Units are designed for operation as follows.

- **U.S.A. and Canada** .................................................. AC 120 V only
- **Australia** ............................................................... AC 240 V only
- **China** ................................................................. AC 220 V only
- **Other countries** ..................................................... AC 110-120/220-240 V switchable

*AC voltage selection*

The AC voltage selector switch on the rear panel is set to the voltage that prevails in the area to which the unit is shipped. Before connecting the power cord to your AC outlet, make sure that the setting position of this switch matches your line voltage. If not, it must be set to your voltage in accordance with the following direction.

Note

Our warranty does not cover damage caused by excessive line voltage due to improper setting of the AC voltage selector switch.

AC voltage selector switch

Move switch lever to match your line voltage with a small screwdriver or other pointed tool.

**Safety precautions**

⚠️ **Caution:** Read this section carefully to ensure safe operation.

**WARNING:** TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

- **CAUTION:** Risk of electric shock. Do not open. No user-serviceable parts inside. Refer servicing to qualified service personnel.

- **THE LIGHTNING FLASH WITH ARROWHEAD SYMBOL, WITHIN AN EQUILATERAL TRIANGLE, IS INTENDED TO ALERT THE USER TO THE PRESENCE OF UNSUSPECTED "DANGEROUS VOLTAGE" WITHIN THE PRODUCT'S ENCLOSURE THAT MAY BE OF SUFFICIENT MAGNITUDE TO CONSTITUTE A RISK OF ELECTRIC SHOCK TO PERSONS.**

- **THE EXCLAMATION POINT WITHIN AN EQUILATERAL TRIANGLE IS INTENDED TO ALERT THE USER TO THE PRESENCE OF IMPORTANT OPERATING AND MAINTENANCE (SERVICING) INSTRUCTIONS IN THE LITERATURE ACCOMPANYING THE APPLIANCE.**

**Unpacking**

Unpack the unit carefully and make sure that all accessories are put aside so they will not be lost. Examine the unit for any possibility of shipping damage. If your unit is damaged or fails to operate, notify your dealer immediately. If your unit was shipped to you directly, notify the consignee—the person or company receiving the unit—without delay. Only the consignee—the person or company receiving the unit—can file a claim against the carrier for shipping damage. We recommend that you retain the original carton and packing materials for use should you transport or ship the unit in the future.

**Accessories**

- **FM indoor antenna (1)**
- **AM loop antenna (1)**
- **Loop antenna stand (1)**
- **Remote control unit (1)**
- **Batteries (R6/AA) (2)**
Special features

Station preset

This unit incorporates a function for storing received stations in preset memory with a simple operation. It is very convenient to preset the stations you like. The preset stations can be recalled also very easily.

Speaker system

Setting the Speaker Impedance Selector to match the impedance of your speakers allows you to take full advantage of your speaker's performance characteristics by driving them under the best possible conditions. We've also included 2 sets of speaker terminals so you can connect two different sounding speaker systems, or use two sets of speakers at once (only when both sets of speakers have an impedance of 8 ohms or more).

Remote controllable audio function

By connecting KENWOOD source components such as a cassette deck and CD player through system control connection, the basic operations of these components can be controlled from the remote control unit provided with this unit. A single remote control unit can control the entire audio system easily.

1 Specifications

Caution: Read the pages marked  with careful to ensure safe operation.
Connections of Audio and Video components

Make connection as shown below. When connecting the related system components, refer also to the instruction manuals of the related components. Do not plug in the power lead until all connections are completed.

Malfunction of microcomputer

If operation is not possible or erroneous display appears even though all connections have been made properly, reset the microcomputer referring to "In case of difficulty."
About the system control connections

Connecting system control cords after connecting a KENWOOD audio component system lets you take advantage of convenient system control operations.

There are two KENWOOD system control modes. Make connections according to the groups of terminal symbols shown below.

- **XS8 Mode**: lets you combine [XE], [XS], and [XS8] terminals
- **SL16 Mode**: for [SL16] terminals only

This unit is compatible with both [XS8] and [SL16] modes. It comes from the factory set to the [XS8] mode. To switch to the [SL16] mode, follow the instructions in "SWITCHING FROM [XS8] TO [SL16]" below.

**EXAMPLE: [XS8] mode connections**
The underlined portion represents the setting of the system control mode.

```
[SL16] [XS8]
[SL16]
[SL16] [XS] [XS8] [XR]
[SL16] [XS] [XS8]
[XS]
```

**EXAMPLE: [SL16] mode connections**
The underlined portion represents the setting of the system control mode.

```
[SL16] [XS8]
[SL16]
[SL16] [XS] [XS8] [XR]
[SL16] [XS] [XS8]
[XS]
```

- Some CD players and cassette decks are not compatible with the [SL16] system control mode. Be sure to use the [XS8] system control mode when making system connections with equipment that is not [SL16] compatible.
- Some MD players are not system control compatible. You cannot make system control connections to this kind of equipment.

---

**ABOUT THE SYSTEM CONTROL OPERATIONS**

**Remote Control (Except [SL16])**
Lets you operate source components with the system remote supplied with this unit.

**Automatic Operation (Except [XR] equipment)**
When you start playback from a source component, the input selector on this unit switches to that component automatically.

**Synchronized Recording (Except [XR] equipment)**
Lets you synchronize recording with the start of playback when recording from CD, MD, or analog discs.

---

**SWITCHING FROM [XS8] TO [SL16]**
You can easily change the system control mode with the following operation. Do this operation after completing all connections.

**Switching to [SL16]:**
Unplug the AC power cord from the wall outlet, then plug it back in while holding down the AUTO/MANUAL key.

**Switching back to [XS8]:**
Unplug the AC power cord from the wall outlet, then plug it back in while holding down the BAND key.

- This operation will not affect items stored in the memory.

---

The system control mode will revert to [XS8] if the power cord is disconnected from the AC outlet for three consecutive days. If you would like to make the unit completely (and permanently) [SL16] compatible, please consult your nearest retailer or the KENWOOD Marketing Department.

---

1. Connect all cords firmly. If connections are loose, there could be loss of sound or noise produced.
2. When plugging and unplugging connection cords, be sure to first remove the power cord from the AC outlet. Plugging / unplugging connection cords without removal of the power cord can cause malfunctions or damage to the unit.
**Connection of speakers**

1. Strip coating.
2. Push lever.
3. Insert cord.
4. Return lever.

**Speaker protection circuitry**

- If the speaker cords are short-circuited, the speaker protection circuitry is activated and the sound is muted. If this occurs, switch the POWER key to OFF, remove the short-circuit from the speaker cords, and switch the POWER key to ON again. Normal operation will resume.

- Never short-circuit the + and - speaker cords.
- If the left and right speakers are connected inversely or if the speaker cords are connected with reversed polarity, the sound becomes unnatural with ambiguous acoustic image positioning. Be sure to connect the speakers and speaker cords correctly.

---

**Setting the speaker IMPEDANCE SELECTOR**

When using the speaker A or speaker B separately:

<table>
<thead>
<tr>
<th>Speaker impedance</th>
<th>Selector position</th>
</tr>
</thead>
<tbody>
<tr>
<td>4 Ω, 6 Ω</td>
<td></td>
</tr>
<tr>
<td>8 Ω, 16 Ω</td>
<td></td>
</tr>
</tbody>
</table>

When using the speaker A and B simultaneously:

<table>
<thead>
<tr>
<th>Speaker impedance</th>
<th>Selector position</th>
</tr>
</thead>
<tbody>
<tr>
<td>8 Ω, 16 Ω</td>
<td></td>
</tr>
</tbody>
</table>

**CAUTION:** To prevent fire or damage requiring service, set the IMPEDANCE SELECTOR switch as described below.

- When the IMPEDANCE SELECTOR switch is set to "A or B: LESS THAN 8Ω, A and B: 8Ω OR MORE", it is possible to use the A and B speakers at the same time. Therefore, when using the speakers A and B simultaneously, be sure to set the IMPEDANCE SELECTOR switch to the "A or B: LESS THAN 8Ω, A and B: 8Ω OR MORE" position.
- During speaker system connection and operation of the speaker IMPEDANCE SELECTOR, set the REMOTE POWER key to OFF.
**Connection of antenna**

**Connection method to each antenna terminal**

1. Push lever.
2. Insert cord.
3. Return lever.

**AM loop antenna connection**
The supplied antenna is for indoor use. Place it as far as possible from the main system, TV set, speaker cords and power cord, and set it to a direction which provides the best reception.

**AM outdoor antenna connection**
If the reception is poor when the AM loop antenna is used, distribute a vinyl-coated wire of more than 6 meters outdoors, without disconnecting the loop antenna.

**FM indoor antenna connection**
The accessory antenna is for temporary indoor use only. For stable signal reception we recommend using an outdoor antenna. Remove the indoor antenna if you connect one outdoors.

**FM outdoor antenna connection**
Lead the 75 Ω coaxial cable connected to the FM outdoor antenna into the room and connect it to the FM 75 Ω terminal.

**FM DE-EMPHASIS / CHANNEL SPACE switch (Except for U.S.A., Canada and Australia)**

The FM DE-EMPHASIS / CHANNEL SPACE switch on the rear panel is set to the correct setting that prevails in the area to which the unit is shipped. However, if the FM DE-EMPHASIS / CHANNEL SPACE setting is not matched to the area where the unit is to be used, for instance when you moved from area 1 to area 2 or vice versa, desired reception of AM / FM broadcasts is not expected. In this case, change the FM DE-EMPHASIS / CHANNEL SPACE setting in accordance with the area corresponding to the table. The FM DE-EMPHASIS is switched over at the same time.

- When changing the setting of the FM DE-EMPHASIS / CHANNEL SPACE switch, first disconnect the power cord of the amplifier, then reset the channel space switch, connect the power cord again, and turn the power on.

<table>
<thead>
<tr>
<th>Area</th>
<th>CHANNEL SPACE freq.</th>
<th>FM DE-EMPHASIS</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 U.S.A., Canada, Hawaii, South America countries</td>

Controls and indicators

About the STANDBY indicator

This unit has a STANDBY indicator. When the STANDBY indicator is lit, the unit consumes a small amount of power to preserve the memory. This is called STANDBY mode. This mode also lets you turn the power ON/OFF using the remote control.

1. POWER key
   - Switches the power ON/OFF
2. STANDBY indicator
3. LEVEL MODE key
   - Press when adjusting the tone
4. LEVEL CONTROL keys
   - Press to adjust the tone
5. BAND key
   - Press to switch the broadcast band
6. INPUT SELECTOR knob
   - Turn to select the input sources
7. VOLUME CONTROL knob
   - Used for headphone listening
8. LOUDNESS key
   - Press to enhance low frequencies
9. MUTING key
   - Press to mute sound temporarily
10. SPEAKERS A/B keys
    - Press to select the A and/or B speaker systems
11. Numeric keys
12. AUTO/MANUAL key
    - Press to select the auto tuning mode
13. DIRECT key
    - Press for direct station tuning based on numerical input
14. MEMORY key
    - Press to preset a station in the memory
15. P.CALL keys
    - Recalls preset stations
16. TUNING keys
    - Press to tune broadcast stations

Remote control unit

The remote control unit provided with the receiver can also control KENWOOD cassette decks, and CD player connected to the receiver through system control cords. For details of the controllable functions, refer to the instruction manuals of these components.

1. POWER key
2. BAND key
   - Press to switch the broadcast band.
3. CALL keys
   - Recalls preset stations.
4. Play/pause key (►/II) (CD)
5. Stop key (II) (CD)
6. Skip keys (◄◄, ►►) (CD)
7. DISC SKIP key (CD)
   - For use as the disc skip key of the multi-CD player.
8. Input selector keys
   - Press to select the inputs.
9. LEVEL MODE key
   - Press when adjusting the tone.
10. TAPE A/TAPE B keys (Cassette decks)
11. Play keys (◄, ►) (Cassette decks)
12. Fast Forward/Rewind keys (◄◄, ►►) (Cassette decks)
13. Stop key (II) (Cassette decks)
14. REC/ARM key (Cassette decks)
   - When recording an TAPE B, puts the deck in record-pause mode after leaving a non-recorded blank of 4 seconds.
15. Muting key
   - Press to mute sound temporarily.
16. LOUDNESS key
   - Press to enhance low frequencies.
17. VOLUME/LEVEL CONTROL keys
   - Press to adjust the volume. If the LEVEL MODE key is pressed before these keys, these keys can also be used to adjust the tone.

Model: RC-R0301
Infrared ray system

Loading batteries
1. Remove the cover.
2. Insert batteries.
   - Insert two AA size (R6 / SUM-3) batteries as indicated by the polarity marking.
3. Close the cover.

Operation procedure
When the STANDBY indicator is lit, the power turns ON when you press the POWER key on the remote. When the power comes ON, press the key you want to operate.

Approximate operating range

- When two operation keys on the remote control unit are pressed successively, press each key securely reserving an interval of more than 1 second for each press.
1 Turn the power ON.

2 Select the SPEAKERS key setting.

3 Select the input source.

4 Play the selected source.

5 Adjust the volume.

A. B OFF
Sound is not output from the speakers. Use this setting for listening through headphones, etc.

A ON
Sound is output from the speakers connected to the SPEAKERS A terminals on the rear panel.

B ON
Sound is output from the speakers connected to the SPEAKERS B terminals on the rear panel.

A. B ON
Sound is output from the speakers connected to the SPEAKERS A and B terminals on the rear panel.

The input sources are switched in the following order:

1. TUNER (frequency display)  
2. PHONO  
3. CD  
4. VIDEO  
5. TAPE (MD)*

* If a KENWOOD MD recorder connected through the system remote control cord in the [SL16] mode, it is necessary to change the TAPE input to MD input using the following procedure.
1. Select the input name to be changed.
2. Press and hold the AUTO/MANUAL key for more than 2 seconds.
Sound adjustment functions

Adjusting the tone and left/right volume balance

1. Select the tone mode to be adjusted.

   Proceed to step 2 within 5 sec. (If more than 5 sec. have elapsed, press the LEVEL MODE key again.)

2. Adjust.

   - To enhance (To decrease the left sound)
   - To disenhance (To decrease the right sound)

Each press of the key switches the mode as follows:

1. L - R - R. The mode for adjusting the volume balance between the left and right.

   Indicates the center.          Indicates the balance setting.

2. BASS. The mode for adjusting the low frequencies.

   Indicates the speaker setting.

3. TREBLE. The mode for adjusting the high frequencies.

To listen through headphones

1. Set both of the SPEAKERS keys to OFF.

2. Plug headphones.

3. Adjust the volume.

Compensating for low frequencies (LOUDNESS)
The LOUDNESS function is used to compensate for the low frequencies which are less audible during low-volume listening.

To cancel
Press the LOUDNESS key again.

To mute sound temporarily

Press again to return to the original volume.

To cancel
Press the MUTE key again.
To record a music source

1. Select the source to be recorded.

Select an input source other than TAPE.

2. Put the cassette deck in record-pause mode.

3. Play the source and start recording.
Broadcast reception

Receiving broadcast stations

1 Select the TUNER input.

2 Select the broadcast band.

3 Select the tuning method.

4 Select a station.

The input sources are switched in the following order:

- TUNER (frequency display)
- PHONE
- CD
- VIDEO
- TAPE (M*1)

The last frequency tuned before is displayed.

Each press switches the band as follows:

* FM
* AM

Each press switches the tuning method as follows:

* AUTO (auto tuning)
* AUTO not at (manual tuning)

Usually, set the switch to AUTO (auto tuning).

Selected manual tuning when noise interferes due to weak radio waves.
(The stereo broadcasting is received in monaural during manual tuning.)

For Auto Tuning: Press V or A once and the tuner automatically tunes to a receivable station.

For Manual Tuning: Press repeatedly until the frequency you desire is tuned. You can also tune by holding the button down.

*Note: Keys or controls to be used in this operation
Receiving radio stations by specifying its frequency

1 Select the TUNER input.

2 Select the broadcast band.

3 Specify the frequency.
   1. Press the DIRECT key.
   2. Enter the frequency of the desired station.

The input sources are switched in the following order:
1. TUNER (frequency display)
2. PHONO
3. CD
4. VIDEO
5. TAPE (MD)

Each press switches the band as follows.
1. FM
2. AM

Press the numeric keys according to the frequency to be tuned as shown below.
*AM10kHz/FM10kHz territories (U.S.A., Canada, etc.)
AM 810 kHz ......... 8 1 (10 kHz space)
AM 1260 kHz ......... 1 2 6 (10 kHz space)
FM 90 MHz ............ 3 0 0 (100 kHz space)
FM 102.5 MHz ......... 1 0 2 5 (100 kHz space)

*AM9kHz/FM50kHz territories (other countries)
AM 810 kHz ......... 8 1 0 (9 kHz space)
AM 1260 kHz ......... 1 2 6 0 (9 kHz space)
FM 90 MHz ............ 3 0 0 0 (50 kHz space)
FM 102.5 MHz ......... 1 0 2 5 0 (50 kHz space)

*FM DE-EMPHASIS/CHANNEL SPACE switch

- If you make a mistake, the frequency display blinks for a few seconds. In this case, repeat step 3 from the beginning.
Storing radio stations in memory (Station preset)

1. Press the MEMORY key during receiving a station.
   - Press the numeric keys in the following order:
     - To store in "15" ... +10 5
     - To store in "20" ... +10 +10 0
   - Repeat steps 1 and 2 for each of the stations to be stored in memory.
   - You can store a combined total of up to 40 FM and AM stations.
   - If a station is stored in a preset number which has already stored a station memory under it, the previous memory is replaced by the new memory content.

2. Select one of the preset numbers from 1 to 40.

Receiving a preset station

Press the numeric keys in the following order:
- To recall "15" ... +10 5
- To recall "20" ... +10 +10 0
- If you make a mistake in entering the figure of 10, press the +10 key repeatedly until the original display is shown, then enter the correct number.

Receiving all preset stations in order

- Every time the key is pressed, the next station in the order of the preset number is received.
- If the key is held pressed, preset stations will be received successively for about half a second each.

Press the P. CALL key.
**In case of difficulty**

**Operation to reset**

The microcomputer may fall into malfunction (impossibility to operate, erroneous display, etc.) when the power cord is unplugged while power is ON or due to an external factor. In this case, execute the following procedure to reset the microcomputer and return it to normal condition.

- Unplug the AC power cord from the wall outlet, then plug it back in while holding down the MEMORY key.
- Please note that resetting the microcomputer clears the contents stored in it returns it to the condition when it left the factory.

**Remote control unit**

<table>
<thead>
<tr>
<th>Symptom</th>
<th>Cause</th>
<th>Remedy</th>
</tr>
</thead>
<tbody>
<tr>
<td>Remote control operation is not possible.</td>
<td>• Batteries are exhausted.  • The remote control unit is too far away from the main system, controlling angle is too large, or there is an obstacle in between  • The audio cords and system control cords are not connected properly  • The source component to be operated does not contain the tape_or CD  • An attempt is made to play a tape which is being recorded in the cassette deck</td>
<td>• Replace with new batteries  • Operate the remote control unit within the controllable range  • Connect properly referring to “System connections”  • Place the tape or CD in the source component to be played  • Wait until the recording is completed</td>

- Frequency
- Preset stations
For the U.S.A.

**FCC WARNING**

The equipment may generate or radiate radio frequency energy. Changes or modifications to this equipment may cause harmful interference unless the modifications are expressly approved in the instruction manual. The user could lose the authority to operate this equipment if any unauthorized changes or modifications are made.

**NOTE:**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment may cause harmful interference to radio communications. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

1. Reorient or relocate the receiving antenna.
2. Increase the separation between the equipment and receiver.
3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4. Consult the dealer or an experienced radio/TV technician for help.

For the U.S.A.

**Note to CATV system installer:**

This reminder is provided to call the CATV system installer's attention to Article 820-40 of the NEC that provides guidelines for proper grounding and, in particular, specifies that the cable ground shall be connected to the grounding system of the building, as close to the
