Pro Junior introduction

The **Fender Pro Junior** amplifier is the ultimate in a professional practice amp. A TRUE ALL TUBE AMP with that late nite blues tone found nowhere else but in a Fender.

The **Fender Pro Junior** amplifier offers both simplicity and versatility through its top panel mounted controls: Power Switch, Power On indicator, Tone, Volume and Input jack. You'll get smooth tones from sparkly clean all the way to the edge with the **Fender Pro Junior**.

The speaker is connected through a standard 1/4" jack allowing the player's choice of the internal speaker or any external 8Ω cabinets.

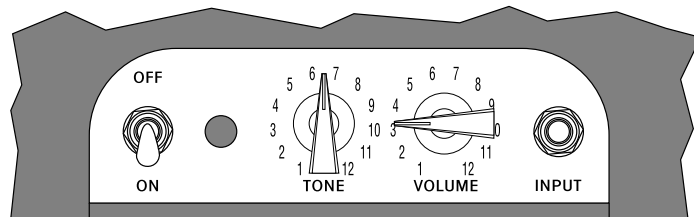

The **Fender Pro Junior's** compact size, professional tone, and traditional styling make it ideal for practice, backstage warm up, and serious recording.

The selection of a Fender amplifier will reward you with years of quality performance and a wide range of musical sounds. The built in quality of a Fender amplifier is the result of over four decades of dedication in the combined skills of research and development by our engineers and musicians.

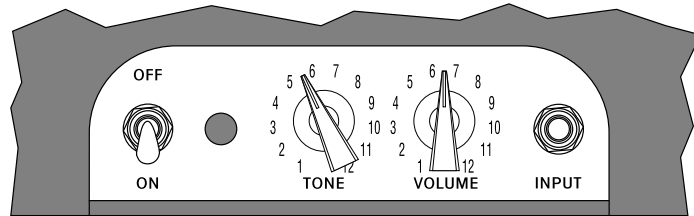

That is why we proudly say...FENDER, The Sound That Creates Legends

Pro Junior sound settings

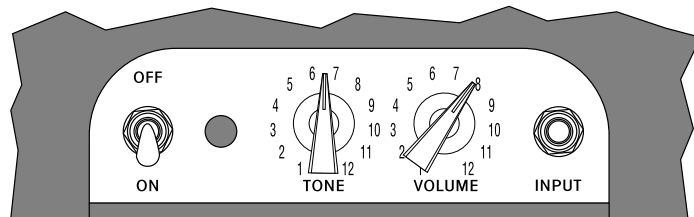

Clean it up and
pick it easy

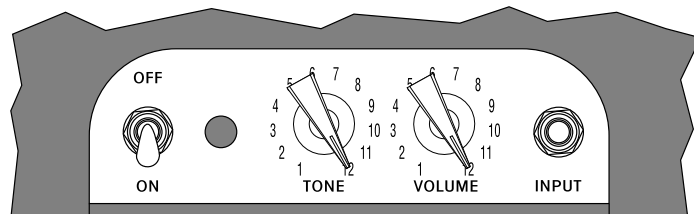

This is what we're
here for, jam

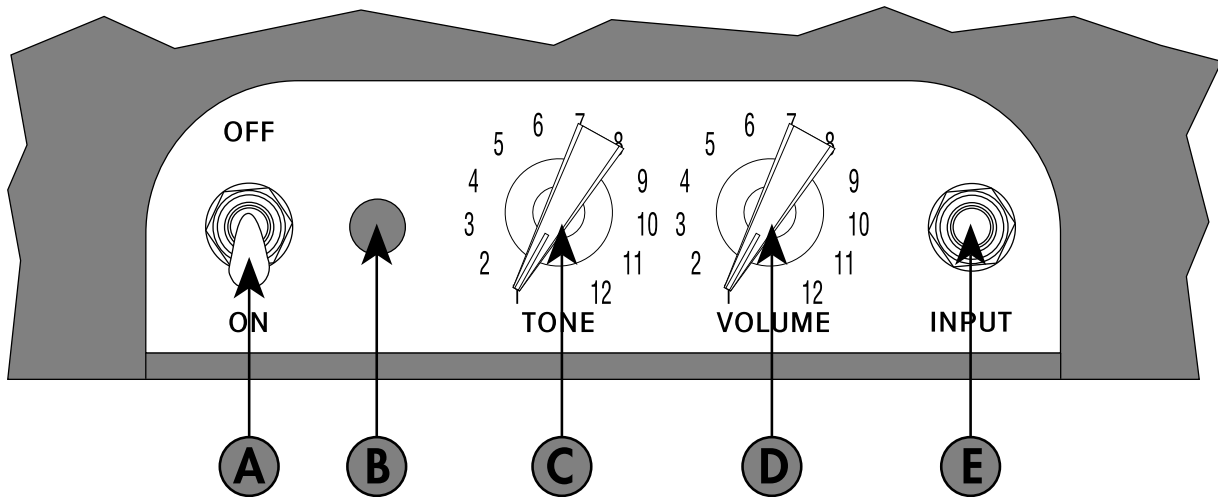

Dial in a little dirt

All out get down on
the floor Blues

Pro Junior front panel functions

A. Power Switch – This switch turns the AC power ON and OFF. When the switch is OFF, the amplifier is completely shut down.

B. Power Indicator – When the indicator is illuminated the Pro Junior is receiving power.

C. Tone – Adjusts the amount of boost or cut in the upper mids and highs.

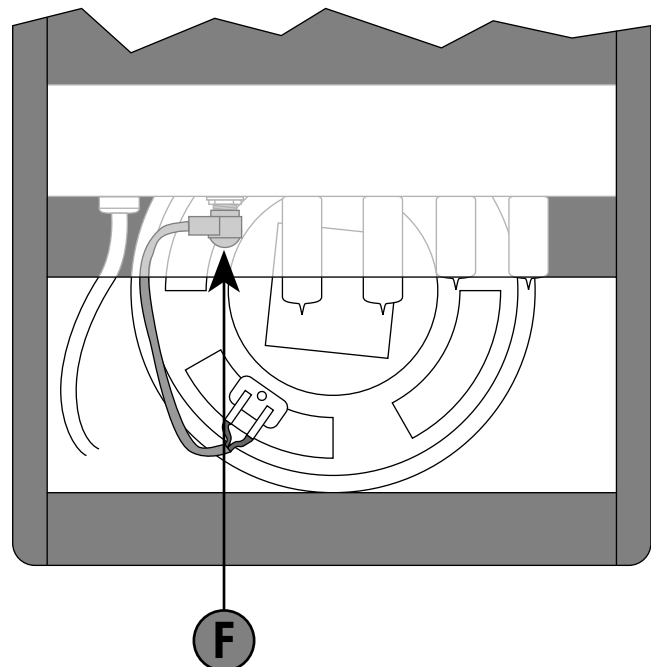

D. Volume – Adjusts the overall loudness of the amplifier.

E. Input – A high impedance, high sensitivity plug-in connection for instruments.

Pro Junior rear panel

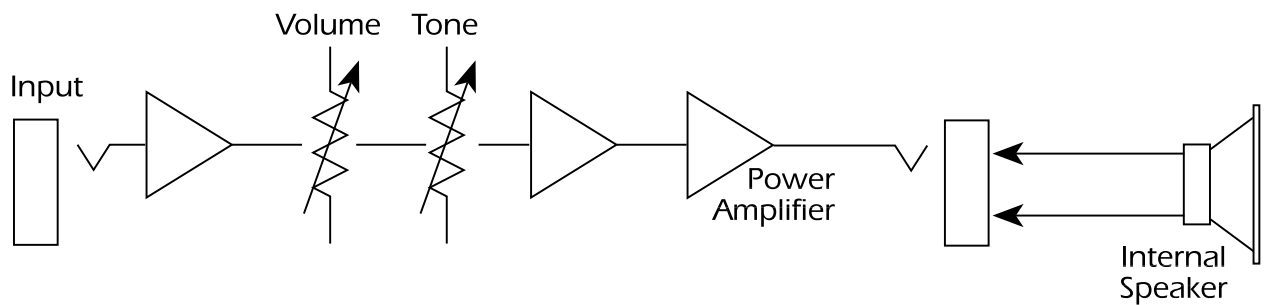

F. Speaker Connector – This jack provides a connection for the internal speaker. An Eight Ohm external speaker cabinet may be used instead of the internal speaker.

WARNING: NO USER SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED PERSONNEL ONLY.
