Dear Customer:

Selecting fine audio equipment such as the unit you’ve just purchased is only the start of your musical enjoyment. Now it’s time to consider how you can maximize the fun and excitement your equipment offers. This manufacturer and the Electronic Industries Association’s Consumer Electronics Group want you to get the most out of your equipment by playing it at a safe level. One that lets the sound come through loud and clear without annoying blaring or distortion—and, most importantly, without affecting your sensitive hearing.

Sound can be deceiving. Over time your hearing “comfort level” adapts to higher volumes of sound. So what sounds “normal” can actually be loud and harmful to your hearing. Guard against this by setting your equipment at a safe level BEFORE your hearing adapts.

To establish a safe level:

- Start your volume control at a low setting.
- Slowly increase the sound until you can hear it comfortably and clearly, and without distortion.

Once you have established a comfortable sound level:

- Set the dial and leave it there.

Taking a minute to do this now will help to prevent hearing damage or loss in the future. After all, we want you listening for a lifetime.

We Want You Listening For A Lifetime

Used wisely, your new sound equipment will provide a lifetime of fun and enjoyment. Since hearing damage from loud noise is often undetectable until it is too late, this manufacturer and the Electronic Industries Association’s Consumer Electronics Group recommend you avoid prolonged exposure to excessive noise. This list of sound levels is included for your protection.

THE FOLLOWING NOISES CAN BE DANGEROUS UNDER CONSTANT EXPOSURE

- 90 Subway, motorcycle, truck traffic, lawn mower
- 100 Garbage truck, chain saw, pneumatic drill
- 120 Rock band concert in front of speakers, thunderclap
- 140 Gunshot blast, jet plane
- 180 Rocket launching pad

Information courtesy of the Deafness Research Foundation.
Precautions

CAUTION:
USE OF CONTROL OR ADJUSTMENT OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

CAUTION:
THE USE OF OPTICAL INSTRUMENTS WITH THIS PRODUCT WILL INCREASE EYE HAZARD.

NOTES:
THIS DEVICE COMPLIES WITH PART 15 OF THE FCC RULES. OPERATION IS SUBJECT TO THE FOLLOWING CONDITIONS: (1) THIS DEVICE MAY NOT CAUSE HARMFUL INTERFERENCE, AND (2) THIS DEVICE MUST ACCEPT ANY INTERFERENCE RECEIVED, INCLUDING INTERFERENCE THAT MAY CAUSE UNDESIRABLE OPERATION.

CHANGES OR MODIFICATIONS TO THIS PRODUCT BY OTHER THAN AN AUTHORIZED SERVICE FACILITY COULD VOID AUTHORIZATION TO USE THIS EQUIPMENT.

SHOULD THE USE OF THIS PRODUCT CAUSE HARMFUL INTERFERENCE WITH ANY RADIO DEVICES, CONTACT YOUR DEALER.

THE USE OF THIS PRODUCT MAY CAUSE A NOTICEABLE LOSS IN AM SIGNAL RECEPTION. THIS IS NOT A MALFUNCTION BUT IS PART OF THE NORMAL OPERATION OF THIS MODEL.

• When you use this universal multi-CD system, the effective sensitivity of your radio will be reduced slightly.
• When you turn the car radio off, the system stays on. If you leave it on for a long time, the car battery may go flat.
• You can connect this unit to a Multi-CD controller (e.g. a head unit) with an IP-BUS cable (sold separately). If you do this, refer to the manual provided with the Multi-CD controller before using it to operate this unit.
• With this player, you can use the ITS functions to store up to 99 tracks per disc. Even if the Head unit’s manual indicates ITS memory is up to 24 tracks per disc, this player can store up to 99 tracks per disc.
• When driving on an uneven road, the player may not reproduce every sound properly.
• When this universal multi-CD system is connected to a vehicle’s diversity antenna, there may be distortion if a station is broadcasting a strong signal on the frequency you’re using for the system. If this occurs, switch to another frequency.
• During winter the inside of the vehicle may be very cold. If the heater is turned on and the player is used soon after, the disc or optical parts (prism, lens, etc.) may become misted up, and the player will not operate correctly. If the disc is misted up, wipe it with a soft cloth. If the optical parts are misted up, wait for about an hour for them to warm up. They will return to their normal condition.
• This product conforms to the track skip function of the CD-R disc. The tracks containing the track skip information are skipped over automatically.

After-sales service for Pioneer products
Please contact the dealer or distributor from where you purchased the product for its after-sales service (including warranty conditions) or any other information. In case the necessary information is not available, please contact the companies listed below:

Please do not ship your product to the companies at the addresses listed below for repair without advance contact.

U.S.A.

For warranty information please see the Limited Warranty sheet included with your product.

Important
The serial number of this device is located on the rear of the unit. For your own security and convenience, be sure to record this number on the enclosed warranty card.
Precautions

• Keep the remote controller unit in an area not exposed to long periods of direct sunlight.
• The remote controller unit may not operate properly if the transmitter of the remote controller unit is pointed towards the floor or the seat of the vehicle.
• Since the transmitter employs an infrared system, it may not operate properly while car stereo unit is exposed to direct sunlight. In such a case, block the sunlight from the sensor and then perform the desired operation.
• If the remote controller fails to operate unless it is brought close to the unit, it may indicate that battery power is low. Replace the batteries in the remote controller.

Loading Battery

WARNING:
• Keep the Lithium Battery out of reach of children. Should the Battery be swallowed, immediately consult a doctor.

CAUTION:
• Do not recharge, disassemble, heat or dispose of battery in fire.
• Use a CR2025 (3 V) Lithium Battery only. Never use other types of battery with this unit.
• Do not handle the battery with metallic tools.
• Do not store the Lithium Battery with metallic materials.
• When disposing of used batteries, please comply with governmental regulations or environmental public institution’s rules that apply in your country/area.
• Always check carefully that you are loading battery with its (+) and (−) poles facing in the proper directions.
**Inserting discs**

1. Hold down the magazine lock button and pull the tray out.
2. Slide out the disc tray.
3. Position the disc with the label upward.

---

**Changing disc trays**

1. Gently pull the disc tray out.
2. Align the disc tray with the left and right grooves, and push it in until you hear it click.
Notes on 8-cm (3-inch) CDs

Do not use an 8-cm CD adapter. If it is used, the player may fail. To load an 8-cm CD, you need a special 8-cm CD tray (Part No. CXB5931). Ask your Pioneer service station about it.

Precautions when handling magazines

- Do not put the magazine in a place where it will be exposed to high temperatures or direct sunlight.
- Do not disassemble the magazine.
- Take care not to drop the magazine or knock it against anything.
- Do not use cracked or warped trays.
- Never insert anything other than discs. Do not attach a label or tape to a disc.
- The use of benzine, thinner, insecticide, or other volatile chemicals may damage the magazine surface.

Extra magazines

If you need more magazines, please ask your nearest dealer for magazine JD-612V.

Attaching the label

Attach the supplied label in the specified position. Attaching the label in an incorrect place or attaching more than one label will cause malfunction.
Using the Compact Discs Magazine

Loading the magazine

1. Slide and open the door.
2. Open it fully until it locks with a click.

To remove the magazine

• Do not put your fingers in the magazine tray as this may lead to incorrect operation and damage to the player.
• If the label on the magazine is coming off or wrinkled up, it may damage the eject mechanism, and in some cases, the magazine may not be ejected. Therefore, remove a damaged label completely before use.
• Never leave the door open while playing discs. The entry of dirt, dust, or any other foreign matter into the player may cause it to fail.

Insert the magazine.
Insert the magazine with the arrow upward.
Press the eject button.
1. Switch the radio on and tune to Modulating Frequencies.
   - The initial value is 89.1 MHz.
     (See Page 20 regarding switching CD player transmission frequency.)
   - If your radio does not have muting, there may be some noise before power switch of control unit is ON. If this happens, turn down the volume of the radio.

2. Press button to switch on and start the player.

Disc Number Search

+: increase the number.

-: decrease the number.
Using Track Search/Fast Forward and Reverse

This product lets you select the track search function or fast forward/reverse function by changing the length of the time you press the button.

- Track search: 0.5 seconds or less
- Fast forward/Reverse: Continue pressing

Track Number
Elapsed play time

: decrease the number.
: Fast Reverse

: increase the number.
: Fast Forward
Pausing

Press button to pause during disc playback. Press button again to release pause.

MEMO

You can select a track using the track search during pause. ("PAUSE" is off while a track is being searched.) When the track search ends, the found track is paused at its beginning.

Repeat

Track Repeat

Play the current track repeatedly.

Disc Repeat

Play the same disc repeatedly.

MEMO

- Changing to a different song or using fast forward or reverse during track repeat will cause the mode to change to disc repeat.
- Changing discs during track repeat or disc repeat will cause the mode to change to normal play.

Each press of button, the mode changes.
Playing Compact Discs

Random Play

1. Select the desired repeat mode.

Example: Disc Repeat (See Page 11.)

2. Hold down button for more than 2 seconds.
   Once the current track has been played, the microprocessor will randomly select the next and subsequent tracks.
   To cancel random play, hold down button for more than 2 seconds again.

Displayed during random play.

MEMO

If track repeat is selected as the repeat mode in step 1, it will automatically switch to disc repeat mode and random play will begin.
ITS (Instant Track Selection)  [Page 13~15]

This function lets you program and play the tracks you want. You can listen to just your favorite tracks.

**Programming**

1. Play the track you want to program.

2. Press button to program the track.

It will be displayed for about 2 seconds to indicate memory storage.

**MEMO**

- The ADPS function* of the multi-play CD player lets you program up to 100 discs.
  
  * ADPS: Automatic Disc Program Selection.
  
  - When the number of discs exceeds 100, the oldest disc that has been played in the past is overwritten by the newest.

- Up to 99 tracks can be programmed for a single disc.
- Tracks are programmed for each disc. Programmed tracks are not erased after the disc is changed.
1. Select the desired repeat mode.

2. Hold down button for more than 2 seconds.

To cancel ITS play, hold down button for more than 2 seconds again.

**MEMO**

- If track repeat is selected as the repeat mode in step 1, it will automatically switch to disc repeat mode and ITS play will begin.
- When you play a disc that has no tracks programmed, “EMPTY” will appear on the display for about 2 seconds, indicating that ITS play is not possible.
- During ITS play, both disc and track number search is performed only on programmed tracks.
Erasing the ITS Play

To erase a single track program:
During ITS play, select the track you wish to erase by using track search. Hold down button for more than 2 seconds to erase the program. (When there are no more memorized tracks, “EMPTY” is displayed, and ITS play is canceled.)

To erase the disc program:
During normal play, select the disc you wish to erase by using disc number search. Hold down button for more than 2 seconds to erase the program.

It will be displayed for about 2 seconds to indicate deletion of memory contents in play.
You can enter a title for the disc in the CD player. The title stored for the disc can be displayed.

**Entering Title**

1. Select the disc for which you want to enter a title.

2. Hold down button for more than 2 seconds to select title input mode.

**MEMO**

- You cannot switch to the Title Input mode while playing a CD TEXT disc.
- The ADPS function* of the CD player lets you enter titles for up to 100 discs. (Up to 100 discs, including ITS, can be programmed.)
- A disc title can consist of up to 10 characters for a single disc.
- When the number of discs exceeds 100, the oldest disc that has been played in the past is overwritten by the newest.
- One title is stored for each disc. The title stored for a disc is not erased after the disc is changed.

*ADPS: Automatic Disc Program Selection.
3. Press the or side of button to select the input position. The input position moves continuously when you hold down either side of the button.

4. Select characters using the or side of button. When you hold down either side of the button, the character changes continuously.

5. Select the input position farthest to the right and press the button to memorize. The title will appear on the display.

**MEMO**

To interrupt title input, press the button for 2 seconds or more.
Each press of the button switches between display of track number (elapsed play time) and disc title indications.

Display Switching

- Normal Operation
- Disc Title
- Disc Artist Name
- Track Title
- Track Artist Name

When playing a CD TEXT disc, indications switch as shown on the left.

MEMO

- When you perform any operation while the disc title is being displayed, the normal operation display will appear for 8 seconds.

CD TEXT Title Scroll

Press the button for more than 2 seconds to scroll CD TEXT titles.

- If TEXT data is not recorded on a CD TEXT disc, “NO ~” (e.g. NO TITLE) is displayed.
Disc Title List

You can list all discs loaded in the magazine being played. This function is convenient for checking discs in the magazine being played.

Each press of button displays the titles of the discs in the magazine being played in ascending order of disc number.

MEMO

• The disc title is displayed for about 8 seconds, then the normal operation display returns.
• Nothing is displayed for discs having no titles.
• Trays with no discs are skipped.

Select the disc to be played from the disc list display

1. Press button to display the disc title list.

2. When the title of the disc you want to listen to is displayed, press button for more than 2 seconds.
That disc is played.
1. Hold down button for more than 2 seconds. The modulator setting mode will be entered, and the frequency will be displayed.

MEMO
If you do nothing within the next 8 seconds, the modulator setting mode returns to the normal mode without changing the most recent settings.

Modulating frequencies selector
This system can change the frequency at which the FM car radio receives the CD audio signals within the range of 87.9 to 90.1 MHz in 0.2-MHz increments. (The initial setting is 89.1 MHz.) If there is a strong broadcast station signal near the current frequency, radio interference may occur. If it occurs, change the frequency.

Source level adjuster
When you play discs, if the volume is low compared with that for FM increase the volume level. If the volume is high and there is distortion, decrease the volume level. (The initial setting is “LEVEL-4”.)

Pre-emphasis selector
Normally, set the pre-emphasis selector to “PRE-EMP 1”. (The initial setting is “PRE-EMP 1”.)
Play a disc. If you feel the treble is insufficient, switch the selector to “PRE-EMP 2” to boost the treble slightly.
• When the selector is set to “PRE-EMP 2”, the sound may distort with some car radios. In this case, switch it back to “PRE-EMP 1”.

or

or

89.1 MHz
2. Set the items while referring to the chart on the left.

<table>
<thead>
<tr>

Pressing the Clear Button

After connecting everything up, press the clear button with the tip of a pencil. If the power will not switch on, or if the CD player does not operate, when the button on the control unit is pressed, or if the control unit display is incorrect, press this button with the tip of a pencil to restore normal operation. (This button is located inside the door.)

Discs

- With this unit, use discs and magazines bearing the above marks.

- This product is designed for use with conventional, fully circular CDs only. Use of shaped CDs are not recommended for this product.
- Check all CDs before playing, and discard cracked, scratched or warped discs.
- Normal playback of CD-R discs other than those recorded with a music CD recorder may not be possible.
- Playback of music CD-R discs, even those recorded with a music CD recorder, may not be possible with this product due to disc characteristics or scratches or dirt on the disc. Dirt or condensation on the lens inside this product may also prevent playback.
- Titles and other text information recorded on a CD-R disc may not be displayed by this product.

- Read the precautions with the CD-R discs before using.
- Avoid touching the recorded (iridescent) surface when handling discs.
- Do not affix labels or apply chemicals to discs.

- Wipe dirty or damp discs outward from the center with a soft cloth.
- Keep discs out of direct sunlight and high temperatures.
A transport screw has been attached to the set in order to protect it during transportation. After removing the transport screw, cover the hole with the supplied seal.

Be sure to remove the transport screw before mounting the set. The removed transport screw should be retained in the accessory bag for use the next time the set is transported.

Note:
Specifications and the design are subject to possible modification without prior notice due to improvements.
Connecting the Units/Connexion des appareils

Before mounting, connect the units temporarily. Check that the units and the system are working correctly.

After connection is complete, press the clear button on the CD player with the tip of a pen-
drill. If the ground lead is not properly connected, noise may occur or the system may not operate correctly.

This unit is for vehicles with a 12 V battery and negative grounding. Before installing it in a recreational vehicle, truck, or bus, check the battery voltage.

To avoid shorts in the electrical system, be sure to disconnect the battery (-) cable before beginning installation.

Check whether installation and wiring have been completed correctly. Replace the removed car components, then connect the end of the cable to the negative (-) terminal of the battery.

Secure the wiring with cable clamps or adhesive tape. To protect the wiring, wrap adhesive tape around them where they lie against metal parts.

Route and secure all wiring so it cannot touch any moving parts, such as the gear shift, handbrake, and seat rails. Do not route wiring in places that get hot, such as near the heater outlet. If the insulation of the wiring melts or gets torn, there is a danger of the wiring short-circuiting to the vehicle body.

Do not pass the yellow lead through a hole into the engine compartment to connect to the battery. This will damage the lead insulation and cause a very dangerous short.

Do not shorten any leads. If you do, the protection circuit may fail to work when it should.

Never feed power to other equipment by routing the insulation of the power supply wire. The power supply wire should be used only to connect with the battery. The current capacity of the lead will be exceeded causing an overcurrent and the fuse holder will blow.

Replace fuses only with the types stipulated in the fuse holder manual. Even if the power is cut off because the power cord is removed or the battery is replaced, the CD ID display and ITS memory are retained for 24 hours.

Before mounting, connect the units temporarily. Check that the units and the system are working correctly.

After connection is complete, press the clear button on the CD player with the tip of a pen-
drill. If the ground lead is not properly connected, noise may occur or the system may not operate correctly.

Check whether installation and wiring have been completed correctly. Replace the removed car components, then connect the end of the cable to the negative (-) terminal of the battery.

Secure the wiring with cable clamps or adhesive tape. To protect the wiring, wrap adhesive tape around them where they lie against metal parts.

Route and secure all wiring so it cannot touch any moving parts, such as the gear shift, handbrake, and seat rails. Do not route wiring in places that get hot, such as near the heater outlet. If the insulation of the wiring melts or gets torn, there is a danger of the wiring short-circuiting to the vehicle body.

Do not pass the yellow lead through a hole into the engine compartment to connect to the battery. This will damage the lead insulation and cause a very dangerous short.

Do not shorten any leads. If you do, the protection circuit may fail to work when it should.

Never feed power to other equipment by routing the insulation of the power supply wire. The power supply wire should be used only to connect with the battery. The current capacity of the lead will be exceeded causing an overcurrent and the fuse holder will blow.

Replace fuses only with the types stipulated in the fuse holder manual. Even if the power is cut off because the power cord is removed or the battery is replaced, the CD ID display and ITS memory are retained for 24 hours.

Before mounting, connect the units temporarily. Check that the units and the system are working correctly.

After connection is complete, press the clear button on the CD player with the tip of a pen-
drill. If the ground lead is not properly connected, noise may occur or the system may not operate correctly.

This unit is for vehicles with a 12 V battery and negative grounding. Before installing it in a recreational vehicle, truck, or bus, check the battery voltage.

To avoid shorts in the electrical system, be sure to disconnect the battery (-) cable before beginning installation.

Check whether installation and wiring have been completed correctly. Replace the removed car components, then connect the end of the cable to the negative (-) terminal of the battery.

Secure the wiring with cable clamps or adhesive tape. To protect the wiring, wrap adhesive tape around them where they lie against metal parts.

Route and secure all wiring so it cannot touch any moving parts, such as the gear shift, handbrake, and seat rails. Do not route wiring in places that get hot, such as near the heater outlet. If the insulation of the wiring melts or gets torn, there is a danger of the wiring short-circuiting to the vehicle body.

Do not pass the yellow lead through a hole into the engine compartment to connect to the battery. This will damage the lead insulation and cause a very dangerous short.

Do not shorten any leads. If you do, the protection circuit may fail to work when it should.

Never feed power to other equipment by routing the insulation of the power supply wire. The power supply wire should be used only to connect with the battery. The current capacity of the lead will be exceeded causing an overcurrent and the fuse holder will blow.

Replace fuses only with the types stipulated in the fuse holder manual. Even if the power is cut off because the power cord is removed or the battery is replaced, the CD ID display and ITS memory are retained for 24 hours.
Installing the Display Unit/Installation de l’afficheur

Parts for display unit mounting/ Pièces requises pour le montage de l’afficheur

- A ×1
- B ×1
- C ×1
- D ×1
- E ×1
- F ×2

(Rough surface) (Surface rugueuse)
(Soft surface) (Surface douce)

Fasten the display unit with Velcro tape/ Fixer l’afficheur à l’aide d’une bande Velcro

- Thoroughly wipe off the surface before affixing the Velcro tape.
- Obviously, it is very dangerous if the cord gets tangled in the steering wheel, so install the cord so that it cannot get in the way.

**Diagram:**

1. Start by opening installation holes in the console, etc.
   - When opening holes in the console, etc., confirm that there is no object at the rear of the console, and be careful not to cut off the power supply cord.
   - A minimum depth of 20 mm is required for installation of the flush mounting bracket.

2. Fit the C into the opening in the console, etc., raise the claws of the D with a flat-bladed screwdriver, and secure the bracket in place.

3. Fit the D into the C (the top and bottom of the holder are predetermined), then secure it with F.

4. Pass the display unit A cord through the hole in the holder, and fit the display unit into the holder.

Removing the Display Unit/ Enlever de l’afficheur

- Insert the C that comes with the unit as shown in the illustration. Turn it to the left and then pull it towards you.

Installation using the flush mounting bracket/ Installation au moyen du support du montage affleurant

- Tout d’abord, percer les trous d’installation dans la console, etc.
  - Avant de percer les trous dans la console, s’assurer que l’on peut le faire sans danger et veiller à ne pas endommager les câbles d’alimentation électrique.
  - La profondeur minimale requise pour le support de montage affleurant est de 20 mm.

- Engager la pièce C dans l’ouverture de la console, etc., soulever les griffes de la pièce D au moyen d’un tournevis plat et assurer de cette manière le maintien du support.

- Engager la pièce D dans la pièce C (les parties supérieure et inférieure du support sont repérées) et assurer le maintien au moyen de E.

- Faire cheminer le cordon de l’afficheur A à travers le trou du support puis engager l’afficheur dans le support.
A transport screw has been attached to the set in order to protect it during transport. After removing the transport screw, cover the hole with the supplied seal. Be sure to remove the transport screw before mounting the set. The removed transport screw should be retained in the accessory bag for use the next time the set is transported.

Transport screw
Attach to the original position before transporting the set.

Vis de transport
Replacez ces vis dans leur position d’origine avant de transporter l’appareil.

Installing the CD Player Unit/Installation de la Unité lecteur CD

1 Horizontally/Verticalement

Mounting the player on the mounting board with self-tapping screws/
Fixation du lecteur sur une platine à l’aide de vis autotaraudeuses

Refer to the following illustrations of mounting parts when mounting the player.

Mounting parts/Pièces de fixation

Suspending the player from the parcel shelf with hex-screws/
Fixation du lecteur sous la plage arrière au moyen de vis à tête hexagonale

Use the holes indicated with arrows.
Percez les trous indiqués par les flèches.
### French

- **Positionnement du sélecteur d’angle de montage**
  - Positionnez le sélecteur de manière que la fente soit horizontale.

### English

- **Mounting angle/ Angle de montage**
  - Use any angle in this range (up to 90 degrees).
  - The angle switching dial must be set on both sides of the player to the same position.

<table>
<thead>
<tr>
<th>Angle switching dial adjustment</th>
<th>Mounting location</th>
</tr>
</thead>
<tbody>
<tr>
<td>Top</td>
<td>The player cannot be installed in this direction.</td>
</tr>
<tr>
<td>Bottom</td>
<td>The player is horizontal.</td>
</tr>
</tbody>
</table>

- **Location**
  - Install the unit where it does not get in the driver’s way and cannot injure the passenger if there is a sudden stop, like an emergency stop.
  - Be sure to mount the player on a rigid surface which is firm enough to hold the player in the proper position under all circumstances. Failure to do so may affect the optimum performance of the player.
  - Before drilling a hole into the trunk, check for the presence of a cric and the tools.
  - Do not mount the player near the heater outlet, where it would be affected by heat, or near the doors, where rainwater might splash onto it.
  - Do not mount the player on the spare tire board or any other unstable place.
  - Mount the player in a place where it does not prevent the spare tire, jack, or tools from being easily removed.
  - Do not mount the player anywhere that gets the sun and so becomes hot, like on the dashboard or the rear shelf.
  - Mount the player on a flat surface.

### Suspending the player from the parcel shelf with hex-screws

- **Ideally, when the player is being mounted under the parcel shelf, two persons should work together. One person should hold the player, and the other should tighten the hex-nuts. If you do this job on your own, take great care not to drop or knock the player.**

- **When suspending the player under the parcel shelf, be sure that it is firmly installed on a solid surface. If the unit is not firmly installed, skipping will occur.**

### Vertical Installation

- **Consult the concessionnaire of your vehicle if the installation exige le perçage de trous or toute autre modification du véhicule.**
  - Before finally installing the unit, connect the wiring temporarily and make sure it is all connected up properly and the unit and the system work properly.
  - Use only the parts included with the unit to ensure proper installation. The use of unauthorized parts can cause malfunctions.
  - When mounting the player, make sure none of the leads are trapped between the player and the surrounding metalwork or fittings.
  - Before drilling a hole into the trunk, consult with your nearest dealer if installation requires the drilling of holes or other modifications of the vehicle.
  - Assemble the player to the same position.
  - The angle switching dial must be set on both sides of the player.
  - The player cannot be installed in this direction.

### Mounting the player on a flat surface

- **Do not mount the player anywhere that gets the sun and so becomes hot, like on the dashboard or the rear shelf.**

  - The player cannot be installed in this direction.
PIONEER ELECTRONICS (USA) INC. - PIONEER ELECTRONICS OF CANADA, INC.
(PA) (POC)

LIMITED WARRANTY
WARRANTY VALID ONLY IN COUNTRY OF PRODUCT PURCHASE

WARRANTY PERIOD
For the period specified below from date of original retail purchase (the warranty period) from an authorized Pioneer dealer, Pioneer Electronics (USA) Inc. (PA), and Pioneer Electronics Of Canada, Inc. (POC), warrant that products distributed by PA in the U.S.A., and by POC in Canada that fail to function properly under normal use due to a manufacturing defect when installed and operated according to the owner's manual enclosed with the unit will be repaired or replaced with a unit of comparable value, at the option of PA or POC, without charge to you for parts or actual repair work. Parts supplied under this warranty may be new or rebuilt at the option of PA or POC.

The warranty period for retail customers who rent the product commences upon the date product is first put into use (a) during the rental period or (b) retail sale, whichever occurs first.

The warranty does not cover any product which is used in any trade or business, or in an industrial or commercial application.

PRODUCT

| WARRANTY PERIOD |
|---|---|
| PARTS | LABOR |
| ONE YEAR | ONE YEAR |

WHAT'S NOT COVERED
This warranty covers the product during the warranty period whether in the possession of the original owner or any subsequent owner. In the event service is required, the product must be delivered within the warranty period, transportation prepaid, from within the country of purchase as explained in this document. You will be responsible for removal and installation of the product. PA or POC, as appropriate, will pay for the cost of returning the repaired or replacement product to you within the country of purchase.

This warranty does not apply to any speaker that has been subjected to power in excess of its published power rating.

This warranty does not cover the cabinet or any appearance item, user attached antennas, any damage to recordings or recording tapes or discs, any damage to the product resulting from alterations, modifications not authorized in writing by PA or POC, accident, misuse or abuse, damage due to lightning or to power surges, subsequent damage from leaking, damaged or inoperative batteries or the use of batteries not conforming to those specified in the owner's manual.

This warranty does not cover the cost of parts or labor which would be otherwise provided without charge under this warranty, obtained from any source other than a PA or POC Authorized Service Company or other designated location. This warranty does not cover defects or damage caused by the use of unauthorized parts or labor, or from improper maintenance.

ALTERED, DEFACED OR REMOVED SERIAL NUMBERS VOID THIS WARRANTY.

YOUR RIGHTS
PA and POC exclude any obligation on their part for incidental or consequential damages related to the failure of products each distributes to function properly under the conditions set forth above.

IN THE U.S.A. - PA LIMITS ITS OBLIGATIONS UNDER ANY IMPLIED WARRANTIES INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE TO A PERIOD NOT TO EXCEED THE WARRANTY PERIOD. NO WARRANTIES SHALL APPLY AFTER THE WARRANTY PERIOD. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS, AND SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THE ABOVE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS, AND YOU MAY HAVE OTHER RIGHTS WHICH MAY VARY FROM STATE TO STATE.

IN CANADA - EXCEPT AS EXPRESSLY PROVIDED HEREIN, THERE ARE NO REPRESENTATIONS, WARRANTIES, OBLIGATIONS OR CONDITIONS, IMPLIED, STATUTORY OR OTHERWISE, APPLICABLE TO THIS PRODUCT.

TO OBTAIN SERVICE
CAR STEREO PRODUCTS (EXCEPT CAR SPEAKERS SOLD IN THE U.S.A. ONLY)

PA and POC have appointed a number of Authorized Service Companies throughout the U.S.A. and Canada should your product ever require service. To receive warranty service you will need to present your sales receipt or, if rented, your rental contract showing place and date of original owner's transaction.

Should it become necessary to ship the unit you will need to package the product carefully and send it, transportation prepaid by a traceable, pre-insured method, to an Authorized Service Company. Carefully package the product using adequate padding material to prevent damage in transit. The original container is ideal for this purpose. Include in the package your name, address, telephone number where you can be reached during business hours, a copy of your sales receipt and a detailed description of the problem.

TO OBTAIN SERVICE
CAR SPEAKERS SOLD IN THE U.S.A. ONLY

Should your car speaker require service, return defective car speaker to your retail dealer for exchange. To receive warranty service you will need to present your sales receipt showing place and date of original owner's retail purchase. If, for any reason, you cannot exchange the speakers at the selling dealer, call the Customer Service Department as given below.
