KENWOOD

MULTIPLE COMPACT DISC PLAYER
CD-2260M/DPF-J7010

INSTRUCTION MANUAL

KENWOOD CORPORATION

This unit is designed for home use only. If the unit is used in a location other than at home, such as in a shop (for commercial use), in a car or in a ship, etc., and is damaged, a service fee may be charged even during the warranty period.

This instruction manual is used for two models. Model availability and features (functions) may differ depending on the country and sales area.

About the DTS multi-channel audio format
The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and cannot be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD player, you will experience digital noise. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper precautions should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system must be connected to the digital output (S/PDIF, AES/EBU, or TosLink) of the CD player.
Introduction

Before applying power

Units are designed for operation as follows.

- **U.S.A. and Canada**: AC 120 V only
- **Australia**: AC 240 V only
- **Europe and U.K.**: AC 230 V only
- **Other countries**: AC 110-120 / 220-240 V switchable

**Caution**: Read this section carefully to ensure safe operation.

---

**For the United Kingdom**

Factory fitted moulded mains plug

1. The mains plug contains a fuse. For replacement, use only a 13-Amp ASTA-approved (BS1362) fuse.
2. The fuse cover must be refitted when replacing the fuse in the moulded plug.
3. Do not cut off the mains plug from this equipment. If the plug fitted is not suitable for the power points in your home or the cable is too short to reach a power point, then obtain an appropriate safety approved extension lead or adapter, or consult your dealer.

If nonetheless the mains plug is cut off, remove the fuse and dispose of the plug immediately, to avoid a possible shock hazard by inadvertent connection to the mains supply.

**IMPORTANT**
The wires in the mains lead are coloured in accordance with the following code:
- Blue : Neutral
- Brown : Live

Do not connect those leads to the earth terminal of a three-pin plug.

---

**Safety precautions**

**WARNING**: TO PREVENT FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

---

**Requirement by Nederland Gazette**

Batteries are supplied with this product. When they empty, you should not throw away. Instead, hand them in as small chemical waste.

---

**The marking of products using lasers**

(Except for some areas)

- **CLASS 1 LASER PRODUCT**

The marking is located on the rear panel and says that the component uses laser beams that have been classified as Class 1. It means that the unit is utilizing laser beams that are of a weaker class. There is no danger of hazardous radiation outside the unit.
Special features

CD player with 200-disc changer
This unit can accommodate up to 200 discs and can be used like a home jukebox.

CD-TEXT support
The text information (disc title, track titles, names of the artists, songwriters, composers, etc.) recorded on the CDs can be easily called and displayed in alphanumericics. (Some Japanese words and text may not be displayed.)

Title name registrable
In case of a disc not corresponding to CD-TEXT, you can register a disc title and track titles yourself.

Programmed playback
Desired tracks from up to 200 discs can be selected and programmed in the desired order. (Maximum 32 tracks)

Filing functions suitable for a 200-disc changer
An enhanced filing function is provided to handle the large disc capacity.

Music type: Discs are filed by 26 music genres.
Best selection: Only favorite tracks can be registered from 200 discs and played.

Unpacking

Unpack the unit carefully and make sure that all accessories are put inside so they will not be lost. Examine the unit for any possibility of shipping damage. If your unit is damaged or fails to operate, notify your dealer immediately. If your unit was shipped to you directly, notify the shipping company without delay. Only the consignee (the person or company receiving the unit) can file a claim against the carrier for shipping damage. We recommend that you retain the original carton and packing materials for use should you transport or ship the unit in the future.

Keep this manual handy for future reference.

Disc handling precautions

Handling
Hold compact discs so that you do not touch the playing surface.

- Do not attach paper or tape to either the playing side or the label side of compact discs.
- The paste left on the label surface after a sticker has been peeled off is a factor which may cause malfunction. If the surface is sticky due to remaining paste, be sure to clean it with alcohol before use.

Cleaning
If fingerprints or foreign matter become attached to the disc, lightly wipe the disc with a soft cotton cloth or similar, from the center of the disc outwards in a radial manner.

Storage
When a disc is not to be played for a long period of time, remove it from the CD player and store it in its case.

Never play a cracked or warped disc

During playback, the disc rotates at high speed in the player. Therefore, to avoid danger, never use a cracked or deformed disc or a disc repaired with tape or adhesive agent. Please do not use discs which are not round because they may cause a malfunction.

CD accessories

The CD accessories (stabilizer, protection sheet, protection ring, etc.) which are marketed for improving the sound quality of protecting discs as well as the disc cleaner should not be used with this system because they may cause malfunction.

About the DTS multi-channel audio format

The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and can not be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD player, you will experience digital noise. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper precautions should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system must be connected to the digital output (SPDIF, AES/EBU, or TosLink) of the CD player.
System connections

Make connections as shown below.
When connecting the related system components, refer also to the instruction manuals of the related components.
Do not plug in the power lead until all connections are completed.

Be sure to use this unit placed on a level surface.

Malfunction of microcomputer
If operation is impossible or an unusual display appears even though all connections have been made properly, reset the microcomputer referring to "In case of difficulty".

Optical connection
(Except for the U.S.A. and Canada)

About the DTS multi-channel audio format

The DTS multi-channel audio format is available on CD, LD and DVD software. DTS is a strictly digital format and can not be decoded inside most CD, LD or DVD players. For this reason, if you attempt to listen to DTS encoded software through the analog output of your new CD player, you will experience digital noise. This noise can be quite loud if the analog output is connected directly to a high power amplification system. Proper precautions should be taken to avoid this situation. To enjoy DTS Digital Surround playback, an external 5.1 channel DTS Digital Surround decoder system must be connected to the digital output (S/PDIF, AES/EBU, or TosLink) of the CD player.

Note on the SL-16 TEXT jack

When using a KENWOOD Receiver equipped with the SL-16 TEXT jack, connect it to the Receiver using the communication cord provided with this unit. This makes it possible to display the disc and track titles on the LCD remote control unit (provided with the Receiver).

Do not forget to set the SL-16/XS8 switches of the Receiver and this unit to SL-16.

1. Connect all cords firmly. If connections are loose there could be loss of sound or noise produced.
2. When plugging and unplugging connection cords, be sure to first remove the power cord from the AC outlet. Plugging/unplugging connection cords without removal of the power cord can cause malfunctions or damage to the unit.
Connection to digital amplifier or MD

Connect the DIGITAL OUT (OPTICAL or COAXIAL) jack to the digital input jack of the amplifier, DAT recorder, MD recorder, etc., using an optical fiber cable or coaxial cable which are commercially available in audio stores.

- When using an optical fiber cable to connect this unit to a digital amplifier, insert the plug straight into the jack until a snap sound is heard.
- Be careful not to bend, coil, or bundle the optical fiber cable.
- Optical fiber cables available on the market may not always be able to be used with this player. If your cord cannot be used with this unit, consult the store from which you purchased the cord or your nearest dealer.

Connection to a general-use amplifier

Use the provided audio cords to connect the OUTPUT jacks of this unit to the CD input jacks (or AUX jacks) of the amplifier.

SYSTEM CONTROL CONNECTIONS

Connecting system control cords after connecting a KENWOOD audio component system lets you take advantage of convenient system control operations.

There are two KENWOOD system control modes. Make connections according to the groups of terminal symbols shown below.

- (XS8) Mode: lets you combine [XL], [XS1], and [XS8] terminals
- (SL16) Mode: for [SL16] terminals only

This unit is compatible with both [XS8] and [SL16] modes. Select the mode according to the connected components.

- Do this operation after completing all connections.
- Ensure that the power plug is not connected!

1. If your amplifier or receiver does not have a system control terminal, do not connect any system control cords to the system control terminals on the other components.
2. Do not connect system control cords to any components other than those specified by KENWOOD. It may cause a malfunction and damage your equipment.
3. Be sure the system control plugs are inserted all the way into the system control terminals.

SYSTEM CONTROL OPERATIONS

Remote Control

Lets you operate this unit with the system remote control unit supplied with the amplifier or receiver.

Automatic Operation (Except [XR] equipment)

Automatically switches the input selector on the amplifier or receiver when you start playback from this unit.

Synchronized Recording (Except [XR] equipment)

Lets you synchronize recording with the start of playback when recording from a CD. Also, the simple CCRS operation enables great recordings from CDs.

See the operating instructions supplied with your cassette deck for details.
Controls and indicators

- **POWER key/STANDBY indicator** (For the U.S.A. and Canada)
  - Power indicator

- **1/0 key/STANDBY indicator** (For other countries)
  - Standby indicator

- **TIMER PLAY switch**
  - Used for timer play ON/OFF

- **Display**
  - The displays given in this manual are approximations only. They may differ from what actually appears on the display.

**About the STANDBY mode**

While the STANDBY indicator is lit, a small amount of power is supplied to the system to back up the memory. This is called the standby mode. Under that condition, the system can be turned ON by the remote control unit.
Operation of remote control unit

Model: RC-P0306
Infrared key system

1. POWER key
   Used for selection of disc numbers and track numbers, as well as for title name registration.

2. Input keys for numbers and letters
   - DISC SKIP keys (↓, ↓)
   - DISC SELECTOR key
   - Press to select a disc number.

3. Disc selection keys
   - CHARACTER/SEARCH
   - SKIP (DOWN/UP) keys (↑, ↑)
   - Search; CURSOR keys (←, →)
   - Press to move the played position of disc at high speed. Used as cursor keys at the time of title name registration.

4. Keys for basic operation and character input
   - Stop key (■)
   - Play/pause key (✓/■)
   - CHARACT/SEARCH
   - SKIP (DOWN/UP) keys (↑, ↑)
   - Search; CURSOR keys (←, →)
   - Press to move the played position of disc at high speed. Used as cursor keys at the time of title name registration.

5. Keys related to playback mode and display
   - CONFIRM key
   - BEST SELECTION key
   - Used for best selection registration and playback.
   - REPEAT key
   - RANDOM key
   - DISPLAY key

6. Keys related to program and file registration
   - MODE key
   - Used for music type file and title name registration and playback.
   - SET key
   - Used for confirmation of mode settings. At the time of title name registration, one character is confirmed and the cursor goes to the next digit.
   - ENTER key
   - Used for title name confirmation.
   - CHARACTER/P.MODE key
   - Used for playback mode switching. At the time of title name registration, this key switch between capital letters, small letters, numbers and special characters.
   - SPACE/CHECK key
   - Used to confirm the entered contents. Inserts a space at the time of title name registration.
   - INSERT key
   - Switches between insert and overwrite mode at the time of title name registration.
   - DELETE/CLEAR key
   - Used to delete the entered contents. At the time of title name registration, characters are deleted.

Loading batteries

1. Remove the cover.
2. Insert batteries.
3. Close the cover.

- Insert two AA-size (R6) batteries as indicated by the polarity marking.

Operation

After plugging in the power cord, press the POWER (I/■) key of the main unit to turn the power ON. When the power is turned ON, press the key of the function to be operated.

- When pressing more than one remote control key successively, press the keys securely by leaving an interval of 1 second or more between keys.

1. The supplied batteries are intended for use in operation checks. Therefore, their lives may be shorter than ordinary batteries.
2. When the remote-controllable distance gets shorter than before, replace both batteries with new ones.
3. Malfunction may occur if direct sunlight or the light of a high-frequency lighting fluorescent lamp enters the remote control light sensor. In such a case, change the system installation position to prevent the malfunction.
Preparation

Up to 200 CDs can be loaded in the carousel. Disc exchange also is possible during playback.

Never let your hand or any object enter inside the unit.

Loading discs in the carousel

1 Switch power ON.

Press the POWER (I/0) key.

2 Open the door panel toward the front.

Press PUSH OPEN at the right top of the door panel.

- Do not place any object on the open door panel.

3 Load discs.

1) Turn the DISC SKIP knob and bring the slot with the disc to be placed to the front.

Carousel

Disc slot

2) Insert the disc vertically.

Insert CDs with the label side facing toward your right.

Insert one CD per slot all the way

3) Repeat 1 and 2 to insert discs.

DISC001

The slot No. is displayed when the DISC SKIP knob is turned.

Insert discs with the label on the right side. Playback is not possible when a disc is inserted the other way round.

- Do not insert more than one disc in a slot.

When a disc not corresponding to CD-TEXT is inserted, searching for this disc will be facilitated when the title name is registered at the time of disc insertion.

“Registration of Title Name”
Disc replacement

Discs can be replaced with the same procedure as "Loading discs in the carousel". In stopped condition, all discs can be exchanged. However, when the door panel is opened while "DISC DETECTION" is being displayed, it may not be possible to remove the disc which had been played. Accordingly, wait for the "DISC DETECTION" indication to go out before opening the door panel. When the disc information has been read in at the time of registration of disc information like title name, music type, etc., the disc information can be recalled even when the disc insertion place is changed.

4 Close the door panel.

When a title name has been registered and the door panel is closed, reading operation is performed automatically.

The display flashes:

DISC READING

In regard to ALL DATA READ mode

The disc information for all discs will be read. It is convenient to execute this mode before playback after discs have been exchanged. Close the door panel before operation.

1. Press the MODE key.

2. Select "ALL DATA READ".

3. Set the input.

To display the title name on a LCD remote control unit (provided with a KENWOOD Receiver), perform the all data read operation first, and operate the LCD remote control unit with the door left closed. For the operation of the LCD remote control unit, refer to the instruction manual provided with your receiver.

Each press switches the modes as follows:

- MUSIC TYPE
- TITLE INPUT
- ALL DATA READ
- ALL INFORMATION

Search in progress or reading information. The display flashes.

DISC READING

When the disc is CD-TEXT

D001 = CD TEXT

- Repeat the above procedure so that the complete disc information is read into the CD player.
- In the case of a non-CD-TEXT disc, the "D001: NO CD TEXT" display will appear for approx. 3 seconds.

To quit ALL DATA READ mode

Press the 8 key.

- Please remove all CDs from the carousel before moving the unit.
- In case of blinking indication of "DISCXXX ERROR", open the door panel, confirm that the error disc has come to the center position, and then exchange the error disc.
- If blinking "PLEASE WAIT" is displayed when the door panel is opened, do not attempt to change the disc.
Normal play (TRACK mode)

Preparation
- Load disc into the carousel.

Playing tracks in order from track No.1

Use the following procedure to play a CD in the original order of tracks from track No.1.

1 Select the disc.

- Each press of a key increases or decreases the disc number. Holding the key depressed varies the disc numbers successively.
- When the disc corresponds to CD-TEXT, or when the disc title has been registered, the disc title will be displayed with scrolling. Discs can be selected while looking at the registered contents.

Registration of Title Name

Display when disc No. 123 is selected

Go to step 2 within 8 sec.

2 Start playback.

Lights up

DISC123 TRACK01

- When the disc corresponds to CD-TEXT, or when the track titles have been registered, the track title will be displayed with scrolling.

To pause playback

- Each press pauses and plays the CD alternately.

To stop playback
**Direct disc selection**

1. Press the DISC SELECTOR key.
   - Within 8 seconds:

2. Input the disc number.
   - Within 8 seconds:

3. Start playback.

Press the numeric keys in the following order...
- Disc No. 63: 6 3
- Disc No. 100: 1 0 0

**How to input numeric values**

The input method for this product is of two different types. One can either use the traditional KENWOOD +10 key approach, or direct numeric input.

- Special input method for CD player with 200-disc changer
  - To input 42: 4 2
  - To input 115: 1 1 5
  - To input 200: 2 0 0

- Same input method as other KENWOOD products
  - To input 42: 4 2 10 10
  - To input 115: 1 1 5 10
  - To input 200: 2 0 0 10

**What is the “normal play TRACK mode”?**

Playback is made from the first track. The normal playback mode is called TRACK mode. Press the CONFIRM key to confirm the present mode.

- TRACK mode: TRACK D120 T02
- PGM mode: PGM01 D131 T02
- BEST SELECTION mode: BEST01 D104 T03
- MUSIC TYPE mode: M.TYPE Rhythm
- RANDOM mode: ONE DISC RANDOM
- REPEAT mode: REPEAT ON

**To set the unit to the TRACK mode:**

At the time of PGM mode: Press the P.MODE key.

At the time of BEST SELECTION mode: Press the • key during playback.

At the time of MUSIC TYPE mode: Press the MODE key.

At the time of RANDOM mode: Select "RANDOM OFF".
Playback from desired track

1 Select the disc.

1 Select the disc number.

- The disc number can be selected directly by using the DISC SELECTOR and numeric keys in place of the DISC SKIP keys.
- When the disc corresponds to CD-TEXT, or when the disc title has been registered, the disc title will be displayed with scrolling. Discs can be selected while looking at the registered contents.

2 Select the track number.

1 Input the track number.

- When the disc corresponds to CD-TEXT, or when the track titles have been registered, the track title will be displayed with scrolling. Tracks can be selected while looking at the registered contents.

Skipping tracks

- When the key is pressed once during playback, the track being played will be played from the beginning.

Searching

- Playback starts from the position where the key is released.
Displays

Displays scrolling
Some track titles contain so much text information that the full titles will not fit on the display. In cases like this, the letters on the display move from right to left so that the non-visible part of the title is revealed. This type of display movement is known as "scrolling display."

Display example

D123 GOOD OLD F
D123 FASHIONED

Time display
Each press of the DISPLAY key changes the displayed contents.

Displaying all the text information
In the case of a CD-TEXT disc, the text information shown below is displayed automatically during normal play (TRACK mode).

1. Press the MODE key.

2. Select “ALL INFORMATION”.

3. Set the input.

To jump to the next track or to return to the previous track during display:

Return — Jump

To jump to the next item or to return to the previous item during display:

Return — Disc SKIP — Jump

The display flashes:

ALL INFORMATION

- ① Disc/Track Title : Disc and track titles
- ② Disc/Track Artist : Singer (or performer)
- ③ Disc/Track Songwriter : Songwriter
- ④ Disc/Track Composer : Composer
- ⑤ Disc/Track Arranger : Arranger
- ⑥ Disc/Track Message : Message from sponsor or artist
- ⑦ ID INFO. : Record company, release data, etc.
- ⑧ Genre INFO. : Music type information

- Items from ① to ⑧ are displayed in the sequence of disc and track.
- When there is no text information to be displayed “-----” is scrolled on the display.
- In the case of a non-CD-TEXT disc, the “NO CD TEXT” display will appear for approx. 3 seconds.

To end ALL INFORMATION during display
Press the MODE key.
Programming tracks in desired order (PGM mode)

Use the following procedure to select desired tracks (up to 32 tracks) from up to 200 discs and program them in the desired order.

**Preparation**
- Load discs into the carousel.
- Set the CD player to stop mode.

1. **Press so that the PGM indicator lights.**

2. **Select the disc.**
   - Select the disc number.
   - Within 8 seconds!
   - Set the input.
   - Go to step 3 within 8 sec.

3. **Select the track number.**
   - Input the track number.
   - Within 8 seconds!
   - Set the input.

4. **Start playback.**

   **Keys and controls used in the procedures described on this page.**

1. **Press so that the PGM indicator lights.**

2. **Select the disc.**
   - Select the disc number.
   - Within 8 seconds!
   - Set the input.

3. **Select the track number.**
   - Input the track number.
   - Within 8 seconds!
   - Set the input.

4. **Start playback.**

   **Press the numeric keys in the following order...**
   - Track No. 8 : 8
   - Track No. 14 : 1 4
   - Track No. 20 : 2 0

   - To program the entire disc, press the SET key without inputting the track number. "ALL" will be displayed.
   - When the disc corresponds to CD-TEXT, or when the track title has been registered, the track title will be displayed with scrolling. Tracks can be selected while looking at the registered contents.
   - Registration of Title Name
   - If you make a mistake, press the CLEAR key and enter the disc No. from the beginning.

   **Press the numeric keys in the following order...**
   - Track No. 8 : 8
   - Track No. 14 : 1 4
   - Track No. 20 : 2 0

   - To program the entire disc, press the SET key without inputting the track number. "ALL" will be displayed.
   - When the disc corresponds to CD-TEXT, or when the track titles have been registered, the track title will be displayed with scrolling. Tracks can be selected while looking at the registered contents.
   - Registration of Title Name
   - If you make a mistake, press the CLEAR key and restart from step 4.

   **Tracks will be played in the order they were programmed (in order of P Nos.).**
   - When the ◄ or ► key is pressed during playback, the track will be skipped in the direction of the pressed button.
To check the programmed tracks

Press the SPACE/CHECK key.

- Each time the key is pressed, the program No. (P-N) and the disc No. are displayed.
- The previous display resumes in a few seconds.

To add a track to the program

1. Set the CD player to stop mode.
2. Perform steps 1 and 2 of "Programming tracks in desired order". – 16.

- When a track No. is entered, the track will be added to the end of the existing program.

To change a track in the program

1. Set the CD player to stop mode.
2. Press the CHECK key.

- Press the CHECK key repeatedly until the track No. to be changed is displayed.
- Press it while the "PGM01" indicator blinks.
- The track being played cannot be changed.

To clear tracks from the program

To clear tracks from the end

- Each time the key is pressed, the last track in the program is cleared.
- The tracks which are programmed earlier than the track being played cannot be cleared.

To clear all tracks

- When the P.MODE key is pressed during playback, playback in order of tracks starts from the track being played.
Repeated playback (REPEAT mode)

Preparation
- Load discs into the carousel.

To repeat only the desired tracks

1. Program the desired tracks by performing steps 1 to 3 of "Programming tracks in desired order".
2. Switch REPEAT ON.
3. Start playback.

- Up to 32 tracks can be programmed by repeating steps 1.

To cancel repeated playback

Press the REPEAT key twice. (REPEAT ON → OFF)

To repeat one selected disc

1. Check that the unit is in the normal play TRACK mode.
2. Select the disc number.
3. Start playback.
4. Switch REPEAT ON.

- The disc number can be selected directly by using the DISC SELECTOR and numeric keys in place of the DISC SKIP keys.

To cancel repeated playback

Press the REPEAT key twice. (REPEAT ON → OFF)

For random repetition
For music type repetition
For best selection repetition
Playback in a random order (RANDOM mode)

Use the following procedure to activate random playback which selects a track at random after every track. This feature may allow you to play CDs for long hours without getting tired of.

**Preparation**

Important items

Cleaning

Do not use volatile solvents such as alcohol, paint thinner, gasoline, or benzene, etc. to clean the cabinet. Use a clean dry cloth.

Do not use contact cleaners because it could cause a malfunction. Be specially careful against contact cleaners containing oil, for they may deform the plastic components.

Periodic inspection

This unit incorporates an optical pickup which is a precision device. It is recommended to have this unit inspected periodically to clear the pickup after about 1000 hours of use, although this period may vary depending on the installation condition (temperature, humidity, dust, smoke, etc.) of the unit.

The unit has inspected, please consult your dealer or a KENWOOD service center in your area.

Caution on condensation

Condensation of dew may occur inside the unit when there is a great difference in temperature between the unit and the cold air. This unit may not function properly if condensation occurs. In this case, leave the unit for a few hours with the power left ON, and restart the operation after the condensation has dried up.

Be specially cautious against condensation in the following circumstance:

When the unit is carried from a place to another across a large difference in temperature, when the humidity in the room where the unit is installed increases, etc.

Note related to transportation and movement

Before transporting or moving this unit, carry out the following operation.

1. Remove all discs from the carousel and close the door panel.
2. Confirm that the flashing “NO DISC” display has changed to steady lighting, and then switch off the power.

NO DISC

3. Wait a few seconds, then disconnect the power plug.

Memory backup function

| Stored contents for at least 3 weeks after power plug is unplugged from the AC outlet. | Power status (ON or OFF), Title name registration contents, Music type registration contents, Best selection registration contents |
