PRODUCT INFORMATION

SV-200

Hybrid full amplifier

The Tube-Line in a compact design, but not "compact" in sound quality - that's how the new SV-200 Hybrid Amplifier from Vincent presents itself as a little brother of the SV-237MK and SV-700.

Despite the construction in midi format, only a few compromises had to be made in terms of technology. As with the SV-700, we opted for a design based on the SRPP principle (Shunt Regulated Push-Pull). This provides high dynamics and a low noise level. In the input stage, Toshiba's FET transistors, which take over the preamplification of the signal, work in combination with two 6N1 tubes, which then process the signal in terms of sound.

PRODUCT INFORMATION

SV-200

Hybrid full amplifier

In the power supply, a toroidal transformer provides sufficient power. To keep the signal constant, we use for the "buffering" Elcos with a total capacity of 13600 μ F. The final gain in the output stage is taken over by four additional Toshiba transistors operating in Class AB mode.

For connecting various sources, the SV-200 has two analog inputs and two digital inputs (1 x optical, 1 x coaxial). For connecting a recording device and a power amplifier or active subwoofer, a Rec output and a Pre output are available. Of course, a high-quality remote control is included in the delivery and completes the classy appearance.

SV-200

Connections

SPECIFICATIONS

Frequency Response:	20 Hz – 20 kHz \pm 0.5 dB 20 Hz – 50 kHz \pm 2 dB
Nominal Output Power to 8 Ohm:	2 x 25 Watt
T.H.D.:	< 0.1%
Input Sensitivity:	220 mV
Signal-to-Noise:	> 72 dB
Input Impedance:	47 KOhm
Inputs:	2 x Stereo RCA, 1 x optical, 1 x Coax
Outputs:	1 x Stereo Rec Out, 1 x Stereo Pre Out, 2 x 2 Speaker terminals, 2 x Power Control (3.5 mm jack)
Tubes:	2 x 6N1 tube
Max. Power Consumption:	125 Watt
Weight:	5 kg
Color:	Black or Silver
Dimensions (W x H x D):	210 x 95 x 320 mm
