IMPORTANT SAFEGUARDS
Please read all of these instructions regarding your display and retain them for future reference.
1 Read this manual fully and carefully before operating your display.
2 Keep this manual handy as a reference for operating procedures and safety information.
3 Pay close attention to all warnings in this manual and follow the instructions carefully.
4 Do not allow other persons to use this system until they have read and understood the operating instructions.
5 Do not install the display where it may (i) obstruct the driver’s vision, (ii) impair the performance of any of the vehicle’s operating systems or safety features, including air bags, hazard lamp buttons or (iii) impair the driver’s ability to safely operate the vehicle.
6 Do not operate this display if doing so in any way will divert your attention from the safe operation of your vehicle. Always observe safe driving rules and follow all existing traffic regulations. If you experience difficulty in operating the system or reading the display, park your vehicle in a safe location and make necessary adjustments.
7 Please remember to wear your seat belt at all times while operating your vehicle. If you are ever in an accident, your injuries can be considerably more severe if your seat belt is not properly buckled.
8 Never use headphones while driving.
9 To promote safety, certain functions are disabled unless the parking brake is on, and the vehicle is not in motion.
10 Never set the volume of your display so high that you cannot hear outside traffic and emergency vehicles.

WARNING
- Do not attempt to install or service your display by yourself. Installation or servicing of the display by persons without training and experience in electronic equipment and automotive accessories may be dangerous and could expose you to the risk of electric shock or other hazards.

To ensure safe driving

WARNING
- LIGHT GREEN LEAD AT POWER CONNECTOR IS DESIGNED TO DETECT PARKED STATUS AND MUST BE CONNECTED TO THE POWER SUPPLY SIDE OF THE PARKING BRAKE SWITCH. IMPROPER CONNECTION OR USE OF THIS LEAD MAY VIOLATE APPLICABLE LAW AND MAY RESULT IN SERIOUS INJURY OR DAMAGE.
  - To avoid the risk of damage and injury and the potential violation of applicable laws, this unit is not for use with a video screen that is visible to the driver.
  - To avoid the risk of accident and the potential violation of applicable laws, no viewing of front seat video should ever occur while the vehicle is being driven.
  - In some countries or states the viewing of images on a display inside a vehicle even by persons other than the driver may be illegal. Where such regulations apply, they must be obeyed and this unit’s DVD features should not be used.

When you attempt to watch a video image while driving, the warning Viewing of front seat video source while driving is strictly prohibited. will appear on the front display. To watch a video image on the front display, park your vehicle in a safe place and apply the parking brake.
Parking brake interlock
Certain functions (Video viewing and certain touch panel keys) offered by this unit could be dangerous and/or unlawful if used while driving. To prevent such functions from being used while the vehicle is in motion, there is an interlock system that senses when the parking brake is set. If you attempt to use the functions described above while driving, they will be come disabled until you stop the vehicle in a safe place, and (1) apply the parking brake, (2) release the parking brake, and then (3) apply the parking brake again. Please keep the brake pedal pushed down before releasing the parking brake.

When using a display connected to REAR MONITOR OUTPUT
This unit’s REAR MONITOR OUTPUT is for connection of a display to enable passengers in the rear seats to watch the DVD or Video CD.

⚠️ WARNING
NEVER install the rear display in a location where the driver can watch a DVD while driving.

When using the rear view camera
With an optional rear view camera, this unit can be used as an aid to keep an eye on trailers, or when backing into a tight parking spot.

⚠️ WARNING
- SCREEN IMAGE MAY APPEAR REVERSED.
- USE INPUT ONLY FOR REVERSE OR MIRROR IMAGE REAR VIEW CAMERA. OTHER USE MAY RESULT IN INJURY OR DAMAGE.

⚠️ CAUTION
- The rear view camera function is to be used as an aid to keep an eye on trailers, or while backing up. Do not use for entertainment purposes.

• Please note that the edges of the rear view camera images may differ slightly according to whether full screen images are displayed when backing up, and whether the images are used for checking the rear when the vehicle is moving forward.

To avoid battery exhaustion
Keep the vehicle engine running when using this unit to avoid draining the battery power.
- When no power is supplied to this unit, such as when the vehicle battery is being replaced, the microcomputer of this unit returns to its initial condition. We recommend that you transcribe the audio adjustment data.

⚠️ WARNING
Do not use with vehicles that do not feature an ACC position.
Before You Start

FCC ID: AJDK027
MODEL NO.: AVH P5200BT
IC: 775E K027
This equipment complies with FCC/IC radiation exposure limits set forth for uncontrolled equipment and meets the FCC/IC radio frequency (RF) Exposure Guidelines in Supplement C to OET65. This equipment has very low levels of RF energy that it deemed to comply without maximum permissible exposure evaluation (MPE). But it is desirable that it should be installed and operated with at least 20 cm and more between the radiator and person’s body (excluding extremities: hands, wrists, feet and ankles).

This transmitter must not be co located or operated in conjunction with any other antenna or transmitter.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

About this unit
The tuner frequencies on this unit are allocated for use in North America. Use in other areas may result in poor reception.

WARNING
Handling the cord on this product or cords associated with accessories sold with the product may expose you to chemicals listed on proposition 65 known to the State of California and other governmental entities to cause cancer and birth defect or other reproductive harm. Wash hands after handling.

CAUTION:
USE OF CONTROL OR ADJUSTMENT OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

CAUTION:
THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT WILL INCREASE EYE HAZARD.

CAUTION
• Do not allow this unit to come into contact with liquids. Electrical shock could result. Also, damage to this unit, smoke, and over heating could result from contact with liquids.
• Keep this manual handy for future reference.
• Always keep the volume low enough to hear outside sounds.
• Avoid exposure to moisture.
• If the battery is disconnected or discharged, any preset memory will be erased.

Information to User
Alteration or modifications carried out without appropriate authorization may invalidate the user’s right to operate the equipment.

For Canadian model
This Class B digital apparatus complies with Canadian ICES 003.

Important (Serial number)
The serial number is located on the bottom of this unit. For your own security and convenience, be sure to record this number on the enclosed warranty card.
**DVD video disc region numbers**

Only DVD video discs with compatible region numbers can be played on this player. You can find the region number of the player on the bottom of this unit and in this manual (refer to Specifications on page 91).

**Operating environment**

This unit should be used within the temperature ranges shown below.

Operating temperature range: 10 °C to +60 °C (14 °F to 140 °F)
EN300328 ETC test temperature: 20 °C and +55 °C (4 °F and 131 °F)

**After-sales service for Pioneer products**

Please contact the dealer or distributor from where you purchased this unit for after sales service (including warranty conditions) or any other information. In case the necessary information is not available, please contact the companies listed below:

Please do not ship your unit to the companies at the addresses listed below for repair without advance contact.

**Visit our website**

Visit us at the following site: http://www.pioneerelectronics.com

1. Register your product. We will keep the details of your purchase on file to help you refer to this information in the event of an insurance claim such as loss or theft.
2. Receive updates on the latest products and technologies.
3. Download owner’s manuals, order product catalogues, research new products, and much more.
4. Your feedback is important in our continual effort to design and build the most advanced, consumer focused product in the industry.

**Serial number**

**Protecting your unit from theft**

The front panel can be detached to deter theft.
- If the front panel is not detached from the head unit within four seconds of turning off the ignition, a warning tone will sound.
- You can turn off the warning tone. Refer to Switching the warning tone on page 64.

**Important**

- Handle gently when removing or attaching the front panel.
- Avoid subjecting the front panel to excessive shock.
- Keep the front panel out of direct sunlight and high temperatures.
- If removed, replace the front panel on the unit before starting up your vehicle.
Removing the front panel
- Pinch the top and bottom of its right side and pull the front panel out.
Take care not pinch it too tightly or to drop it, and also avoid contact with water or other fluids to prevent permanent damage.

Re-attaching the front panel
1 Slide the front panel to the left.
Front panel and the head unit are connected on the left side. Make sure that the front panel has been properly connected to the head unit.

2 Press the right side of the front panel until it is firmly seated.
- If you can’t attach the front panel to the head unit successfully, try again. However, forcing the front panel into place may result in damage.

Resetting the microprocessor
By pressing RESET, you can reset the microprocessor to its initial settings without changing the bookmark information.
The microprocessor must be reset in the following situations:
- Before using this unit for the first time after installation
- If the unit fails to operate properly
- When strange or incorrect messages appear on the display
1 Turn the ignition switch OFF.

2 Press RESET with a pen tip or other pointed instrument.
For this function, verify the following section before operation. Refer to this page.

Note
Switch your engine ON or set the ignition switch to ACC ON before pressing RESET in the following situations:
- After completing connections
- When erasing all stored settings
- When resetting the unit to its initial (factory) settings

Feature demo mode
The feature demo automatically starts when you select Off for the source and continues while the ignition switch is set to ACC or ON.
To cancel the feature demo, press and hold MUTE/. Press and hold MUTE/ again to restart. Operating the feature demo while the car engine is turned off may drain the battery power.

Important
Failure to connect the red lead (ACC) of this unit to a terminal coupled with ignition switch on/off operations may lead to battery drain.

Adjusting the response positions of the touch panels (Touch Panel Calibration)
If you feel that the touch panel keys on the screen deviate from the actual positions that respond to your touch, adjust the response positions of the touch panel. Refer to Adjusting the response positions of the touch panels (Touch Panel Calibration) on page 70.
Cautions

- Use an optional Pioneer USB cable (CD U50E) to connect the USB audio player/USB memory, as any device connected directly to the unit will protrude out from the unit and may be dangerous.
- Do not use unauthorized products.
- For details on how to operate a navigation unit from this unit, refer to its operation manual.

Note

When the navigation unit is connected, press MODE to switch to the navigation display. Press MODE and hold to turn the display off. Press MODE again to turn the display on.

Optional remote control

The remote control CD R55 is sold separately. For details concerning operations, see the remote control manual.

Basic Operations

Selecting a source using the buttons
1. Press SRC/OFF to cycle through the sources listed below:
   - XM XM tuner
   - Sirius SIIRUS tuner
   - HD Radio Digital Radio tuner
   - Radio Radio
   - AV AV input
   - Disc Built in DVD player
   - USB/iPod USB/iPod
   - SD SD memory card
   - EXT1 External unit 1
   - EXT2 External unit 2
   - AUX AUX
   - TEL Bluetooth telephone/audio (Function of AVH P5200DVD)
   - When the source icon is not displayed, it can be displayed by touching the screen.
   - While operating the menu, you cannot select a source by touching the source icon.

Adjusting the volume
1. Rotate MUTE/ - to increase or decrease the volume.

Notes
- In this manual, iPod and iPhone will be referred to as “iPod”.
- The USB/iPod icon will change as follows:
  - USB is displayed when a USB storage device is connected.
  - iPod is displayed when an iPod is connected.
  - USB/iPod is displayed when no device is connected.
- When appropriately set up, the image from the rear view camera can be displayed automatically. For details, refer to Setting the rear view camera (back up camera) on page 65.

1. Touch panel keys
   - Source Off
     - Displaying the source menu.
   - Wed 28 may 12 45 PM
     - Switching to clock adjustment display. Refer to Setting the clock on page 15.
   - Radio
     - Selecting a favorite source. When the source icon is not displayed, it can be displayed by touching the screen.
   - Rear Front
     - Switching the output source for the rear monitor. Refer to Setting rear monitor output on page 69.
   - Rear View
     - Switching the rear view image on or off.
   - Source Off
     - Turning the unit off.

Turning the unit on using the buttons
1. Press SRC/OFF to turn the unit on.

Turning the unit off using the buttons
1. Press SRC/OFF and hold until the unit turns off.
• An external unit refers to a Pioneer product, such as those which will be available in the future. Although incompatible as a source, the basic functions of up to two external units can be controlled with this unit. When two external units are connected, the external units are automatically allocated to external unit 1 or external unit 2.

Operating the scroll bar and the scrubber bar

- Scroll icon
  Appears when selectable items are hidden.
- Scrubber bar
  Appears when the playback point can be specified or set by dragging.
Activating the touch panel keys

1 Touch panel keys
Perform various operations by touching the panel.

2 Open/close keys
Control the touch panel key area by touching these keys.

Common operations for menu settings/lists

- Touch panel keys
- Open/close keys
- Common operations for menu settings/lists
- Performing various operations by touching the panel

Turning the display to simplified display.
Returning to the normal display by touching the screen when playing moving images.
Returning to the normal display by touching same icon when playing audio.

Viewing the hidden touch panel keys.

Shorten the touch panel area.

Opening and closing the LCD panel

The LCD panel will open or close automatically when the ignition switch is turned on or off. You can turn off the automatic close/open function. (Refer to page 9.)

- Do not close the LCD panel by force with your hands. That will cause a malfunction.
- The automatic close/open function will operate the display as follows:
  When the ignition switch is turned OFF while the LCD panel is opened, the LCD panel will close after six seconds.
  When the ignition switch is turned ON again (or turned to ACC), the LCD panel will open automatically.
Removing or attaching the front panel will automatically close or open the LCD panel. (Refer to page 64.)

- When the ignition switch is turned OFF after the LCD panel has been closed, turning the ignition switch ON again (or turning it to ACC) will not open the LCD panel. In this case, press OPEN/CLOSE to open the LCD panel.
- When closing the LCD panel, check to make sure that it has closed completely. If the LCD panel has stopped halfway, leaving it like this could result in damage.

**CAUTION**
Keep hands and fingers clear of the unit when opening, closing, or adjusting the LCD panel. Be especially cautious of children’s hands and fingers.

- Press OPEN/CLOSE to open the LCD panel.
  - To close the LCD panel, press OPEN/CLOSE again.

**Adjusting the LCD panel angle**

**Important**
- If you can hear the LCD panel knocking against your vehicle’s console or dashboard, touch the TILT keys to move the LCD panel a little forward.
- When adjusting the LCD panel angle, be sure to touch the TILT keys. Forcibly adjusting the LCD panel by hand may damage it.

1. Display the system menu. Refer to *Introduction of menu operations* on page 54.
2. Touch TILT.
3. Touch the TILT keys to adjust the LCD panel to an easily viewable angle. The LCD panel angle continues changing as long as you touch and hold the TILT keys.

![Laying the panel down.](image)

As the set angle is saved, the LCD panel will automatically be adjusted to the same position the next time the LCD panel is opened.

**Turning the LCD panel horizontally**
When the LCD panel is upright and hinders the operation of the air conditioner, the panel can be turned horizontally temporarily.

- Press and hold OPEN/CLOSE to turn the LCD panel horizontally.
  - To return to the original position, press and hold OPEN/CLOSE again.
  - The LCD panel returns to the original position automatically, indicated with a beeping sound 10 seconds after operation.

**Ejecting a disc**
1. Press (eject).
2. Eject a disc
Ejecting an SD

1  Removing the front panel
   Refer to Removing the front panel on page 9.

2  Push an SD.

3  Ejecting an SD

Setting the clock

1  Switch to Clock Adjustment display.
   Refer to Basic Operations on page 11.

2  Select the item to set.

3  Touch ▲ or ▼ to set the correct date
   and time.
Introduction of tuner operations

1. **Local**
   - Turning local seek tuning on and off.
   - Refer to Tuning in to strong signals on page 33.

2. **EQ**
   - Switching the equalizer curves.
   - Refer to Using the equalizer on page 55.
   - Touch and hold for more than two seconds to turn the auto equalizer on or off.
   - Refer to Using the auto equalizer on page 56.

3. **Displaying the preset channel list.**
   - Refer to Storing and recalling stations on page 33.
   - Refer to Storing the strongest stations on page 33.
   - Refer to Storing and recalling stations on page 33.

4. **Band:**
   - Selecting a band (FM1, FM2, FM3 for FM or AM).

5. **Recalling radio station frequencies assigned to preset tuning keys.**
   - Refer to Storing and recalling stations on page 33.

6. **TAG**
   - Saving song information (tag) from the broadcasting station to your iPod.
   - Refer to Using iTunes tagging on page 34.

---

Manual tuning (step by step) using the buttons
1. Press or (TRACK).

Seek tuning using the buttons
1. Press and hold or (TRACK).

**Note**
Listening AM radio while an iPod is charged from this unit may generate noise. In this case, disconnect the iPod from this unit.
Introduction of video playback operations

You can view DVD/DVD R/DVD RW/CD/CD R/CD RW/USB/SD/iPod.

When playing a disc containing a mixture of various media file types

- If an iPod with video capabilities is connected to this unit using an interface cable such as the CD IU50V (sold separately), you can enjoy the video contents of the iPod as an iPod source.
Starting the search function. Refer to Searching for the part you want to play on page 38. Refer to Selecting files from the file name list on page 40. Displaying iPod menus. Refer to Playing videos from your iPod on page 36 and Browsing for a video/music on the iPod on page 36.

Returning to normal playback during paused, slow motion, or frame by frame playback.

Pausing playback

Displaying the DVD menu during DVD playback. Refer to Operating the DVD menu on page 35.

Returning to the top menu during DVD playback.

Stopping playback. Stopping playback at the point set in Resume playback. Touch one more time to stop playback completely. Refer to Resume playback (Bookmark) on page 37.

Displaying arrow keys to operate the DVD menu. Refer to Using the arrow keys on page 35.

Skipping to another title. Selecting a folder during DivX file playback.

Moving ahead one frame at a time during playback. Refer to Frame by frame playback on page 37. Touch and hold for more than two seconds to slow down playback speed. Speeding up the playback speed in four steps during slow motion playback on DVD video/Video CD.

Speeding down the playback speed in four steps, during slow motion playback on Video CD.

Returning to the specified scene to which the DVD currently being played has been preprogrammed to return. Refer to Return to the specified scene on page 39.

Playing the video on your iPod in a random order. Refer to Random play (shuffle) on page 35.

Switching the Advanced sound retriever function setting when playing a video on your iPod. Refer to Using advanced sound retriever on page 40.

Conducting operation from your iPod and listening to it using your car’s speaker’s. Refer to Operating this unit’s iPod function from your iPod on page 35.

Switching between media file types to play on DVD/CD/USB/SD. Refer to Switching the media file type on page 34.
Playing back videos

1. Insert the disc into the disc loading slot with the label side up. Playback will automatically start.
   - If you are playing a DVD or Video CD, a menu may appear. Refer to Operating the DVD menu on page 35 and PBC playback on page 39.
   - When the automatic playback function is on, the unit will skip the DVD menu and automatically start playback from the first chapter of the first title. Refer to Automatic playback of DVDs on page 61.
   - If a disc has already been inserted, press SRC/OFF or touch the source icon to select the source.
   - When the source icon is not displayed, it can be displayed by touching the screen.
   - Disconnect headphones from the iPod before connecting to this unit.
   - Depending on the iPod model and the amount of data stored in the iPod, it may take some time for playback to begin.
   - Use the touch panel keys to select the iPod after connecting it to this unit.
   - No Device is displayed when disconnecting the iPod.
   - If a message is displayed after loading a disc containing DivX VOD content, touch Play. Refer to Playing DivX® VOD content on page 40.

Ejecting a disc

1. Refer to Ejecting a disc on page 14 or Ejecting an SD on page 15.

Selecting a chapter using the buttons

1. Press ◀ or ► (TRACK).

Fast forwarding or reversing using the buttons

1. Press and hold ◀ or ► (TRACK).
   - Fast forward/fast rewind may not always be possible on some discs. In such cases, normal playback will automatically resume.

Notes

- This DVD player can play back a DivX file recorded on CD R/RW or DVD R/RW. (Please see the following section for files that can be played back. Refer to page 84.)
- Do not insert anything other than a DVD (R/RW) or CD (R/RW) into the disc loading slot.
- If the bookmark function is on, DVD playback resumes from the selected point. For more details, refer to Resume playback (Bookmark) on page 37.
- Some operations may not be available while watching a DVD due to the programming of the disc. In such cases, the icon appears on the screen.
- To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.
- If the ignition switch is set to ACC or ON, the iPod battery will be charged while connected. However, the iPod battery is not charged when you select an SD as the source.
- While the iPod is connected to this unit, the iPod cannot be turned on or off. However, the iPod can be turned on or off when you select an SD as the source.
Introduction of sound playback operations

You can listen to DVD R/DVD RW/CD/CD R/CD RW/USB/SD/iPod sound files.

You can control an iPod with this unit by using a cable such as the CD IU50 (sold separately).

1. Touch panel keys

   - Selecting the repeat range. Refer to Repeating playback on page 36.
   - Playing songs in random order. Refer to Random play (shuffle) on page 35.
   - Switching the Advanced sound retriever function setting when playing audio. Refer to Using advanced sound retriever on page 40.
   - Switching the equalizer curves. Refer to Using the equalizer on page 55.
   - Touch and hold for more than two seconds to turn the auto equalizer on or off. Refer to Using the auto equalizer on page 56.
   - Displaying a list of track titles/file names to select songs on a CD. Refer to Selecting tracks from the track title list on page 39.
   - Displaying the file name list to select the files. Refer to Selecting files from the file name list on page 40.
   - Displaying iPod menus. Refer to Browsing for a video/music on the iPod on page 36.
   - Pausing and starting playback
   - Switching the text information to display on this unit when playing MP3/WMA/AAC files.
   - Selecting a folder.
   - Switching between media file types on a DVD/CD/USB/SD. Refer to Switching the media file type on page 34.
   - Playing songs on the iPod in random order. Refer to Random play (shuffle) on page 35.
### Changing the speed of audiobook playback on the iPod.
Refer to Changing audio book speed on page 40.

### Switching to Link Search mode to play songs related to the currently playing song on the iPod.
Refer to Displaying lists related to the currently playing song (Link Search) on page 40.

### Playing all songs on the iPod in random order.
Refer to Playing all songs in random order (shuffle all) on page 36.

### Conducting operation from your iPod and listening to it using your car’s speaker’s.
Refer to Operating this unit’s iPod function from your iPod on page 35.

### Displaying the Songs list on the iPod.
Refer to Searching for a video/music by category on page 36.

### Displaying the Artists list on the iPod.
Refer to Searching for a video/music by category on page 36.

### Displaying the Albums list on the iPod.
Refer to Searching for a video/music by category on page 36.

### Starting Album Link Play on your iPod when you touch the artwork display.
Refer to Displaying lists related to the currently playing song (Link Search) on page 40.

### Playing back sound
1. Insert the disc into the disc loading slot with the label side up.
   Playback will automatically start.
1. If a disc has already been inserted, press SRC/OFF or touch the source icon to select the source.
   • When the source icon is not displayed, it can be displayed by touching the screen.
   • Disconnect headphones from the iPod before connecting to this unit.
   • Depending on the iPod model and the amount of data stored in the iPod, it may take some time for playback to begin.
   • Use the touch panel keys to select the iPod after connecting it to this unit.
   • **No Device** is displayed when disconnecting the iPod.

### Ejecting a disc
1. Refer to Ejecting a disc on page 14 or Ejecting an SD on page 15.

### Selecting a track using the buttons
1. Press ◄ or ► (TRACK).

### Fast forwarding or reversing using the buttons
1. Press and hold ◄ or ► (TRACK).

### Notes
- When playing back files recorded as VBR (variable bit rate) files, the play time will not be correctly displayed if fast forward or reverse operations are used.
- To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.
- If the ignition switch is set to ACC or ON, the iPod battery will be charged while connected. However, the iPod battery is not charged when you select an SD as the source.
- While the iPod is connected to this unit, the iPod cannot be turned on or off. However, the iPod can be turned on or off when you select an SD as the source.
- If the characters recorded on the disc are not compatible with this unit, those characters will not be displayed.
- Text information may not be correctly displayed depending on the recorded environment.
• USB storage device that can be charged via USB will be recharged when plugged in and the ignition switch is set to ACC or ON. However, the USB storage device that can be charged via USB will not be recharged when you select an SD as the source.

• Disconnect the USB portable audio player/USB memory when you are done using it.

• When you select Clock or Speana on Selecting the background display on page 68, the artwork is not displayed. ■
Playing still images

Introduction of still image playback operations
You can view still images saved in CD R/CD RW/USB/SD.

When playing a disc containing a mixture of various media file types
When loading a CD R/RW/USB/SD containing JPEG picture files, this unit starts a slideshow from the first folder/picture on the disc/device. The player displays the pictures in each folder in alphabetical order. The table below shows the controls for viewing a slideshow.

1 Touch panel keys
Touch any of the following touch panel keys to select the function to be adjusted.

1 Selecting the repeat range.
Refer to Repeating playback on page 36.

2 Playing files in a random order.
Refer to Random play (shuffle) on page 35.

3 Changing the screen mode
Refer to Changing the wide screen mode on page 41.

Displaying the file name list to select the files.
Refer to Selecting files from the file name list on page 40.

Starting or pausing the slideshow.

Rotating the displayed picture 90° clockwise

Capturing an image in JPEG files.
Refer to Capture an image in JPEG files on page 41.

Selecting a folder.

Switching between media file types.
Refer to Switching the media file type on page 34.

Playing still images
1 Insert the disc into the disc loading slot with the label side up. Playback will automatically start.

1 If a disc has already been inserted, press SRC/OFF or touch the source icon to select the source.
- When the source icon is not displayed, it can be displayed by touching the screen.

Ejecting a disc
1 Refer to Ejecting a disc on page 14 or Ejecting an SD on page 15.

Selecting a file using the buttons
1 Press ▼ or ▲ (TRACK).

Fast file searching
1 Press and hold ▼ or ▲ (TRACK).
- You can search 10 JPEG files at a time.
Playing still images

Notes

- This unit can play back a JPEG file recorded on CD R/RW/ROM/SD/USB storage device. (Please see the following section for files that can be played back. Refer to page 84.)
- Files are played back in file number order and folders are skipped if they contain no files. (If folder 01 (ROOT) contains no files, playback commences with folder 02.)

Introduction of still image playback as a slideshow operations

You can view still images saved in CD R/CD RW/USB/SD as a slideshow when listening to another source.

The table below shows the controls for viewing a slideshow.

1 Touch panel keys
   Touch any of the following touch panel keys to select the function to be adjusted.

   1 Selecting the repeat range. Refer to Repeating playback on page 36.
   2 Playing files in a random order. Refer to Random play (shuf file) on page 35.
   3 Changing the screen mode Refer to Changing the wide screen mode on page 41.

   4 Selecting a folder.
   5 Selecting a file.
   6 Starting or pausing the slideshow.
   7 Rotating the displayed picture 90° clockwise.
   8 Capturing an image in JPEG files. Refer to Capture an image in JPEG files on page 41.

1 Start slideshow when listening to another source.
   Refer to Common operations for menu settings/lists on page 13.

2 Select the device containing the files that you want to display.
   - Disc Built in DVD player
   - USB USB
   - SD SD memory card
   - To cancel searching, touch Cancel.

Notes

- When the USB or SD source is selected, this unit cannot view still images on USB/SD as a slideshow.
- When MW/LW band is selected, this unit can not view still images as a slideshow.
Introduction of Bluetooth telephone operations

Be sure to park your vehicle in a safe place and apply the parking brake when performing this operation.

1. Incoming call notice
   Indicates that an incoming call has been received and has not been checked yet.
   • Not displayed for calls made when your cellular phone is disconnected from this unit.

2. Touch panel keys

- Switching the mode to enter the phone number directly. Refer to Making a call by entering phone number on page 49.
- Switching to the call history list. Refer to Using the missed, received and dialed call lists on page 48.
- Switching to the phone book mode. Refer to Calling a number in the phone book on page 47. Refer to Selecting a number by alphabet search mode on page 47.
- Turning automatic answering on or off. Refer to Setting automatic answering on page 49.
- Turning the ring tone for incoming calls on or off. Refer to Switching the ring tone on page 49.
- Displaying the preset dial screen. Refer to Using the preset dial lists on page 49.
- Displaying the Bluetooth connection menu. Refer to the instructions from page 50 to page 52.
- Turning private mode on or off. Refer to Setting the private mode on page 50.

You can use Bluetooth telephone (AVH-P5200BT only).

Important
- Since this unit is on standby to connect with your cellular phone via Bluetooth wireless technology, using it without the engine running can drain the battery power.
- Advanced operations that require attention such as dialing numbers on the monitor, etc., are prohibited while driving. Park your vehicle in a safe place when using these advanced operations.
- Operations available may be limited depending on the cellular phone connected to this unit.
Bluetooth Telephone

1. Adjusting the other party’s listening volume.
   Refer to Adjusting the other party’s listening volume on page 49.

2. Accepting an incoming call.
   Making a phone call, when selecting a phone number.
   Switching between callers on hold.

3. Ending a call.
   Rejecting an incoming call.
   Canceling call waiting.

Accepting an incoming call
Ending a call
1 Press MUTE/.

Notes

- Private mode can only be operated while you are talking on the phone.
- To end the call, both you and the other caller must hang up your phones.

Setting up for hands-free phoning

Before you can use the hands free phoning function you must set up the unit for use with your cellular phone. This entails establishing a Bluetooth wireless connection between this unit and your phone, registering your phone with this unit, and adjusting the volume level.

1. Connection
   First, you need to connect a Bluetooth telephone to this unit.
   For detailed instructions on connecting your phone to this unit via Bluetooth wireless technology, see following section, Using a Bluetooth device to pair on page 51 and Pairing from this unit on page 50.
   - You may also need to enter a PIN code into this unit. If your telephone requires a PIN code to establish a connection, look for the code on the telephone or in its accompanying documentation. Refer to Entering PIN code for Bluetooth wireless connection on page 52.

2. Volume adjustment
   Adjust the earpiece volume of your cellular phone to your preference. The unit will record the adjusted volume level as the default setting.
   - The volume of the caller’s voice and ring tone may vary depending on the type of cellular phone.
   - If there is a large volume difference between the ring tone and caller’s voice, the overall volume level may become unstable.
   - Make sure to adjust the volume to a proper level before disconnecting the cellular phone from the unit. If the volume is muted (zero level) on your cellular phone, the volume level of your cellular phone remains muted even after the cellular phone is disconnected.
Introduction of XM/SIRIUS tuner operations

You can use this unit to control an XM satellite digital tuner (GEX P920XM), which is sold separately.

For details concerning operation, refer to the XM tuner’s operation manuals. This section provides information on XM operations with this unit which differs from that described in the XM tuner’s operation manual. When the SIRIUS Tuner is used together with this unit, some operations differ slightly from those described in the SIRIUS operation manual. This manual provides information on these points. For all other information on using the SIRIUS tuner, please refer to the SIRIUS operation manual.

- With this unit, you can operate one additional function: XM/SIRIUS channel direct selection. Refer to Selecting an XM/SIRIUS channel directly on page 43.

1 Touch panel keys

Selecting a channel by number or category. Refer to Switching the XM/SIRIUS channel selection mode on page 42.

2 Memo On

Tuning the MyMix function on or off for the SIRIUS tuner. Refer to Turning the MyMix function on or off on page 44.

3 Team On

Turning the Game Alert on or off for the SIRIUS tuner. Refer to Switching the Game Alert on or off on page 45.

4 EQ

Switching the equalizer curves. Refer to Using the equalizer on page 55. Touch and hold for more than two seconds to turn the auto equalizer on or off. Refer to Using the auto equalizer on page 56.

5

Displaying the preset channel list. Refer to Storing and recalling stations on page 33. Selecting a channel directly. Refer to Selecting an XM/SIRIUS channel directly on page 43. Selecting a channel from the XM channel list. Refer to Selecting a channel from the XM channel list display on page 42.
Selecting a band (XM1, XM2 or XM3) for XM tuner.
Selecting a band (SIRIUS1, SIRIUS2 or SIRIUS3) for the SIRIUS tuner.

Recalling radio station frequencies assigned to preset tuning keys.
Refer to Storing and recalling stations on page 33.
Selecting the channel category when selecting Mode Category.
Refer to Switching the XM/SIRIUS channel selection mode on page 42 and Selecting a SIRIUS channel from a channel category on page 42.

Selecting a track, fast forwarding/reversing or pausing/playing for the SIRIUS tuner.
Refer to Using the Instant Replay function on page 46.

Storing the song title and artist name.
Refer to Making the MyMix playlist on page 43.

Switching to memo edit mode.
Refer to Setting up a song alert on page 44.
Refer to Deleting a song from the MyMix playlist for XM tuner on page 44.
Refer to Deleting a song from the MyMix playlist for SIRIUS tuner on page 44.

Displaying information on games for the SIRIUS tuner.
Refer to Displaying game information on page 46.

Selecting teams for game alert on the SIRIUS tuner.
Refer to Selecting teams for Game Alert on page 45.

Switching the SIRIUS information.
Refer to Switching the SIRIUS display on page 46.
Touch and hold for more than two seconds to scroll the text.

Manual tuning (step by step) using the buttons
1. Press ◀ or ▶ (TRACK).

Seek tuning using the buttons
1. Press and hold ◀ or ▶ (TRACK).

Note
You can also perform tuning from a desired channel category. (Refer to Selecting a SIRIUS channel from a channel category on page 42.)

SIRIUS tuner information
Introduction of HD Radio™ tuner operations

You can use this unit to control an HD Radio tuner (e.g. GEX P20HD), which is sold separately.

For details concerning operation, refer to the HD Radio tuner’s operation manual.

1. Touch panel keys

   1. **Local**
      - Turning local seek tuning on or off.
      - Refer to Tuning in to strong HD Radio signals on page 33.

   2. **Seek All**
      - Switching between Digital broadcasting station seek and normal seek.
      - Refer to Switching the seek mode on page 47.

   3. **Seek HD**
      - Switching to the analog broadcast of the same frequency.
      - Refer to Switching the reception mode on page 47.

   4. **Blending Analog**
      - Switching the equalizer curves.
      - Refer to Using the equalizer on page 55.
      - Touch and hold for more than two seconds to turn the auto equalizer on or off.
      - Refer to Using the auto equalizer on page 56.

   5. **EQ**
      - Displaying the preset channel list.
      - Refer to Storing and recalling stations on page 33.

   6. **Band:**
      - Selecting a band (FM1, FM2, FM3 for FM or AM).

   7. **Seek**
      - Recalling radio station frequencies assigned to preset tuning keys.
      - Refer to Storing and recalling stations on page 33.

   8. **TAG**
      - Saving song information (tag) from the broadcasting station to your iPod.

   9. **Digital Radio tuner information**
      - Switching the digital radio tuner information.

Manual tuning (step by step) using the buttons

1. Press ▼ or ▲ (TRACK).

Seek tuning using the buttons

1. Press and hold ▼ or ▲ (TRACK).
Introduction of Bluetooth telephone operations

You can control the Bluetooth telephone if you connect a Bluetooth adapter, such as the CD BTB200 (sold separately), to the AVH P5200DVD. But the available features are limited. See Using as an external unit section on Bluetooth adapter’s Owner’s Manual. This unit fits into Head unit group 3.

You cannot use following features:
- Answering and rejecting call waiting
- Deleting a registered phone
- Connecting to a registered cellular phone on the function menu
- Using the Phone Book
- Using preset numbers
- Making a call by entering a phone number
- Setting automatic reject

You can use limited function in the following features:
- Using the Call History (Numbers of call history you can store are limited from 12 to 3.)
- Switching the ring tone (You can not switch the ring tone on or off.)

Important
- In some countries, CD BTB200 is not sold on the market.
- Since this unit is on standby to connect with your cellular phone via Bluetooth wireless technology, using it without the engine running can drain the battery power.
- Advanced operations that require attention such as dialing numbers on the monitor, etc., are prohibited while driving. Park your vehicle in a safe place when using these advanced operations.
- Operations available may be limited depending on the cellular phone connected to this unit.

1 Touch panel keys

- Switching the equalizer curves. Refer to Using the equalizer on page 55.
- Touch and hold for more than two seconds to turn the auto equalizer on or off. Refer to Using the auto equalizer on page 56.
- Accepting an incoming call. Making a phone call, when selecting a phone number from the dialed and received call history.
- Displaying the received/missed call history. Selecting a phone number from the call history. Refer to Using the missed, received and dialed call lists on page 48.
- Displaying the dialed call history. Selecting a phone number from the call list. Refer to Using the missed, received and dialed call lists on page 48.
Using Bluetooth wireless technology

5. Text Scroll

Scrolling the phone number. Touch and hold for more than two seconds to activate connection mode on this unit and establish a Bluetooth wireless connection from your phone. Refer to Using a cellular phone to initiate a connection on page 52.

6. REG

Registering connected cellular phone to take full advantage of the features available with Bluetooth wireless technology. Refer to Registering a connected cellular phone on page 52. Touch and hold for more than two seconds to terminate the Bluetooth wireless connection.

7. Auto

Turning automatic answering on or off. Refer to Setting automatic answering on page 49. Touch and hold for more than two seconds to connect to a Bluetooth telephone automatically. Refer to Connecting to a Bluetooth device automatically on page 53.

8. info

Turning the ring tone for incoming calls on or off. Refer to Switching the ring tone on page 49. Touch and hold for more than two seconds to display the BD address of your cellular phone and the Bluetooth adapter. Refer to Displaying BD (Bluetooth Device) address on page 53.

9. Switching between Bluetooth telephone and Bluetooth audio. Touch and hold for more than two seconds to start voice recognition. Refer to Voice recognition on page 53.

Note

When selecting the phone source, you can only operate Fader/Balance (balance adjustment) in the audio menu.

Bluetooth audio operations

You can control Bluetooth audio if you connect a Bluetooth adapter, such as the CD BTB200 (sold separately), to the AVH P5200DVD.

Important

- Depending on the Bluetooth audio player connected to this unit, the available operations will be limited to the following two levels: A2DP profile (Advanced Audio Distribution Profile): You can only playback songs on your audio player. AVRCP profile (Audio/Video Remote Control Profile): You can perform playback, pause playback, select songs, etc.

- Since there are a number of Bluetooth audio players available on the market, available operations will vary extensively. When operating your player with this unit, refer to the instruction manual that came with your Bluetooth audio player as well as this manual.

- Information related to a song (such as the elapsed playing time, song title, song index, etc.) cannot be displayed on this unit.

- As the signal from your cellular phone may cause noise, avoid using it when you are listening to songs on your Bluetooth audio player.

- When a call is in progress on the cellular phone connected to this unit via Bluetooth wireless technology, the sound of the Bluetooth audio player connected to this unit is muted.

- When the Bluetooth audio player is in use, you cannot connect to a Bluetooth telephone automatically.
• Playback continues even if you switch from your Bluetooth audio player to another source while listening to a song.

1 Touch panel keys

- Switching between Bluetooth telephone and Bluetooth audio.

- Skipping back or forward to an other track when Auto is set for the Auto/manual setting.
  Performing fast forward or rewind when Manual is set for the Auto/manual setting.

- Pausing a song.
  Touch and hold for more than two seconds to activate connection mode on this unit and establish a Bluetooth wireless connection from your player.
  Refer to Connecting a Bluetooth audio player on page 53.

- Playback starts.
  Touch and hold for more than two seconds to terminate the Bluetooth wireless connection.

- Setting the action for ◄ and ► icons.

- Switching the equalizer curves.
  Refer to Using the equalizer on page 55.
  Touch and hold for more than two seconds to turn the auto equalizer on or off.
  Refer to Using the auto equalizer on page 56.

Setting up for Bluetooth audio

Before you can use the Bluetooth audio function you must set up the unit for use with your Bluetooth audio player. This entails establishing a Bluetooth wireless connection between this unit and your Bluetooth audio player, and pairing your Bluetooth audio player with this unit.
Storing and recalling stations
You can easily store up to six stations for each band as presets.
- Six stations for each band can be stored in memory.
- Channels are stored and recalled on a broadcast station basis. This means that if the broadcast station you stored has been assigned to a different channel by SIRIUS, you can still recall the same broadcast station (though a different channel number may appear in the display).

1 Display the preset screen.
Refer to Introduction of tuner operations on page 16.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.
Refer to Introduction of HD Radio™ tuner operations on page 29.
The preset screen appears in the display.

2 Touch and hold one of the preset tuning keys to store the selected frequency in the memory.
The selected radio station frequency has been stored in the memory.

3 Touch one of the preset tuning keys to select the desired station.
- You can also use ▲ and ▼ to recall stations assigned to preset tuning keys P1 to P6 when the ALL-CH mode is selected.
  (Function of SIRIUS tuner)

Storing the strongest stations
BSM (best stations memory) automatically stores the six strongest stations in the order of their signal strength.
Storing broadcast frequencies with BSM may replace broadcast frequencies you have saved using the preset tuning keys.

1 Display the preset channel list.
Refer to Introduction of tuner operations on page 16.
Refer to Introduction of HD Radio™ tuner operations on page 29.
The preset screen appears in the display.

2 Touch BSM to turn BSM on.
The six strongest broadcast frequencies will be stored under preset tuning keys in order of their signal strength.
- To cancel the storage process, touch Cancel.

Tuning in to strong signals
Local seek tuning lets you tune in to only those radio stations with sufficiently strong signals for good reception.

FM: off － － － － － － － － AM: off － － －
The larger the setting number, the higher the signal level. The highest level setting allows reception of only the strongest stations; while lower settings let you receive progressively weaker stations.

Tuning in to strong HD Radio signals
Local seek tuning lets you tune in to only those radio stations with sufficiently strong signals for good reception.

1 Start local seek tuning
Refer to Introduction of HD Radio™ tuner operations on page 29.

2 Touch On on LOCAL to turn on.
- To turn off, touch Off.

3 Touch ◀ or ▶ on Level to select the desired level.
- Level1  Level2  Level3  Level4
The larger the setting number, the higher the signal level. The highest level setting allows reception of only the strongest stations; while lower settings let you receive progressively weaker stations.

Using iTunes tagging
This function can be operated with the following iPod models.
- iPod 5th generation
- iPod nano 3rd generation
- iPod nano 4th generation
- iPod classic
- iPod classic 2nd generation
- iPod touch
- iPod touch 2nd generation
- iPhone
- iPhone 3G

However, tag information can be stored in this unit even while other iPod models are used. When you want to use this function in the HD Radio tuner source, use an HD Radio tuner (GEX P20HD). The song information (tag) can be saved from the broadcasting station to your iPod. The songs will show up in a playlist called “Tagged playlist” in iTunes the next time you sync your iPod. Then you can directly buy the songs you want from the iTunes Store. The tagged songs and the song that you can buy from the iTunes Store may be different. Make sure to confirm the song before you make the purchase. If you cannot use this function normally, update your iPod firmware.

Storing the tag information to this unit
1  Tune in to the broadcast station.
2  Store the tag information to this unit. Refer to Introduction of tuner operations on page 16.

Refer to Introduction of HD Radio™ tuner operations on page 29. You can store the information if the TAG indicator is displayed while the desired song is being broadcast.
- While storing the tag data on this unit, TAG flashes.
- The tag information for up to 50 songs can be stored on this unit. Depending on the timing of when the tag information is stored, the tag information for the song played before or after the currently playing song may also be stored.
- If an SD is selected as the source while tag information is being stored to this unit, the tag information will not be transferred to the iPod.

3  When completed, indicator turns off and indicator is displayed.

Storing the tagged information to your iPod
1  Connect your iPod if it’s not connected to this unit. When your iPod is connected to this unit, your iPod starts storing the tagged information automatically.
- While transferring the tag, you cannot select the SD source.

2  When completed, indicator on page 80 turns off and the tagged information is stored on your iPod.
- Tag information cannot be transferred to the iPod when a file on an SD device is being viewed as a slideshow.

Switching the media file type
When playing a disc containing a mixture of various media file types, such as DivX and MP3, you can switch between media file types to play.
Audio data (CD DA) and JPEG picture files on DVD R/RW/ROM cannot be played back on this unit.

- **CD** (audio data (CD DA))
- **Music** (compressed audio)
- **Video** (DivX video files)
- **Photo** (JPEG picture files)

### Operating the DVD menu
(Function for DVD video)
Some DVDs allow you to make a selection from the disc contents using a menu.

#### Using the arrow keys

1. Display arrow keys to operate the DVD menu.
   Refer to Playing moving images on page 17.
2. Select the desired menu item.

   - When operating the DVD menu by directly touching the menu item, touch the icon to operate.

   - Ways to display the menu will differ depending on the disc.
   - Depending on the contents of the DVD disc, this function may not work properly. In such cases, use the touch panel keys to operate the DVD menu.

### Operating this unit’s iPod function from your iPod

- While this function is in use, the iPod will not turn off even if the ignition key is turned off. Operate the iPod to turn off the power.
- When the control mode is set to iPod, the signal can be changed between PAL and NTSC from the iPod.

1. Switch the control mode to iPod.
   Refer to Playing moving images on page 17. Refer to Introduction of sound playback operations on page 20.
2. Operate the connected iPod to select a video/song and play.

### Random play (shuffle)

Videos/songs can be played back in random order.

- **Songs** Play back videos/songs in the selected list in random order.
- **Albums** Play back videos/songs from a randomly selected album in order.
- **Folder** Play back songs/tracks in the selected folder in random order.
- **Disc** Play back songs/tracks in the selected disc in random order.
- **On** Play back files in random order within the repeat range, **Folder** and **Disc**.
- **Off** Cancel random play.
Playing all songs in random order (shuffle all)
(Function for iPod)
This method plays all songs on the iPod randomly.

Repeating playback
- Disc  Play through the current disc
- Chapter  Repeat the current chapter
- Title  Repeat the current title
- Track  Repeat the current track
- File  Repeat the current file
- Folder  Repeat the current folder
- One  Repeat just the current video/song/track
- All  Repeat all videos/songs in the selected list on the iPod
- Repeat all files
- This function cannot be operated during Video CD playback featuring PBC (playback control).
- If you perform chapter search, fast forward/reverse, frame by frame playback or slow motion playback, the repeat play will stop.
- When playing discs with compressed audio and audio data (CD DA), playback is repeated within the type of data currently playing even if Disc is selected.
- If you select another folder during repeat play, the repeat play range changes to Disc. If you select USB or SD source, the repeat play range changes to All.
- If you perform track search or fast forward/reverse during File, the repeat play range changes to Folder.
- If you perform track search or fast forward/reverse during Chapter, the repeat play range changes to Title.
- If you perform track search or fast forward/reverse during Track, the repeat play range changes to Disc.
- When Folder is selected, it is not possible to play back a subfolder of that folder.

Playing videos from your iPod
(Function for iPod)
Videos can be played on this unit if an iPod with video capabilities is connected.
- This unit can play back “Movies”, “Music videos”, “Video Podcast” and “TV show” which are downloaded from the iTunes store.
- Before you display the video screen, be sure to change the video setting on the iPod so that the iPod can output the video to an external device.

1 Display the iPod menus.
Refer to Playing moving images on page 17.

2 Switch to iPod video mode.

3 Play the video from the iPod.
- If you want to switch to iPod music mode, touch the icon.

Browsing for a video/music on the iPod
(Function for iPod)
To make operating and searching easy, operations to control an iPod with this unit are designed to be as similar to the iPod as possible.
- Incompatible text saved on the iPod will not be displayed by the unit.

Searching for a video/music by category

1 Display the iPod menus.
Refer to Playing moving images on page 17.
Refer to *Playing audio* on page 20.

2 Touch one of the categories in which you want to search for a video/music.
   - Video Playlists (video playlists)
   - Movies (movies)
   - Music Videos (music videos)
   - Video Podcasts (video podcasts)
   - TV Shows (TV shows)
   - Playlists (playlists)
   - Artists (artists)
   - Albums (albums)
   - Songs (songs)
   - Podcasts (podcasts)
   - Genres (genres)
   - Composers (composers)
   - Audiobooks (audiobooks)

3 Touch the title of the list that you want to play.
   Repeat this operation until you find the desired video/music.

4 Start playback of the selected list.

   | ![Start] | Starting playback of the selected list. |

---

**Searching the list by alphabet**

*(Function for iPod)*

1 Select a category.
   Refer to *Searching for a video/music by category* on the previous page.

2 Switch to alphabet search mode.

   | ![ABC] | Switching to alphabet search mode. |

   Alphabet search mode is displayed.

3 Touch the first letter of the title of the video/song you are looking for.
   While searching, touch panel key operation is not available.

4 Touch the title of the list that you want to play.
   Repeat this operation until you find the desired song/video.

5 Start playback of the selected list.

   | ![Start] | Starting playback of the selected list. |

---

**Resume playback (Bookmark)**

*(Function for DVD video)*

By using the Bookmark function, you can resume playback from a selected scene the next time the disc is loaded.

The selected scene will be bookmarked so that playback resumes from that point next time.
   - To clear the bookmark on a disc, touch and hold the button during playback.
   - The oldest bookmark is replaced by the new one.

---

**Frame-by-frame playback**

*(Function for DVD video/video CD)*

Images during frame by frame playback may be unclear for some discs.

---

**Slow motion playback**

*Notes*

- There is no sound during slow motion playback.
- Images during slow motion playback may be unclear for some discs.
- Reverse slow motion playback is not available.
Searching for the part you want to play

You can use the search function to find the part you want to play.
For DVD videos, you can select Title (title), Chapter (chapter) or 10key (numeric keypad).
For video CDs, you can select Track (track) or 10key (numeric keypad).
• Chapter search is not available when disc playback is stopped.
• This function cannot be operated during Video CD playback featuring PBC (playback control).

1. Start the search function.
Refer to Playing moving images on page 17.

2. Touch the desired search option (e.g., Chapter).

3. Touch 0 to 9 to input the desired number.
   ▪ To cancel the entered numbers, touch C.

4. Start playback from the selected part.
   Registering the numbers.
   ▪ This starts playback from the selected part.

Note
With discs featuring a menu, you can also use the DVD menu to make your selection.
Refer to Playing moving images on page 17.

Changing audio language during playback (Multi-audio)

With DVDs/DivX files that provides audio playback in different languages and different audio systems (Dolby Digital, DTS, etc.), you can switch between languages/audio systems during playback.

Notes
• With some DVDs, switching between languages/audio systems may only be possible using a menu display.
• You can also switch between languages/audio systems using Video setup menu. For details, refer to Setting the audio language on page 58.
• Only digital output of DTS audio is possible. If the unit’s optical digital outputs are not connected, select an audio setting other than DTS.
• Depending on the setting, the video may not be played back with the audio system used to record the DVD.
• You will return to normal playback if you change the Audio during fast forward/fast rewind, pause or slow motion playback.

Changing the subtitle language during playback (Multi-subtitle)

With DVDs/DivX files featuring multi subtitle recordings, you can switch between subtitle languages during playback.

Notes
• With some DVDs, switching between subtitle languages may only be possible using a menu display.
• You can also switch between subtitle languages using Video setup menu. For details, refer to Setting the subtitle language on page 58.
• You will return to normal playback if you change the Subtitle during fast forward/fast rewind, pause or slow motion playback.
Changing the viewing angle during playback (Multi-angle)

With DVDs featuring multi angle (scenes shot from multiple angles) recordings, you can switch among viewing angles during playback.

- During playback of a scene shot from multiple angles, the angle icon is displayed. Use the Video setup menu to turn the angle icon display on or off. For details, refer to Setting the multi angle DVD display on page 59.

Note
You will return to normal playback if you change the viewing angle during fast forward/fast rewind, pause or slow motion playback.

Return to the specified scene
(Function for DVD video)

This function cannot be used if a specified scene has not been preprogrammed on the DVD disc.

Selecting audio output

When playing DVD video discs recorded with LPCM audio, you can switch the audio output. When playing video CDs, you can switch between stereo and monaural audio output.

- This function is not available when disc playback is stopped.

- L+R left and right
- Left left
- Right right
- Mix mixing left and right

You may not be able to select or use this function depending on the disc and the playback location.

PBC playback
(Function for Video CDs)

During playback of Video CDs featuring PBC (Playback Control), PBC ON is displayed.

1. Start the search function.
   Refer to Playing moving images on page 17.

2. Touch 10key to display the numeric keypad.

3. Touch 0 to 9 corresponding to a menu number.

4. Start playback from the selected part.

Notes

- You can display the menu by touching Return during PBC playback. For details, refer to the instructions provided with the disc.
- PBC playback of a Video CD cannot be canceled.
- During playback of Video CDs featuring PBC (Playback Control), you cannot select the repeat play range or use the search function.

Selecting tracks from the track title list

You can select tracks to playback using the track title list which is a list of the tracks recorded on a disc.

1. Display the track title list.
   Refer to Playing audio on page 20.

2. Touch your favorite track title.
   Playback begins.
Detailed instructions

Selecting files from the file name list
(Function for USB/SD/DivX)
File name list is a list of file names (or folder names) from which you can select a file (or folder) to play back.

1 Display the file (or folder) name list.
Refer to Playing audio on page 20.
Refer to Introduction of still image playback operations on page 23.

2 Touch your favorite file (or folder) name.
   - When you have selected a folder, a list of the names of the files (or the folders) in it can be viewed. Repeat this operation to select the desired file name.
   - If folder 01 (ROOT) contains no files, playback commences with folder 02.

3 Start playback of the selected list.

Using advanced sound retriever
Automatically enhances compressed audio and restores rich sound.

Off
- is more effective than -.

Changing audiobook speed
(Function for iPod)
- Playback at a speed faster than normal
- Playback at normal speed
- Playback at a speed slower than normal

Displaying lists related to the currently playing song (Link Search)
(Function for iPod)

1 Start Link Play.
Refer to Introduction of sound playback operations on page 20.

2 Touch one of the categories in which you want to play.
   - Artist Displays an album list of the artist currently being played.
   - Album Displays a song list from the album currently being played.
   - Genre Displays an album list from the genre currently being played.
   - To cancel searching, touch Cancel.

3 Touch the title of the list that you want to play.

4 Start playback of the selected list.

If no related albums/songs are found, Not Found is displayed.

Playing DivX® VOD content
Some DivX VOD (video on demand) content may only be playable a fixed number of times. When you load a disc containing this type of content, the remaining number of times it can be played is shown on screen. You can then decide whether or not to play the disc.
   - If there is no limit to the number of times the DivX VOD content can be viewed, then you may load the disc into your player and play the content as often as you like, and no message will be displayed.
   - You can confirm the number of times that the content can be played by checking the number displayed after Remaining Views:
Important

- In order to play DivX VOD content on this unit, you first need to register the unit with your DivX VOD content provider. For details on your registration code, refer to Displaying the DivX VOD registration code on page 61.
- DivX VOD content is protected by a DRM (Digital Rights Management) system. This restricts playback of content to specific, registered devices.

- If a message is displayed after loading a disc containing DivX VOD content, touch Play.
Playback of the DivX VOD content will start.
  - To skip to the next file, touch Next Play.
  - If you do not want to play the DivX VOD content, touch Stop.

Capture an image in JPEG files

You can capture image data and use it as wallpaper. Images can be stored and recalled easily in this unit.
- Only one image can be stored on this unit. Old images are overwritten with the new ones.

1 Pause the slideshow when the desired image is displayed.
Refer to Introduction of still image playback operations on page 23.
Refer to Introduction of still image playback as a slideshow operations on page 24.

2 Capture the image.
Refer to Introduction of still image playback operations on page 23.
Refer to Introduction of still image playback as a slideshow operations on page 24.

3 When Do you save this image? is displayed, touch Yes.
While storing the image to this unit, Saving the image Don’t switch off the battery. is displayed. When the process is finished, Image saved is displayed.
  - To cancel the storage process, touch No.

Changing the wide screen mode

You can select a desired mode for enlarging a 4:3 picture to a 16:9 picture.

1 Display the screen mode.
Refer to Introduction of video playback operations on page 17.
Refer to Introduction of still image playback operations on page 23.
Refer to Introduction of still image playback as a slideshow operations on page 24.

2 Touch the desired wide mode setting.

Full (full screen)
The 4:3 picture is enlarged in the horizontal direction only, giving you a 4:3 TV picture (normal picture) without any omissions.

Just (just)
The picture is enlarged slightly at the center and the amount of enlargement increases horizontally toward the edges of the screen, enabling you to enjoy a 4:3 picture without sensing any disparity even when viewing on a wide screen.

Cinema (cinema)
The picture is enlarged by the same proportion as Full or Zoom in the horizontal direction and by an intermediate proportion between Full and Zoom in the vertical direction; ideal for a cinema sized picture (wide screen picture) where captions lie outside the picture.

Zoom (zoom)
The 4:3 picture is enlarged in the same proportion both vertically and horizontally; ideal for a cinema sized picture (wide screen picture).
Normal (normal)
The 4:3 picture is displayed as it is, giving you no sense of disparity since its proportions are the same as that of the normal picture.

Notes
- You cannot operate this function while driving.
- Different settings can be stored for each video source.
- When a video is viewed in a wide screen mode that does not match its original aspect ratio, it may appear different.
- Remember that using the wide mode feature of this system for commercial or public viewing purposes may constitute an infringement on the author’s rights protected by the Copyright Law.
- The video image will appear coarser when viewed in Cinema or Zoom mode.

Switching the XM/SIRIUS channel selection mode
You have two methods for selecting a channel: by number and by category. When selecting by number, channels in any category can be selected. Select by category to narrow your search down to only channels in a particular category.

Mode All CH (channel number select setting)
Mode Category (channel category select setting)

Selecting a SIRIUS channel from a channel category
Channels are organized into various program categories, e.g. Rock, Classic, Jazz while listening to a SIRIUS station. You can specify channels by selecting the desired category.

1. Select channel category selection mode.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.
Mode All CH (channel number select setting)
Mode Category (channel category select setting)

2. Touch ▲ or ▼ to select the desired channel category.

3. Touch ◀ or ► on the buttons to select the desired channel in the selected channel category.

Selecting a channel from the XM channel list display
The list content can be switched so you can search for the track you want to listen to not only by the channel name but also by the artist name or song title.
- This function is available for GEX P920XM.
- The channel list shows all the channels during ALL-CH mode, and the channels included in the selected category during Mode Category mode.

1. Display the preset channel list.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.

2. Switch the channel list mode.

3. Touch the desired channel that you want to listen to.
Selecting an XM/SIRIUS channel directly

You can select an XM/SIRIUS channel directly by entering the desired channel number.

1 Display the preset channel list.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.

2 Switch to direct input display.

Switching to direct input display.

3 Touch 0 to 9 to input the desired channel number.
   - To cancel the input numbers, touch C.

4 Select the XM/SIRIUS channel of the entered number.
The XM/SIRIUS channel of the entered number is selected.

Using the MyMix function

The MyMix function allows you to make a MyMix song playlist. When a song in the MyMix playlist is being broadcast on a station other than the one you are listening to, you will be alerted, and you can listen to the other station to listen to that song.
- This function is available for GEX P920XM.
- The track itself is NOT downloaded. Only the song title and artist name are stored.

Making the MyMix playlist

You can add a song that is being broadcast to the MyMix playlist. When it is added, the song title and its artist name are stored to this unit. The MyMix function will start when you listen to a song that matches a song title and its artist name in the MyMix playlist.

- Store the song title and artist name.
   Refer to Introduction of XM/SIRIUS tuner operations on page 27.
The song title and artist name of the song you are listening to are stored, and a confirmation message appears.
- To delete a song from the MyMix playlist, refer to Deleting a song from the MyMix playlist for XM tuner on the next page and Deleting a song from the MyMix playlist for SIRIUS tuner on the next page.
   - (XM)
The song title and artist name of up to 12 tracks can be stored. Old tracks will be overwritten when saving more than 12 tracks.
   - (Sirius)
The song title and artist name of up to 10 tracks can be stored. Old tracks will be overwritten when saving more than 10 tracks.
   - You cannot store the song title or the artist name when “” is displayed for the title information.
   - You cannot store song titles or artist names from channel 000.
   - Stored titles may not be displayed correctly.

When a song in the MyMix playlist is broadcast

(XM tuner)
As soon as a song in the MyMix playlist starts being broadcast on a different station, a message is displayed. Touch Yes to switch to that station, and you can listen to that song.
(SIRIUS tuner)
As soon as a stored song starts being broadcast on a different station, a song alert is displayed.

Jump
Switching to the other station to listen to that track.

Stay
Not tuning in to the other station.
Detailed instructions

- (XM tuner)
  If you would rather not to tune in to the other station, touch No.
- If an alert for a song in the MyMix playlist is set to off, no alert will be provided even when the song is broadcast. Refer to Setting up a song alert on this page.
- If the stored title and the title of the song being broadcast differ, no alert will be provided even if they are the same song.

Turning the MyMix function on or off.
You can turn the MyMix function off and stop the alerts for all the songs in the MyMix playlist. To restart, turn this function on. The MyMix function is on as the default setting.

- Turn the MyMix function on or off.
  Refer to Introduction of XM/SIRIUS tuner operations on page 27.

Setting up a song alert
You can set up an alert (on or off) for each song in the MyMix playlist. First, display the MyMix playlist and then change each alert setting. Set the alert to on to receive an alert when the song is broadcast, or set it to off to stop the alert for that song.

1 Switch to memo edit mode.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.
The MyMix playlist is displayed.

2 Select the song title for which you want to turn the alert on or off.
(XM tuner)
The check mark is removed, and the alert for that song is off.
(SIRIUS tuner)

Deleting a song from the MyMix playlist for XM tuner
You can delete each song in the MyMix playlist.

1 Switch to memo edit mode.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.
The MyMix playlist is displayed.

2 Delete the song title.

Deleting a song from the MyMix playlist for SIRIUS tuner
You can delete each song in the MyMix playlist.

1 Switch to memo edit mode.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.

3 A message to confirm deletion will appear. Touch Yes.
   - To cancel deletion, touch No.
Detailed instructions

2 Select the song title that you want to delete.

Selecting the song title that you want to delete.

3 Delete the song title.

Deleting the song title.

4 A message to confirm deletion will appear. Touch Yes.
That song will be deleted from the MyMix play list.
- To cancel deletion, touch No.

Using the Game Alert function

This system can alert you when games involving your favorite teams are about to start. To use this function you need to set up a game alert for the teams in advance.
- This function is available for CD SB10/SIR PNR2/SIR PNR2C.

Selecting teams for Game Alert

1 Start Game Alert setup.
Refer to Introduction of XM/SIRIUS tuner operations on page 27.

2 Select a desired league in League

Switching the league name.

3 Select a desired team in Team.

Switching the team name.

4 Turn the alert on or off.

Turning the alert on or off.

The game alert function is activated for that team.
- When you have already selected 12 teams, FULL is displayed and additional teams cannot be selected. In this case, first delete a selected team and then try again.

5 Repeat these steps to select other teams.
Up to 12 teams can be selected.

Switching the Game Alert on or off

Once you select the teams, you need to turn the Game Alert function on.
The Game Alert function is on at the default setting.

When a game of a selected team starts

When a game of the selected team is about to start (or is currently playing) on a different station, a game alert is displayed.

Switching to the other station to listen to the game.

Not tuning in to the other station.
Displaying game information
If any games of the selected teams are currently playing, you can display information on the games and tune in to the broadcast channel.

1 Display the game information for the selected team.
   Refer to Introduction of XM/SIRIUS tuner operations on page 27.

2 Touch ‹ or › (TRACK) to select a game.
   The game is displayed, followed by more detailed game information.
   • The game score will be updated automatically.

3 Switch to the other station to listen to the game.

□ Not Set
If you have not selected any teams, NOT SET is displayed.
□ No Game
When games involving your favorite teams are not currently playing, NO GAME is displayed.

Displaying the Radio ID
Channel number selection setting
If you select CH000, the ID code is displayed.

• Select CH000.
   Refer to Introduction of XM/SIRIUS tuner operations on page 27.

Switching the SIRIUS display
• Actions will differ depending on the connected SIRIUS tuner.

• Touch SIRIUS information to switch the SIRIUS display.
   Refer to Introduction of XM/SIRIUS tuner operations on page 27.

Channel number Channel name Category name Artist name Song title/Title name Composer name Play time

Note
• Play time is displayed during the Instant Replay mode.

Using the Instant Replay function
The following functions can be operated in Instant Replay mode.
• To use this function, a Pioneer SIRIUS bus interface (e.g. CD SB10) is required.
• To use this function, a SIRIUS plug and play unit with an Instant Replay Function is required.
• For details, refer to the SIRIUS plug and play unit’s manuals.

• To exit from Instant Replay mode, select another source or touch the following icon.

Live Exiting from Instant Replay mode.

• Select a track
   Press ‹ or › (TRACK).

• Fast forward or reverse
   Press and hold ‹ or › (TRACK).

• Pause and play
   Playing and pausing.
Switching the seek mode
There are two seek tuning settings, one is **HD** (Digital broadcasting stations seek) and the other is **ALL** (normal seek).

**ALL**  **HD**

Switching the reception mode
If the reception for a digital broadcast becomes poor, this unit automatically switches to the analog broadcast of the same frequency. If this function is set to **D/A Auto**, the tuner switches between digital broadcast and analog broadcast automatically. If this function is set to **Analog**, the tuner will only receive analog broadcasts.

**D/A Auto**  **Analog**

**Note**
If **SEEK MODE** is set to **HD** and **BLENDING** is set to **Analog**, the tuner cannot receive broadcasts. In this case, the seek mode or reception mode is changed automatically as follows:
- When **SEEK MODE** is set to **HD**, if you switch **BLENDING** from **D/A Auto** to **Analog**, **SEEK MODE** is changed to **ALL**.
- When **BLENDING** is set to **Analog**, if you switch **SEEK MODE** from **ALL** to **HD**, **BLENDING** is changed to **D/A Auto**.

Calling a number in the phone book
(Function of AVH P5200BT)
The phone book in your cellular phone will be transferred automatically when the phone is connected to this unit.
After finding the number you want to call in the phone book, you can select the entry and make the call.

1. **Switch to phone book mode.**
Refer to *Introduction of Bluetooth telephone operations* on page 25.

The phone book display appears.

2. **Select the phone number.**
The detailed phone number list of the selected entry is displayed.

3. **Select the phone number.**
- If you want to store the phone number, touch and hold the list.

4. **Make the call.**
Refer to *Introduction of Bluetooth telephone operations* on page 25.

5. **End the call.**
Refer to *Introduction of Bluetooth telephone operations* on page 25.

**Note**
Depending on the cellular phone, the phone book may not be transferred automatically. In this case, operate your cellular phone to transfer the phone book. The visibility of this unit should be on. Refer to *Switching visible unit* on page 51.

Selecting a number by alphabet search mode
(Function of AVH P5200BT)
If a lot of numbers are registered in the phone book, you can search for the phone number by alphabet search mode.

1. **Switch to phone book mode.**
Refer to *Introduction of Bluetooth telephone operations* on page 25.

The phone book display appears.

2. **Touch ABC to switch to alphabet search mode.**

3. **Touch the first letter of the entry you are looking for.**
The Phone Book entries starting with that letter (e.g. “Ben”, “Brian” and “Burt” when “B” is selected) will be displayed.
- If you want to change the character to Russian, touch the icon. To return to English, touch the icon again.
Changing the character to Russian.

The order of the first name and last name may be different from that of the cellular phone.

4 Touch the list to display the phone number list of the selected entry.
   - If several phone numbers are included in an entry, select one by touching the list.
   - If you want to switch to the call history list, touch the icon.

Switching to the call history list.

5 Make the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

6 End the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

Using the missed, received and dialed call lists
(Function of AVH-P5200BT)
The 80 most recent calls dialed, received, and missed are stored in the memory. You can browse them and call numbers from these lists.

1 Switch to the call history list.
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Select Missed Calls, Dialed Calls or Received Calls.
   - Displaying the received call list.
   - Displaying the dialed call list.
   - Displaying the missed call list.

3 Touch the list number to select a phone number.
Name and phone number are displayed in the detailed list.
   - If you want to store the phone number, touch and hold the list.

4 Make the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

5 End the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

Using the missed, received and dialed call lists
(Function of AVH-P5200DVD)
The 80 most recent calls dialed, received, and missed are stored in the memory. You can browse them and call numbers from these lists.

1 Switch to the call history list.
Refer to Introduction of Bluetooth telephone operations on page 30.

2 Touch a phone number or name (if entered) you want to call.

3 Make the call.
Refer to Introduction of Bluetooth telephone operations on page 30.
4 End the call.
Refer to Introduction of Bluetooth telephone operations on page 30.

Setting automatic answering
If this function is on, this unit automatically answers all incoming calls.

- Turn automatic answering on or off.
  (AVH P5200DVD)
  Refer to Introduction of Bluetooth telephone operations on page 30.
  (AVH P5200BT)
  Refer to Introduction of Bluetooth telephone operations on page 25.

Adjusting the other party’s listening volume
(Function of AVH P5200BT)
To maintain the good sound quality, this unit can adjust the other party’s listening volume. If the volume is not loud enough for the other party, use this function.

- Select Far end Volume.
  Refer to Introduction of Bluetooth telephone operations on page 25.
  1 2 3
  - This function can be performed even while talking on the phone.
  - Settings can be stored for each device.

Switching the ring tone
You can select whether or not to use this unit’s ring tone. If this function is set to on, the ring tone for this unit will sound.

1 Connect your cellular phone to this unit.

2 Turn ring tone on or off.
  (AVH P5200DVD)
  Refer to Introduction of Bluetooth telephone operations on page 30.

Using the preset dial lists
(Function of AVH P5200BT)
You can easily store up to six phone numbers as presets.

1 Display the preset screen.
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Touch one of preset dial keys to select the desired phone number.
  - If you want to delete a preset phone number, touch and hold the preset dial key.

3 Make the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

4 End the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

Making a call by entering phone number
(Function of AVH P5200BT)

Important
Be sure to park your vehicle in a safe place and apply the parking brake when performing this operation.
1 Switch to the entering phone number mode.
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Touch the number icons to input the numbers.
- Up to 24 digits can be entered.

3 Make the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

4 End the call.
Refer to Introduction of Bluetooth telephone operations on page 25.

Note
Entering phone number mode cannot be operated unless a Bluetooth telephone is connected to this unit.

Setting the private mode
(Function of AVH P5200BT)
During a conversation, you can switch to private mode (talk directly on your cellular phone).
Refer to Introduction of Bluetooth telephone operations on page 25.

Pairing from this unit
(Function of AVH P5200BT)

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Touch Connection to select a device.

3 Start to search.

While searching, is displayed and when available devices are found, the device names or BD addresses (if names cannot be obtained) are displayed.
- If you want to switch between the device names and BD addresses, touch the icon.

4 Touch a device name to select the device you want to connect to.
While connecting, Pairing is displayed. If the connection is established, Paired is displayed.
- If the connection fails, Connection Error is displayed. In such cases, try again from the beginning.
- The PIN code is set to 0000 as the default, but can be changed. Refer to Entering PIN code for Bluetooth wireless connection on page 52.
- When establishing connection, the icon is displayed. Touch the icon to disconnect the device.

- If you want to delete a paired Bluetooth telephone, display Delete OK? Touch Yes to delete the device.
Deleting a paired device.

Never turn the unit off while the paired Bluetooth telephone is being deleted.

Using a Bluetooth device to pair

(Function of AVH P5200BT)
If you cannot open the connection between your Bluetooth device and this unit from your Bluetooth device, you can use this function to establish a connection.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Touch Special Device to select the special device.
- Bluetooth devices that are difficult to establish a connection with are called special devices. If your Bluetooth device is listed as a special device, select the appropriate one.

3 Touch the special device list to open the connection.
This unit is now on standby for a connection with the Bluetooth device.
- If five devices are already paired, Memory Full is displayed and pairing cannot be performed. In such cases, delete a paired device first. Refer to Deleting a paired device on this page.

4 Use your Bluetooth device to establish a connection.
The connection method is different depending on the Bluetooth device. Refer to the manual for your Bluetooth device to establish a connection.
While connecting, Pair your phone is displayed. If the connection is established, Paired is displayed.

- If the connection fails, Connection Error is displayed. In such cases, try again from the beginning.
- The PIN code is set to 0000 as the default, but can be changed. Refer to Entering PIN code for Bluetooth wireless connection on the next page.

Connecting to a Bluetooth device automatically

(Function of AVH P5200BT)
If this function is set to on, a connection between your Bluetooth device and this unit will take place automatically as soon as the two devices are less than a few meters apart. Initially, this function is set to on.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Touch Auto Connect to turn automatic connection on.
If your Bluetooth device is ready for a Bluetooth wireless connection, a connection to this unit will automatically be established.
- To turn automatic connection off, touch Auto Connect again.

3 Turn your vehicle’s ACC switch off and on.

Switching visible unit

(Function of AVH P5200BT)
This function sets whether or not to make this unit visible to the other device. Initially, this function is set to on.

1 Display the Bluetooth Connection Menu.
Refer to Introduction of Bluetooth telephone operations on page 25.
2 Touch Visibility to select visibility off.  
   • To turn visibility on, touch Visibility again.

Displaying BD (Bluetooth Device) address
(Function of AVH P5200BT)
This unit displays its BD address.

1 Display the Bluetooth Connection Menu.  
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Touch Bluetooth Version to select device information.  
The BD address is displayed.

Entering PIN code for Bluetooth wireless connection
(Function of AVH P5200BT)
To connect your Bluetooth device to this unit via Bluetooth wireless technology, you need to enter a PIN code on your Bluetooth device to verify the connection. The default code is 0000, but you can change it with this function.

1 Display the Bluetooth Connection Menu.  
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Touch PIN Code Input to select PIN code input.

3 Touch 1 to 0 to input pin code.

4 After inputting PIN code (up to 8 digits), store in this unit.

Using a cellular phone to initiate a connection
(Function of AVH P5200DVD)
A Bluetooth wireless connection can be established from your phone by putting the unit into initiating a connection mode. You may need to refer to the operation manual that came with your phone if you are unsure how to initiate a connection from your phone.

1 Put the unit in initiating a connection mode.  
Refer to Introduction of Bluetooth telephone operations on page 25.

2 Use a cellular phone to connect to this unit.  
   ▪ Operation varies depending on the type of cellular phone.
   ▪ You may need to enter the link code on your cellular phone to complete the connection.

Registering a connected cellular phone
(Function of AVH P5200BT)
You can register a phone that is temporarily connected to this unit in order to take full advantage of the features available with Bluetooth wireless technology. Only one cellular phone can be registered.

1 Start registering a connected cellular phone.  
Refer to Introduction of Bluetooth telephone operations on page 30.

2 Use cellular phone to register to this unit.  
If registration is successful, the device name of the connected phone is displayed in the selected assignment.  
   ▪ If the assignment is already taken, the device name will be displayed. To replace an assignment with a new phone, first delete the current assignment.
If registration failed, the device name of the connected phone will not be displayed in the selected assignment. In such cases, return to step 1 and try again.

**Voice recognition**
(Function of AVH P5200DVD)
If your cellular phone features voice recognition technology, you can make a call by voice commands.
- Operation varies depending on the type of cellular phone. Refer to the instruction manual that came with your cellular phone for detailed instructions.

1. **Start voice recognition.**  
   Refer to *Introduction of Bluetooth telephone operations* on page 30.
2. **Say the name of your contact aloud.**

**Connecting a Bluetooth audio player**
(Function of AVH P5200DVD)
A Bluetooth wireless connection can be established by putting the unit into initiating a connection mode.

- **Put the unit in initiating a connection mode.**  
  Refer to *Bluetooth audio operations* on page 31.  
  This unit is now on standby for connection from Bluetooth audio player.  
  If your Bluetooth audio player is set ready for Bluetooth wireless connection, connection to this unit is automatically established.

**Connecting to a Bluetooth device automatically**
(Function of AVH P5200DVD)  
If this function is set to on, a connection between your Bluetooth device and this unit will take place automatically as soon as the two devices are less than a few meters apart. Initially, this function is set to on.

1. **Touch Auto Connect to turn automatic connection on.**  
   Refer to *Introduction of Bluetooth telephone operations* on page 30.  
   If your Bluetooth device is ready for a Bluetooth wireless connection, a connection to this unit will automatically be established.  
   - To turn automatic connection off, touch *Auto Connect* again.
2. **Turn your vehicle’s ACC switch off and on.**

**Displaying BD (Bluetooth Device) address**
(Function of AVH P5200DVD)
This unit displays its BD address.

- **Touch Bluetooth Version to select device information.**  
  Refer to *Introduction of Bluetooth telephone operations* on page 30.  
  The BD address is displayed.
Introduction of menu operations

1 Display menus. Refer to Common operations for menu settings/lists on page 13.

2 Touch any of the following touch panel keys to select the menu to be adjusted.
   ① Touch panel keys

   ① Video Setup Menu
   Refer to Setting up the DVD player on page 58.

   ② Audio function menu
   Refer to Audio Adjustments on the next page.

   ③ System menu
   Refer to System settings on page 62.

   ④ Entertainment menu
   Refer to Entertainment settings on page 67.

   ⑤ Custom menu
   You can choose menus within each menu (Audio function menu, etc.) and register them to this custom menu. Refer to Customizing menus on page 68.

Notes
- You can display the Video setup menu when a Disc, USB or SD source is selected.
- If you start the Video setup menu, playback is stopped.
Audio Adjustments

Notes
• When selecting FM as the source, you cannot switch to Source Level Adjuster.
• When selecting Bluetooth telephone as the source, you can not use this function.

Using fader/balance adjustment
You can change the fader/balance setting to provide an ideal listening environment for all of the occupied seats.

1 Display the audio function menu. Refer to Introduction of menu operations on the previous page.

2 Touch Fader/Balance on the audio function menu.

3 Touch ▲ or ▼ to adjust the front/rear speaker balance.
Range: Front:15 to Rear:15
  ▪ Select F/R: 0 L/R: 0 when only using two speakers.
  ▪ The front/rear speaker balance cannot be adjusted when the rear output setting is Subwoofer. Refer to Setting the rear output and subwoofer controller on page 62.

4 Touch ◀ or ▶ to adjust the left/right speaker balance.
Range: Left:15 to Right:15

Using the equalizer
You can adjust the equalization to match the car’s interior acoustic characteristics as desired.

Recalling equalizer curves
There are seven stored equalizer curves which you can easily recall at any time. Here is a list of the equalizer curves.

<table>
<thead>
<tr>
<th>Display</th>
<th>Equalizer curve</th>
</tr>
</thead>
<tbody>
<tr>
<td>Powerful</td>
<td>Powerful</td>
</tr>
<tr>
<td>Natural</td>
<td>Natural</td>
</tr>
<tr>

<td>Vocal</td>
</tr>
<tr>
<td>Custom1</td>
<td>Custom 1</td>
</tr>
<tr>
<td>Custom2</td>
<td>Custom 2</td>
</tr>
<tr>
<td>Flat</td>
<td>Flat</td>
</tr>
<tr>
<td>Super Bass</td>
<td>Super bass</td>
</tr>
</tbody>
</table>

• The equalizer curves for Custom1 and Custom2 can be adjusted.
• You cannot select Custom1 and Custom2 when using the auto equalizer.
• When Flat, no changes are made to the sound. You can check the effects of the equalizer curves by switching alternatively between Flat and another equalizer curve.

1 Display the audio function menu. Refer to Introduction of menu operations on the previous page.

2 Touch Graphic EQ on the audio function menu.
  ▪ You can select Graphic EQ when Auto EQ function is off.

3 Touch ◀ or ▶ to select the desired item.
Powerful Natural Vocal Custom1
Custom2 Flat Super Bass

Adjusting the 8-band graphic equalizer
You can adjust the level of each band for the equalizer curves.
• A separate Custom1 curve can be created for each source. If you make adjustments when a curve other than Custom2 is selected, the equalizer curve settings will be stored in Custom1.
• A Custom2 curve that is common for all sources can be created. If you make adjustments when the Custom2 curve is selected, the Custom2 curve will be updated.
1 Display the audio function menu.
   Refer to Introduction of menu operations on page 54.

2 Touch Graphic EQ on the audio function menu.

3 Touch ◀ or ▶ to select the desired item.
   Powerful  Natural  Vocal  Custom1  Custom2  Flat  Super Bass

4 Touch the Equalizer band to adjust.

5 Touch ▲ or ▼ to adjust the level of the equalizer band.
   Range: +12dB to -12dB
   ▪ You can then select another band and adjust the level.

Using the auto-equalizer
The auto equalizer is an equalizer curve created by auto EQ (refer to Auto EQ (auto equalizing) on page 65).
You can turn the auto equalizer on or off. If you connect an optional microphone to this unit, you can use this function.

1 Display the audio function menu.
   Refer to Introduction of menu operations on page 54.

2 Touch Auto EQ to turn the auto-equalizer on or off.
   ▪ You cannot use this function if auto EQ has not been carried out.

Using sonic center control
Sound that is suited for the listening position can easily be created with this function.

1 Display the audio function menu.
   Refer to Introduction of menu operations on page 54.

2 Touch Sonic Center Control on the audio function menu.

3 Touch ◀ or ▶ to select a listening position.
   Range: Left:7 to Right:7

Adjusting loudness
Loudness compensates for deficiencies in the low and high frequency ranges at low volume.

1 Display the audio function menu.
   Refer to Introduction of menu operations on page 54.

2 Touch Loudness on the audio function menu.

3 Touch ◀ or ▶ to select a desired level.
   Off (off)  Low (low)  Mid (mid)  High (high)

Using subwoofer output
This unit is equipped with a subwoofer output which can be turned on or off.
▪ The cut off frequency and output level can be adjusted when the subwoofer output is on.

1 Display the audio function menu.
   Refer to Introduction of menu operations on page 54.

2 Touch Subwoofer on the audio function menu.

3 Touch On or Off next to Subwoofer to turn the subwoofer output on or off.

4 Touch Normal or Reverse next to Phase to select the phase of subwoofer output.

5 Touch ◀ or ▶ next to Level to adjust the output level of the subwoofer.
   Range: +6 to -24

6 Touch ◀ or ▶ next to Frequency to select the cut-off frequency.
   50Hz  63Hz  80Hz  100Hz  125Hz
Boosting the bass
You can boost the bass level.

1 Display the audio function menu. Refer to Introduction of menu operations on page 54.
2 Touch Bass Booster on the audio function menu.
3 Touch \(\uparrow\) or \(\downarrow\) to select a desired level. Range: 0 to +6

Using the high pass filter
When you do not want low sounds from the subwoofer output frequency range to play from the front or rear speakers, turn on the HPF (high pass filter). Only frequencies higher than those in the selected range are output from the front or rear speakers.

1 Display the audio function menu. Refer to Introduction of menu operations on page 54.
2 Touch High Pass Filter on the audio function menu.
3 Touch \(\leftarrow\) or \(\rightarrow\) next to Frequency to select cut-off frequency.
   Off (off)  50Hz  63Hz  80Hz  100Hz  125Hz
Only frequencies higher than those in the selected range are output from the front or rear speakers.

Adjusting source levels
With SLA (source level adjustment), the volume levels of each source can be adjusted to prevent significant differences between sources.

- Settings are based on the FM volume level, which remains unchanged.

1 Display the audio function menu. Refer to Introduction of menu operations on page 54.
2 Compare the FM volume level with the level of the source you wish to adjust.
3 Touch Source Level Adjuster on the audio function menu.
4 Touch \(\uparrow\) or \(\downarrow\) to adjust the source volume. Range: +4 to –4

Notes
- The AM volume level can also be adjusted with this function.
- Video CD, CD, compressed audio and DivX are automatically set to the same source level adjustment volume.
- iPod and USB storage device are automatically set to the same source level adjustment volume.
- External unit 1 and external unit 2 are automatically set to the same source level adjustment volume.
Setting up the DVD player

Setting the subtitle language
You can set a desired subtitle language. When available, the subtitles will be displayed in the selected language.

1  Display the Video Setup Menu.
Refer to Introduction of menu operations on page 54.

2  Touch Subtitle Language on the Video Setup menu.
A subtitle language menu is displayed.

3  Touch the desired language.
The subtitle language is set.

   ▪ If you have selected Others, refer to When you select Others on this page.

Notes

   ![Note]
   • If the selected language is not available, the language specified on the disc is displayed.
   • You can also switch the subtitle language by touching the icon during playback. (Refer to Playing moving images on page 17.)
   • The setting made here will not be affected even if the subtitle language is switched during playback using Subtitle.

When you select Others
A language code input display is shown when Others is selected. Refer to Language code chart for DVD on page 89.

1  Touch 0 to 9 to input the language code.
   ▪ To cancel the entered numbers, touch C.

2  Registering the code.

Registering the code.

Setting the audio language
You can set the preferred audio language.

1  Display the Video Setup Menu.
Refer to Introduction of menu operations on page 54.

2  Touch Audio Language on the Video Setup menu.
An audio language menu is displayed.

3  Touch the desired language.
The audio language is set.

   ▪ If you have selected Others, refer to When you select Others on this page.

Notes

   ![Note]
   • If the selected language is not available, the language specified on the disc is used.
   • You can also switch the audio language by touching Audio during playback. (Refer to Playing moving images on page 17.)
   • The setting made here will not be affected even if the audio language is switched during playback using Audio.

Setting the menu language
You can set the preferred language in which the menus recorded on a disc are displayed.

1  Display the Video Setup Menu.
Refer to Introduction of menu operations on page 54.

2  Touch Menu Language on the Video Setup menu.
A menu language menu is displayed.

3  Touch the desired language.
The menu language is set.

   ▪ If you have selected Others, refer to When you select Others on this page.

Note

If the selected language is not available, the language specified on the disc is displayed.
Setting the multi-angle DVD display

The angle icon can be set so it appears on scenes where the angle can be switched.

1. Display the Video Setup Menu. Refer to Introduction of menu operations on page 54.

2. Touch Multi Angle on the Video Setup menu to turn angle icon display on or off.

Setting the aspect ratio

There are two kinds of display: a wide screen display that has a width to height ratio (TV aspect ratio) of 16:9, and regular display that has a TV aspect of 4:3. Be sure to select the correct TV aspect for the display connected to REAR MONITOR OUTPUT.

- When using regular display, select either Letter Box or Pan Scan. Selecting 16:9 may result in an unnatural picture.
- If you select the TV aspect ratio, the unit’s display will change to the same setting.

1. Display the Video Setup Menu. Refer to Introduction of menu operations on page 54.

2. Touch TV Aspect on the Video Setup menu to select the TV aspect ratio.

Touch TV Aspect repeatedly until the desired setting appears.

- 16:9: Wide screen picture (16:9) is displayed as is (initial setting)
- Letter Box: The picture is the shape of a letterbox with black bands on the top and bottom of the screen
- Pan Scan: The picture is cut short on the right and left sides of the screen

Notes

- When playing discs that do not specify Pan Scan, the disc is played back in Letter Box display even if you select the

Pan Scan setting. Confirm whether the disc package bears the 16:9 LB mark.
- The TV aspect ratio cannot be changed for some discs. For details, refer to the disc’s instructions.

Setting the slide show interval

JPEG files can be viewed as a slide show on this unit. In this setting, the interval between each image can be set.

1. Display the Video Setup Menu. Refer to Introduction of menu operations on page 54.

2. Touch Slide Show on the Video Setup menu to select the slide show interval.

Touch Slide Show repeatedly until the desired setting appears.

- 5sec: JPEG images switch at intervals of 5 seconds
- 10sec: JPEG images switch at intervals of 10 seconds
- 15sec: JPEG images switch at intervals of 15 seconds
- Manual: JPEG images can be switched manually

Setting parental lock

Some DVD video discs let you use parental lock to restrict children from viewing violent and adult oriented scenes. You can set parental lock to the desired level.

- When you have a parental lock level set and play a disc featuring parental lock, code number input indications may be displayed. In such cases, playback will begin when the correct code number is entered.
Setting the code number and level
A code number must be registered in order to play back discs with parental lock.

1 Display the Video Setup Menu. Refer to Introduction of menu operations on page 54.

2 Touch Parental on the Video Setup menu.

3 Touch 0 to 9 to input a four digit code number.
   ▪ To cancel the entered numbers, touch C.

4 Registering the code.

The code number is set, and the level can now be set.

5 Touch 1 to 8 to select the desired level.

6 Touch Enter.
The parental lock level is set.
   ▪ 8  Playback of the entire disc is possible (initial setting)
   ▪ 7 to 2  Playback of discs for children and non adult oriented discs is possible
   ▪ 1  Playback of discs for children only is possible

Notes
   ▪ We recommend to keep a record of your code number in case you forget it.
   ▪ The parental lock level is stored on the disc. Look for the level indication written on the disc package, included literature or on the disc itself. Parental lock of this unit is not possible if a parental lock level is not stored on the disc.
   ▪ With some discs, the parental lock may be active only for certain levels of scenes. The play back of those scenes will be skipped. For details, refer to the instruction manual that came with the disc.

Changing the level
You can change the set parental lock level.

1 Display the Video Setup Menu. Refer to Introduction of menu operations on page 54.

2 Touch Parental on the Video Setup menu.

3 Touch 0 to 9 to input the registered code number.

4 Registering the code.

This sets the code number, and the level can now be changed.
   ▪ If you enter an incorrect code number, the C icon is displayed. Touch C and enter the correct code number.
   ▪ If you forget your code number, refer to If you forget your code number on this page.

5 Touch 1 to 8 to select the desired level.

6 Touch Enter.
The new parental lock level is set.

If you forget your code number
Press RESET.

Setting the DivX subtitle file
You can select whether or not to display DivX external subtitles.
   ▪ The DivX subtitles will be displayed even when Custom is selected if no DivX external subtitle files exist.

1 Display the Video Setup Menu. Refer to Introduction of menu operations on page 54.
2 Touch DivX Subtitle on the Video Setup menu to select the desired subtitle setting.
   - Original  Display the DivX subtitles
   - Custom    Display the DivX external subtitles

**Notes**
- Up to 42 characters can be displayed on one line. If more than 42 characters are set, the line breaks and the characters are displayed on the next line.
- Up to 126 characters can be displayed on one screen. If more than 126 characters are set, the excess characters will not be displayed.

**Displaying the DivX® VOD registration code**
In order to play DivX VOD (video on demand) content on this unit, the unit must first be registered with a DivX VOD content provider. For registration, generate a DivX VOD registration code and submit it to your provider.
- Keep a record of the code as you will need it when you register your unit to the DivX VOD provider.

1 Display the Video Setup Menu.
   Refer to Introduction of menu operations on page 54.

2 Touch DivX VOD on the Video Setup menu.
3 Touch Deactivation Code.
   - To cancel deactivation, touch Cancel.
4 Touch OK.
   The deactivation completed.

**Automatic playback of DVDs**
When a DVD disc with a DVD menu is inserted, this unit will cancel the menu automatically and start playback from the first chapter of the first title.
- Some DVDs may not operate properly. If this function is not fully operated, turn this function off and start playback.

1 Display the Video Setup Menu.
   Refer to Introduction of menu operations on page 54.

2 Touch DVD Auto Play to turn automatic playback on.
   - To turn automatic playback off, touch DVD Auto Play again.

**Displaying the deactivation code**
If your device is already activated, deactivate it by entering the deactivation code.

1 Display the Video Setup Menu.
   Refer to Introduction of menu operations on page 54.
System settings

Switching the auxiliary setting
Activate this setting when using an auxiliary device connected to this unit.

1 Display the system menu.
Refer to Introduction of menu operations on page 54.

2 Touch AUX Input on the system menu to turn AUX Input on or off.

Setting AV input
Activate this setting when using an external video component connected to this unit.

1 Display the system menu.
Refer to Introduction of menu operations on page 54.

2 Touch AV Input on the system menu to turn AV Input on or off.

Setting the rear output and subwoofer controller
This unit’s rear output (rear speaker leads output and RCA rear output) can be used for full range speaker (Full) or subwoofer (Subwoofer) connection. If you switch the rear output setting to Subwoofer, you can connect a rear speaker lead directly to a subwoofer without using an auxiliary amp. Initially, the unit is set for a rear full range speaker connection (Full).

1 Turn the unit off.
Refer to Basic Operations on page 11.

2 Display the system menu.
Refer to Introduction of menu operations on page 54.

3 Touch Rear Speaker on the system menu to switch the subwoofer output or full-range speaker.
- When no subwoofer is connected to the rear output, select Full (full range speaker).
- When a subwoofer is connected to the rear output, select Subwoofer (subwoofer).
- When the rear output setting is Subwoofer, you cannot operate the following procedure.

Notes
- Even if you change this setting, there is no output unless you turn the subwoofer output on (refer to Using subwoofer output on page 56).
- If you change this setting, subwoofer output in the audio menu will return to the factory settings.
- Both rear speaker lead outputs and RCA rear output are switched simultaneously in this setting.

Switching sound muting/attenuation
Sound from this system is automatically muted or attenuated when a signal from equipment with a mute function is received.
- Sound from this system returns to normal when the muting or attenuation is canceled.

1 Display the system menu.
Refer to Introduction of menu operations on page 54.

2 Touch Mute/ATT until the desired setting appears.
Touch Mute/ATT until the desired setting appears in the display.
- Mute Muting
- ATT-20dB Attenuation (ATT-20dB has a stronger effect than ATT-10dB)
- ATT-10dB Attenuation
- Off Turns the sound muting/attenuation off
**Notes**

- When **Mute** is displayed, the sound is turned off and no audio adjustments can be made.
- When **ATT** is displayed, the sound is attenuated and only the volume can be adjusted. (No other audio adjustments can be made.)
- Operation returns to normal when the phone connection is ended.

**Changing languages for CAUTION**

Some operations on this unit are prohibited while driving or needs to be paid a careful attention when operating. In such case, a caution appears on the display. You can change the language of the cautions at this setting.

1. **Display the system menu.**  
   Refer to *Introduction of menu operations* on page 54.

2. **Touch Caution Language to select your desired language.**

3. **Touch any of the following touch panel keys to select the **Caution Language.****
   - **English**  
   - **Español**  
   - **Français**

**Selecting the menu language**

The menu language can be selected from four languages.

- The language can be changed for the following:
  - System menu
  - Video Setup
  - On screen display
  - Multi language setting for DivX
- If the embedded language and the selected language setting are not the same, text in formation may not be displayed properly.

- Some characters may not be displayed properly.

1. **Display the system menu.**  
   Refer to *Introduction of menu operations* on page 54.

2. **Touch System Language on the system menu to select the desired language.**

3. **Touch the desired language.**  
   - **English** (English)  
   - **Español** (Spanish)  
   - **Português** (Portuguese)  
   - **Русский** (Russian)

**Clearing Bluetooth memory**  
(AVH P5200BT only)

**Important**

Never turn the unit off while the Bluetooth memory is being cleared.

1. **Turn the unit off.**  
   Refer to *Basic Operations* on page 11.

2. **Display the system menu.**  
   Refer to *Introduction of menu operations* on page 54.

3. **Touch Bluetooth Memory Clear on the system menu.**

4. **Touch Clear.**  
   After selecting a desired item, a confirmation display appears. Touch **OK** to delete the memory.

- If you do not want to clear the selected memory, touch **Cancel.**

**Updating Bluetooth connection software**  
(AVH P5200BT only)

This function is used to update this unit with the latest software. For information on the software and updating, refer to our website.
Important
Never turn the unit off and never disconnect the phone while the software is being updated.

1 Display the system menu.
Refer to Introduction of menu operations on page 54.

2 Touch Bluetooth Software Update.

3 Touch Start to display the data transfer mode.
   - Follow the on screen instructions to finish up dating the software.

Displaying the Bluetooth system version
(AVH P5200BT only)
If this unit fails to operate properly, you may need to consult your dealer for repair. In such cases, you may be asked to specify the system version. Perform the following procedure to check the version on this unit.

1 Turn the unit off.
   Refer to Basic Operations on page 11.

2 Display the system menu.
   Refer to Introduction of menu operations on page 54.

3 Touch Bluetooth Version Information to display to the version of the Bluetooth module of this unit.

Adjusting the LCD panel slide position
You can adjust the LCD panel slide position so that the panel is set back or forward.

1 Display the system menu.
   Refer to Introduction of menu operations on page 54.

2 Touch Flap Set Back.

3 Touching the Flap Set Back keys allows you to move the LCD panel back and forth.
   - The LCD panel slides to the back.
   - The LCD panel slides to the front.

Setting the automatic open function
To prevent the display from hitting the shift lever of an automatic vehicle when it is in the P (park) position, or when you do not wish the display to open/close automatically, you can set the automatic open function to manual mode.

1 Display the system menu.
   Refer to Introduction of menu operations on page 54.

2 Touch AUTO FLAP to select whether to open/close the display automatically or manually.
   Each time you touch AUTO FLAP the setting switches between:
   - **ON** The LCD panel will open or close automatically when the ignition switch is turned on or off.
   - **OFF** You have to press OPEN/CLOSE to open/close the LCD panel.

Switching the warning tone
If the front panel is not detached from the head unit within four seconds of turning off the ignition, a warning tone sounds. You can turn off the warning tone.

1 Display the system menu.
   Refer to Introduction of menu operations on page 54.
2 Touch DT.WARNING to turn the warning tone on.
- To turn the warning tone off, touch DT.WARNING again.

Setting the rear view camera (back up camera)

⚠️ CAUTION
Pioneer recommends the use of a camera which outputs mirror-reversed images. Otherwise, the screen image will appear reversed.

This unit features a function that automatically switches to the rear view camera video (REAR VIEW CAMERA IN) when a rear view camera is installed on your car and the gear shift is moved to the REVERSE (R) position. (For more details, consult your dealer.)
- After you set up the rear view camera setting, move the gear shift to REVERSE (R) and confirm that the rear view camera video is shown on the display.
- Change this setting if the display switches to the rear view camera video by error while you are driving forward.
- To stop watching the rear view camera video and return to the source display, press and hold MENU/.
- Touch the RearView source icon to display the rear view camera image while driving. Touch the source icon again to turn the rear view camera off. For details, refer to Selecting a source using the touch panel keys on page 11.

1 Display the system menu.
Refer to Introduction of menu operations on page 54.

2 Touch Camera Polarity on the system menu to select the appropriate setting.
- Battery When the polarity of the connected lead is positive while the gear shift is in REVERSE (R) position
- Ground When the polarity of the connected lead is negative while the gear shift is in REVERSE (R) position
- Off When a rear view camera is not connected to this unit

Auto EQ (auto-equalizing)
The auto equalizer automatically measures the car’s interior acoustic characteristics, and then creates an auto equalizer curve based on that information.

⚠️ WARNING
As a loud tone (noise) may be emitted from the speakers when measuring the car’s interior acoustic characteristics, never perform auto EQ while driving.

⚠️ CAUTION
- Thoroughly check the conditions before performing auto EQ as the speakers may be damaged if these functions are performed when:
  - The speakers are incorrectly connected.
  - A speaker is connected to a power amp delivering output higher than the speaker’s maximum input power capability.
- If the microphone is placed in an unsuitable position the measurement tone may become loud and measurement may take a long time, resulting in battery drainage. Be sure to place the microphone in the specified location.
Before operating the auto EQ function

- Carry out auto EQ in as quiet a place as possible, with the car engine and air conditioning switched off. Also cut power to car phones or portable telephones in the car, or remove them from the car before carrying out auto EQ. Sounds other than the measurement tone (surrounding sounds, engine sound, telephones ringing etc.) may prevent correct measurement of the car interior acoustic characteristics.
- Be sure to carry out auto EQ using the optional microphone. Using another microphone may prevent measurement, or result in incorrect measurement of the car interior acoustic characteristics.
- In order to perform auto EQ, the front speaker must be connected.
- When this unit is connected to a power amp with input level control, auto EQ may not be possible if the power amp’s input level is set below the standard level.
- When this unit is connected to a power amp with an LPF, turn this LPF off before performing auto EQ. Also set the cut off frequency for the built in LPF of an active subwoofer to the highest frequency.
- The distance has been calculated by computer to be the optimum delay to give accurate results for the circumstances, so please continue to use this value. The reflected sound within the car is strong and delays occur. The LPF on active subwoofers or external amps delay the lower sounds.
- Auto EQ changes the audio settings as follows:
  - The fader/balance settings return to the center position. (Refer to Using fader/balance adjustment on page 55.)
  - The equalizer curve switches to Flat. (Refer to page 55.)
  - The front, center and rear speakers will automatically be adjusted to a high pass filter setting.
- Previous settings for auto EQ will be overwritten.

Performing auto EQ

1. Stop the car in a place that is quiet, close all the doors, windows and sun roof, and then turn the engine off.
   If the engine is left running, engine noise may prevent correct auto EQ.
2. Fix the optional microphone in the center of the headrest of the driver’s seat, facing forward.
   The auto EQ may differ depending on where you place the microphone. If desired, place the microphone on the front passenger seat to carry out auto EQ.
3. Turn the ignition switch to ON or ACC.
   If the car’s air conditioner or heater is turned on, turn it off. Noise from the fan in the air conditioner or heater may prevent correct auto EQ.
4. Display the system menu.
   Refer to Introduction of menu operations on page 54.
5. Touch Auto EQ Measurement to enter auto EQ measurement mode.
6. Plug the microphone into the microphone input jack on this unit.
7 Touch Start to start auto EQ.

8 When the 10-second countdown starts, get out of the car and close the door within 10 seconds.
A measurement tone (noise) is emitted from the speakers, and auto EQ measurement begins.
When auto EQ is completed, Complete is displayed.
When the car’s interior acoustic characteristics cannot be measured correctly, an error message will be displayed. (Refer to Understanding auto EQ error messages on page 77.)
- It takes about nine minutes for auto EQ measurement to be completed when all the speakers are connected.
- To stop auto EQ, touch Stop.
- To cancel auto EQ measurement mode during this procedure, touch the following touch panel key.

9 Store the microphone carefully in the glove compartment or another safe place.
If the microphone is subjected to direct sunlight for an extended period, high temperatures may cause distortion, color change or malfunction.

Entertainment settings
Selecting the illumination color
This unit is equipped with multiple color illumination.

Direct selection from preset illumination colors
You can select an illumination color from the color list.
1 Display the entertainment menu.
Refer to Introduction of menu operations on page 54.
2 Touch Appearance.
3 Touch Illumination and then touch a color on the list.

Customizing the illumination color
1 Display the entertainment menu.
Refer to Introduction of menu operations on page 54.
2 Touch Appearance.
3 Touch Illumination and then touch Custom.
4 Display the customizing menu.
5 Touch the color bar to customize the color.
6 Touch ◀ or ▶ to fine-tune the color.
7 Touch the icon and hold to store the customized color in the memory.

Note
(AVH-P5200DVD)
Do not press ▲ (eject) to open or close the panel when you are using the microphone.
Customizing menus

1 Display menu columns to register. Refer to Introduction of menu operations on page 54.

2 Touch and hold the menu column to register it.
   - To cancel registration, touch and hold the menu column again.

3 Display the custom menu and choose a registered menu. Refer to Introduction of menu operations on page 54.

Note
You can register up to 12 columns.

Selecting the OSD color
The OSD color can be changed.

1 Display the entertainment menu. Refer to Introduction of menu operations on page 54.

2 Touch Appearance.

3 Touch Screen.

4 Touch one of the colors on the list.

Selecting the background display
You can switch the background that is displayed when listening to a source.

1 Display the entertainment menu. Refer to Introduction of menu operations on page 54.

2 Touch Background.

3 Touch the desired setting.
   - If no JPEG images are stored in this unit, you cannot select photo. To store a JPEG image to this unit, refer to Capture an image in JPEG files on page 41.

The customized color has been stored in the memory. The set color will be recalled from the memory the next time you touch the same icon.
### Changing the picture adjustment

You can adjust the **Brightness** (brightness), **Contrast** (contrast), **Color** (color), **Hue** (hue), **Dimmer** (dimmer), **Temperature** (temperature), **Black Level** (black level) and **RGB Dot ADJ** (RGB dot clock adjustment) for each source and rear view camera.

- You cannot adjust **Color**, **Hue**, **Contrast** and **Black Level** for the audio source.

1. Press and hold MENU to display Picture Adjustment. The adjustment function names are displayed.

2. If you are adjusting the Picture Adjustment, select the unit.

   - **NAVI** Adjusting the Picture Adjustment for the Navigation unit.
   - **Rear View** Adjusting the Picture Adjustment for the rear view camera.
   - **Source** Adjusting the Picture Adjustment for the source.

3. Touch any of the following touch panel keys to select the function to be adjusted. Picture Adjustment items are displayed.
   - **Brightness** Adjusts the black intensity
   - **Contrast** Adjusts the contrast
   - **Color** Adjusts the color saturation
   - **Hue** Adjusts the tone of color (red or green is emphasized)
   - **Dimmer** Adjusts the brightness of the display
   - **Temperature** Adjusts the color temperature, resulting in a better white balance
   - **Black Level** Emphasizes the dark portions of images making the difference between bright and dark more distinct
   - **RGB Dot ADJ** Adjusts phase shifting by dot clock when a Navigation unit is connected

   - You cannot adjust the picture adjustment for the rear view camera when **Camera Polarity** is set to **Off**. (Refer to Setting the rear view camera (back up camera) on page 65.)
   - If the color system is set to PAL/PAL M/SECAM, you cannot adjust **Hue**.
   - With some rear view cameras, picture adjustment may not be possible.

4. Touch ◀ or ▶ to adjust the selected item.
   Each time you touch ◀ or ▶, the level of the selected item increases or decreases.
   - **Dimmer** can be adjusted from +1 to +48.
   - **Temperature** can be adjusted from +3 to –3.

5. Touch Black Level and RGB Dot ADJ to adjust.
   - **Black Level** can be set on or off.
   - **RGB Dot ADJ** can be set to 1 or 2.

### Notes

- You cannot operate this function while driving.
- Different **Brightness/Contrast/Dimmer** settings can be set for when the illumination switch is on and when it is off.

### Setting rear monitor output

The output source for the rear monitor can be switched to the following:

- **Front** The source on the front screen of this unit
- **Disc** The video and sound from the DVD
- **AV** The video and sound from AV input
- **AUX** The source for AUX input
- **Off** No source

### Note

You cannot play DivX files on the rear and front monitors at the same time.
Adjusting the response positions of the touch panels (Touch Panel Calibration)

If you feel that the touch panel keys on the screen deviate from the actual positions that respond to your touch, adjust the response positions of the touch panel. There are two adjustment methods: 4 point adjustment, in which you touch four corners of the screen; and 16 point adjustment, in which you make fine adjustments on the entire screen.

- Touch the screen gently for adjustment. Forcefully pressing the touch panel may damage the touch panel. Do not use a sharp pointed tool such as a ballpoint pen or mechanical pen. Doing so may damage the screen.
- If the touch panel cannot be adjusted properly, consult your local Pioneer dealer.

1 Turn the unit off. Refer to Basic Operations on page 11.
2 Press and hold MENU to display Picture Adjustment.
3 Press and hold MENU to start Touch Panel Calibration.
The 4 point touch panel adjustment screen appears.
4 Touch each of the arrows on the four corners of the screen.
   - To cancel the adjustment, press and hold MENU.
5 Press MENU to complete 4-point adjustment.
   Data for the adjusted position is saved.
   - Do not turn off the engine while the data is being saved.
6 Press MENU to proceed to 16-point adjustment.
The 16 point touch panel adjustment screen appears.
   - To cancel the adjustment, press and hold MENU.

7 Gently touch the center of the + mark displayed on the screen.
   After you touch all the marks, the data for the adjusted position is saved.
   - Do not turn off the engine while the data is being saved.

8 Press and hold MENU to complete the adjustment.

Using an AUX source

A separately sold auxiliary device such as a VCR or portable device can be connected to this unit. When connected, the auxiliary device is automatically recognized as an AUX source and is assigned to AUX.

About AUX connection methods

There are two methods to connect auxiliary devices to this unit.

Mini pin plug cable (AUX)

When connecting an auxiliary device using a mini plug cable
iPods and portable audio/video players can be connected to this unit via mini plug cable.
- If an iPod with video capabilities is connected to this unit via 3.5mm plug (4 pole) cable (such as the CD V150M), you can enjoy the video contents of the connected iPod.
- A portable audio/video player can be connected by using a 3.5mm plug (4 pole) with an RCA cable (sold separately). However, depending on the cable, a reverse connection between the red (right side audio) cable and yellow (video) cable may be required in order for the sound and video image to be reproduced correctly.
**Other Functions**

- Insert the stereo mini plug into the AUX input jack on this unit. For more details, refer to What’s what on page 10.

**Using an external unit**

An external unit refers to a Pioneer product, such as those which will be available in the future. Although incompatible as a source, the basic functions of up to two external units can be controlled with this unit. When two external units are connected, the external units are automatically allocated to external unit 1 or external unit 2. The basic operations of the external unit are explained below. The allocated functions will differ depending on the connected external unit. For details concerning these functions, refer to the owner’s manual for the external unit.

**Basic operations**

The functions allocated to the following operations will differ depending on the connected external unit. For details concerning these functions, refer to the owner’s manual for the connected external unit.

| Auto | Switching to auto or manual. |
| Manual |
| Audio | Switching to video and audio. |
| Video |
| Wide | Changing the screen mode. Refer to Changing the wide screen mode on page 41. |

Switching the equalizer curves. Refer to Using the equalizer on page 55. Touch and hold for more than two seconds to turn the auto equalizer on or off. Refer to Using the auto equalizer on page 56. Actions will differ depending on the connected external unit.

Function 1 to 4. Actions will differ depending on the connected external unit.

Using the functions allocated to 1 to 6 keys. Actions will differ depending on the connected external unit.
## Troubleshooting

### Common

### Additional Information

#### Symptom Cause Action (Reference page)

**Nothing is displayed.**  
The rear view camera is not connected.  
Connect a rear view camera.  
**Camera Polarity** is at incorrect setting.  
Press and hold **MENU** to return to the source display and then select the correct setting for **Camera Polarity**. (Page 65)

**The touch panel keys cannot be used.**  
**The rear view camera is not connected.**  
**Camera Polarity** is at incorrect setting.  
Connect a rear view camera.  
Press and hold **MENU** to return to the source display and then select the correct setting for **Camera Polarity**. (Page 65)

**No xxxx appears when a display is changed (No Title, for example).**  
There is no text information embedded.  
Switch the display or play another track/file.

**Sub folders cannot be played back.**  
Folder repeat play has been selected.  
Select the repeat range again.

**The repeat range changes automatically.**  
Another folder was selected during repeat play.  
Select the repeat range again.

**Track search or fast forward/rewind was performed during file repeat play.**  
Select the repeat range again.

### DVD

#### Symptom Cause Action (Reference page)

**Playback is not possible.**  
The loaded disc has a different region number from this unit.  
Replace the disc with one featuring the same region number as this unit.

**A parental lock message is displayed and playback is not possible.**  
Parental lock is activated.  
Turn parental lock off or change the level. (Page 59)

**Parental lock cannot be canceled.**  
The code number is incorrect.  
Enter the correct code number. (Page 59)

**You have forgotten your code number.**  
Press **RESET**. (Page 60)

**No subtitles are displayed.**  
The DVD being played does not feature subtitles.  
Subtitles are not displayed if they are not recorded on the disc.

**The repeat range changes automatically.**  
Another folder was selected during repeat play.  
Select the repeat range again.

**Track search or fast forward/rewind was performed during file repeat play.**  
Select the repeat range again.

**Playback is not performed with the audio language and subtitle language settings selected in Video setup menu.**  
The DVD being played does not feature dialog or subtitles in the selected language.  
The language cannot be switched if the selected language is not recorded on the disc.

**The viewing angle cannot be switched.**  
The DVD being played does not feature scenes shot from multiple angles.

**The viewing angle cannot be switched if the DVD does not feature scenes recorded from multiple angles.**  
You are trying to switch to multi-angle viewing for a scene that was not recorded from multiple angles.

**You are trying to switch to multi-angle viewing for a scene that was not recorded from multiple angles.**  
Switch between multiple angles when watching scenes recorded from multiple angles.

Handling guideline

Discs and player

Use only discs featuring any of the following logos.

Use 12 cm disc. Do not use 8 cm disc or an adapter for 8 cm disc.

Use only conventional, fully circular discs. Do not use shaped discs.

Do not insert anything other than a DVD (R/RW) or CD (R/RW) into the disc loading slot.

Do not use cracked, chipped, warped, or otherwise damaged discs as they may damage the player.

Unfinalized CD-R/CD RW disc playback is not possible.

Do not touch the recorded surface of the discs.

Store discs in their cases when not in use.

Avoid leaving discs in excessively hot environments including under direct sunlight.

Do not attach labels, write on or apply chemicals to the surface of the discs.

To clean a disc, wipe the disc with a soft cloth outward from the center.

Condensation may temporarily impair the player’s performance. Leave it to adjust to the warmer temperature for about one hour. Also, wipe any damp discs with a soft cloth.

Playback of discs may not be possible because of disc characteristics, disc format, recorded application, playback environment, storage conditions, and so on.

Road shocks may interrupt disc playback.

Read the precautions for discs before using them.

Certain functions may not be available for some DVD video discs.

It may not be possible to play back some DVD video discs.

It is not possible to play back DVD RAM discs.

This unit is not compatible with discs recorded in AVCHD (Advanced Video Codec High Definition) format. Do not insert AVCHD discs as you may not be able to eject the disc.

External storage device (USB, SD)

Address any questions you have about your external storage device (USB, SD) to the manufacturer of the device.

Do not leave the external storage device (USB, SD) in places with high temperatures.

Depending on the external storage device (USB, SD), the following problems may occur.

- Operations may vary.
- The storage device may not be recognized.
- Files may not be played back properly.

USB storage device

Connections via USB hub are not supported.

Do not connect anything other than a USB storage device.

Firmly secure the USB storage device when driving. Do not let the USB storage device fall onto the floor, where it may become jammed under the brake or accelerator pedal.

Depending on the USB storage device, the device may cause noise to occur on the radio.

Copyright protected files that are stored in the USB devices cannot be played back.

You cannot connect a USB portable audio player/USB memory to this unit via USB hub.

Partitioned USB memory is not compatible with this unit.
Depending on the kind of USB portable audio player/USB memory you use, the device may not be recognized or audio files may not be played back properly.

Do not leave the USB portable audio player/USB memory in direct sunlight for extended amounts of time. Doing so may cause the device to malfunction from the extreme rise in temperature.

SD memory card

This unit supports only the following types of SD memory cards.
- SD

Keep the SD memory card out of the reach of children. Should the SD memory card be swallowed, consult a doctor immediately.

Do not touch the connectors of the SD memory card directly with your fingers or with any metal device.

Do not insert anything other than an SD memory card into the SD card slot. If a metal object (such as a coin) is inserted into the slot, the internal circuits may break and cause malfunctions.

Do not insert a damaged SD memory card (e.g. warped, label peeled off) as it may not be ejected from the slot.

Do not try to force an SD memory card into the SD card slot as the card or this unit may be damaged.

When ejecting an SD memory card, press it and hold it until it clicks. It is dangerous to release your finger immediately after pressing the card as it may shoot out of the slot and hit you in the face, etc. If the card shoots out of the slot, it may be lost.

iPod

Do not leave the iPod in direct sunlight for extended amounts of time. Doing so may cause the iPod to malfunction from the extreme rise in temperature.

Do not leave the iPod in places with high temperatures.

To ensure proper operation, connect the dock connector cable from the iPod directly to this unit.

Firmly secure the iPod when driving. Do not let the iPod fall onto the floor, where it may become jammed under the brake or accelerator pedal.

For details, refer to the manuals for the iPod.

About iPod settings
- When an iPod is connected, this unit changes the EQ (equalizer) setting of the iPod to off in order to optimize the acoustics. When you disconnect the iPod, the EQ returns to the original setting.
- You cannot set Repeat to off on the iPod when using this unit. Repeat is automatically changed to All when the iPod is connected to this unit.

DVD-R/DVD-RW discs

Unfinalized DVD R/ RW discs which have been recorded in the Video format (video mode) cannot be played back.

Playback of DVD R/DVD RW discs may not be possible, due to disc characteristics, scratches or dirt on the disc, or dirt, condensation, etc. on the lens of this unit.

Depending on the application settings and the environment, playback of discs recorded on a personal computer may not be possible. (For details, contact the manufacturer of the application.)

CD-R/CD-RW discs

When CD R/CD RW discs are used, playback is possible only for discs which have been finalized.

Playback of CD R/CD RW discs recorded on a music CD recorder or a personal computer may not be possible due to disc characteristics, scratches or dirt on the disc, or dirt, condensation, etc., on the lens of this unit.

Depending on the application settings and the environment, playback of discs recorded on a personal computer may not be possible. (For details, contact the manufacturer of the application.)

Playback of CD R/CD RW discs may become impossible in case of direct exposure to sunlight, high temperatures, or the storage conditions in the vehicle.

Titles and other text information recorded on a CD R/CD RW disc may not be displayed by this unit (in the case of audio data (CD DA)).

DualDiscs

DualDiscs are two sided discs that have a recordable CD for audio on one side and a recordable DVD for video on the other.

Playback of the DVD side is possible with this unit. However, since the CD side of DualDiscs is not physically compatible with the general CD standard, it may not be possible to play the CD side with this unit.
Frequent loading and ejecting of a DualDisc may result in scratches on the disc. Serious scratches can lead to playback problems on this unit. In some cases, a DualDisc may become stuck in the disc loading slot and will not eject. To prevent this, we recommend you refrain from using DualDisc with this unit. Please refer to the information from the disc manufacturer for more detailed information about Dual Discs.

**JPEG picture files**

JPEG is short for Joint Photographic Experts Group and refers to a still image compression technology standard.

Files are compatible with Baseline JPEG and EXIF 2.1 still images up to a resolution of 8 192 × 7 680. (EXIF format is used most commonly with digital still cameras.)

Playback of EXIF format files that were processed by a personal computer may not be possible.

There is no progressive JPEG compatibility.

**DivX video files**

Depending on the composition of the file information, such as the number of audio streams or file size, there may be a slight delay when playing back discs.

Some special operations may be prohibited due to the composition of the DivX files.

Only DivX files downloaded from a DivX partner site are guarantee for proper operation. Unauthorized DivX files may not operate properly.

DRM rental files cannot be operated until playback is started.

Recommended file size: 2 Mbps or less with a transmission rate of 2 GB or less.

The ID code of this unit must be registered to a DivX VOD provider in order to playback DivX VOD files. For information on ID codes, refer to Displaying the DivX® VOD registration code on page 61.

For more details about DivX, visit the following site: http://www.divx.com/

**Important**

- When naming a JPEG image file, add the corresponding filename extension (.jpg, .jpeg, .jpe or .jfif).

- This unit plays back files with these filename extensions (.jpg, .jpeg, .jpe or .jfif) as a JPEG image file. To prevent malfunctions, do not use these extensions for files other than JPEG image files.

**Compressed audio compatibility (disc, USB, SD)**

**WMA**

File extension: .wma

Bit rate: 5 kbps to 320 kbps (CBR), VBR

Sampling frequency: 8 kHz to 48 kHz

Windows Media Audio Professional, Lossless, Voice/DRM Stream/Stream with video: No

**MP3**

File extension: .mp3

Bit rate: 8 kbps to 320 kbps

Sampling frequency: 8 kHz to 48 kHz (32 kHz, 44.1 kHz, 48 kHz for emphasis)

Compatible ID3 tag version: 1.0, 1.1, 2.2, 2.3 (ID3 tag Version 2.x is given priority over Version 1.x.)

M3u playlist: No

MP3i (MP3 interactive), mp3 PRO: No

**AAC**

Compatible format: AAC encoded by iTunes

File extension: .m4a

Sampling frequency: 8 kHz to 44.1 kHz

Bit rate: 8 kbps to 320 kbps

Apple Lossless: No

AAC file bought on the iTunes Store (.m4p file extension): No
**DivX compatibility**

Compatible format: DivX video format implemented in relation to DivX standards

File extensions: .avi or .divx

DivX Ultra format: No

DivX HD format: No

DivX files without video data: No

DivX plus: No

Compatible audio codec: MP2, MP3, Dolby Digital LPCM: No

Bit rate: 8 kbps to 320 kbps (CBR), VBR

Sampling frequency: 8 kHz to 48 kHz

Compatible external subtitle file extension: .srt

**Supplemental information**

Some characters in a file name (including the file extension) or a folder name may not be displayed.

This unit may not operate correctly depending on the application used to encode WMA files.

There may be a slight delay when starting playback of audio files embedded with image data.

**Disc**

Playable folders: up to 700

Playable files: up to 999 for CD R/CD RW

Playable files: up to 3 500 for DVD R/DVD RW

File system: ISO 9660 Level 1 and 2, Romeo, Joliet, UDF 1.02 (DVD R/DVD RW)

Multi session playback: Yes

Packet write data transfer: No

Regardless of the length of blank section between the songs of the original recording, compressed audio discs play with a short pause between songs.

**External storage device (USB, SD)**

Playable folders: up to 6 000

Playable files: up to 65 535, up to 255 for one folder

Playback of copyright protected files: No

Partitioned external storage device (USB, SD): Only the first playable partition can be played.

There may be a slight delay when starting playback of audio files on an external storage device (USB, SD) with numerous folder hierarchies.

Compatibility with all SD memory cards is not guaranteed.

This unit is not compatible with SD Audio/SD Video.

**CAUTION**

Pioneer accepts no responsibility for data lost on the USB memory/USB portable audio player/SD memory card even if that data is lost while using this unit.

**iPod compatibility**

This unit supports only the following iPod models. Supported iPod software versions are shown below. Older versions may not be supported.

- iPod nano 5th generation (software version 1.0.2)
- iPod nano 4th generation (software version 1.0.3)
- iPod nano 3rd generation (software version 1.1.3)
- iPod nano 2nd generation (software version 1.1.3)
- iPod nano 1st generation (software version 1.3.1)
- iPod touch 2nd generation (software version 3.0)
- iPod touch 1st generation (software version 3.0)
- iPod classic 120GB (software version 2.0.1)
- iPod classic (software version 1.1.2)
- iPod 5th generation (software version 1.3.0)
- iPhone 3GS (software version 3.0)
- iPhone 3G (software version 3.0)
- iPhone (software version 3.0)

Depending on the generation or version of the iPod, some functions can not be operated.

Operations may vary depending on the software version of iPod.

When using an iPod, iPod Dock Connector to USB Cable is required.

Pioneer CD IU50 interface cable is also available. For details, consult your dealer.

About the file/format compatibility, refer to iPod manuals.

Audio Book, Podcast: Yes
CAUTION

Pioneer accepts no responsibility for data lost on the iPod even if that data is lost while using this unit.

Sequence of audio files

The user cannot assign folder numbers and specify playback sequences with this unit.

Example of a hierarchy

<table>
<thead>
<tr>
<th>Level 1</th>
<th>Level 2</th>
<th>Level 3</th>
<th>Level 4</th>
</tr>
</thead>
<tbody>
<tr>
<td>01</td>
<td>02</td>
<td>03</td>
<td></td>
</tr>
<tr>
<td>04</td>
<td>05</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

- Folder
- Compressed audio file
- 01 to 05: Folder number
- 1 to 6: Playback sequence

Disc

Folder selection sequence or other operation may differ depending on the encoding or writing software.

External storage device (USB, SD)

Playback sequence is the same as recorded sequence in the external storage device (USB, SD).

To specify the playback sequence, the following method is recommended.

1. Create the file name including numbers that specify the playback sequence (e.g., 001xxx.mp3 and 099yyy.mp3).
2. Put those files into a folder.
3. Save the folder containing files on the external storage device (USB, SD).

However, depending on the system environment, you may not be able to specify the playback sequence.

For USB portable audio players, the sequence is different and depends on the player.

Using the display correctly

CAUTION

- If liquid or foreign matter should get inside this unit, turn off the power immediately and consult your dealer or the nearest authorized PIONEER Service Station. Do not use the unit in this condition because doing so may result in fire, electric shock, or other failure.
- If you notice smoke, a strange noise or smell, or any other abnormal signs from the display, turn off the power immediately and consult your dealer or the nearest authorized PIONEER Service Station. Using this unit in this condition may result in permanent damage to the system.
- Do not disassemble or modify this unit, as there are high voltage components inside which may cause electric shock. Be sure to consult your dealer or the nearest authorized PIONEER Service Station for internal inspection, adjustments, or repairs.

Handling the display

- Never touch the screen with anything besides your finger when operating the touch panel function. The screen can scratch easily.
- When the display is subjected to direct sunlight for a long period of time, it will become very hot resulting in possible damage to the LCD screen. You should avoid exposing the display unit to direct sunlight as much as possible.
- The display should be used within the temperature range of 10°C to +60°C (14 °F to 140 °F).
  At temperatures higher or lower than this operating temperature range, the display may not operate normally.
- The LCD screen is exposed in order to increase its visibility within the vehicle. Do not press it strongly on it as this may damage it.
- Do not push the LCD screen forcefully as this may scratch it.
Liquid crystal display (LCD) screen

- Heat from the heater may damage the LCD screen, and cool air from the cooler may cause moisture to form inside the display, resulting in possible damage.
- Small black dots or white dots (bright dots) may appear on the LCD screen. These are due to the characteristics of the LCD screen and do not indicate a malfunction.
- When using a cellular phone, keep the antenna away from the display to prevent disruption of the video image by the appearance of spots, colored stripes, etc.

LED (light-emitting diode) backlight

- At low temperatures, using the LED backlight may increase image lag and degrade the image quality due to the characteristics of the LCD screen. Image quality will improve with an increase in temperature.
- To protect the LED backlight, the display will darken in the following environments:
  - In the direct sunlight
  - Near the heater vent
- The product lifetime of the LED backlight is more than 10,000 hours. However, it may decrease if used in high temperatures.
- If the LED backlight reaches the end of its product lifetime, the screen will become dark and the image will no longer be projected. In such cases, please consult your dealer or the nearest authorized PIONEER Service Station.

Keeping the display in good condition

- When removing dust from the screen or cleaning the display, first turn the system power off, then wipe with a soft dry cloth.
- When wiping the screen, take care not to scratch the surface. Do not use harsh or abrasive chemical cleaners.

Copyright and trademark

This product incorporates copyright protection technology that is protected by method claims of certain U.S. patents and other intellectual property rights owned by Macrovision Corporation and other rights owners. Use of this copyright protection technology must be authorized by Macrovision Corporation, and is intended for home and other limited viewing uses only unless otherwise authorized by Macrovision Corporation. Reverse engineering or disassembly is prohibited.

Bluetooth

The Bluetooth® word mark and logos are registered trademarks owned by Bluetooth SIG, Inc. and any use of such marks by Pioneer Corporation is under license. Other trade marks and trade names are those of their respective owners.

- Bluetooth is a short range wireless radio connectivity technology that is developed as a cable replacement for mobile phones, handheld PCs and other devices. Bluetooth operates in 2.4 GHz frequency range and transmits voice and data at speeds up to 1 megabit per second. Bluetooth was launched by a special interest group (SIG) that comprises of Ericsson Inc., Intel Corp., Nokia Corp., Toshiba and IBM in 1998, and it is currently developed by nearly 2,000 companies worldwide.
**DVD video**

DVD is a trademark of DVD Format/Logo Licensing Corporation.

**iTunes**

Apple and iTunes are trademarks of Apple Inc., registered in the U.S. and other countries.

**MP3**

Supply of this product only conveys a license for private, non-commercial use and does not convey a license nor imply any right to use this product in any commercial (i.e. revenue generating) real time broadcasting (terrestrial, satellite, cable and/or any other media), broadcasting/streaming via internet, intranets and/or other networks or in other electronic content distribution systems, such as pay audio or audio on demand applications. An independent license for such use is required. For details, please visit http://www.mp3licensing.com.

**WMA**

Windows Media and the Windows logo are trademarks or registered trademarks of Microsoft Corporation in the United States and/or other countries. This product includes technology owned by Microsoft Corporation and cannot be used or distributed without a license from Microsoft Licensing, Inc.

**SD memory card**

SD Logo is a trademark.

**iPod**

iPod is a trademark of Apple Inc., registered in the U.S. and other countries. “Made for iPod” means that an electronic accessory has been designed to connect specifically to iPod and has been certified by the developer to meet Apple performance standards. Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

**iPhone**

iPhone is a trademark of Apple Inc. “Works with iPhone” means that an electronic accessory has been designed to connect specifically to iPhone and has been certified by the developer to meet Apple performance standards.
Apple is not responsible for the operation of this device or its compliance with safety and regulatory standards.

**Dolby Digital**

Manufactured under license from Dolby Laboratories. Dolby, Pro Logic, and the double D symbol are trademarks of Dolby Laboratories.

**DivX**

DivX® is a registered trademark of DivX, Inc., and is used under license.

**ABOUT DIVX VIDEO:** DivX® is a digital video format created by DivX, Inc. This is an official DivX Certified device that plays DivX video. Visit www.divx.com for more information and software tools to convert your files into DivX video.

**ABOUT DIVX VIDEO-ON-DEMAND:** This DivX Certified® device must be registered in order to play DivX Video on Demand (VOD) content. To generate the registration code, locate the DivX VOD section in Menu operations. Go to vod.divx.com with this code to complete the registration process and learn more about DivX VOD.

**About the SAT RADIO READY mark**

The SAT RADIO READY mark indicates that the Satellite Radio Tuner for Pioneer (i.e., XM tuner and Sirius satellite tuner which are sold separately) can be controlled by this unit. Please inquire to your dealer or nearest authorized Pioneer service station regarding the satellite radio tuner that can be connected to this unit. For satellite radio tuner operation, please refer to the satellite radio tuner owner’s manual.

- The system will use direct satellite to receiver broadcasting technology to provide listeners in their cars and at home with crystal clear sound seamlessly from coast to coast. Satellite radio will create and package over 100 channels of digital quality music, news, sports, talk and children’s programming.

**HD Radio™ Technology**

- HD Radio™ and the HD Radio Ready logo are proprietary trademarks of iBiquity Digital Corporation.

### Specifications

#### General
- **Power source**: 14.4 V DC (10.8 V to 15.1 V allowable)
- **Grounding system**: Negative type
- **Maximum current consumption**: 10.0 A
- **Dimensions (W × H × D):**
  - DIN Chassis: 180 mm × 50 mm × 160 mm (7 1/8 in. × 2 in. × 6 1/4 in.)
  - Nose: 188 mm × 58 mm × 32 mm (7 3/8 in. × 2 1/4 in. × 1 1/4 in.)
  - D Chassis: 178 mm × 50 mm × 165 mm (7 in. × 2 in. × 6 1/2 in.)
  - Nose: 170 mm × 46 mm × 27 mm (6 3/4 in. × 1 3/4 in. × 1 in.)
- **Weight**: 2.2 kg (4.9 lbs)

#### Display
- **Screen size/aspect ratio**: 7.0 inch wide/16:9 (effective display area: 154 × 86.9 mm)
- **Pixels**: 345 600 (1 440 × 240)
- **Display method**: TFT active matrix, driving type
- **Color system**: NTSC
- **Durable temperature range (power off)**: 20 °C to +80 °C
- **Angle adjustment**: 50° to 110° (initial settings: 90°)

#### Audio
- **Maximum power output**: 50 W × 4
  - 70 W × 1/2 Ω (for subwoofer)
- **Continuous power output**: 22 W × 4 (60 Hz to 15 000 Hz, 5 % THD, 4 Ω load, both channels driven)
- **Load impedance**: 4 Ω (4 Ω to 8 Ω (2 Ω for 1 ch) allowable)
- **Preout maximum output level**: 4.0 V
- **Equalizer (8 Band Graphic Equalizer):**
  - **Frequency**: 40/80/200/400/1k/2.5k/8k/10k Hz
  - **Gain**: ±12 dB
- **HPF**:
  - **Frequency**: 50/63/80/100/125 Hz
  - **Slope**: 12 dB/oct
  - **Gain**: +12 dB to 0 dB
  - **Frequency response**: 5 Hz to 44 000 Hz (with DVD at sampling frequency 96 kHz)
  - **Signal to noise ratio**: 96 dB (1 kHz) (IHF A network) (RCA level)
- **Output level**:
  - **Video**: 1.0 Vp p/75 Ω (±0.2 V)
- **Number of channels**: 2 (stereo)
- **MP3 decoding format**: MPEG 1 & 2 Audio Layer 3
- **WMA decoding format**: Ver. 7, 7.1, 8, 9, 10, 11 (2ch audio) (Windows Media Player)
- **AAC decoding format**: MPEG 4 AAC (iTunes encoded only) (.m4a) (Ver. 8.2 and earlier)
- **DivX decoding format**: Home Theater Ver. 3, 4, 5.2, 6 (.avi, .divx)

#### DVD Player
- **System**: DVD video, Video CD, CD, WMA, MP3, AAC, DivX, JPEG system
- **Usable discs**: DVD video, Video CD, CD RW/RD, DVD R/RW/RDL
- **Region number**: 1
- **Frequency response**: 5 Hz to 44 000 Hz (with DVD at sampling frequency 96 kHz)
- **Signal to noise ratio**: 96 dB (1 kHz) (IHF A network) (RCA level)
- **Output level**:
  - **Video**: 1.0 Vp p/75 Ω (±0.2 V)
- **Number of channels**: 2 (stereo)
- **MP3 decoding format**: MPEG 1 & 2 Audio Layer 3
- **WMA decoding format**: Ver. 7, 7.1, 8, 9, 10, 11 (2ch audio) (Windows Media Player)
- **AAC decoding format**: MPEG 4 AAC (iTunes encoded only) (.m4a) (Ver. 8.2 and earlier)
- **DivX decoding format**: Home Theater Ver. 3, 4, 5.2, 6 (.avi, .divx)

#### USB
- **USB standard specification**: USB 1.1, USB 2.0 full speed
- **Maximum current supply**: 500 mA
- **USB Class**: MSC (Mass Storage Class)
- **File system**: FAT16, FAT32
- **MP3 decoding format**: MPEG 1 & 2 Audio Layer 3
- **WMA decoding format**: Ver. 7, 7.1, 8, 9, 10, 11 (2ch audio) (Windows Media Player)
- **AAC decoding format**: MPEG 4 AAC (iTunes encoded only) (.m4a) (Ver. 8.2 and earlier)
- **DivX decoding format**: Home Theater Ver. 3, 4, 5.2, 6 (.avi, .divx)

#### SD
- **Compatible physical format**: Version 1.1
Appendix

Additional Information

Maximum memory capacity .................................................... 2 GB
File system ................................................................. FAT12, FAT16, FAT32
MP3 decoding format ............... MPEG 1 & 2 Audio Layer 3
WMA decoding format ............. Ver. 7, 7.1, 8, 9, 10, 11 (2ch audio)
                               (Windows Media Player)
AAC decoding format ............. MPEG 4 AAC (iTunes encoded only)
                               (Ver. 8.2 and earlier)
DivX decoding format ............ Home Theater Ver. 3, 4, 5, 2, 6 (.avi, .divx)

FM tuner
Frequency range ......................... 87.9 MHz to 107.9 MHz
Usable sensitivity ...................... 9 dBf (0.8 \(\mu\)V/75 Ohm, mono, S/N: 30 dB)
Signal to noise ratio ............... 72 dB (IHF A network)

AM tuner
Frequency range ......................... 530 kHz to 1,710 kHz (10 kHz)
Usable sensitivity ...................... 25 \(\mu\)V (S/N: 20 dB)
Signal to noise ratio ............... 62 dB (IHF A network)

Bluetooth
(AVH-P5200BT)
Version .................................................. Bluetooth 2.0 certified
Output power ................................. +4 dBM Max.
                               (Power class 2)

CEA2006 Specifications

![CEA-2006 Compliant](image)

Power output ......................... 14 W RMS × 4 Channels (4 Ohm and \(\leq 1\%\) THD+N)
S/N ratio ................................. 91 dBA (reference: 1 W into 4 Ohm)
