RADIO SHACK LIMITED WARRANTY

This product is warranted against defects for 90 days from date of purchase from Radio Shack company-owned stores and authorized Radio Shack franchisees and dealers. Within this period, we will repair it without charge for parts and labor. Simply bring your Radio Shack sales slip as proof of purchase date to any Radio Shack store. Warranty does not cover transportation costs. Nor does it cover a product subjected to misuse or accidental damage.

EXCEPT AS PROVIDED HEREIN, RADIO SHACK MAKES NO WARRANTIES, EXPRESS OR IMPLIED, INCLUDING WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. Some states do not permit limitation or exclusion of implied warranties; therefore, the aforesaid limitation(s) or exclusion(s) may not apply to the purchaser.

This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

Printed in Korea
TO RECEIVE

For installation, connect the antenna to the receiver.

Using your transceiver

If you have a suitable transceiver in any position, you can install this kit.

Mounting bracket

- 2 bolts (2)
- Rubber washer (2)
- Washer (2)
- Tapping screw (3)

before mounting, make sure you have the correct parts.

The most common

Installation without a suitable transceiver

You can use the kit with or without the transceiver mounted. For installation, refer to the instructions for using the transceiver.
ANTENNA SYSTEM

Special Features

When using the CB equipment, please observe the following:

- Always use the equipment properly for its intended purpose.
- Do not alter the equipment in any way.
- Use only the equipment for its intended purpose.
- Keep the equipment clean and free from dirt and dust.
- Do not use the equipment in wet or humid environments.
- Do not use the equipment in high-temperature environments.
- Do not use the equipment in high-pressure environments.
- Do not use the equipment in low-temperature environments.
- Do not use the equipment in dusty environments.
- Do not use the equipment in environments with magnetic fields.
- Do not use the equipment in environments with electric fields.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high wind.
- Do not use the equipment in environments with high noise levels.
- Do not use the equipment in environments with high vibration.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
- Do not use the equipment in environments with high altitude.
- Do not use the equipment in environments with high moisture.
- Do not use the equipment in environments with high humidity.
- Do not use the equipment in environments with high pressure.
- Do not use the equipment in environments with high temperature.
### CB Transceiver

**Typical Applications for Your CB Transceiver**

<table>
<thead>
<tr>
<th>Application</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Replace anything in your Transceiver</td>
<td>Open the case of your Transceiver</td>
</tr>
<tr>
<td>2. Never charge or replace the battery</td>
<td>1. You should never replace the battery</td>
</tr>
</tbody>
</table>

**To Be Safe and Sure:**

- **Warning:**
  - Unauthorized modifications or changes to the Transceiver can void the warranty and negate all FCC approvals.
  - Always keep the Transceiver in its original packaging when not in use.

---

**Service and Maintenance**

- **If trouble is not associated with the Transceiver:**
  1. **Check the following:**
     - Is the antenna connected and the unit turned on?
   2. **Check the following:**
     - Check the power cord and connections.
   3. **Check the following:**
     - Check the power source.

- **If the Transceiver is not functioning:**
  1. **Check the following:**
     - Is the antenna connected and the unit turned on?
   2. **Check the following:**
     - Check the power cord and connections.
   3. **Check the following:**
     - Check the power source.

---

**Personal and Family:**

Campfire: Running and cooking food in your Transceiver can affect the Transceiver's performance and may lead to overheating. It is recommended to use a separate cooking area.

Back at camp, make sure your Transceiver is turned off to conserve power.

**10-Codes**

- **Description**: The table lists various codes with their corresponding meanings. The codes are used for emergency situations, communication, and other critical operations. Each code is paired with a specific meaning, such as "Report in service" or "In service." These codes are crucial for coordinating responses during emergencies or operational issues.

**Business Uses**: These codes are primarily used in emergency and operational contexts to facilitate quick and effective communication. They are particularly important for coordinating efforts between different services and ensuring that critical information is transmitted efficiently. For instance, "9:52" could represent a code for "Standby," indicating readiness for immediate action. "OK" could signify the resolution of an issue, while "10:10" might denote a status update needing immediate attention. By using these codes, professionals can communicate critical information without ambiguity, ensuring that actions are taken swiftly and accurately.
