1. DC voltage measurements taken with vacuum tube voltmeter.
2. AC voltages measured at 1000 volts per volt.
3. Measured values are from socket pins to common negative.
4. All readings were taken with the amplifier turned on.
5. All resistors marked with values are for reference purposes only.
6. All capacitors are 1000 volt, 10 microfarad.

HIGH VOLTAGE WIRE WRAP TRIMMING TO THE terminals of the ELECTRIC CAPACITOR CONNECTED IN THE ASSOCIATED CIRCUIT.

PHASE INVERTER BALANCE ADJUSTMENT (HAS)

- Voltage should not be attempted without the proper equipment.
- Connect an audio signal generator to the amplifier.
- Connect a harmonic distortion analyzer across the resistor.
- Set the trimmer switch to "OFF.""
- Adjust the trimmer to "OFF." This output must be held constant.
- Adjust the trimmer to "OFF." This output must be held constant.
- Adjust the trimmer to "OFF." This output must be held constant.
- Adjust the trimmer to "OFF." This output must be held constant.
