What's a Cassiever? Just a quicker way of saying Cassette/Receiver. Scott's new 3600 is an ultra-sensitive 65-Watt FM stereo receiver. It's also a professional cassette recorder with digital counter and individual record and playback meters. And it's all in one beautiful long low cabinet.

The Cassiever is versatile. You can listen to FM or FM stereo. You can listen to pre-recorded cassettes. You can also record onto cassettes, either from voice or instruments (there are two microphone jacks on the front panel), or from records (just connect a turntable), or directly from the Cassiever's own superlative FM stereo tuner. More? Add extra speakers or headphones. You can do a lot more with the Cassiever because it's a lot more than a receiver.

Inside, the Cassiever has a lot going for it. Scott's silver-plated FET front end brings in a raft of stations loud and clear... whether you live in the canyons of Manhattan or the Grand Canyon. Integrated Circuits, both in the IF strip and in the preamplifier, keep your favorite sound distortion-free and clear of annoying interference. The cassette section is specially built to Scott's demanding specifications, including a precision synchronous AC motor, assuring you of absolutely constant speed, with no annoying flutter or wow. AC operation is inherently stable, and requires no additionally stabilized power supply.

That's the Cassiever... a great new idea from Scott... An idea you'll get used to very quickly once you've seen and heard it in action. At your Scott dealer's showroom... only $399.95.
