Thank you for buying this PIONEER product. Please read through these operating instructions so you will know how to operate your model properly. After you have finished reading the instructions, put them away in a safe place for future reference. In some countries or regions, the shape of the power plug and power outlet may sometimes differ from that shown in the explanatory drawings. However, the method of connecting and operating the unit is the same.

**WARNING:** TO PREVENT FIRE OR SHOCK HAZARD. DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

**IMPORTANT NOTICE**

[For U.S. and Canadian models]
The serial number for this equipment is located on the rear panel. Please write this serial number on your enclosed warranty card and keep it in a secure area. This is for your security.

[For Canadian model]

**CAUTION:** TO PREVENT ELECTRIC SHOCK DO NOT USE THIS (POLARIZED) PLUG WITH AN EXTENSION CORD, RECEPTACLE OR OTHER OUTLET UNLESS THE BLADES CAN BE FULLY INSERTED TO PREVENT BLADE EXPOSURE.

**ATTENTION:** POUR PREVENIR LES CHOCS ELECTRIQUES NE PAS UTILISER CETTE FICHE POLARISEE AVEC UN PROLONGATEUR UNE PRISE DE COURANT OU UNE AUTRE SORTIE DE COURANT, SAUF SI LES LAMES PEUVENT ETRE INSEREEES A FOND SANS EN LAISSER AUCUNE PARTIE A DECOUVERT.

**LINE VOLTAGE SELECTOR SWITCH**

Only multi-voltage models are provided with this switch. U.S., Canadian, European, U.K., and Australian models are not provided with this switch.

Mains voltage in Saudi Arabia are 127 V and 220 V only.

The line voltage selector switch is on the rear panel. Before your model is shipped from the factory, this switch is set to the power requirements of the destination. Check that it is set properly before plugging the power cord into the AC wall socket. If the voltage is not properly set or if you move to an area where the voltage requirements differ, adjust the selector switch as follows:

1. Use a medium-size screwdriver.
2. Insert the screwdriver into the groove on the voltage selector, and adjust so that the tip of the arrow points to the voltage value of your area.

**VOLTAGE SELECTOR**

Medium-size screwdriver
IMPORTANT

The lightning flash with arrowhead, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

CAUTION

Risk of Electric Shock Do Not Open

CAUTION: To Prevent the Risk of Electric Shock, do not remove cover (or back). No user-serviceable parts inside. Refer servicing to Qualified Service Personnel.

The explosion points within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

IMPORTANT

If the appliance is fitted with AC mains power outlet(s), see NEC PANEL FACILITIES for connection of additional HiFi components. Make all connections to the AC outlet(s) and input terminals first. Connect the plug to the wall socket last (make sure that the power switch is off).

FOR USE IN THE UNITED KINGDOM

The wires in this mains lead are coloured in accordance with the following code:

- Blue: Neutral
- Brown: Live

As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings indicating the terminals in your plug provision as follows:

- The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.
- The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red.
- Do not connect either wire to the earth terminal of a three-pin plug.
- Equipment sold in the U.K. is not supplied with a power plug.
FEATURES

- High-power Output of 40 W + 40 W/8 Ω (DIN)
  (model A-119) 30 W + 30 W/8 Ω (DIN)
- The use of a DIRECT circuit ensures high fidelity playback of consistent frequency characteristics, with maximum clarity. (A-229 only)

- Speaker terminals for two speakers systems are provided. (A-229 only)

INSTALLATION

LOCATION

Install the amplifier in a well-ventilated location where it will not be exposed to high temperature or humidity.

Do not install the amplifier in a location which is exposed to direct rays of the sun, or near to hot appliances or radiators. Excessive heat can adversely affect the cabinet and internal components. Installation of the amplifier in a damp or dusty environment may result in malfunction or accident. (Also avoid installation near cookers etc., where the amplifier may be exposed to smoke from oil, steam or heat.)

POWER-CORD CAUTION

Handle the power cord by the plug. Do not pull out the plug by tuggering the cord and never touch the power cord when your hands are wet as this could cause a short circuit or electric shock. Do not place the unit, a piece of furniture, etc., on the power cord, or pinch the cord. Never make a knot in the cord or tie it with other cords. The power cable should be routed in such a way that they are not likely to be stepped on. A damaged power cord can cause fire or give you an electrical shock. Check the power cord regularly. When you find it damaged, ask your nearest PIONEER authorized service center or your dealer for a replacement.

MAINTENANCE OF EXTERNAL SURFACES

- Use a polishing cloth or dry cloth to wipe off dust and dirt. When the surfaces are very dirty, wipe with a soft cloth dipped in some neutral cleanser diluted five or six times with water, and wrung out well, and then wipe again with a dry cloth. Do not use furniture wax or cleaners.
- Never use thinners, benzine, insecticide sprays and other chemicals on or near this unit, since these will corrode the surfaces.
CONNECTIONS

① CD player
② DAT/Tape decks
③ Adaptor component (graphic equalizer)
④ Speaker system B (R)
⑤ Speaker system B (L)
Speaker system B can be connected to model A-229 only.

The illustration shows model A-229.

Illustration not applicable to the U.K. and Australian models.

⑥ Speaker system A (L)
⑦ Speaker system A (R)

⑧ Turntable
⑨ FM-AM

⑩ To an AC wall socket

<ARB1304>
CONNECTIONS

1. CD player
2. DAT/Tape decks
3. Adaptor component (graphic equalizer)
4. Speaker system B (R)
5. Speaker system B (L)
6. Speaker system A (R)
7. Speaker system A (L)
8. Turntable
9. Tuner
10. To an AC wall socket.

CONNECTING THE SPEAKER CORDS
1. Strip off the vinyl covering and twist the tip of the wire core.

2. Raise the lever in the direction of the arrow and insert the exposed conductor into the hole.
3. Now return the lever to its original position to secure the cord.

NOTE:
Do not allow any of the cord conductors to protrude from the terminals or touch any other conductors. Malfunctioning or breakdowns may occur when conductors come into contact with each other.

Model A-229 and A-119 can be placed on another component with less depth by changing the position of the rear feet. (However, a minimum depth of 200 mm is required.)

Change the position of the rear feet as follows:
1. Remove the AC plugs, connection cords etc., connected to the amplifier, and turn the unit upside down.
2. Remove the screws holding the rear feet using a (+) screwdriver.
3. Move the rear feet to the holes located towards the center of the unit (see the arrows in the diagram).
4. Secure the feet by tightening the screws removed in step 2 with a (+) screwdriver.

Speaker Impedance
[Model A-229]
- When speaker systems are connected to only SPEAKERS A or SPEAKERS B terminals, such speakers should have rated impedance in the range of 4-16 Ω.
- When speakers are connected to both the A and B terminals, they should have a rated impedance in the range of 8-32 Ω.

[Model A-119]
- The speaker systems used should have a rated impedance in the range of 6 - 16 Ω.

CONNECTING THE INPUT/OUTPUT CORDS
Connect the white plug to the L (left) side, and the red plug to the R (right) side. Be sure to push the plugs securely.

The INPUT/OUTPUT jacks of this unit are gold-plated, for high audio quality.

The illustration shows model A-229.
PANEL FACILITIES

[FRONT PANEL]

The illustration shows model A-229.
Model A-119 is not equipped with ②, ③ and ④.

① POWER switch/indicator
Press to turn power to the unit ON and OFF.
ON:
Indicator lights.
OFF:
Indicator goes out.

② INPUT SELECTOR switch
Use to select the playback source.
TUNER:
For AM or FM broadcast reception with a tuner.
PHONO:
For record playback with a turntable.
CD:
For compact disc playback with a CD player.
DAT/TAPE 1:
For playback with a tape deck or digital audio tape deck connected to the DAT/TAPE 1 terminals.

③ VOLUME CONTROL
Use to adjust the volume level.

④ ADPT/TAPE 2 monitor switch/indicator
Use when there is an adaptor component (graphic equalizer, etc.) or tape deck connected to the ADPT/TAPE 2 terminals.
OFF:
Indicator goes out when not in use.
ON:
Indicator lights when using the adaptor component or listening to the tape deck.

NOTE:
- When no connections are made to the ADPT/TAPE 2 terminals, or when they are not in use, be sure to set this switch to the OFF position. (No sound will be heard if it is set to ON position)
- When the DIRECT switch is set to ON, the input to be reproduced is always selected with the INPUT SELECTOR, regardless of whether the ADPT/TAPE 2 indicator lights or not. Furthermore, when the ADPT/TAPE 2 indicator is ON, signals input through ADPT/TAPE 2 are output at DAT/TAPE 1 REC OUT. (A-229 only)
LOUDNESS switch/indicator
Use when listening at low volume levels.

ON:
The indicator lights: Boosts low and high frequencies to give added punch to playback even at low volume levels.

OFF:
The indicator goes off: Should normally be left in this position.

DIRECT switch/indicator
(A-229 only)
Use this switch when you do not wish to pass the output from input terminal equipment through the various frequency adjusting circuits (BASS, TREBLE, BALANCE).

ON:
The indicator lights: The signals input through the input terminals are reproduced without passing through the various frequency adjusting circuits. This results in flat, pure sound which is a more faithful reproduction of the input source.

OFF:
The indicator goes out; The signal passes through the various frequency adjusting circuits.

BALANCE control
Should normally be left in the center position. Adjust the balance if the sound is louder from one of the speakers. If the right side is louder, turn toward the L (left) position and if the left side is louder, turn toward the R (right) position.

NOTE:
This control does not operate when the DIRECT switch is in the ON position. (A-229 only)

TREBLE tone control
Use to adjust the high-frequency tone. The center position is the flat (normal) position. When turned to the right, high-frequency tone is emphasized; when turned to the left, high-frequency tone is de-emphasized.

NOTE:
This control does not operate when the DIRECT switch is in the ON position. (A-229 only)

BASS tone control
Use to adjust the low-frequency tone. The center position is the flat (normal) position. When turned to the right, low-frequency tone is emphasized; when turned to the left, low-frequency tone is de-emphasized.

NOTE:
This control does not operate when the DIRECT switch is in the ON position. (A-229 only)

SPEAKERS B selector switch
(A-229 only)
Use this switch to listen to the speaker systems connected to the SPEAKERS B terminals.

ON ( ):
Depressed position: Sound is heard from the speaker systems.

OFF ( ):
Released position: No sound is heard from the speaker systems. Set to this position when listening with headphones.

SPEAKERS A selector switch
(A-229 only)
Use this switch to listen to the speaker systems connected to the SPEAKERS A terminals.

ON ( ):  
Depressed position: Sound is heard from the speaker systems.

OFF ( ):  
Released position: No sound is heard from the speaker systems. Set to this position when listening with headphones.

PHONES jack
When using headphones, insert the plug into this jack. With model A-119 the output to the speakers is cut automatically when connecting headphones.
**[REAR PANEL]**

The illustration shows model A-229.
Model A-119 is not equipped with ⑨ and ⑩.

The U.K. and Australian models (A-229 and A-110) are not equipped with ⑨ and ⑩.

![Diagram of rear panel with numbered parts]

③ PHONO terminals.
④ TUNER terminals.
⑤ CD terminals.
⑥ DAT/TAPE 1 REC terminals.
⑦ DAT/TAPE 1 PLAY terminals.
⑧ ADPT/TAPE 2 OUT (REC) terminals
⑨ ADPT/TAPE 2 IN (PLAY) terminals
⑩ SPEAKERS B terminals (right channel)
(A-229 only)
⑪ SPEAKERS B terminals (left channel)
(A-229 only)
⑫ VOLTAGE SELECTOR
(Not provided on the models for U.K. and Australia.)

**⑬ AC OUTLETS**
(Not provided on the models for U.K. and Australia.)

**AC OUTLETS (SWITCHED)**
Power supplied through these outlets is turned on and off by the amplifier's POWER switch. Total electrical power consumption of connected equipment should not exceed 100 W.

**AC OUTLET (UNSWITCHED)**
Power flows continuously to this outlet, regardless of whether the amplifier is switched ON or OFF. Electrical power consumption of the connected equipment should not exceed 100 W. The equipment should be disconnected by removing the power plug from the wall socket when not in regular use, e.g., when on vacation.

**NOTE:**
Do not connect appliances with high power consumption such as heaters, irons, or television sets to the AC OUTLETS in order to avoid overheating or fire risk.

⑫ Power cord.
Connect this cord to an AC wall socket, or the AC outlet of an audio timer.

⑭ SPEAKERS A terminals (left channel).
⑮ SPEAKERS A terminals (right channel).
⑯ Turntable ground terminal (GND).
⑰ SPEAKERS terminals (left channel).
⑱ SPEAKERS terminals (right channel).
OPERATIONS

BEFORE BEGINNING OPERATIONS
Set the controls and switches as follows: See page 6.
1. Set POWER switch (1) to ON.
2. Press the SPEAKERS A selector switch (3), SPEAKERS B selector switch (5), or both switches. (A-229 only)
3. Set the BALANCE control (7) to the center position.
4. Set the DIRECT switch (6) to OFF. (A-229 only)
5. Set the ADPT/TAPE 2 monitor switch (4) to OFF.

PLAYBACK PROCEDURES
1. Set the INPUT SELECTOR switch (2) to the desired playback source.
   • For reception of an AM/FM broadcast: Set to [TUNER].
   • For playback of a record: Set to [PHONO].
   • For playback of a compact disc: Set to [CD].
   • For playback of a tape: Set to [DAT/TAPE 1].
2. Operate the equipment to begin playback.
3. Adjust playback volume with VOLUME CONTROL (3) on this unit.

RECORDING TAPES:
1. Select the recording equipment with REC SELECTOR switch (2).
2. Begin recording by operating the recording equipment and tape deck.
   • Refer to the operating instructions for your tape deck for proper operating procedures.

COPYING TAPES:
When two decks are used (or when using double cassette decks), you can record the sounds from one deck onto the other.

Application examples:
• To make a tape copy with contents identical to the original tape.
• To edit a recording of an FM broadcast in order to cut out unwanted commercials, recording only desired material onto another tape.

When using two tape decks
1. Load tapes for playback (prerecorded tape) and recording (blank tape) into the respective tape decks.
2. Select the copying direction with the INPUT SELECTOR switch (2) and ADPT/TAPE 2 monitor switch (3).
   • When copying from the tape deck of the DAT/TAPE 1 terminals to the tape deck of the ADPT/TAPE 2 terminals: Set the INPUT SELECTOR switch to DAT/TAPE 1 and ADPT/TAPE 2 monitor switch to OFF.
   • When copying from the tape deck of the ADPT/TAPE 2 terminals to the tape deck of the DAT/TAPE 1 terminals: Set the ADPT/TAPE 2 monitor switch to ON and the INPUT SELECTOR to a position other than DAT/TAPE 1.
3. Operate the tape decks to begin copying.
   Set the tape deck with the original (playback) tape to the playback mode, and set the tape deck with the blank tape to the recording mode.

TO USE THE COMPONENT CONNECTED TO THE ADPT/TAPE 2 TERMINALS:
[For an adapter component]
By connecting a graphic equalizer, source sounds (from records, tapes, AM/FM broadcasts, etc.) can be heard with added sound and tone compensation.
Sounds compensated via the adapter component can be recorded.

NOTE:
When the DIRECT switch (6) is ON, the adapter component cannot be used to modify the source sounds. (A-229 only)

1. Set the ADPT/TAPE 2 monitor switch (4) to ON.
2. Play back the source.
3. Operate the adapter component.

[For a tape deck]
A tape deck connected here can be operated in the same way (recording and playback) as a deck connected to the DAT/TAPE 1 terminals. Also, if two decks are used, you can copy tapes from one deck onto the other (see the section "Copying Tapes")

NOTE:
To play a tape with the tape deck connected to the ADPT/TAPE 2 terminals the DIRECT switch must be set to OFF. (A-229 only)

1. Set the ADPT/TAPE 2 monitor switch (4) to ON.
2. Operate the tape deck to perform playback (or recording).
## TROUBLESHOOTING

Incorrect operations are often mistaken for trouble and malfunctions. If you think that there is something wrong with this component, check the points below. Sometimes the trouble may lie in another component. Investigate the other components and electrical appliances being used. If the trouble cannot be rectified even after exercising the checks listed below, ask your nearest PIONEER authorized service center or your dealer to carry out repair work.
