The photographs show the gold version of SA-DA8. Model SA-DA10 is only for the United Kingdom. The black version of SA-DA8 is only for the United Kingdom.

Note:
“EB” on the packaging indicates the United Kingdom.
Before connecting, operating or adjusting this product, please read these instructions completely. Please keep this manual for future reference.
Dear customer

Thank you for purchasing this product.
For optimum performance and safety, please read these instructions carefully.

Caution for AC Mains Lead

(For United Kingdom)

(“EB” area code model only)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience. A 5-ampere fuse is fitted in this plug. Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362. Check for the ASTA mark or the BSI mark on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced. If you lose the fuse cover the plug must not be used until a replacement cover is obtained. A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE Fuse SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY. THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as stated below. If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:
Blue: Neutral, Brown: Live.
As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:
The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.
The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below. Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

2. Replace the fuse and close or attach the fuse cover.
Safety precautions

**Placement**

Set the unit up on an even surface away from direct sunlight, high temperatures, high humidity, and excessive vibration. These conditions can damage the cabinet and other components, thereby shortening the unit’s service life.

Place it at least 15 cm away from wall surfaces to avoid distortion and unwanted acoustical effects.

Do not place heavy items on the unit.

**Voltage**

Do not use high voltage power sources. This can overload the unit and cause a fire.

Do not use a DC power source. Check the source carefully when setting the unit up on a ship or other place where DC is used.

**AC mains lead protection**

Ensure the AC mains lead is connected correctly and not damaged. Poor connection and lead damage can cause fire or electric shock.

Do not pull, bend, or place heavy items on the lead. Grasp the plug firmly when unplugging the lead.

Pulling the AC mains lead can cause electric shock.

Do not handle the plug with wet hands. This can cause electric shock.

**Foreign matter**

Do not let metal objects fall inside the unit. This can cause electric shock or malfunction.

Do not let liquids get into the unit. This can cause electric shock or malfunction. If this occurs, immediately disconnect the unit from the power supply and contact your dealer.

Do not spray insecticides onto or into the unit. They contain flammable gases which can ignite if sprayed into the unit.

**Service**

Do not attempt to repair this unit by yourself. If sound is interrupted, indicators fail to light, smoke appears, or any other problem that is not covered in these instructions occurs, disconnect the AC mains lead and contact your dealer or an authorized service center. Electric shock or damage to the unit can occur if the unit is repaired, disassembled or reconstructed by unqualified persons.

Extend operating life by disconnecting the unit from the power source if it is not to be used for a long time.

---

**CAUTION!**

DO NOT INSTALL OR PLACE THIS UNIT IN A BOOKCASE, BUILT IN CABINET OR IN ANOTHER CONFINED SPACE. ENSURE THE UNIT IS WELL VENTILATED. ENSURE THAT CURTAINS AND ANY OTHER MATERIALS DO NOT OBSTRUCT THE VENTILATION TO PREVENT RISK OF ELECTRIC SHOCK OR FIRE HAZARD DUE TO OVERHEATING.

**CAUTION**

Do not place anything on top of this unit or block the heat radiation vents in any way. In particular, do not place tape decks or CD/DVD players on this unit as heat radiated from it can damage your software.
To enjoy surround sound

Do the connections, settings, and adjustments in the order shown to enjoy surround sound.
Be sure to make the correct speaker settings. If, for example, you have not connected a center speaker and you leave the initial setting value of LARGE as it is, then dialog and other sounds may not be reproduced.

Connect the equipment
( Pages 10–13.)

Position and connect the speakers
( Pages 14–16.)

Set the presence and type (small/large), distance and filter of the speakers you have connected
( Pages 17–18.)

Adjust the level for the speakers
( Page 19.)

Sit back and enjoy the experience
( Pages 22–23.)

---

Connect the equipment

Before use

Position and connect the speakers

Set the presence and type (small/large), distance and filter of the speakers you have connected

Adjust the level for the speakers

Sit back and enjoy the experience

---

In SIZE
Select LARGE or SMALL for the front speakers
Select LARGE, SMALL, or NONE for the center and surround speakers
Select YES or NO for the subwoofer

In DISTANCE
Enter the distance of the front, center, and surround speakers from the listening position

In FILTER
Enter the cutoff frequency for your subwoofer based on the bass capability of your front speakers

---

When using DVD 6CH INPUT mode
These settings need to be changed on the player.
Read the player’s instructions for setting details.

Concerning the remote control

**A Battery installation**

**Use of batteries**

- Align the poles (+ and –) properly when inserting the batteries. Press in and down towards the minus end.
- Do not mix old and new batteries or different types of batteries.
- Do not recharge ordinary dry cell batteries.
- Do not heat or disassemble the batteries. Do not allow them to contact flame or water.
- Remove the batteries if the unit is not to be used for a long time.
- Do not keep together with metallic objects such as necklaces.
- Do not use rechargeable type batteries.
- Do not use batteries if the covering has been peeled off.

Mishandling of batteries can cause electrolyte leakage which can damage items the fluid contacts and may cause a fire. If electrolyte leaks from the batteries, consult your dealer. Wash thoroughly with water if electrolyte comes in contact with any part of your body.

**B Correct method of use**

**Operation notes**

- Do not place obstacles between the remote control signal sensor and remote control unit.
- Do not expose the remote control signal sensor to direct sunlight or to the bright light of a fluorescent light.
- Take care to keep the remote control signal sensor and end of the remote control unit free from dust.
- If the unit is installed in a rack with glass doors, the glass doors’ thickness or color might make it necessary to use the remote control a shorter distance from the unit.

**To prevent damage**

- Never place heavy items on top of the unit.
- Do not disassemble or reconstruct the unit.
- Do not spill water or other liquids into the unit.

**C How to open the remote control SA-DA10 only**

For your reference

This remote control can be used to operate the receiver you purchased and some other Panasonic and Technics cassette decks, MD decks, CD players, TVs, VCRs and DVD players, provided they are equipped with a remote control sensor.

**SA-DA10 only**

It is also possible to change-over the remote control code so that the remote control can operate TVs, VCRs and DVD players which have not been manufactured by this company ( pages 46–47).

**Note**

- For details on operating other equipment, see the instruction manual provided with specific unit.
- Some models cannot be operated by this remote control.
- Actual operations depend on your equipment and software.
Turn off all components before making any connections.

To connect equipment, refer to the appropriate operating instructions.

Connecting a DVD player

Optical fiber cable connection

- Dust cap

- Do not bend the optical fiber cable.
- If the digital optical connector is not going to be used, be sure to attach the dust cap to prevent exposure to dust.

Note

Dolby Digital RF (radio frequency) signals cannot be decoded with this unit.

To connect analogue 6 channel

Audio OUT (CENTER) (SUBWOOFER)
Audio OUT (FRONT L,R)
Audio OUT (SURROUND L,R)

Note

Connect to FRONT L, R if your DVD player does not have 6 channel output.

The S-VIDEO terminals

Connections through these terminals provide higher quality pictures than through the video terminal.

Note

When using S-VIDEO terminals, be aware that video signals input into the VIDEO terminals cannot be output from S-VIDEO terminals or vice versa.

Connections

Connecting audio equipment

Stereo phono cable (not included)
- White (L)
- Red (R)

Optical fiber cable (not included)

Turntable (not included)

Note
If you want to connect a graphic equalizer, connect it to the TAPE/MD (for the United Kingdom) or TAPE (for Australia and New Zealand) terminals (page 24).

Antenna connections

AM loop antenna
- Fit the AM loop antenna holder (included) onto the rear panel of this unit and then attach the AM loop antenna to the AM loop antenna holder (facing in the direction of best reception).
- Keep the antenna cord away from tape decks, DVD players, and other cords.

FM indoor antenna (included)

FM antenna
Fix the other end of the antenna where reception is best.

Adhesive tape (not included)

When mounting the antenna to a column, wall or rack

Screw (included)

AM loop antenna (included)
**FM outdoor antenna**
- Disconnect the FM indoor antenna.
- The antenna should be installed by a competent technician.

**AM outdoor antenna**
- Run a piece of vinyl wire horizontally across a window or other convenient location.
- Leave the loop antenna connected.
- Disconnect the antenna when the unit is not in use. Do not use the antenna during an electrical storm.

**Connecting the AC mains lead and other information**

**Cooling fan**
The cooling fan operates at high power output levels only.

**AC mains lead**
Connect this lead only after all other cables and cords are connected.

**Insertion of Connector**
Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing. However there is no problem using the unit.

---

**To connect an outdoor antenna**

**FM outdoor antenna**

- Disconnect the FM indoor antenna.
- The antenna should be installed by a competent technician.

**AM outdoor antenna**
- Run a piece of vinyl wire horizontally across a window or other convenient location.
- Leave the loop antenna connected.
- Disconnect the antenna when the unit is not in use. Do not use the antenna during an electrical storm.

**How to use the antenna plug (included)**

**For Australia and New Zealand**

Two types of wire are most commonly used for connection from the antenna: 300 Ω parallel feeder wire or 75 Ω coaxial cable. For best resistance to outside interference, the use of 75 Ω coaxial cable is suggested.

- **To connect a 75 Ω coaxial cable**
  1. Remove a piece of the outer vinyl insulator.
  2. Carefully pull the tabs apart to remove the cover.
  3. Remove the lead wire and clamp it with the plastic bar.
  4. Install the coaxial cable. Clamp the cable conductor, and wind it on so that it doesn’t contact anything else.
  5. Attach the cover.

- **To connect a 300 Ω feeder wire**
  Loosen the screws, connect the wires, and tighten the screws to secure the connection.

---

**Connections**

---

(FOR THE UNITED KINGDOM ONLY)
READ THE CAUTION FOR THE AC MAINS LEAD ON PAGE 3 BEFORE CONNECTION.

**Note**
The included AC mains lead is for use with this unit only. Do not use it with other equipment.
**Placement of speakers**

- **Front speakers**: Place on the left and right of the TV at seated ear height so that there is good coherency between the picture and sound.
- **Center speaker**: Place underneath or above the center of the TV. Aim the speaker at the seating area.
- **Surround speakers**: Place on the side of or slightly behind the listening position, about one meter higher than ear level.
- **Subwoofer**: The subwoofer can be placed in any position as long as it is at a reasonable distance from the TV. Note that some experimentation can yield the smoothest low frequency performance. Placement near a corner can increase the apparent output level, but can result in unnatural bass.

**Connecting speakers**

Other connections are possible depending on your speaker system. See your speaker system’s operating instructions for details.

**Front speakers**

- **Front speaker (left)** (not included)
- **Center speaker** (not included)
- **Front speaker (right)** (not included)
- **Surround speaker (left)** (not included)
- **Surround speaker (right)** (not included)
- **Subwoofer** (not included)

**Speaker impedance:**

- A or B: 4-16 Ω
- A and B: 8-16 Ω

**Note**

If you connect speakers with an impedance under 6 Ω, switch on “LOW IMP” (page 24).

**“B” terminals**

For connection to a second pair of speakers.

**Note**

Use the A terminals to enjoy SURROUND, SFC and DVD 6CH INPUT.
**Bi-wiring connection**

**Note**

When bi-wiring, use speakers designed for that purpose that have combined impedance of 6–16 Ω.

---

**Speaker cables**

Front speaker (right) (not included)

Front speaker (left) (not included)

---

**Speaker impedance:**

BI-WIRE: 6-16 Ω

---

**Connecting the cables**

1. [Connector A]
2. [Connector B]
3. [Connector C]
**Speaker connections**

**Center speaker**

*Note*

This receiver does not have an amplifier for the subwoofer.

**To connect a passive subwoofer**

- Connect another amplifier and connect the subwoofer to it.
- Or
  - Connect a passive subwoofer that has front speaker terminals
  (See the operating instructions of the speaker system for details.)
Speaker settings

These settings should be done to get the most from the unit's DSP reproduction modes (pages 20 and 21).

In SIZE
Set the type (LARGE or SMALL) and presence (NONE, YES or NO) of your speakers. Select “LARGE” if the speakers can produce bass (below around 100 Hz). Select “SMALL” if the speakers cannot produce bass. Select “NONE” if center and surround speakers aren’t connected. Select “NO” if a subwoofer isn’t connected. The sound for those speakers is then produced through the front speakers.

In DISTANCE
Enter the distance of front, center surround speakers from the listening position so the sound from the speakers reaches the listening position at the same time. The unit calculates the delay time for the center and surround speakers based on these distances.

In FILTER
Enter the cutoff frequency for your subwoofer based on the bass capability of your front speakers.

1 Press [\(\text{\texttrade} /\text{I}\text{\texttrade}\)]
2 Press [A] and [B] at the same time. “SETTING” appears on the display.
3 To set “SIZE”
   ① Press [A] to select “SIZE”.
      Each time you press the button, the display switches as follows.
      \[
      \text{SIZE} \rightarrow \text{DISTANCE} \rightarrow \text{FILTER} \rightarrow \text{DR COMP} \]
   ② Press [B] to select the speaker channel to be set.
      Each time you press the button, the display switches as follows.
      \[
      \text{FRONT} \rightarrow \text{CENTER} \rightarrow \text{SURROUND} \rightarrow \text{SUB-WFR} \]
      \[
      \text{SUB-WFR=SUBWOOFER} \]
   ③ Turn [INPUT SELECTOR] to set the type (LARGE, SMALL) and presence (NONE, YES or NO) of the speaker.
      Each time you turn the selector, the display switches as follows.
      \[
      \text{FRONT:} \rightarrow \text{SMALL} \rightarrow \text{LARGE}
      \text{CENTER, SURROUND:} \rightarrow \text{NONE} \rightarrow \text{SMALL} \rightarrow \text{LARGE}
      \text{SUBWOOFER:} \rightarrow \text{NO} \rightarrow \text{YES}
      \]
      The factory settings are as follows.
      Front, center and surround speakers: LARGE
      Subwoofer: YES
   ④ Repeat steps ② and ③ to complete the size settings for all speakers.
      (Continued on next page)
Preparatory steps

4 To set “DISTANCE”
   ① Press [A] to select “DISTANCE”.

   ② Press [B] to select the speaker channel to be set.
      Each time you press the button, the display switches as follows.
      FRONT — CENTER — SURROUND

   ③ Turn [INPUT SELECTOR] to set the distance.
      Distance can be set at 0.1 m intervals between 1.0 to 10.0 m.
      The factory settings are as follows.
      Front and center speakers: 3.0 m
      Surround speakers: 1.5 m

   ④ Repeat steps ② and ③ to complete the size settings for the front, center and surround speakers.

5 To set “FILTER”
   ① Press [A] to select “FILTER”.

   ② Turn [INPUT SELECTOR] to set the cut off frequency.
      Each time you turn the selector, the display switches as follows.
      100 — 150 — 200
      The factory setting is 100 Hz.

6 Press [A] and [B] at the same time.
   “COMPLETE” appears on the display.

   If you allow about 10 seconds to elapse between settings, the procedure is canceled, all settings are returned to how they were, and the previous display is restored. Begin again if this occurs.

For your reference
The settings remain as they are until changed by the above procedure, even after the power has been turned off.
Adjusting speaker output level

Adjust speaker level so the output from all the speakers is the same apparent level when sitting where you would normally enjoy a source.

1. Press [A] or [BI-WIRE] to turn on SPEAKERS.
   A or BI-WIRE refer to the speaker terminals at the rear of the unit.
   You cannot adjust output level when SPEAKERS B is selected.

2. **by remote control only**
   Press [TEST] to output the test signal.
   “TEST” appears on the display.
   The signal is output from each speaker in order for about two seconds each:
   L: Front speaker (left)
   C: Center speaker
   R: Front speaker (right)
   RS: Surround speaker (right)
   LS: Surround speaker (left)
   SW: Subwoofer
   Speakers set as “NONE” or “NO” are skipped.

   **Note**
   DSP sound mode switches to SURROUND mode when the test starts.

3. **by remote control**
   Press [VOLUME (+ or –)] (SA-DA10) or [VOL (– or +)] (SA-DA8) to set the volume level normally used for enjoying the source.

   **Note**
   Use [BALANCE] if the left right balance of the front speakers is off.

4. **by remote control only**
   Press [LEVEL] to select the speaker channel to adjust.
   The current level appears on the display.
   Press again to change the speaker channel.
   Speakers set as “NONE” or “NO” are skipped.

5. **by remote control only**
   Press [+] or [–] to adjust the level to the same apparent level as the front speakers.
   The four channels can be adjusted between –10 dB and +10 dB, with zero being the current level of the front speakers.

6. Repeat 4 and 5 for each speaker channel.

To stop the test signal
Press [TEST].

**Note**
The test signal will not be output if VGCA is ON (page 27).
DSP sound modes

This unit's digital signal processor (DSP) has the following three modes—STEREO, SURROUND and SFC.

A  STEREO mode

Use this mode when you want to listen to stereo sources, whether they are digital or analogue, or when you want to play Dolby Digital or DTS sources through two channels. The sounds usually fed through the other speakers are down-mixed so they are output through the left and right front speakers. There may be some change in the overall sound when surround sources are down-mixed.

B  SURROUND mode

By selecting this mode while digital input is being used, the unit automatically determines the kind of digital source being used (Dolby Digital, Dolby Surround, or DTS), and processes it accordingly. Select this mode also when you are playing an analogue source, VCR for example, that has been recorded in Dolby Surround.

Software with the following marks can be played back in this mode.

The following indicators light depending on the source.

DOLBY DIGITAL
When playing Dolby Digital sources.

DOLBY SURROUND
When playing DTS sources.

PRO LOGIC
When playing analogue sources.
When playing digital sources with PCM signals.
When playing Dolby Digital sources that contain Dolby Pro Logic.

About the program format indicators

(L, C, R, LS, S, LFE, RS)
The program format indicators light up to indicate the channels contained in the digital input signal.
These indicators do not light when input is analogue.
L: Front channel (left)
C: Center channel
R: Front channel (right)
LS: Surround channel (left)
RS: Surround channel (right)

If the surround channel is monaural, “S” is displayed instead of LS and RS.

“LFE” (Low Frequency Effect) is a channel for the deep-bass effect.

DSP sound modes

SFC modes

by remote control only
Enjoy an enhanced sound experience with greater presence and spread by using these SFC (sound field control) modes with stereo sources. Choose from the following modes.

HALL
Imparts the reflection and spread of a large concert hall.

CLUB
Conveys the exciting and intimate atmosphere of a jazz club.

LIVE
Brings you up close for “live” stage performance and smoother vocals.

THEATER
Recreates natural sound ambience and direction.

SIM Surr (Simulated Surround)
Heightens the sensation of expanded space with stereo sources, and augments monaural sources.

If the beginning of a track is cut off when playing CDs
The beginning of a track may be cut off when you play CDs in STEREO mode. You can solve this by engaging the PCM FIX mode. Press and hold [DIGITAL INPUT] for four seconds in STEREO mode. “PCM FIX” appears on the display.

Note
• This mode can be selected for each source, but is canceled when the unit is turned off.
• The PCM FIX mode can be selected in STEREO mode only.
• Dolby Digital and DTS sources cannot be played while PCM FIX mode is on.
• Noise can occur if DTS sources are played while PCM FIX mode is engaged. To avoid this, be sure to turn PCM FIX mode off after use.

If the DTS source you are playing is not recognized
The DTS source may not be recognized if you select SURROUND mode. You can solve this by engaging the DTS FIX mode. Press and hold [DIGITAL INPUT] for four seconds in SURROUND mode. “DTS FIX” appears on the display.

Note
• This mode can be selected for each source, but is canceled when the unit is turned off.
• The DTS FIX mode can be selected in SURROUND mode only.
• Dolby Digital and PCM sources cannot be played while DTS FIX mode is on.
• Noise can occur if Dolby Digital and PCM sources are played while DTS FIX mode is engaged. To avoid this, be sure to turn DTS FIX mode off after use.
Enjoying the sounds

Preparation: Set [VOLUME] to the “MIN” position.

1 Press [\(\text{\(\bigcirc\)}\)/\(\text{\(\bigcirc\)}\)].

2 Select the speaker system(s) to be used.

   A, B and BI-WIRE refer to the speaker terminals at the rear of the unit.

   BI-WIRE and A, or BI-WIRE and B cannot be used at the same time.

   “SURROUND” and “SFC” cannot be turned on if [B] is pressed.

   If the button is pressed once more, the indicator will switch off and no sound will be heard from the speakers.

3 Turn [INPUT SELECTOR] to select desired source.

   (Refer to the appropriate operating instructions for details.) Each time the selector is turned the display switches.

   **Note**

   Turn on the TV and select the input mode to suit the source (e.g. TV, VIDEO).

4 (only if you select TV, CD or DVD in the above step)

   Press [DIGITAL INPUT] to select the desired input mode.

   Each time you press the button, the display switches as follows.

   DIGITAL → ANALOG

   The “DIGITAL” indicator lights when “DIGITAL” selected.

5 Press [DSP SOUND MODE] to select the desired mode.

   The SOUND MODE indicator corresponding to the selected mode lights and that mode is displayed.

   **Note**

   • Be sure to select the mode appropriate to the source you are playing (pages 20 and 21).
   • Dolby Digital and DTS sources cannot be played with the SFC modes.

(Continued on next page)
Enjoying the sounds

6 (if you selected SFC in step 5)

**by remote control only**

Press [SFC] to select the desired SFC mode.

The mode changes each time you press the button while the modes are displayed.

7 Start the source.

8 Adjust the volume.

**While using the SFC modes**

To adjust speaker level **by remote control only**

1. Press [LEVEL] to select the speaker channel to adjust.
   Each time the button is subsequently pressed, the speaker whose level is to be set is selected in the listed sequence.
   C → RS → LS → SW
   Speakers for which “NONE” or “NO” has been set are skipped.

2. Press [+] or [–] to adjust the output level.
   Channels C, RS, LS, and SW can be adjusted between –10 dB and +10 dB.

To adjust delay time **by remote control only**

You can adjust surround channel only.
Adjust the delay time of the sound from the surround speakers to produce the proper effect.

1. Press [DELAY].
   When you press the button, the current delay time is displayed.

2. Press [+] or [–] to set the time.
   Select a delay time to suit your individual needs.
   Delay time can be set at 10 milliseconds (ms) intervals between 10 and 100 ms.
   The factory settings for each mode are 50 ms.

For your reference

Speaker level and delay time can be set for each SFC mode.

When you finish listening

Be sure to reduce the volume and press [I] to switch the unit to standby.

For your reference

- If you are using a VCR (connected to VCR 1) and you select TAPE/MD (for the United Kingdom), TAPE (for Australia and New Zealand), CD, TUNER, or PHONO
  The picture will remain on the screen.
- **About the DSP sound modes**
  The DSP sound modes can be set for each source. Once you have set the mode for a source, the mode is engaged whenever that source is selected.
  These modes are automatically switched to STEREO if SPEAKERS B is selected or both SPEAKERS A and B or BI-WIRE are turned off. When SPEAKERS B is turned off or SPEAKERS A or BI-WIRE is selected, the mode is switched back to the latest mode.
  - Only Dolby Digital, DTS or PCM signals (44.1 kHz or 48 kHz) can be reproduced through the digital terminal
  The digital input signal of sampling frequencies 96 kHz or 192 kHz and other signal formats such as MPEG cannot be reproduced on this unit.
Enjoying the sounds

A  To enjoy bi-amp sound

By using the bi-wiring feature of this unit to connect your speakers, you are able to take advantage of two separate amplifiers for the high frequency and low frequency ranges. This enables more highly defined sound reproduction of the two ranges thus producing high quality bi-amp stereo sound.

Ensure “BI-AMP” lights when [BI-WIRE] is selected.

BI-AMP will turn off and the indicator will go out in the following cases
- If any of the DSP sound modes are turned on.
- If DVD 6CH INPUT is selected.

Note
- Before pressing [BI-WIRE], connect speakers designed for bi-wiring using bi-wiring connection.
- Do not select [BI-WIRE] if you have connected two sets of speakers to the A and B speaker terminals.

B  For front speakers with an impedance under 6 Ω

Press and hold [A] or [B] until “LOW IMP” lights up on the display.

If even one of the speakers being used has an impedance under 6 Ω, press and hold down either [A] or [B] for 4 seconds or more to set the impedance on the main unit to LOW.

(Press and hold down once again for 4 seconds or more to turn it off.)

Note that when “LOW IMP” is on, SPEAKERS A and B cannot both be used at the same time.

To change speakers:
E.g. To use SPEAKERS B, press [A] (“A” goes out), and then press [B] to activate SPEAKERS B.

C  To use TAPE MONITOR

(For use when you have connected a graphic equalizer to the TAPE/MD (for the United Kingdom) or TAPE (for Australia and New Zealand) terminals.)

Press [TAPE MONITOR].

The “TAPE MONITOR” indicator lights and the tape monitor comes on.

Sources other than TAPE/MD (for the United Kingdom) or TAPE (for Australia and New Zealand) can still be selected with [INPUT SELECTOR] while the “TAPE MONITOR” indicator is on.

Press [TAPE MONITOR] again to turn the tape monitor off.

(See “Making a recording” on page 48 for details on how to use the tape monitor during recording.)

Note
- The tape monitor cannot be used when TV, DVD, or CD digital input is being used.
- If you are using the tape monitor and you select a digital input source, the tape monitor switches off.
- Depending on the settings on the graphic equalizer, there may be some distortion.
Enjoying the sounds

A To adjust the tone quality

Turn [BASS] to adjust the bass. Turn [TREBLE] to adjust the treble.

B To adjust the sound balance

Turn [BALANCE] to adjust the left/right sound balance.

C When using the VCR 3 terminals

This button only works when “VCR 2” is selected as the input source.
When you have connected a VCR to the VCR 2 terminals on the rear of the unit, select “VCR 2”.
When you have connected equipment to the VCR 3 terminals on the front of the unit, select “VCR 3”.

Select “VCR 2” or “VCR 3.”

FRT-VCR 3=FRONT VCR 3
Use analogue input to enjoy the high-quality, 96 kHz or 192 kHz linear PCM and multiple channel linear PCM audio found on some DVD-Video and DVD-Audio.

Select the analogue input mode to suit the source.

**DVD**: For two-channel audio. Use the bi-amp to enhance your audio experience (page 24).

**DVD 6CH**: For multiple channel audio.

1. Turn [INPUT SELECTOR] to select “DVD”.

2. Press [DVD 6CH INPUT].

   The mode changes each time you press the button.

   DVD 6CH — DVD

   If you press this button while another source (CD, PHONO, etc.) is selected, the receiver switches the source to DVD and engages the DVD 6CH INPUT mode.

3. Start the desired source.

   Follow your equipment’s operating instructions.

**Note**

- If you select SPEAKERS B or turn the speakers off, DVD 6CH switches to DVD and the STEREO DSP sound mode turns on. The mode is restored when you turn SPEAKERS B off or turn SPEAKERS A or BI-WIRE on.

- You cannot select any of the DSP sound modes while in the DVD 6CH INPUT mode.

- BI-AMP and DVD 6CH INPUT cannot be used at the same time.

  If you are using BI-AMP and you select DVD 6CH INPUT, BI-AMP will turn off and the “BI-AMP” indicator will go out.

- Any speaker settings you have made (pages 17 and 18) are ineffective in the DVD 6CH INPUT mode. If you need to change speaker settings, make the settings on the other unit.
This unit features a state-of-the-art variable gain control amplifier (VGCA). This feature cuts down greatly on noise encountered during normal use.

1 **Turn [INPUT SELECTOR] to select the source.**

2 **Press [VGCA].**
   - The “VIA TONE” indicator goes out and the “ON” indicator lights when “VGCA” is selected.
   - “VGCA ON” is displayed, then “DISPLAY OFF” scrolls across the display. The display then turns off.
   - If TUNER was chosen as the source, the current frequency is shown.

3 **Start the desired source.**
   - Follow your equipment’s operating instructions.

   **To confirm the current display**
   - Press [VGCA].
   - The display comes on for about 4 seconds.

   **To turn VGCA off**
   - When the display is off
     1 Press [VGCA].
     2 Press [VGCA] again to turn VGCA off.
   - When the display is on
     Press [VGCA].

   **For your reference**
   - You can set the VGCA mode for each source.
   - Each source will retain the selected mode.

**Note**
- Tone quality (bass and treble) cannot be adjusted in this mode.
- In STEREO mode, no sound comes from the subwoofer when VGCA is turned on.
- This mode can only be used with analogue input. VGCA is turned off if you select digital input.
- DSP sound modes cannot be selected while VGCA is on. These modes are also canceled when VGCA is turned on and STEREO mode is engaged.

**To have the display on constantly**

   The display is turned off while VGCA is on to cut down on unnecessary noise. Do the following if you would prefer to have the display on.

   ① **Turn [INPUT SELECTOR] to select a source other than TUNER.**
   ② **Press [VGCA] to turn VGCA on.**
   ③ **After the display turns off**
     - Press and hold [VGCA] for about 4 seconds until the display comes on.

   This setting remains active even if the unit is turned off.
   Repeat the procedure to turn the display off again.
The radio

Sequential tuning

Use the tuning buttons to tune-in radio stations.

1 Turn [INPUT SELECTOR] to select “TUNER”.

2 Press [BAND] to select “FM” or “AM”.

3 Press [TUNING, V, A, PTY SELECTOR] (for the United Kingdom) or [TUNING, V, A] (for Australia and New Zealand) to tune to the desired frequency.

“TUNED” lights up when tuned.
“STEREO” lights up when an FM stereo broadcast is received.

To make an automatic search for stations
Hold down [TUNING, V, A, PTY SELECTOR] (for the United Kingdom) or [TUNING, V, A] (for Australia and New Zealand) until the frequency begins to scroll. Tuning stops when a station is found. (Tuning may stop if there is interference.)

If noise is excessive in the FM stereo mode
Press [FM MODE, EON] (for the United Kingdom) or [FM MODE] (for Australia and New Zealand).
(“STEREO” will go out, and “MONO” will light up).

The broadcast will be monaural, but noise will be reduced.
If the button is pressed once more, the stereo mode resumes.

If there is hissing or thumping while the radio is playing
Turn VGCA on.
This turns DSP off and can improve sound.
(See Page 27 for details about VGCA.)

For your reference
The tuner can pick up interference from DVD players. If this occurs turn the DVD player off.

To change the AM frequency step
Press and hold [BAND] for about 3 seconds when AM band is selected. (The frequency step changes from 9 kHz to 10 kHz.)
To return to the previous step, press and hold [BAND] for about 3 seconds again.
Radio functions

The radio

Direct tuning

by remote control only

Specify the frequency using the numbered buttons on the remote control to directly tune to the station.

1. Press [TUNER/BAND].
   This will set the remote control to operate the tuner. The selector on the receiver will change to “TUNER”. Each time you press the button, the band will change as follows,
   FM → AM.

2. Press [DIRECT TUNING/DISC ENTER].

3. While cursor display is flashing (approx. 10 seconds) Press the numbered buttons to enter the frequency.

   If the desired FM frequency is 107.90 MHz, press
   $1 \rightarrow 0 \rightarrow 7 \rightarrow 9 \rightarrow 0$.
   If the frequency has been input correctly, the displayed frequency will blink once.

   Note
   1. If no button is pressed while the cursor display is flashing, the display will return to the frequency which is currently being received.
      To re-specify the frequency, repeat the procedure from step 2.
   2. If the frequency has not been input correctly, “ERROR” will be displayed.
      In this case, re-enter the frequency.
The radio

Preset tuning

Presetting radio stations into the memory channels of this unit makes selecting stations simple.

A total of 30 FM and AM stations can be preset.

Please remember this
If a new station is preset into a channel, the setting for the station which was previously entered in that channel will be automatically erased.

Automatic memory presetting

Automatic memory presetting allows this unit to search for stations and then preset them into memory.

1 Tune to the lowest frequency in FM.
   (☞ Pages 28 and 29.)

2 Press and hold [MEMORY, PTY SEARCH] (for the United Kingdom) or [MEMORY] (for Australia and New Zealand).

   Automatic memory presetting will start.
   All the FM stations the unit can receive are preset in channels 1 to 30.

3 Tune to the lowest frequency in AM.
   (☞ Pages 28 and 29.)

4 Press and hold [MEMORY, PTY SEARCH] (for the United Kingdom) or [MEMORY] (for Australia and New Zealand).

   Automatic memory presetting will start.
   All the AM stations the unit can receive are preset in channels 21 to 30. (Any FM stations in these channels will be replaced.)

   During automatic memory presetting, the memory indicator will flash while the frequency scrolls.

   When a station is preset
   The memory indicator and the preset channel number will be displayed for approximately 1 second. (A)

   When presetting is completed
   The last station to be preset will be displayed.

Note

Frequencies may not be preset correctly in cases where the broadcast waves are too strong or too weak. In such cases, carry out presetting manually (☞ page 31).
Manual memory presetting

The desired stations can be preset into the desired channels by the user.

1 Set to the desired frequency.
(Pages 28 and 29.)
If interference or static is keeping you from enjoying an FM broadcast, press [FM MODE, EON] (for the United Kingdom) or [FM MODE] (for Australia and New Zealand) and change to monaural.
You can preset the station in monaural just as in stereo.

2 Press [MEMORY, PTY SEARCH] (for the United Kingdom) or [MEMORY] (for Australia and New Zealand).
To cancel the memory function, press [MEMORY, PTY SEARCH] (for the United Kingdom) or [MEMORY] (for Australia and New Zealand) again.

3 Press [TUNING , , , PTY SELECTOR] (for the United Kingdom) or [TUNING , , ] (for Australia and New Zealand) to select the desired channel.
Holding the buttons down lets you scroll through channels faster.

4 Press [MEMORY, PTY SEARCH] (for the United Kingdom) or [MEMORY] (for Australia and New Zealand).
The channel will blink on the display.
To continue presetting
Repeat steps 1 through 4.

To listen to preset channels

1 Press [PRESET, DISPLAY MODE] (for the United Kingdom) or [PRESET] (for Australia and New Zealand).

2 Press [TUNING , , , PTY SELECTOR] (for the United Kingdom) or [TUNING , , ] (for Australia and New Zealand).
Holding down the buttons lets you scroll through channels faster.
The channel number flashes for approximately 5 seconds.
Select the desired channel number during that time.
After 5 seconds, the display will change from the channel number to the frequency.

Note
If you press [PRESET, DISPLAY MODE] (for the United Kingdom) or [PRESET] (for Australia and New Zealand) while the channel number is displayed, the display will change to the frequency.

To confirm the channel number of the station being received
Press [PRESET, DISPLAY MODE] (for the United Kingdom) or [PRESET] (for Australia and New Zealand).
The channel number flashes for approximately 5 seconds.

Note
The channel number is not displayed if you change the frequency or FM mode setting.

For your reference
Even if the AC mains lead is disconnected from the household AC outlet, the memory will retain its contents for approximately one month.

If frequency presettings are accidentally erased
Program the presettings once again.
The AC mains lead should remain connected for one hour or more for the memory back-up to be effective.
RDS broadcasts

Only for the United Kingdom

RDS (Radio data system) is a multiplex broadcasting system. Along with the audio signals of FM broadcasts, text information and other signals are transmitted to help you enjoy radio more and make tuning into programs easier. This unit can use the following types of signals.

- **PS (Program service):**
  The name of the station can be displayed.
- **PTY (Program type):**
  The type of program can be displayed. This signal can also be used to search for a type of program (page 33). See page 35 for more information about the PTY displays.
- **EON (Enhanced other networks):**
  This signal is used between networked stations to make it easier for listeners to tune into a type of program (page 34).
- **RT (Radio text):**
  This is text transmitted by the station. This unit can show a maximum of 64 characters by scrolling it across the screen. The text could be information about the song playing, traffic and weather reports, phone-in numbers, or police information.

Some areas currently do not have PTY, EON, and RT.

### To display RDS information

The display normally shows the radio frequency. When the “RDS” indicator lights, the station is broadcasting RDS signals.

1. **Press [RDS].**
2. **Press [PRESET, DISPLAY MODE].**

   Each time you press the button, the display changes.
   1. **Frequency display**
   2. **PS display**
      (See below if PS is not displayed)
   3. **PTY display**
      (“NO PTY” is displayed if PTY signals are not being received, then the frequency is shown again.)
   4. **RT display**
      (There is no change if RT signals are not being received.)

If RDS signals are not being received, the “RDS” indicator does not light and there is no change when the button is pressed.

---

**For your reference**

Occasionally PS isn’t displayed even if PS signals are being received. You may be able to see PS if you change the reception mode.

Press and hold [PRESET, DISPLAY MODE].

The mode switches between “MODE 1” and “MODE 2” every time the button is pressed and held.

If PS isn’t displayed, PS signals are not being received. Restore “MODE 1” in this case.
PTY search and EON tuning

Before trying to use these functions, it is necessary to preset radio stations into the receiver’s memory ( pages 30 and 31). Neither of these functions will work if stations have not been preset.

PTY search

Carry out this operation while listening to an FM broadcast.

PTY search finds a particular type of program for you.

1 Press [RDS].

2 Press [TUNING,  V,  ^, PTY SELECTOR] to select the desired program type.
   Each time you press the button, the PTY display will change in sequence. (For PTY displays:  page 35.)

3 While the PTY display is flashing (approx. 10 seconds) Press [MEMORY, PTY SEARCH].
   “PTY” flashes while the search is carried out.

When the selected type of program is located
The receiver automatically switches over to the station broadcasting the program. The PTY indicator continues to flash for about two seconds after the program is found. During this time the display changes, first showing the preset channel number, then the frequency of the station, and finally the previously selected display mode is resumed.

Restarting a search
It is possible to restart the search during the two seconds that the PTY indicator is flashing after the program is found, simply by pressing [MEMORY, PTY SEARCH] again.
It is also possible to search for the same kind of program on another station by pressing [MEMORY, PTY SEARCH] at any time if the display is in PTY mode. If [MEMORY, PTY SEARCH] is pressed in any other mode, the message “SELECT PTY FIRST” scrolls across the display.

If the desired type of program is not found
“NO PTY” will be displayed for a moment, then the current frequency and the receiver will return to the original display.
RDS broadcasts
Only for the United Kingdom

EON tuning

EON tuning is useful if the type of program you want to listen is not currently being broadcast. It allows you to set the unit to automatically change to a particular type of program when one begins.

EON tuning only works if RDS data and EON signals are being received.
EON tuning finds programs on stations that share EON signals.

1 Press [RDS].

2 Press [TUNING, V, ^, PTY SELECTOR] to select the desired program type.

Each time you press the selector, the PTY display will change in sequence. (For PTY displays: & page 35.)

3 While the PTY display is flashing (approx. 10 seconds)
Press [FM MODE, EON].
“EON” will light up.

The current station remains tuned in until the selected type of program begins. When the receiver finds the type of program you selected, “EON” appears on the display and the message “OTHER PROGRAM SERVICE” scrolls from right to left across the display. The receiver automatically changes over at this time. If the type of program you selected is currently broadcasting, the receiver will immediately change to that station.

Note
EON tuning turns OFF if you operate the tuner (page 28–31), change the input source, or turn the unit OFF.

When “NO EON” is displayed
The broadcast you are presently receiving does not provide EON service.

To check the program type while on reception standby
Press [TUNING, V, ^, PTY SELECTOR].
The program type last selected will be displayed for approximately 2 seconds. (“EON” will flash.)

Note
If you press [TUNING, V, ^, PTY SELECTOR] again while the program type is being displayed, you will turn EON tuning OFF.

To cancel EON tuning
Press [FM MODE, EON].
“EON” will go out.
About the PTY display

There are a total of 31 PTY displays on this unit. The display changes each time [TUNING, V, A, PTY SELECTOR] is pressed.

The table below shows the order in which the display changes, and also gives an explanation of each display.

Note

This unit does not have EBS-Emergency Broadcast System which tunes automatically into emergency broadcasts when they begin.
Other functions

A To listen through headphones

1. Reduce the volume.
2. Connect the headphones.
   Plug type: 6.3 mm stereo
3. Adjust the volume.

Select STEREO or turn both SPEAKERS A and B, or Bi-WIRE off when using headphones. Turning the speakers off automatically engages STEREO mode and ensures no sound is heard from the subwoofer. If SURROUND is used, the sound heard through the headphones will seem unusual.

Note
Avoid listening for prolonged periods of time to prevent hearing damage.

B Dynamic range compression

“Dynamic range compression” (DR COMP) is a function for compressing the dynamic range (reproduction level range) of audio signals. It is used for viewing movie software late at night or at other times when high volume levels are not desirable.

This function only works with DR COMP compatible Dolby Digital format software.

OFF: The dynamic range is not compressed.
STANDARD: The dynamic range is compressed according to a level set by the producer of the software.
MAX: The dynamic range is compressed to the maximum permitted level.
The factory setting is “OFF”.

1. Press [A] and [B] at the same time.
   “SETTING” appears on the display.
2. Press [A] to select “DR COMP”.
   Each time you press the button, the display switches as follows.
   SIZE → DISTANCE → FILTER → DR COMP
3. Turn [INPUT SELECTOR] to select the setting.
   Each time you turn the selector, the display switches as follows.
   OFF → STANDARD → MAX
4. Press [A] and [B] at the same time.
   “COMPLETE” appears on the display.

For your reference
When DR COMP is on, scenes that already have a low sound level will be heard as they are. When scenes that are loud occur, the function acts to reduce the peak level. The sound field will remain intact even if DR COMP is functioning.
Other functions

A  To mute the sound level

By remote control only
Press [MUTING].

The message “MUTING ON NOW” runs repeatedly from right to left across the display as long as the muting function is on.

Press once again to return to the previous volume level.

Note
Muting is canceled when the receiver is turned off.

B  When using the unit in a darkened room

By remote control only
Dimming the display and turning off the white lights (SA-DA10 only) can improve video viewing in dark or dimly lit rooms.

Press [DIMMER].

Repeat to turn on again.

Note
The display and white lights return to normal when the unit is turned on.

To change the remote control code

Hold down the button corresponding to the component you wish to operate.

Continue to hold the button down and...

Aim the remote control at the component you wish to operate and carefully and slowly press the numbered buttons to enter the appropriate two-digit code number.

(Refer to the tables on the facing page for the code numbers.)

When the two-digit code number is entered, the remote control will automatically output the on/off signal.

If you changed the code correctly, the component switches on or off.

Change the remote control code in either of the following circumstances:

- If the Panasonic TV, VCR or DVD player does not operate as a result of a difference in the remote control code.
- If you wish to operate some other make of TV, VCR or DVD player.

(Refer to pages 42–45 for the buttons which can be used.)

**Note**

- Even after changing the code there may be cases where certain operations cannot be done or operation is not possible at all.
- Changes to the codes are canceled when the remote control's batteries are replaced. Reenter the code.

Making a recording

Note
- You cannot record a source connected through a digital terminal.
- When recording CD, DVD, or TV, ensure the source is connected through the corresponding analogue terminals (pages 10–12) and “ANALOG” input is selected (page 22).
- When you select DVD 6CH INPUT mode, only sound from the front left and right channels is recorded.

A Recording on a tape deck or VCR

You can record to a tape deck connected to TAPE REC (OUT) or to a VCR connected to VCR 1 OUT. See the recording unit’s operating instructions for details on how to prepare it for recording.
When recording with a tape deck, you can record any source except TAPE.
When recording with a VCR, you can record any source except TAPE or VCR 1.

Note
Recording from the tape deck to the VCR is not possible.

1 Turn [INPUT SELECTOR] to select the source to be recorded.

2 If you selected VCR 2 in step 1, set [VCR 2, VCR 3] to the required position.

3 Begin recording.
Follow your recording unit’s operating instructions.

4 Begin the source to be recorded.
Follow your equipment’s operating instructions.

B To monitor sound being recorded onto a tape deck

It is possible to check the sound being recorded if your tape deck is a 3 head system.

Press [TAPE MONITOR] on this unit and set the monitor button on the tape deck to “TAPE”.

Press [TAPE MONITOR] once again to turn it off.

For your reference
Use the VCR 3 terminals on the front of the unit when dubbing from a video camera.
There are two timer functions: the sleep timer and the wake timer.

- **Sleep timer:**
  The unit turns off after a set time.
  It can be set for 30, 60, or 90 minutes.

- **Wake timer:**
  The unit can be set to turn on a certain number of hours after it is turned off.
  It can be set for 5, 7, or 9 hours.

### Setting the timers

1. **Press [TIMER, -MODE, –TIME] to select the desired timer mode.**
   Each time you press the button, the timer mode changes.

2. **[Within 5 seconds] Press [TIMER, -MODE, –TIME] and release when the time you require is displayed.**
   The display changes as follows:
   - In sleep timer mode: 30 → 60 → 90 (minutes)
   - In wake timer mode: 5H → 7H → 9H (hours)
   The display is restored 5 seconds after the setting is completed.

3. **Wake timer mode only Press [ (/)] to turn off the unit.**
   The “WAKE” indicator lights up.

### Checking the remaining time on the sleep timer and the time set for the wake timer

**Note**

Do not press [TIMER, -MODE, –TIME] again before the remaining time indication goes out.

The setting may change if you do this.

### Changing a setting

Repeat steps 1 and 2.

### To cancel the timer

Press [TIMER, -MODE, –TIME] until “OFF” is displayed.
“SLEEP” or “WAKE” will go out.

**Note**

- The timers cannot be used together.
- The sleep timer turns off the receiver, and the wake timer turns on the receiver, but they do not turn off/on any externally connected components.
Troubleshooting guide

Before requesting service for this unit, check the chart below for a possible cause of the problem you are experiencing. Some simple checks or a minor adjustment on your part may eliminate the problem and restore proper operation.

If you are in doubt about some of the check points, or if the remedies indicated in the chart do not solve the problem, refer to the directory of Authorized Service Centers (enclosed with this unit) to locate a convenient service center, or consult your dealer for instructions.

<td>• Nothing appears on the display while VGCA is on. To turn the display on, press and hold [VGCA].</td>
</tr>
<tr>
<td>The display is dim.</td>
<td>The dimmer is on.</td>
<td>• Press [DIMMER] to restore the display to normal.</td>
</tr>
<tr>
<td>The picture doesn’t appear on the television.</td>
<td>Connection is incorrect.</td>
<td>• Check and correct connections.</td>
</tr>
<tr>
<td></td>
<td>The television’s input mode is incorrect.</td>
<td>• Change the input mode to suit the connections between this unit and the television.</td>
</tr>
<tr>
<td>Sound suddenly stops or none is heard when the unit is switched on.</td>
<td>The protection circuitry has functioned because: the positive and negative speaker wires have shorted; speakers with a lower impedance than this unit’s rated impedance are being used; the speakers are under strain through excessive volume, excessive power, or by being used in a high temperature environment.</td>
<td>• Switch off the unit, determine and correct the cause, then switch the unit on.</td>
</tr>
<tr>
<td></td>
<td>• Use speakers with the right impedance rating.</td>
<td>• Use speakers with the right impedance rating.</td>
</tr>
<tr>
<td>“F70” appears on the display.</td>
<td></td>
<td>• Turn off the unit and then turn it on again, or disconnect the AC mains lead and then connect it to your household mains socket again. (If “F70” remains on the display, consult an authorized service center or your dealer.)</td>
</tr>
</tbody>
</table>

### The RESET function

While the unit is on
While pressing and holding [DIGITAL INPUT], press and hold [Ø/í] until “RESET” appears on the display.

The operation settings for the unit will be initialized to the settings made at the time of shipment.
However, any preset radio stations will not be erased.

### Maintenance

**If the surfaces are dirty**

To clean this unit, wipe with a soft, dry cloth.
If the surfaces are extremely dirty, use a soft cloth dipped in a soap-and-water solution or a weak detergent solution.

- Never use alcohol, paint thinner or benzine to clean this unit.
- Before using chemically treated cloth, read the instructions that came with the cloth carefully.
Specifications (DIN 45 500)

### AMPLIFIER SECTION

**Power output (at 240 V)**
- DIN 1 kHz (T.H.D. 1 %): 2 x 100 W (6 Ω)
- 20 Hz–20 kHz continuous power output: 2 x 80 W (6 Ω)

**Total harmonic distortion**
- Rated power at 20 Hz–20 kHz: 0.09 % (6 Ω)
- Half power at 1 kHz: 0.03 % (6 Ω)

**Power output at the DVD 6CH operation**
- DIN 1 kHz (T.H.D. 1 %)
  - Front: 2 x 100 W (6 Ω)
  - Center: 100 W (6 Ω)
  - Surround: 2 x 100 W (6 Ω)

**Power bandwidth**
- Both channels driven, –3 dB: 10 Hz–70 kHz (6 Ω, 0.9 %)

**Damping factor**
- 30 (6 Ω)

**Load impedance**
- Front:
  - A or B: 4–16 Ω
  - A and B: 8–16 Ω
- Center: 6–16 Ω
- Surround: 6–16 Ω

**Frequency response**
- PHONO: RIAA standard curve (30 Hz–15 kHz) ±0.8 dB
- [For the United Kingdom]
  - CD, TAPE/MD, DVD, TV, VCR 1, VCR 2, VCR 3: 10 Hz–70 kHz, ±3 dB
- [For Australia and New Zealand]
  - CD, TAPE, DVD, TV, VCR 1, VCR 2, VCR 3: 10 Hz–70 kHz, ±3 dB

**Input sensitivity and impedance**
- PHONO: 3 mV/47 kΩ
- [For the United Kingdom]
  - CD, TAPE/MD, DVD, TV, VCR 1, VCR 2, VCR 3: 200 mV/22 kΩ
- [For Australia and New Zealand]
  - CD, TAPE, DVD, TV, VCR 1, VCR 2, VCR 3: 200 mV/22 kΩ

**S/N at rated power (6 Ω)** (VGCA ON)
- PHONO: 70 dB (IHF, A: 80 dB)
- [For the United Kingdom]
  - CD, TAPE/MD, DVD (L/R/C/LS/RS), TV, VCR 1, VCR 2, VCR 3: 113 dB (IHF A, rated power, S=2 V), 98 dB (IHF A, A: 100 dB)
- [For Australia and New Zealand]
  - CD, TAPE, DVD (L/R/C/LS/RS), TV, VCR 1, VCR 2, VCR 3: 113 dB (IHF A, rated power, S=2 V), 98 dB (IHF A, A: 100 dB)

**Tone controls**
- BASS: 50 Hz, +10 to −10 dB
- TREBLE: 20 kHz, +10 to −10 dB

**Output voltage**
- [For the United Kingdom]
  - TAPE/MD REC (OUT), VCR 1 OUT: 200 mV
- [For Australia and New Zealand]
  - TAPE REC (OUT), VCR 1 OUT: 200 mV

**Channel balance (250 Hz–6.3 kHz)**
- ±1 dB

**Channel separation**
- 55 dB

**Headphones output level and impedance**
- 430 mV/330 Ω

**Subwoofer frequency response (–6 dB)**
- 7–200 Hz

### FM TUNER SECTION

**Frequency range**
- 87.50–108.00 MHz

**Sensitivity**
- S/N 30 dB: 1.5 μV/75 Ω
- S/N 26 db: 1.3 μV/75 Ω
- S/N 20 db: 1.2 μV/75 Ω

**IHF usable sensitivity (IHF '58)**
- 1.5 μV/75 Ω

**IHF 46 dB stereo quieting sensitivity**
- 22 μV/75 Ω

**Total harmonic distortion**
- MONO: 0.2 %
- STEREO: 0.3 %

**S/N**
- MONO: 60 dB (75 dB, IHF)
- STEREO: 58 dB (71 dB, IHF)

**Capture ratio**
- 1.5 dB

**Image rejection at 98 MHz**
- 70 dB

**Spurious response rejection at 98 MHz**
- 70 dB

**AM suppression**
- 50 dB

**Stereo separation**
- 1 kHz: 40 dB

**Alternate channel selectivity**
- ±400 kHz: 65 dB

**Channel balance (250 Hz–6.3 kHz)**
- ±1.5 dB

**Limiting point**
- 1.2 μV

**Bandwidth**
- IF amplifier: 180 kHz
- FM demodulator: 1000 kHz

**Antenna terminal**
- 75 Ω (unbalanced)

### AM TUNER SECTION

**Frequency range**
- 522–1611 kHz (9 kHz steps)
- 530–1620 kHz (10 kHz steps)

**Sensitivity**
- 20 μV, 330 μV/m

**Selectivity (at 999 kHz)**
- 55 dB

**IF rejection (at 999 kHz)**
- 50 dB

### VIDEO SECTION

**Output voltage at 1 V input (unbalanced)**
- ±0.1 Vp-p

**Maximum input voltage**
- 1.5 Vp-p

**Input/output impedance**
- 75 Ω (unbalanced)

### GENERAL

**Power supply**
- AC 230–240 V, 50 Hz

**Power consumption**
- 270 W

**Dimensions (W x H x D)**
- [SA-DA10]: 430 x 180 x 370 mm
- [SA-DA8]: 430 x 158 x 370 mm

**Mass**
- [SA-DA10]: 12.7 kg
- [SA-DA8]: 11.7 kg

**Power consumption in standby mode**: 2 W

**Notes:**
1. Specifications are subject to change without notice.
2. Mass and dimensions are approximate.
