when the power is turned off. Doing so could damage it.
- To not press buttons with pencils, etc.
9 NORMAL PLAYBACK

(1) Starting Playback

1. Turn on the power.
2. Load the disc.
   - For instructions on loading discs, refer to "OPENING AND CLOSING THE DISC HOLDER AND LOADING DISCS" (Page 8).
3. Press the play button.
   - Playback starts.

(2) Stopping Playback

1. During playback, press the stop button.
   - Playback stops.
   - Playback also stops automatically after the last track on the disc has been played.

NOTES:
- Zeros are displayed if no disc is loaded or if the disc is loaded upside-down.
- The total remaining time and the remaining time per track are not displayed if the disc data cannot be read properly due to scratches or dirt on the disc. In this case, some time may be required for finding the beginnings of tracks, etc.
- Do not use discs with cellophane tape on them, rental discs on which there is glue seeping out from under the label, or discs on which there are traces of labels that have been peeled off. If such discs are loaded, they may get stuck inside the player and cause damage.

10 VARIOUS PLAYBACK FUNCTIONS

(1) Stopping playback temporarily ................................................ [Pause]

- Use this function to stop playback temporarily then resume playback from that point.

1. During playback, press the pause button.
   - Playback pauses.

2. To resume playback from the position at which the disc is paused, press either the pause button or the play button.

(2) Automatic Search

Moving ahead to the beginning of the next track

1. Press the ▶ button.
   - Press the button more than once to move ahead to the beginning of subsequent tracks.

Moving back to the beginning of the current track

1. Press the ▼ button.
   - Press the button more than once to move back to the beginning of previous tracks.
(3) Finding the desired spot while listening to the sound .......................... [Manual Search]
- Use this function to skip forward or backward while listening to the sound. This function comes in handy for finding the desired spot in the middle of long tracks.

1. Searching forward
2. Searching backward

Press and hold the button.

During playback, press and hold in the button. When the button is released, normal playback resumes from that point.

Press and hold in the button. When the button is released, normal playback resumes from that point.

* If the end of the last track on the disc is reached while pressing the button, " 32 " appears on the display and the manual search mode is canceled. To resume playback, press and hold the button until " 32 " turns off and the track number reappears, then perform another operation.
* To move ahead at high speed without listening to the sound, press the button while in the pause mode.

NOTE:
- The sound may be interrupted momentarily when resuming normal playback from the manual search mode. This is not a malfunction.

(4) Selecting the desired track (remote control unit) .......................... [Direct Play]
- Use the number buttons and the +10 button to select the desired track.

Ex.: To select track 4:
- To select track 12:
- To select track 30:
  Playback starts from the selected track.

* To perform the direct play operation during programmed playback, first press the direct button to cancel the programmed play mode.

(5) Playing the tracks in the desired order (remote control unit) ........ [Programmed Play]
- Use this function to select the desired tracks on the disc and play them in the desired order.
- Up to 30 tracks can be programmed.

Press the number and +10 buttons to select the track to be programmed.
* For example, to program the 3rd track and the 12th track, press 3, 12, and +10.

Displays when the 3rd track is set at the first place.

Displays the total number of programmed tracks and total playing time.

Displays when the 12th track is set at the second place.

Displays the total number of programmed tracks and total playing time.

Press the PROG/DIRECT button.

The tracks are played in the programmed order.
Press the PROG/DIRECT button again to resume normal playback during the stop mode.
To cancel the entire program, press the PROG/DIRECT button or cancel the program one by one using the CLEAR button.
If you program the wrong track, press the CLEAR button to program the right track. (The last track in the program is erased each time the CLEAR button is pressed.)
To confirm the programmed playing order, press the CALL button. The programmed playing order appears in the display.
Press the CLEAR button with a track number appearing in the display automatically erases that specific track from Program Play.

Other operations possible during programmed playback:
Such operations as quick search, pause, and skip monitor are also possible during programmed playback. For the quick search function, press the automatic search reverse button (▶↑) to move back to the beginning of the track, then press it again while the time display reads "00:00" to move back to the beginning of the preceding track. To move ahead to the beginning of the next track, press the automatic search forward button (▶↓) regardless of the time display.

NOTES:
• The entire program is canceled when the ◄ (open/close) button is pressed.
• Set the stop mode when cancelling tracks from the program. To cancel the program mode, press the PROG/DIRECT button.

(6) Playing the tracks in random order (remote control unit) .................. [Random Play]
Use this function to play all the tracks on the disc once in random order.

1. In the stop mode, press the random button.
   • The "RANDOM" indicator lights.
   • If pressed during playback, random play starts from that track.

2. Press the play button.
   • A track is selected automatically and playback starts.
   • During programmed playback: The programmed tracks are played in random order.
   • During repeat playback: The tracks are played once in random order, then played again in a different order, and this is repeated.

3. To cancel random playback, press the random button again. Normal playback resumes.

NOTES:
• The total remaining time is not displayed during random playback.
• Random playback is not possible in the editing mode when the DCD-F101 is connected in a system with the Receiver (DRA-F101).
(8) Setting the pause mode at the beginning of a certain track (remote control unit) ................................................. [Pause]

1. Finding the beginning of a track directly

- Use this function to set the pause mode at the beginning of a track with the direct search operation, for example when you want to record that track onto a cassette tape or mini-disc.

2. Finding the beginning of a track using the programmed play mode

- To perform this operation during programmed playback, first press the direct button to cancel the programmed play mode.
**SYSTEM FUNCTIONS**

1. **System connection**
   - Operation is even easier when the Receiver (DRA-F101) is connected to the DCD-F101 with system connections. (For instructions on connections, refer to the respective operating instructions of the receiver (DRA-F101)).
   - The system functions will only work when the Receiver (DRA-F101) is connected. They will not work with other components.
   - The system function signals for operating the DCD-F101 are all output from the receiver (DRA-F101). Thus, when making system connections, be sure to connect the receiver (DRA-F101).

2. **Auto power on function (when connected to the DRA-F101)**
   - When the system is set to the standby mode, you can start the playback of disc by simply pressing the play/pause button.

   ![Auto power on function diagram]

3. **Auto function selection (when connected to the DRA-F101)**
   - Use this function to switch the function to "CD" and start playing the disc simply by pressing a single button.

   ![Auto function selection diagram]

4. **Timer functions (when connected to the DRA-F101)**
   - The timer functions of the receiver (DRA-F101) can be used to play CDs at set times.
   - Refer to the operating instructions included with the DRA-F101.
## TROUBLESHOOTING

If a problem should arise, first check the following:
1. Are the connections correct?
2. Have you operated the receiver according to the Operating Instructions?
3. Are the speakers, turntable, and other components operating properly?

If this unit is not operating properly, check the items listed in the table below. Should the problem persist, there may be a malfunction. Disconnect the power immediately and contact your store of purchase.

## SPECIFICATIONS

**AUDIO**
- Number of Channels: 2 channels
- Frequency Response: 2 – 20,000 Hz
- Dynamic Range: 95 dB
- Signal-to-noise Ratio: 102 dB
- Harmonic Distortion: 0.005 % (1 kHz)
- Separation: 95 dB (1 kHz)
- Wow and Flutter: Below measurable limit: ≤0.001 % W. peak
- Output Voltage: 1.8 V

**DISCS**
- Compact Disc format

**GENERAL CHARACTERISTICS**
- Power Supply: AC 120 V, 60 Hz
- Power Consumption: 16 W
- Dimensions: 256 (W) x 81.5 (H) x 260 (D) mm (9-7/32" x 3-13/64" x 10-15/64")
- Mass: 2.6 kg (5 lbs 12 oz)

* Design and specifications are subject to change without notice in the course of product improvement.
• Pulp molds made of recycled paper are used as the shock-absorbing material for packing this product.
Please dispose of this shock-absorbing material in the same way as you do for paper products.

• Als stoßabsorbierendes Verpackungsmaterial für dieses Produkt wurde eine Pressmasse aus Altpapier verwendet. 
Entsorgen Sie dieses stoßabsorbierende bitte auf die gleiche Weise, auf die Sie Altpapier entsorgen.

• Du cartonnage moulé fait à l'aide de papier recyclé est utilisé comme matériau d'absorption des chocs pour
emballer ce produit.
Veuillez vous débarrasser de ce matériau d'absorption des chocs comme s'il s'agissait de papier.

• Come materiale di imballaggio per proteggere questo prodotto contro eventuali urti viene usata della carta pesta
fatta di carta riciclata.
Gettate via il materiale di imballaggio nello stesso modo in cui vi disfate dei normali scarti di carta.

• Moldes de pasta de madera fabricados a partir de papel reciclado se utilizan como material de amortiguación
mecánica para el empaque de este producto.
Por favor deseche este material de amortiguación mecánica de la misma forma que lo hace para productos de papel.

• Dit product is verpakt met schokabsorberend opvulmateriaal van gerecycleerd papier.
Gooi dit schokabsorberend materiaal weg samen met papier afval.

• Massaformer som tillverkats av återanvänd papper används som stötdämpande material hos förpackningen av
denna produkt.
Kassera detta stödtämpande material på samma sätt som du gör med pappersprodukter.

• São utilizados moldes de polpa fabricados com papel reciclado como material de absorção de choque para a
embalagem deste produto.
Queira descartar este material de absorção de choque da mesma forma que outros produtos de papel.

• 利用再生紙制成的紙漿外殼模子用於保護產品以防止受到震動，
可用處理其它紙製品一樣的方法來處理此防振材料。
SAFETY INSTRUCTIONS

1. Read instructions – All the safety and operating instructions should be read before the product is operated.
2. Retain instructions – The safety and operating instructions should be retained for future reference.
3. Heed Warnings – All warnings on the product and in the operating instructions should be adhered to.
4. Follow Instructions – All operating and use instructions should be followed.
5. Cleaning – Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners.
6. Attachments – Do not use attachments not recommended by the product manufacturer as they may cause hazards.
7. Water and Moisture – Do not use this product near water – for example, near a bathtub, washbowl, kitchen sink, or laundry tub, in a wet basement, or near a swimming pool; and like.
8. Accessories – Do not place this product on an unstable cart, stand, tripod, bracket, or table. The product may fall, causing serious injury to a child or adult, and serious damage to the product. Use only with the cart, stand, tripod, bracket, or table recommended by the manufacturer, or sold with the product. Any mounting of the product should follow the manufacturer’s instructions, and should use a mounting accessory recommended by the manufacturer.
9. Product and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the product and cart combination to overturn.
10. Ventilation – Slots and openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating. These openings must not be blocked or covered. The openings should never be blocked by placing the product on bed, sofa, rug, or other similar surfaces. This product should not be placed in a built-in installation such as a bookcase or rack unless proper ventilation is provided or the manufacturer’s instructions have been adhered to.
11. Power Sources – This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply to your home, consult your product dealer or local power company. For products intended to operate from battery power, or other sources, refer to the operating instructions.
12. Grounding or Polarization – This product may be equipped with a polarized alternating-current line plug (a plug having one blade wider than the other). This plug will fit into the power outlet only one way. This is a safety feature. If you are unable to insert the plug fully into the outlet, try reversing the plug. If it still fails to fit, contact your electrician to replace your obsolete outlet. Do not defeat the safety purpose of the polarized plug.

13. Power Cord Protection – Power-supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them, paying particular attention to cords at plugs, convenience receptacles, and the point where they exit from the product.
14. Outdoor Antenna Grounding – If an outside antenna or cable system is connected to the product, be sure the antenna or cable system is grounded so as to provide some protection against surges and built-up static charges. Article 810 of the National Electrical Code, ANSI/NFPA 70, provides information with regard to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna-discharge unit, connection to grounding electrodes, and requirements for the grounding electrode. See Figure A.
15. Lightning – For added protection for this product during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the antenna or cable system. This will prevent damage to the product due to lightning and power-line surges.
16. Power Lines – An outside antenna system should not be located in the vicinity of overhead power lines or other electric light or power circuits, or where it can fall into such power lines or circuits. When installing an outside antenna system, extreme care should be taken to keep from touching such power lines or circuits as contact with them might be fatal.
17. Overloading – Do not overload wall outlets, extension cords, or integral convenience receptacles as this can result in a risk of fire or electric shock.
18. Object and Liquid Entry – Never push objects of any kind into this product through openings as they may touch dangerous voltage points or short-out parts that could result in a fire or electric shock. Never spill liquid of any kind on the product.
19. Servicing – Do not attempt to service this product yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel.
20. Damage Requiring Service – Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
   a) When the power-supply cord or plug is damaged,
   b) If liquid has been spilled, or objects have fallen into the product,
   c) If the product has been exposed to rain or water,
   d) If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions; improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation,
   e) If the product has been dropped or damaged in any way, or
   f) When the product exhibits a distinct change in performance – this indicates a need for service.

Replacement Parts – When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or other hazards.

Safety Check – Upon completion of any service or repairs to this product, ask the service technician to perform safety checks to determine that the product is in proper operating condition.

Wall or Ceiling Mounting – The product should be mounted to a wall or ceiling only as recommended by the manufacturer.

Heat – The product should be situated away from heat sources such as radiators, heat registers, stoves, or other products (including amplifiers) that produce heat.
NOTE ON USE / OBSERVATIONS RELATIVES A L'UTILISATION / NOTAS SOBRE EL USO

- Avoid high temperatures. Allow for sufficient heat dispersion when installed on a rack.
- Evit aer temperatures élevées. Tenir compte d'une dispersion de chaleur suffisante lors de l'installation sur une étagère.
- Evite altas temperaturas. Permite la suficiente dispersión del calor cuando está instalado en la consola.

- Keep the set free from moisture, water, and dust.
- Prendez l'appareil contre l'humidité, l'eau et la poussière.
- Mantenga el equipo libre de humedad, agua y polvo.

- Do not let foreign objects in the set.
- Ne pas laisser des objets étrangers dans l'appareil.
- No deje objetos extraños dentro del aparato.

- Unplug the power cord when not using the set for long periods of time.
- Débrancher le cordon d'alimentation lorsque l'appareil n'est pas utilisé pendant de longues périodes.
- Desconecte el cordón de energía cuando no utilice el equipo por mucho tiempo.

- Handle the power cord carefully. Hold the plug when unplugging the cord.
- Manipule le cordon d'alimentation avec précaution. Tenir la prise lors du débranchement du cordon.
- Maneje el cordón de energía con cuidado. Sostenga el enchufe cuando desconecte el cordón de energía.

- Never disassemble or modify the set in any way.
- Ne jamais démonter ou modifier l'appareil d'une manière ou d'une autre.
- Nunca desarme o modifique el equipo de ninguna manera.

- For sets with ventilation holes:
- Ne pas obstruer les trous d'aération.
- No obstruya los orificios de ventilación.

1. HC-TR output circuit for both subtlety and power
A single push-pull circuit using an HC-TR (high current transistor) based on the same principles as the UMC-MOS used in the RCD-SA, DENON'S top grade monaural power amplifier, achieves both stable a high current supply and excellent low level signal linearity. The result is an extremely high level of both subtlety and power.

2. Strong power circuitry supporting the expressive abilities of the HC-TR output circuit
The strong power circuitry consisting of high speed rectifier diodes and large high sound quality block condensers allows the HC transistor output circuit to be used to its maximum potential.

3. S.L.D.C.
The DRA-F101 uses an S.L.D.C. (Signal Level Divided Construction) with the ideal separation of the different circuits (low level signal circuit, high level signal circuit, microprocessor circuit, etc.)

4. Source Direct function for improved sound quality
The DRA-F101 is equipped with a source direct function that bypasses the bass, treble, loudness and balance control circuits to achieve a simple signal path, contributing to keeping the sound pure.

5. AM/FM tuner with random 40-station preset function

6. System remote control unit
The DRA-F101 comes with a system remote control unit that can be used to control the CD player (DCD-F101) (when used system connections only).

7. Low standby power consumption
The power consumption when the power is in the standby mode is reduced to 1W or less.
2 BEFORE USING

Read the following before using the set.
- Before turning on the power
  Check again that all connections are correct and that there are no problems with the connection cords. Be sure to unplug the power cord before connecting or disconnecting the connection cords.
- Moving the set
  To prevent short-circuits or damage to the connection cords, always unplug the power cord and disconnect the connection cords between all other audio components when moving the set.

- Store this instructions in safe place
  After reading, store this instructions along with the warranty in a safe place. Also fill in the items on the back paper for your convenience.
- Illustrations in this manual
  Note that some of the illustrations used for explanations in this manual may differ from the actual set.

3 CONNECTING THE ANTENNAS

Installing the FM indoor antenna
Tune in FM station (see page 13), set the antenna so that distortion and noise is minimal, then secure the tip of the antenna in this position using tape or a pin.

Installing the AM loop antenna
Tune in an AM station (see page 13) and set the antenna as far from the system as possible to keep distortion and noise minimal. In some cases, it is best to invert the polarities. AM broadcasts cannot be received well if the loop antenna is not connected or if it is set close to metal objects.

Assembling the AM loop antenna

1. Remove the vinyl tie and take out the connection line.
2. Bend in the reverse direction.
3. Connect to the AM antenna terminals.
4. With the antenna on top any stable surface.
   a. With the antenna attached to a wall.

Installing an AM outdoor antenna
Connect the signal wire from the AM outdoor antenna to the antenna terminal. Be sure to connect the signal ground wire to the terminal. Also be sure to connect the included AM loop antenna.

Connecting an FM outdoor antenna
If good reception cannot be achieved with the included FM antenna, use an FM outdoor antenna. Connect an IEC type connector to the coaxial cable and connect the antenna to the FM COAX (75 Ω level) terminal.

Selecting a place for the FM outdoor antenna
- Set the antenna so that it points towards the broadcast station's transmitting antenna. Behind buildings or mountains, set the antenna in the position at which reception is best, and also try changing the direction of the antenna.
- Do not install the antenna under power lines. Doing so is extremely dangerous, as the power line could touch the antenna.
- Install the antenna away from roads or train tracks to avoid noise from cars or trains.
- Do not install the antenna too high, as it may be hit by lightning.

Note to CATV system installer:
This reminder is provided to call the CATV system installer’s attention to Article 820-40 of the NEC which provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the point of cable entry as practical.
4 CONNECTIONS

When connecting, also refer to the manuals of the other components.
When connecting to the DCD-F101, make the system connection shown by dotted line on the diagram below.
The DRA-F101 is not equipped with connection cord. Use the connection cord included with the DCD-F101.

NOTES:
- Do not plug the power cords into the power outlets until all connections have been completed.
- Check the left and right channels and be sure to interconnect them correctly (L to R, L to L).
- Plug in the power cords securely. Incomplete connections will result in noise.
- Use the AC OUTLET for audio equipment only. Do not use them for hair dryers, etc.
- Do not clasp the connection cords together with the power cords or place them near other electric products. Doing so may result in noise.
- The PHONO input jack is extremely sensitive. A booming sound may be produced from the speakers if the volume is turned up when no turntable is connected.
- The sound of another component may be heard if no component is connected to the input jacks of the function selected with the FUNCTION selector.

- When making system connection with the DCD-F101, connect the system cord to the DRA-F101 system connector (either 1 or 2). (System connection is indicated by dotted line on the diagram.)

NOTE: To allow for heat dispersal, do not place another component or any other object directly on top of the DRA-F101.
**System Operations**

- System operations such as the timer playback and auto power on functions can only be used if stereo audio cords and system cords are connected between all the system components. Be sure to securely connect all the connection cords between all the units.
- Disconnecting a system cord during system operation may result in malfunction. Be sure to unplug the power cords before changing the connections.

**Recommended System Installation**

- To ensure performance and stability, install the system (D-F101 series) as shown below.

![Diagram of Recommended System Installation](image)

- Do not place another component directly on top of the DRA-F101. To allow for heat dispersal, leave a space of at least 10 cm above the DRA-F101 so as not to obstruct its ventilation holes.
- For stability, do not stack more than three components on top of each other.

For heat dispersal, leave at least 10 cm of space between the top, back and sides of this unit and the wall or other components.

**Connecting Speaker Systems**

- **Speaker impedance**
  Use speaker systems with an impedance of 4 to 16Ωohms.
  - Note that using speakers with other impedances will activate the protector circuit and may result in damage.

**Protector Circuit**

The LHA-F101 is equipped with a high speed protector circuit.
This circuit prevents strong currents from being generated inside the unit and damaging internal circuitry if the speaker cables are not securely connected to the speaker terminals or if they are short-circuited. If the protector circuit is activated, the speaker output is automatically cut off. If this happens, turn off the unit's power, check the speaker cable connections, then turn the power back on. The sound will be muted for several seconds, after which the unit will operate normally.

- Be sure to connect the speaker cords to the terminals with the same polarities on the speaker and amplifier (Ω to Ω, + to +).
- When connecting, make sure that the speaker cords' core wires do not stick out and touch other terminals, other core wires or the rear panel.

**Connecting the speaker cords**

1. Peel off the coating from the tip of the cord.
2. Twist the core wire.
3. Turn the speaker terminal counterclockwise to loosen it.
4. Completely insert the core wire, then turn the terminal clockwise to tighten it.

**Switching the input function when input jacks are not connected**

A clicking noise may be produced if the input function is switched when nothing is connected to the input jacks. If this happens, either turn down the VOLUME control or connect components to the input jacks.

**Please be sure to unplug the cord when you leave home for a vacation.**

**NOTE:**
- NEVER touch the speaker terminals while the set is connected to a power supply. Doing so may result in electric shock.
5 PART NAMES AND FUNCTIONS

(1) Front Panel

1. Power operation switch (ON/STANDBY)
   - This turns the power for the entire system on and off.
   - Press this once to turn the power on, then press again to set the power to STANDBY mode.
   - The LED color changes as follows, according to the condition:
     - During power ON: green
     - During STANDBY: red
     - During TIMER STANDBY: orange
   - The mute mode is set when the main unit's power button is pressed and when the standby mode is canceled from the remote control unit. The power indicator flashes green when in the mute mode, then stops flashing and turns green once the set is in the operational mode.

2. Remote sensor (Remote Control Sensor)
   - Point the included remote control unit (RC-627) at this sensor when operating it.

3. Headphones jack (PHONES)
   - Use this jack to listen to the sound over commercially available headphones.
   - When the headphones plug is inserted into the jack, the speaker output is automatically cut off, so no sound is produced from the speakers.

4. Function dial (FUNCTION)
   - Swings the input function. Also used to set the modes selected with the mode button.

5. Display
   - Refer to page 9.

6. Volume control dial (VOLUME)
   - Use this to adjust the overall volume. (Rotary Encoder System)
   - The volume increases when the control is turned clockwise (Q), decreases when it is turned counterclockwise (S). The volume increases and decreases in 63 steps from the minimum (VOLUME 0) to the maximum (VOLUME MAX).

7. Source direct button (SOURCE DIRECT)
   - When pressed and set to the "ON" position, the tone control, bass, treble, balance and loudness circuits are set in the default condition.
   - When pressed again and set to the "OFF" position, the signals pass through the tone control circuits, so the tone (bass, treble, balance and loudness) can be adjusted as desired.

8. Band button (BAND)
   - Each time this button is pressed, the band and FM reception mode change as follows:

   FM AUTO — FM MONO — AM

9. Tuning buttons (TUNING UP AND DOWN)
   - Use these buttons to tune in AM and FM stations.

10. Memory/set button (MEMORY/SET)
    - Use this as the memory button when presetting AM and FM stations.
    - Use this as the set button when setting the time and timer when inputting data.
    - When the PTY search mode, press this button to select the type of program.

11. Display button (DISPLAY)
    - Each time this button is pressed, the display changes as follows:

    TIME — FUNCTION

12. Timer button (TIMER)
    - Press this button during power ON mode to confirm or change the display. Each time this button is pressed, the display changes as follows:

    CLOCK — TIMER STANDBY

    CLOCK: Indicates the current time.
    TIMER STANDBY: Indicates the timer standby mode. Use the TUNING buttons to set the timer standby mode on or off (refer to page 16).
    - Press this button during for at least 3 seconds to set the timer (refer to page 15) or to confirm the timer contents (refer to page 16).
    - Each time the TUNING button is pressed, the display changes as follows:

    TIME — EVERYDAY — ONCE

    TIME: Use this to set the time.
    EVERYDAY: Use this to set the everyday timer.
    ONCE: Use this to set the once timer.
    - Press this button during in STANDBY mode to switch ON/OFF ("Saving Energy Mode") on the clock display.

13. Tone button (TONE)
    - Use this to set the bass, treble and balance level.
    - Use this to set the loudness function to on or off.

(2) Rear Panel

14. SIGNAL GND (ground) terminal
    - Connect the turntable's ground wire here.

    NOTE:
    - This terminal is designed to reduce noise when a turntable is connected.
    - This is not a safety ground.

15. INPUT terminals (INPUTS)
    - There are input terminals for CD player, turntable, DVD or other playback components.

16. TAPE and MD PLAY terminals (PB)
    - Playback terminals (PB)

17. TAPE and MD REC terminals (REC)
    - Recording terminals (REC)
    - These are output jacks for recording.
    - TAPE:
      - Use these to connect a cassette deck.
    - MD:
      - Use these to connect an MD recorder

18. PRE OUT terminal (SUB WOOFER)
    - Connector jack for subwoofer with built-in amplifier (super woofer), etc.

19. AC OUTLET
    - When using in combination with the DCD-F101, connect DCD-F101 to the AC outlet on the receiver (DRA-F101).

20. Power cord
    - Plug this cord into a wall power outlet.

21. Speaker terminals (SPEAKER SYSTEM)
    - Use these to connect the speakers.

22. System connectors (SYSTEM CONNECTOR 1 and 2)
    - When connecting the DCD-F101 in a system, connect these connectors to system connectors on DCD-F101.
    - (Use the system cord included with the DCD-F101.)

23. AM antenna terminal (ANTENNA TERMINAL AM)
    - Connect the AM antenna here.

24. FM antenna terminal (ANTENNA TERMINAL FM)
    - Connect the FM antenna here.
(3) Display (2)

Mode indicators
- These indicate the various modes.
  - 0:
    This lights when the timer is set to the standby mode. It does not light if the current time and the timer have not been set.
  - TIME:
    This lights when the display is set to the time display.
  - TIMER:
    This lights when the timer is set.
    It also lights while the timer is being set.
  - TUNED:
    This lights when a station is properly tuned in.
  - STEREO:
    This lights in the AUTO mode when a stereo broadcast is tuned in.
  - MONO:
    This lights in the AUTO mode when a monaural broadcast is tuned in and when the MONO mode is set with the BAND button.
  - AUTO:
    This lights when the AUTO mode is set with the BAND button.
  - MEMO:
    This flashes when storing AM and FM stations in the preset memory to indicate that the station can be stored in the memory.
  - SLEEP:
    This lights when the sleep timer is activated.

Main display section
- The function, input program source, etc., are displayed here.
- During normal operation the input program source is displayed.
- When the mode button is pressed, the display switches to show the various functions.
- The reception band, reception frequency, time, timer setting times, etc., are displayed here.

6 SYSTEM REMOTE CONTROL

- The included remote control unit (RC-927) can be used to perform the main operations of the units in the D-F101 series that are connected with system connections. Other components cannot be operated with this remote control unit.
  Note that some functions may not operate with system remote control units. In this case, use the remote control unit included with the component.

(1) Inserting Batteries

1. Remove the remote control unit's cover.

2. Insert two R03 (AAA) batteries into the battery compartment in the direction indicated by the marks.

3. Set the cover back in its original position.

Cautions on Batteries
- Use R03 (AAA) batteries in this remote control unit.
- Replace the batteries with new ones after approximately 1 year, though this depends on the frequency with which the remote control unit is used.
- Replace the batteries with new ones if the unit does not operate when the remote control unit is operated from nearby, even if the batteries are less than a year old.
- Be sure to insert the batteries in the proper direction, following the "+" and "−" marks in the battery compartment.
- To avoid damage or leakage of battery fluid:
  - Do not use a new battery with an old one.
  - Do not use two different types of batteries.
  - Do not short-circuit, take apart, heat or dispose of batteries in flames.
- Remove the batteries when you do not plan to use the remote control unit for an extended period of time.
- If the battery fluid should leak, carefully wipe off the fluid from the inside of the battery compartment, then insert new batteries.
(2) Using the Remote Control Unit

NOTES:

• The remote control unit may not work properly if the remote sensor is exposed to direct sunlight or strong artificial light or if there is an obstacle between the remote control unit and the remote sensor.
• Do not press the buttons on the main unit and the remote control unit at the same time. Doing so will result in malfunction.

Point the remote control unit at the remote sensor on the main unit as shown on the diagram when operating it.

(3) Names and Functions of Remote Control Unit Buttons

- Opening the remote control unit's cover

• The remote control unit can be used from a straight distance of about 7 meters, but this distance will be shorter if there is an obstacle in the way or if the remote control unit is not pointed directly at the remote sensor.
• Use the remote control unit within a range of 30° to the left and right of the remote sensor.
- Buttons not described here function in the same way as the corresponding buttons on the main unit.

Number buttons
Press these buttons to recall preset station.
Examples:
To call the station at preset number 12:
Press 1, 2
To call the station at preset number 29:
Press 2, 9

Power standby button
(SYSTEM POWER STANDBY)
Press this to set the DRA-F101's power to the standby mode.
(When connected in a system with the D-F101 series, this button sets the power of the entire system to the standby mode.)

Power on button
(SYSTEM POWER ON)
When this button is pressed while the DRA-F101's power is in the standby mode, the DRA-F101's power turns on.
(When connected in a system with the D-F101 series, this button turns on the power of the entire system.)

D-F101 series
function operation block
When connected in a system with the DCD-F101, these buttons are used to operate the DCD-F101.
For operating instructions, refer to the manuals of the DCD-F101.

BAND button (BAND)
Use this button to select the band.
FM AUTO—FM MONO—AM

PRESET button (PRESET)
Use these buttons to recall preset stations on the tuner.

FUNCTION button
Press this to select the function source to be played.
The function switches in the following order each time the button is pressed:
CD—TUNER—D/D/DAUX—MD—TAPE—PHONE

SLEEP button (SLEEP)
Press this button to set the sleep timer

REMOTE control function selector switch
Use this to select the function to be operated with this remote control unit. Set to TUNER to use the DRA-F101's tuner function. For instructions on operating the various components, refer to their respective manuals.

DIMMER button
The display becomes darker (in 4 steps) each time this button is pressed.
Adjust the brightness of the display according to the brightness of the room.

TUNING button (A, T)
Use these buttons to selecting the station.

VOLUME/SELECT buttons
- Press △ to increase the volume, ○ to decrease it.
- These buttons are also used to set various modes.

MODE button
The mode switches as follows each time the button is pressed:
BASS—TREBLE—LOUDNESS

Models compatible with system remote control
- Receiver: DRA-F101
- CD player: DCD-F101

* The buttons above for which there are no explanations cannot be operated with the DRA-F101.
7 OPERATION

(1) Playback

1. Check that all connections are correct.
   - Turn on the power.
   - The indicator first flashes green, then after about 6 seconds stops flashing, remaining lit, indicating that the unit is set to the power on mode.

2. Power on/standby mode and function memory
   - When the remote control unit is used to turn the DRA-F101’s power on from the standby mode, the function is set to the function that was selected when the power was last set to the standby mode. (Last memory function)
   - If the function has been cleared from the memory, the function is set to "CD" when the DRA-F101’s power is turned on.

3. "FUNCTION" dial (Main unit) and "FUNCTION" (Remote control unit)
   - Either turn the FUNCTION dial on the main unit or press the remote control unit’s FUNCTION button to select the function source to be played.
   - The function switches in the order shown below:
   - The function switches in the opposite order when the dial is turned counterclockwise (Q).

4. Start playback of the selected function source.
   - For instructions on operation, refer to the component’s operating instructions.

5. Adjust the volume.

6. Adjust the BALANCE, BASS, and TREBLE controls and set the LOUDNESS position to the desired position.
   - For instructions on adjusting, see "(3) Setting the various modes" on page 12, 13.

7. To use the source direct function:
   - Press the SOURCE DIRECT button to display “SD ON”.

(2) Recording

1. Follow step 1 to 4 under “(1) Playback”.

   Start recording on the cassette deck or MD recorder.
   - For instructions, refer to the component’s operating instructions.
   - Operating the VOLUME, BALANCE, BASS, TREBLE and the LOUDNESS controls will not affect the sound being recorded.
   - When the function source is set to “MD”, recording is performed from the MD recorder onto the cassette deck. When the function source is set to “TAPE”, recording is performed from the cassette deck onto the MD recorder.

(3) Setting the various modes

1. Adjusting the bass and treble

   Press the TONE or MODE button to display the mode to be adjusted (“BASS” or “TREBLE”).

   1. The mode switches as follows each time the button is pressed:
      - BASS → TREBLE → LOUDNESS
      - Repeat function source
   - This cannot be selected when the source direct mode is set to “ON”.

   2. Either turn the FUNCTION dial on the main unit or use the remote control unit’s SELECT buttons.
      - To increase the bass or treble:
        - Turn the dial clockwise (Q) or press the △ button.
        - To decrease the bass or treble:
        - Turn the dial counterclockwise (Q) or press the □ button.
        - The bass and treble can be adjusted within the range of -8 to 0 to +8 in steps of 2. The response is flat at 0.
[2] Setting the loudness mode

Press the TONE or MODE button to display "LOUDNESS".

1. (Main unit) (Remote control unit)
   - The mode switches as shown at the left each time the button is pressed.
   - "LOUDNESS" cannot be selected when the source direct mode is on.

Either turn the FUNCTION dial on the main unit or use the remote control unit's SELECT buttons.

2. (Main unit) (Remote control unit)
   - To set to "ON": Turn the dial clockwise (Q) or press the △ button.
   - To set to "OFF": Turn the dial counterclockwise (Q) or press the ▽ button.

[3] Adjusting the balance

Press the TONE or MODE button to display "BALANCE" (Refer to page 12.)

1. (Main unit) (Remote control unit)
   - "BALANCE" cannot be selected when the source direct mode is on.

Either turn the FUNCTION dial on the main unit or use the remote control unit's SELECT buttons.

2. (Main unit) (Remote control unit)
   - If the volume of the right speaker is low: Turn the dial clockwise (Q) or press the △ button.
   - If the volume of the left speaker is low: Turn the dial counterclockwise (Q) or press the ▽ button.
   - The balance can be set to "CENTER" or adjusted within the range of -10 to +20 in steps of 1. When set "CENTER", the difference between the volume of the left and right speakers is 0.

[8] LISTENING TO RADIO

(1) Tuning

Auto Tuning
- When a program being broadcast in stereo is received, the "STEREO" indicator lights and the program is received in stereo.
- If reception is poor and there is much noise in the stereo signals, press the BAND button to set the FM MONO mode.
- When one of the TUNING UP/DOWN button is pressed, the frequency changes in steps of 100 kHz in the FM band, 10 kHz in the AM band.
- If one of the TUNING UP/DOWN button is held for over 1 second, the frequency continues to change when the button is released (auto tuning) and stops when a station is tuned in. Tuning will not stop at stations whose reception is poor.
- To stop the auto tuning function, press the TUNING UP/DOWN button once.

Example: Tuning in FM 92.50 MHz
(AM stations are tuned in using the same procedure.)

- Press the power operation switch to turn on the power.

1. (Main unit) (Remote control unit)

- Use the TUNING UP/DOWN button to tune the frequency to 92.50.

3. (Main unit) (Remote control unit)
   - This lights when a station is tuned in.

- Press the BAND button on the tuner to select the FM AUTO.

2. (Main unit) (Remote control unit)

- Use the TUNING UP/DOWN button to tune the frequency to 92.50.

3. (Main unit) (Remote control unit)
   - This lights when a station is tuned in.
(2) Presetting AM and FM stations

Example: To preset the currently tuned in FM station at preset number “3”

Press the MEMORY/SET button.
- The “P.SET”, “MEMO” indicator flashes.

Depending on what preset number is displayed before the button is pressed, the preset number section flashes as shown below and the setting standby mode is set.
- When “01” to “10” or “0” is displayed, “0” flashes.
- When “11” to “20” or “1” is displayed, “1” flashes.
- When “21” to “30” or “2” is displayed, “2” flashes.
- When “31” to “40” or “3” is displayed, “3” flashes.

While the “MEMO” indicator is flashing, press the TUNING UP button three times to display “P.SET”, “03”.

To store the station at a different preset number, use the tuning buttons (TUNING UP or DOWN) to set the desired preset number.

Press the MEMORY/SET button again while the “MEMO” indicator is flashing.
- The “MEMO” indicator turns off and the station is preset.

* A total of 40 AM and FM stations can be preset using this procedure.

(3) Tuning in Preset Stations

Example: To tune in the station stored at preset number “3”

* When operating with the system remote control unit, first set the remote control unit’s function selector switch to “TUNER”.

Procedure

- This setting can also be made by pressing the “P.SET” button instead of pressing “0”.
- To store the station at a different preset number, use the number buttons and the +10 button on the system remote control unit (RC-927) to set the desired preset number.

Examples:
To store the station at preset number 12:
Press , ,
To store the station at preset number 29:
Press , ,

* When operating with the system remote control unit, first set the remote control unit’s function selector switch to “TUNER”.

Procedure:

- Instead of pressing , the preset channel can also be called out by pressing the or button to display “P.SET 03”.
- To call the station at a different preset number, use the number buttons and the +10 button on the system remote control unit (RC-927) to set the desired preset number.

Examples:
To call the station at preset number 12:
Press , ,
To call the station at preset number 29:
Press , , ,

Presetting

- When a station is preset, both the reception frequency and reception mode are stored in the memory.
- If a station is preset at a number where another station is already preset, the previous station is erased and the new station is set.
- The preset memory is not erased immediately if the power supply is cut off momentarily.
9 USING THE TIMER

(1) Setting the Current Time (12-hour display)

Example: Setting the current time to 9:30 p.m.

1. Turn on the power.
2. Press the TIMER button for at least 3 seconds. “TIME” flashes on the display. If the time is already set, “EVERYDAY” is displayed. Press one of the TUNING buttons to display “TIME,” then perform step 3.
3. Press the MEMORY/SET button. The hours position flashes.
4. Use the TUNING buttons to input the hours (PM 9). “9” flashes in the hours position.
5. Press the MEMORY/SET button. “9” stops flashing, remaining lit, and the minutes position starts flashing.
6. Use the TUNING buttons to input the minutes (30). “30” flashes in the minutes position.
7. Press the MEMORY/SET button at the sound of the chime of a time service, etc. “30” stops flashing, remaining lit, and the current time is displayed.

(2) Before Setting the Timer

- Be sure to set the current time. If the current time is not set, the timer standby indicator (“") will not light and the timer will not function.
- Be sure to preset the station before setting the timer. (Refer to “Presetting AM and FM stations” on page 14.)
- The DRA-F101 is equipped with two types of timers: the everyday time which turns the power on and off at the same times every day, and the once timer that turns the power on and off only once.
- Do not change the timer standby mode after the timer is activated (after the timer on time is reached). The timer may not operate properly.
- It is not possible to set the timer start and end time to the same time.
- If the display or operation is not normal, unplug the power cord, then plug it back in while pressing the memory/ button (MEMORY/SET). This restores the tuner to the initial default values. After doing this, reset the presettings current time and timer settings.
- When setting the timer to operate the CD player do so with a disc loaded and the disc holder closed. The timer will not operate properly if no disc is loaded or if the disc holder is open.

(3) Setting the Timer

- The timer function lets you switch the power between the on and standby modes automatically at the desired times.
- When connected in a system with the DCD-F101, the timer can be used to play a CD.

Example: Using the everyday timer to listen to the station stored at preset number 3 (FM 98.00 MHz) from 2:35 p.m. to 2:56 p.m.

- Use the TUNING buttons to switch the function to “TUNER.”

1. Turn on the power.
2. Press the TIMER button for at least 3 seconds. “EVERYDAY” is displayed.
3. If the time is not set, “TIME” is displayed. Perform steps 3 to 7 on page 15, then start the timer setting over.
4. Press one of the TUNING buttons to display “EVERDAY” or “ONCE.”
5. Press the MEMORY/SET button. This sets the unit to the timer setting mode’s function setting mode.

Example: When the everyday timer is selected

- Use the TUNING buttons to set preset number 3.

6. Press the MEMORY/SET button. “TUNER” is stored in the memory as the timer function.
7. Press the TUNING button to set preset number 3.
8. Press the MEMORY/SET button. The preset station is stored in the memory and the timer on time setting mode is set. “E” and “ON” appear alternately in the display in the steps 8 to 11.

9. "Setting the timer on time”

Use the TUNING buttons to set the hours position to “PM 2.”
(4) Using the timer

The timer and timer functions are incorporated in this unit.

**Timer Settings**

- **Everyday Timer**: Use this to turn the power on and standby at the same time every day.
- **Once Timer**: Use this to turn the power on and standby once.
- **Sleep Timer**: Use this to set the power to turn standby after 10 to 60 minutes, in steps of 10 minutes (operated from the remote control unit).

**Notes on timer settings**

- Be sure to set the current time beforehand.
- To listen to a radio program using the timer, be sure to preset the station beforehand (Refer to "Presetting AM and FM Stations" on Page 14.).

**Power Failures**

If the power cord is unplugged or there is a power failure, the settings of the current time and once timer are erased and the time display will flash. If this happens, reset the current time and the once timer. Also check the timer and timer presets, and reset them if they have been cleared.

**Checking the Settings**

To check the timer settings, press the TIMER button for at least 3 seconds to select EVERYDAY or ONCE TIMER. Next, press the TUNING button to select EVERYDAY or ONCE TIMER, then press MEMORY/SET button repeatedly to display in order: Timer Start mode, and (when in TIMER mode) the reception band and preset channel number, Timer On time, Timer Off time, Press the MEMORY/SET button again to return to the current mode display.

**Changing the Settings**

Repeat the timer setting operation to erase the previous settings and set the new settings.

**Note on Setting the Timer**

If the timer set with the timer is reached while the system power is on, the operation switches to the operation set by the timer.
(5) Timer function
When connected in a system with the DCD-F101
The power can be set to turn on and off at a specific time or at the same time everyday, in any modes: tuner ("TUNER"), CD player ("CD").

(6) Setting the Sleep Timer
With this function, the power can be set to turn off after 10 to 60 minutes, in steps of 10 minutes, using the remote control unit.

Cancelling the Sleep Timer
Press the SLEEP button repeatedly until the "SLEEP" indicator turns off.
The sleep timer is also canceled if the power operation switch or the power operation switch on the remote control unit is pressed, turning the system power off.

Example: To turn the power off after 50 minutes.
(This operation is only possible from the remote control unit (RC-927).)

1. Press the SLEEP button.

2. Press the SLEEP button again while the "SLEEP" indicator is flashing.

3. The previous display reappears after 5 seconds. The "SLEEP" indicator remains lit, indicating that the sleep timer is functioning.

NOTE: If a several timer operations are set at once, the sleep timer has priority.

- The time is reset to "60" (60 minutes) if the SLEEP button is pressed again while the sleep timer is functioning.

10 SYSTEM FUNCTIONS
Operation is even easier when the DCD-F101 is connected to the DRA-F101 with system connection. (For instructions on connections, refer to "CONNECTIONS" on page 6, 7.)

- All the system function signals for operating the DCD-F101 are output from the DRA-F101, so be sure to connect the DRA-F101 when making system connection.

- The system functions will only work when the DCD-F101 is connected. They will not work with other components.

- When system connections are made, the system functions described below can be used.
  1) The system remote control unit (RC-927) included with the DRA-F101 can be used to perform the main operations on the DCD-F101.
  2) The remote control signals of the DCD-F101 are received by the DRA-F101's remote sensor.
  3) Auto function selection:
      The function automatically switches when the PLAY/PAUSE button (\[\[\]) on the DCD-F101, is pressed, and playback begins.
  4) Timer functions:
      The timer functions on the stereo receiver (DRA-F101) can be used to start playback at set times. The sleep timer can also be used.

- For instructions on the various operations, refer to the components' operating instructions.
## TROUBLESHOOTING

Check the following before assuming there is a problem with the set.

1. Are all connections proper?
2. Is the set being operated as described in the operating instructions?
3. Are the speakers and input components being operated properly?

If the set does not seem to be operating properly, check the points listed below. If these points do not apply, the set may be damaged. Turn off the power immediately and contact your store of purchase.

### Symptom: Boom sound produced when playing records.
- Turntable's ground wire not connected.
- Input cords not properly connected to PHONO terminals.
- Influence from a TV or other electrical device near the turntable.
- Connect securely.
- Connect securely.
- Change the position of installation.

### Symptom: Howling produced when volume is turned up while playing records.
- Turntable and speaker systems are too close.
- Floor is soft and vibrates easily.
- Move speaker systems as far away as possible.
- Use cushions to absorb the vibrations transmitted from the floor to the speakers. If the turntable does not include insulators, use audio insulators, available in stores.

### Symptom: Sound is distorted.
- Stylus pressure is too light.
- Dirt on tip of stylus.
- Defective cartridge.
- Apply proper pressure.
- Check the tip of the stylus.
- Replace the cartridge.

### Symptom: This unit does not operate properly when remote control unit is used.
- Batteries dead.
- Remote control unit too far from this unit.
- Obstacle between this unit and remote control unit.
- Different button is being pressed.
- # and 8 ends of battery inserted in reverse.
- Replace with new batteries.
- Move closer.
- Remove obstacle.
- Press the proper button.
- Insert batteries properly.
SPECIFICATIONS

- POWER AMPLIFIER SECTION
  - Rated Output Power: 36 W + 36 W (4 Ωohms, 1 kHz, T.H.D. 0.7%)  
  - Output terminals: 4 to 16Ωohms
  - PRE AMPLIFIER SECTION
    - Input Sensitivity: PHONO: 2.5 mV/47 kΩohms  
    - Input Impedance: CD, DVD/AUX:  
    - TAPE, MD: 300 mV/47 kΩohms  
    - RIAA Deviation: PHONO: 20 Hz to 20 kHz ±0.5 dB

- OVERALL CHARACTERISTICS
  - SN Ratio (IHF A Network): PHONO: 80 dB (at 5 mV input) (input terminals short-circuited)  
  - CD, DVD/AUX:  
  - TAPE, MD: 90 dB (SOURCE DIRECT: ON)  
  - Frequency Response: 5 Hz to 80 kHz: +0.5, -3 dB (SOURCE DIRECT: ON)  
  - Tone Control Adjustable Range: BASS: 100 Hz ±8 dB  
  - TREBLE: 10 kHz ±8 dB  
  - LOUDNESS: 100 Hz ±8 dB  
  - 10 kHz ±6 dB

- TUNER SECTION
  - Reception frequency range: FM: 87.5 MHz – 108.0 MHz  
  - AM: 520 kHz – 1710 kHz  
  - Practical sensitivity: FM: 1.2 μV/75 Ωohms (12.8 dB)  
  - AM: 18 μV  
  - FM stereo isolation: 40 dB (1 kHz)  
  - FM S/N ratio: Monaural: 74 dB  
  - FM harmonic distortion: Stereo: 70 dB  
  - Monaural: 0.3%  
  - Stereo: 0.4%

- CLOCK/TIMER SECTION
  - Clock system: Power source frequency synchronization system  
  - Clock precision (per month): ±30 seconds  
  - Timer functions: Everyday timer (1 setting)  
  - Once timer (1 setting)  
  - Sleep timer (maximum 60 min.)

- OTHERS
  - Power Supply: AC 120 V, 60 Hz  
  - Power Consumption: 85 W  
  - Dimensions: (Approx. 1W in standby mode)  
  - Mass: 250 (W) X 81.5 (H) X 265 (D) mm ±9-27/32" x 3-13/64" x 10-7/32"
