H. H. SCOTT

Scott’s lowest priced Stereo FM Receiver . . . 70-watt output

A
FET front-end and integrated circuit IF strip assure sensitive, static-free FM reception

$199.95 less case
$10 monthly see page 438

Scott 110-watt Stereo FM-AM Receiver with quartz crystal filter in IF strip . . . never needs realignment

B
Wire-wrap bonded connections plus plug-in PC modules assure longer life, easier servicing

$299.95 less case
$15 monthly see page 438

Scott 175-watt Stereo FM-AM Receiver has quartz crystal filter and rugged silicon output transistors

C
Microphone input jacks conveniently mounted on front panel let you make your own music!

$349.95 less case
$17 monthly see page 438

SHIPPING NOTE: Items with suffix L, W, or Z in stock no. sent truck or express. See Ordering Information pages.

Exciting Scott "Casseiver" combines 82-watt solid-state Stereo FM Receiver with Stereo Cassette Recorder

Scott professional quality Stereo FM-AM Receiver

699.95
$29 monthly
less case
see page 438

Model 3800. Exciting Scott stereo FM-AM receiver has the latest design features for superlative performance. Sensitive silver-plated FET front-end pulls in more stations. Integrated-circuit IF strip and preamp virtually eliminates distortion. All silicon output transistors. Delivers a tremendous 210-watt output. 1 dB at 4 ohms; 170-watt IHF at 4 ohms; 63 watts/channel rms.

Response: 1 dB, 9-20,000 Hz. FM Sensitivity: 15 µV IHF. FM Stereo Separation: 32 dB. Signal-to-Noise Ratio: 60 dB. Capture Ratio: 2.5 dB. Size: 183/8 x 121/4 x 71/2". With walnut wood case. For 117 VAC.

Model 3900. Finest Scott stereo FM-AM receiver ever! Built to give you stereo realism that rivals the depth and splendor of the original performance. Magnificent solid-state front-end. 82 watts continuous (rms) power per channel at 4 ohms.

Deluxe Walnut Wood Case.

Model 3600. The latest concept in home entertainment! Scott combines a deluxe solid-state stereo FM-AM receiver with a versatile stereo tape cassette recorder in an attractive low-profile wood cabinet with a smart walnut finish. Full-feature receiver boosts sensitive silver-plated FET front-end and IC’s in the IF strip for top performance. Pulls-in marvelous true-to-life stereo FM, crystal-clear mono FM. Power Output at 4 ohms: 82 watts. 1 dB; 65 watts IHF; 22 watts rms per channel. Has a full array of controls and inputs for all music sources. Stereo cassette recorder can tape directly off the air or line with miles. Features synchronous motor, level meters, digital counter, pushbutton controls. Plays back through Cassiver for full fidelity sound. Response: 1 dB, 20-30,000 Hz. FM Sensitivity: 0.5 µV. FM Separation: 30 dB. Signal-to-Noise Ratio: 60 dB. With walnut wood panels. Size: 22 1/2 x 11 1/2 x 7 1/2". For 117 VAC.

Look to Allied for the latest in stereo hi-fi components
A 70-watt solid-state FM Receiver has field-effect-transistors for superior FM

Model 341X. Even Scott's lowest priced solid-state stereo FM receiver offers many convenient features, plus the sensitive field-effect-transistor front-end found in Scott's higher priced models. FET's assure greater sensitivity, freedom from cross-modulation and lower noise than conventional bipolar transistors. You will hear more stations more clearly with FET design. Also has tuning meter, stereo indicator light and flywheel weighted knob to simplify accurate, pinpoint tuning. Integrated circuits in IF strip assure great stereo FM.

Convenient, positive-acting slide-type switches control both main and remote speaker systems; also control tape monitor for use with three-head tape decks and loudness contour which automatically compensates for loss of human hearing sensitivity to bass and treble at low volume. Preamp has volume, balance, bass and treble tone controls.

Front panel stereo headphone jack lets you enjoy hi-fi in complete privacy. Rugged transformerless output stage assures full power over the entire audio frequency spectrum. Power Output at 4 ohms: 70 watts = 1 dB, 55 watts IHF; 15 watts rms per channel at 8 ohms. Response: = 1 dB, 20-20,000 Hz. Hum and Noise: = 55 dB. Harmonic Distortion: 0.05% at rated output. Sensitivity: 25 mV. Separation: 20 dB. Inputs: mag. phono, tape, aux. Outputs: 4-16 ohms, tape and headphones. Size: 43×14×121. Takes optional case below. For 117 VAC... 199.95

110-watt solid-state FM-AM Receiver has rugged silicon-transistor output stage

Model 382C. This Scott receiver has many extras to assure superb stereo. Field-effect-transistors in the front end, output transistor of the IF and integrated circuit IF strip and multiplex provide noise-free FM and superior stereo separation. Tuning meter, flywheel tuning, stereo indicator light and Perfectionite light that flashes on when FM is tuned in. Perfectionite fades when station quitting eliminates interstation "hash" when you're tuning FM stations.

13 A 2184 X. Walnut Wood Case, Wt.: 4 lbs. 22.50

175-watt solid-state FM-AM Receiver easily drives two sets of speaker systems

Model 386. Powerful receiver offers superb mono and stereo FM, ultra-VERSATILE preamp facilities for every music source and enough power to drive any speaker systems made. Field-effect-transistor front-end and integrated circuit IF and multiplex assure finest stereo FM reception. Crystal filter in the IF strip provides outstanding selectivity so that you'll hear more sounds you hear ever before. Tuning meter, stereo indicator light and flywheel make station selection easy. Between-station quieting eliminates noise when you tune FM.

Computer-type pushbuttons control loudness contour, tape monitor, scrub filter, muting, mono/stereo mode, main and remote speakers. Also has bass, treble, volume, stereo headphone jack and front panel microphone inputs. Power Output at 4 ohms: 175 watts = 1 dB, 137 watts IHF; 15 watts rms per channel at 8 ohms. Response: = 1 dB, 20-20,000 Hz. Sensitivity: 25 mV. Takes optional case below. Size: 53×15×14. For 117 VAC...

Scott 12 VDC/110 VAC Receiver with speakers

Model 2550. Stereo FM-AM receiver system operates on 12 VDC in cars or boats or from AC line. Offers features comparable to many more expensive component systems. Automatic speaker switching. Separate tone controls for each channel. Sensitivity FET front-end. Integrated circuit preamp and IF strip. "Full Complementary Output" delivers virtually undistorted sound even at the lowest listening levels. Walnut finish wood.

Includes inputs for tape recorder and magnetic phono. Front panel stereo headphone jack. Complete tape monitoring facilities. Acoustic suspension speaker systems. FM Sensitivity: 25 mV. Receiver, 75×15×14. 117 VAC...
