Performance.
Scott Stacks Up.

Every serious listener knows that separate tuners and amplifiers offer greater system versatility and flexibility than the all-in-one receiver. But Scott separates stack up where it really counts — performance.

Every one of Scott's complete line of tuners and amplifiers is engineered and designed to give you all the performance features you expect, at a price no higher than many receivers currently on the market.

Scott's T 526 AM/FM Stereo Tuner and A 436 Integrated Power Amplifier provide such important performance features as front panel Dolby de-emphasis switching, a phase locked loop multiplex section and linear motion calibrated controls.

And that's only part of the story. Compare these important performance features with any other medium-priced tuner and amplifier on the market today.

The Scott T 526 Tuner
IHF sensitivity rated at 1.9 µV, S/N ratio 68 dB and a capture ratio of 1.5 dB.
Signal strength and center channel tuning meters.
Four gang tuning capacitor for better image rejection.
AM section designed around a tuned RF amplifier using J-FET for improved signal-to-noise ratio.
AM noise suppression circuitry.

The Scott A 436 Amplifier
42 watts RMS per channel, driven into 8 ohms from 20 Hz to 20 kHz with no more than 0.3% THD.
True logarithmic meter amplifier obviates the need for range switching.
Individual channel power level meters calibrated in % of full power output capability eliminates confusing dB and VU readings.
Two completely independent tape monitors allow two tape recorders to be used simultaneously for direct tape-to-tape copying.
Instantaneous electronic protection circuit in the output stage.
IM distortion lower than 0.15% for a cleaner sound without listening fatigue.
High and Low filters, two auxiliary outlets and mic inputs.

And the Scott T 526 and A 436 come complete with professional rack-mount handles, and are backed by a three-year, parts and labor limited warranty.
