

Zip through Scott's new solid state FM stereo tuner kit in one afternoon

Four to six hours! That's all you need to zip through Scott's new LT-112 solid state FM stereo tuner kit. All you do is complete five simple wiring groups and breeze through an easy new 10-minute alignment. You can actually start after lunch and enjoy superb FM stereo at dinner.

Scott solid state circuitry is the key to the LT-112's superior performance. Costly silicon transistors, three IF stages, and three limiters give the LT-112 a usable sensitivity of 1.9 uv, selectivity of 45 db . . . performance unapproached by any other kit on the market. The LT-112 is actually the kit version of Scott's best-selling 312 solid state factory-wired stereo tuner, of which AUDIO said, ". . . it is one of the finest tuners Scott makes. And that means it is one of the finest tuners anywhere."

All Critical Circuitry Pre-Wired

To insure perfect results, your LT-112

arrives with all critical circuitry pre-wired, pre-tested, pre-aligned, and mounted on heavy-duty printed circuit boards. Wires are all color-coded, pre-cut, and pre-stripped to the proper length. Scott's exclusive life-size, full-color construction book fully details every step . . . makes perfect wiring almost automatic.

You'd never believe a kit so easy to build could be so packed with features. Built right into the LT-112 is a brand-new Scott invention . . . the Tri-modulation Meter. A convenient front panel switch lets you use this Scott exclusive as:

1. A signal-Strength Indicator . . . for proper antenna orientation and coarse tuning.
2. A Zero-Center Indicator . . . for ex-

tremely accurate fine tuning of very weak or very strong stations. Accurate tuning is essential to minimum distortion and maximum separation.

3. A precision Alignment Meter that enables you to align your tuner, anytime, with absolute accuracy . . . a procedure that previously required the use of a \$500 test instrument.

For your further listening enjoyment, the LT-112 is provided with three stereo outlets . . . one of them conveniently located on the front panel (you can connect a portable tape recorder without disturbing the installation of the tuner). Output level controls on the rear of the unit need be set only once, so you don't have to be bothered about duplication of controls.

Stop in at your Scott dealer's today, and pick up an LT-112 tuner kit . . . \$179.95 plus one enjoyable afternoon will net you a lifetime of listening pleasure.

SCOTT
