

MB-5

Introducing the Amazing MB-5 ... The World's Smallest 5-Disc Changer Unit for System Upgrade

5 Discs, No Waiting

Maximize your sales potential. With a 5-disc capacity, the MB-5 enables customers to sample across a broad spectrum of your store's offerings.

Surprisingly Low Cost

Maximize sales impact at minimal cost. The price of the MB-5 will be music to your ears.

Rock-Solid Reliability

Count on fast, dependable changer performance. The ultra-reliable high-speed mechanism is based on Nakamichi's world-renowned MusicBank™ technology. It provides numerous benefits, including fast changes without annoying delays.

Versatile Modular Design

The MB-5 player can be mounted vertically or horizontally. This compact, versatile design makes the entire system highly customizable and space-efficient.

Remote Installation Capability

Simplify disc management. Using optional extension cables, player units can be installed at a distance from their controllers. Placing the players in a central location makes it easier to update listening stations.

Flexible System Configuration

Buy only what you need. Start with a 5-disc listening station – the MB-K1000f. Later, you can upgrade to a 10-disc system simply by adding an MB-5 changer unit.

A Low-Cost, Easily Upgradable 5-Disc Version

Stores with more modest requirements can start with the MB-K1000f – a 5-disc version of the MB-K1000 system. Later, should the need arise, the system can be easily expanded to handle 10 discs. Installation of the additional MB-5 is a simple matter. And because the same operating panel is used, there is no need for costly retrofits.

SPECIFICATIONS

Power Requirement 10 V / 1.5 A (via MB-K1000f control box)

Power Consumption 15 W

CD Changer

Dimensions* 149 (W) x 43 (H) x 262 (D) mm
